G. THIBAUT,
Registrar, Calcutta University.

Calcutta University.

NOTICE.

APPLICATIONS are hereby invited from Graduates of this University for having their names registered under section 7 of the Indian Universities Act, 1904 (Act VIII of 1904), and in accordance with the provisions made in Chapter XIV of the new Regulations.

Any graduate who—

- (a) has taken the degree of Doctor or Master in any Faculty, or
- (b) has graduated in any Faculty not less than ten years before registration,

will be entitled to have his name entered in a register maintained for the purpose in the University office.

Applications for registration must be accompanied by the initial fee of Rs. 10, and must contain the following particulars:—

Name of applicant.

Address.

Degree or degrees taken, with dates thereof.

College or Colleges from which degree or degrees were taken.

Present occupation.

Amount of fee paid.

Date of application.

The following Chapter from the New Regulations of the University dealing with Register of graduates is annexed to this Notice for general information:—

CHAPTER XIV.

REGISTER OF GRADUATES.

1. The Register of Graduates to be kept under section 7 (2) of the Indian Universities Act shall be in such form as the Syndicate may from time to time prescribe.

2. The initial fee payable by a Graduate for having his name entered on the Register shall be Rs. 10.

3. The fee payable by a Graduate for having his name retained on the Register shall be Rs. 10 a year. The annual fee shall cover the period from the 1st of April in the year in which it is paid till the 31st of March in the year following. Till such fee has been paid no Graduate shall be entitled to take part in any election or to enjoy any of the privileges conferred by these Regulations.

4. When a graduate applies to have his name entered on the Register after the expiry of the limited time prescribed under section 7, sub-section (2) of the Indian Universities Act, he shall be liable to pay, in addition to the initial fee, a further sum of Rs. 10.

5. A Graduate whose name has been already entered on the Register may at any time compound for all subsequent payments of the annual fee by paying the sum of Rs. 150.

6. The name of any Graduate entered on the Register shall, if the amount of the annual fee is not paid by the 30th of June, be removed therefrom, but shall at any time be re-entered on payment of all arrears.

7. The day of the Convocation on which a person is entitled to be admitted to his degree, shall be deemed the day on which he has graduated or taken his degree.

8. Registered Graduates shall have, besides the right of electing ordinary Fellows, the following privileges:—

- (a) They shall be entitled to the use of the University Library on such special terms as may from time to time be prescribed by the Syndicate.
- (b) They shall be supplied with a copy of the University Calendar or such portions of it as the Syndicate may from time to time decide.
- (c) They shall be admitted free to all lectures delivered by University Professors and Readers.
- (d) They shall have priority of admission to the Convocation over unregistered Graduates.

SENATE HOUSE,

The 6th May 1907.

G. THIBAUT,

Registrar, Calcutta University.

YEARLY EXAMINATION OF CANDIDATES FOR FOURTH GRADE OF ACCOUNTANTS.

The yearly examination of candidates for fourth grade of Accountants, Public Works Department, will be held at the Civil Engineering College, Sibpur, on Monday and Tuesday, the 1st and 2nd July 1907, at 10-30 A.M. both days:—

| SUBJECTS. | Full marks. | Minimum pass marks. |
|---|-------------|------------------------|
| Writing (neatness, clearness, and rapidity) | 100 | 50 |
| Dictation (spelling, punctuation, etc.) | 100 | 50 |
| Arithmetic (the whole) | 240 | 160 |
| Mensuration (a) (the whole) | 60 | 30 |
| Book-keeping (b) (mercantile) | 100 | 50 |
| TOTAL | 600 | ... |

Minimum required in all papers
collectively, 400.

(a) Todhunter's Mensuration for Beginners.

(b) "Book-keeping" by Ball and Hamilton.

"Book-keeping" by double and single entry, by W. Inglis (Chamber's Educational Course).

1. The examination is held annually at the Civil Engineering College, Sibpur, on the 1st Monday in July. The examination will be conducted, either at the College or by an Examiner, Public Works Accounts (including Railway and Telegraph), in Bengal, Assam, and Burma only. The examination will be *ipso facto* vitiated, if it be not held (begun and completed) on the dates fixed; but the officer who will conduct the examination, may make his own arrangements, in regard to the *place* and *hour* of examination, with the candidates.

Candidates will not be examined in any of the Calcutta offices

A candidate already in permanent Government employ* may be allowed to compete in the examination, even if he is more than 25 years of age, and may be appointed to an accountantship if he passes it; but he is not already in pensionable service, he will be eligible only for appointment to the non-pensionable establishment on State Railways.

* This term includes employment under Local Boards and foreign bodies, if such is pensionable by the British Government.

2. The candidate should apply to an Examiner of Public Works Accounts, not later than 30 days previous to the date fixed for the examination, and obtain his consent to conduct his examination, if examination at the College is not convenient. The application must bear the address of the candidate, must be accompanied by a fee of ₹10 and the following certificates, and must be forwarded by him, not direct to the Principal, but through the Examiner.

Certificates may be submitted in original, or true copies attested by an officer of the Engineer or Accounts Branch, but none will be returned:—

(1) Certificate of good character signed by applicant's immediate official superior, or by the instructor under whom he has been educated, or by some other superior under whom he may have been brought up or employed or to whom he may be well known. (This certificate must have special reference to the two years immediately preceding the application.)

(2) Certificate of age (baptismal or of birth) not required, if the candidate is already in permanent Government employ.

(3) Certificate that the application is in the candidate's hand-writing.

NOTE.—A candidate already in Government service should, in like manner, submit his application, through his immediate official superior, to an Examiner of Accounts qualified to hold the particular examination, and should state whether he desires to be examined at the office of the Examiner of Accounts concerned or at the College.

It will rest with the Examiner of Accounts, to whom the candidate submits his application, to decide, on a consideration of the certificates submitted, whether the candidate should be allowed to appear for the examination, or whether his application should be rejected. The Examiner of Accounts will then forward to the Principal for registration the names of the accepted candidates. The names of these candidates should be entered in a statement showing their ages and their addresses, and also showing where each candidate is to be examined, whether at the College or at the office of the Examiner of Accounts. This statement, together with the fees, should be transmitted to the Principal not later than 15 days after the dates fixed in paragraph 2 for the submission of applications of candidates.

3. Examination papers that are issued for examination need not be returned.

4. Each examination is complete in itself. A candidate who has failed in an examination, and presents himself for examination on a subsequent occasion, must undergo the full examination and furnish fresh fee and certificates.

5. If from any cause a candidate fails to appear for the examination, the fee paid will not be refunded.

6. Passed candidates should apply, not to the Principal of the College, nor to the Accountant-General, Public Works Department, but direct to the Examiner of Public Works Accounts, in the province or railway under whom they may desire to be employed.

7. It must be distinctly understood that the passing of this examination does not give any claim to an appointment, and that in making appointments, preference will be given to qualified persons who are already employed in the Department.

8. The Civil Engineering College acts solely as an examining body in reference to admission to the 4th grade of Accountants, Public Works Department.

9. Candidates for the 4th grade Accountantship examination, who are not Government servants and over 25 years of age, are allowed to appear at the examination, at the Sibpur College centre only, but, even if successful, they are debarred from employment in the service of Government, and their names will be excluded from the list of passed candidates which is furnished to the Accountant-General, Public Works Department.

10. Candidates over 25 years of age should apply in writing to the Principal of the Civil Engineering College, not later than 30 days previous to the examination; the application to be accompanied by the fee of Rupees ten.

B. HEATON,

Principal, Civil Engineering College, Sibpur.

SIBPUR;

The 1st May 1907.

FREDERICK NOËL-PATON

Director-General of Commercial Intelligence

J. S. MESTON

Secretary to the Government of India

Calcutta, May 6, 1907

The Gazette of India.

PUBLISHED BY AUTHORITY.

CALCUTTA, SATURDAY, MAY 18, 1907.

Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART II.

Notifications by High Court, Comptroller General, etc.

GAZETTE OF INDIA.

NOTICE.

The 26th March 1907.

From the 6th April next till further notice, Parts I, IV, V, and VI of the *Gazette of India* and the Weather and Crop Report will be published at Simla. After the 30th March all notifications and other matter intended for publication in the *Gazette* should be addressed to the Officiating Publisher, at Simla.

Attention is invited to the following Circular Memorandum of the Government of India, Home Department, of August 1901:—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's *Gazette*, and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No. 777—79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 P.M. on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's *Gazette*. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next *Gazette*."

J. P. HEWETT,

Secretary to the Government of India.

By order of Government, all subscriptions must be paid in advance.

Applications for the supply of the *Gazette* on the public service should be addressed to the Home Department.

Complaints regarding non-receipt of any number of the *Gazette* should be forwarded within a week after the date on which it is due.

J. J. MEIKLE,

Publisher, *Gazette of India*.

GOVERNMENT OF INDIA. DEPARTMENT OF COMMERCE AND INDUSTRY.

INVENTIONS and DESIGNS.

Calcutta, the 16th May 1907.

NOTIFICATIONS.

No. 1810 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act during the week ending 13th May 1907 :—

- No. 250 of 1907.—Wilbert Wesley Lamb, mechanic, of No. 26 North 2nd street, San Jose, state of California, United States of America. *Device for burning vegetation, melting snow, et cetera.*
- No. 251 of 1907.—Vincent Litchfield Raven, engineer, of Alpine Cottage, Darlington, in the county of Durham, England. *Improvements in railway signalling apparatus.*
- No. 252 of 1907.—Vincent Litchfield Raven, engineer, of Alpine Cottage, Darlington, in the county of Durham, England. *Improvements in railway signalling apparatus.*
- No. 253 of 1907.—Vincent Litchfield Raven, engineer, of Alpine Cottage, Darlington, in the county of Durham, England. *Improvements in railway signalling apparatus.*
- No. 254 of 1907.—Edward Brice Killen, engineer, formerly of 2 Kensington Villas, Bangor, Ireland, but now of 52 Queen Victoria street, London, England. *Improved method and means for securely binding and locking in proper position the ends of steel rails of the permanent-way of railways and tramways.*
- No. 255 of 1907.—Tozaburo Suzuki, gentleman, of No. 401 Jibeishinden, Sunamura, in the county of Minami-Katsushika, province of Tokio, empire of Japan. *Apparatus for brewing soy.*
- No. 256 of 1907.—Charles Walke, Inspector of Steam Boiler, The Town Customs House, Fort, Bombay. *Improvements in the feed water softeners of steam boilers.*
- No. 257 of 1907.—Richard Edwin Davis, engineer, of 23 Solon New road, Bedford road, Clapham, London, England. *Improved method of and means for locking nuts to bolts or studs.*
- No. 258 of 1907.—The Westinghouse Brake Company, Limited, manufacturers, of 82 York road, King's Cross, London, England. *Improvements in brakes for railway and other vehicles.*
- No. 259 of 1907.—Benjamin Augustus Chew, inventor, of Augusta, state of Georgia, United States of America. *Improvements in cotton pickers.*
- No. 260 of 1907.—Henry Stafford Golland, merchant, 10 Park road, Eccles Old Road, Manchester, in the county of Lancaster, England. *Improvements in spinning mules.*
- No. 261 of 1907.—Jorgen Georg Maardt, engineer, of 25 A. N. Hansens Alle, Hellerup, near Copenhagen, Denmark. *A process for the manufacture of beer wort in a dry or nearly dry state.*

No. 1811 P.—SPECIFICATIONS of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Madras, Bombay, and Burma, and the Director of the Department of Land Records and Agriculture, United Provinces of Agra and Oudh. These and other specifications are open to public inspection, from 11 A.M. to 3 P.M., at the Secretary's office, 2 Bankshall street, Calcutta, on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying :—

- No. 372 of 1906.—James Temple Clark, of 189 St. James street, city of Montreal, province of Quebec, and dominion of Canada. *Improvements in or relating to lock nuts.* (Specification filed 4 May 1907.)

- No. 434 of 1906.—Lucas Eustratio Ralli and Pandely Leonidas Argenti, of 25 Finsbury Circus, London, carrying on business as merchants among other places at Bombay under the name and firm of Ralli Brothers, Bombay. *An expansion ring eccentric to be fitted to Platt's Macarthy double roller cotton gins in place of oscillating levers V dies, cams, conical bearings, etc.* (Specification filed 27 April 1907.)
- No. 437 of 1906.—Lucas Eustratio Ralli and Pandely Leonidas Argenti, of 25 Finsbury Circus, London, carrying on business as merchants among other places at Bombay under the name and firm of Ralli Brothers, Bombay. *A roller die to be fitted to Platt's Macarthy double roller cotton gins in place of the present so called V die.* (Specification filed 27 April 1907.)
- No. 466 of 1906.—Harold Irwin, gardener, of Gwavas, Tikokino, Hawkes Bay, New Zealand. *Improvements in alarms particularly adapted for scaring birds and the like.* (Specification filed 2 May 1907.)
- No. 470 of 1906.—John Gill, gentleman, of Beechwood Mains, Murrayfield, Edinburgh, Scotland. *Improvements in rotary motive power engines applicable also to rotary pumps, air or gas blowers, compressors or exhausters, meters, and the like.* (Specification filed 8 May 1907.)
- No. 500 of 1906.—Fernando Staud Y Ximenez, civil engineer, of Chicago, Cook county, state of Illinois, United States of America. *Improvements in or relating to apparatus for raising sunken vessels* (Specification filed 8 May 1907.)
- No. 513 of 1906.—Thomas Henry Glasscoe, gas engineer, of Ivydale, Herongate road, Wanstead, Essex. *Improvements in the arrangements and construction of carburetted air gas apparatus relating to automatically and thermostatically controlled mixing valves.* (Specification filed 8 May 1907.)
- No. 517 of 1906.—Marconi's Wireless Telegraph Company, Limited, of 18 Finch lane, in the city of London, England. *Improvements in or relating to wireless telegraphy.* (Specification filed 8 May 1907.)
- No. 160 of 1907.—George Edward Bunning, pastoralist, of Dalveen, in the state of Queensland, commonwealth of Australia. *Improvements in and relating to fence droppers and wire retaining means.* (Specification filed 1 May 1907.)
- No. 96 of 1907.—Tracy French Gavin Jones, managing partner in the firm of Gavin Jones and Son, engineers, Cawnpore, British India. *Improvements in wheels.* (Specification filed 1 May 1907.)

No. 1812 P.—THE fees prescribed in the fourth schedule to the Inventions and Designs Act of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each:—

- No. 401 of 1897.—Tito Livio Carbone. *An improvement in sheet metal boxes.* (From 16 May 1907 to 16 May 1908.)
- No. 353 of 1898.—C. F. G. Dobson. *An army filtering water bottle.* (From 10 May 1907 to 10 May 1908.)
- No. 41 of 1899.—Edward Tyer. *Improvements in railway signals.* (From 7 June 1907 to 7 June 1908.)
- No. 371 of 1899.—Khasherao Bhagawantrao Jadhava. *Improvements in or relating to the treatment of sewage and in apparatus therefor.* (From 9 May 1907 to 9 May 1908.)
- No. 379 of 1899.—Henry James Kimman and Edward Nash Hurley. *Improvements in portable pneumatic drills and like tools.* (From 16 May 1907 to 16 May 1908.)
- No. 108 of 1901.—John William Kincaid. *A mechanical stoker.* (From 4 June 1907 to 4 June 1908.)
- No. 293 of 1901.—Auguste Lumiere and Louis Lumiere. *Improvements in panoramic photographic apparatus.* (From 27 May 1907 to 27 May 1908.)
- No. 23 of 1902.—Edward Coverly Newcomb. *Method and means for generating superheated steam or vapor.* (From 26 May 1907 to 26 May 1908.)

- No. 105 of 1902.—Joseph Allen Baker and William King Baker. *Improvements in or relating to refuse destructors and the like.* (From 9 May 1907 to 9 May 1908.)
- No. 169 of 1902.—George Samuel Baker. *Improvements in or relating to refuse destructors and the like.* (From 25 June 1907 to 25 June 1908.)
- No. 197 of 1902.—Francis Lawrence Lane. *Improvements in brake gear for railway wagons and the like.* (From 7 September 1907 to 7 September 1908.)
- No. 2 of 1903.—Louis Carnegy Auldjo. *Improvements in steam boilers.* (From 11 May 1907 to 11 May 1908.)

No. 1813 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act of 1888, the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2), of the said Act the exclusive privilege of making, selling, and using the said inventions in British India, and of authorising others so to do, has ceased:—

- No. 445 of 1901.—George Cecil Gnapp. *A frame carrying a pair of bicycle wheels for attachment to the body of an ordinary jinricksha or other light carriage.* (Specification filed 6 February 1903.)
- No. 62 of 1902.—Thomas Henry McCauley. *Improvements relating to the lubrication of axles.* (Specification filed 10 February 1903.)
- No. 288 of 1902.—David James Young. *Improved portable shower bath.* (Specification filed 10 February 1903.)
- No. 294 of 1902.—Hormusji Khurshedji Bana. *The automatic sprinkler.* (Specification filed 7 February 1903.)
- No. 324 of 1902.—John Duncan Roberts. *Improvements in and relating to the heating arrangements of oil engine vapourisers.* (Specification filed 5 February 1903.)
- No. 443 of 1902.—Galloways Limited. *Improvements in steam superheaters or dryers.* (Specification filed 4 February 1903.)
- No. 452 of 1902.—Dominik Brummer. *Improvements in or relating to portable buildings.* (Specification filed 4 February 1903.)
- No. 472 of 1902.—William Henderson, and James Dallas. *Improvements in or relating to doffing-arrangements for roving frames and the like.* (Specification filed 6 February 1903.)
- No. 473 of 1902.—William Henderson and James Dallas. *Improvements in or relating to the spindle bearings for roving frames and the like.* (Specification filed 6 February 1903.)
- No. 492 of 1902.—Parker Match Company. *Improvements in a process of making matches.* (Specification filed 5 February 1903.)
- No. 493 of 1901.—Horace Drummond Deane and Charles George Landseer Judge. *A centrifugal drier for steamed tea leaf.* (Specification filed 6 February 1903.)

Fee in respect of the continuance of an exclusive privilege—

- 4 (a) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of Rs 50 for each of the above inventions.

No. 229 of 1897.—William Warburton. *Improved method of extracting vegetable fibres.* (Specification filed 7 February 1898.)

No. 437 of 1897.—William Ashton Hockly. *An improved draw-bar for the hauling of coal tubs, etc., to be called "Ashton Hockly's Patent Draw-Bar."* (Specification filed 5 February 1898.)

Fee in respect of the continuance of an exclusive privilege—

- 4 (f) After the expiration of the eighth year and before the expiration of the ninth year from the date of the filing of the specification—

The sum of Rs 100 for each of the above inventions.

NOTICES.

All communications relating to applications for leave to file specifications and for registration of designs under the Inventions and Designs Act, 1888 (V of 1888), or in continuation of such applications, should be addressed to the Patents Secretary, 2, Bankshall Street, Calcutta.

The Office of the Secretary under the Inventions and Designs Act, 1888, will in future be open for the transaction of business from 11 A.M. to 3 P.M. on all days, except Sundays and gazetted holidays.

The Government of India are advised that, as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash and applicants are warned that they must be responsible for any delay in cashing cheques.

Cheques and money orders will only be accepted if made payable *at Calcutta* to the Secretary under the Inventions and Designs Act.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's Office are now on sale to the public at one anna and eight annas a copy, respectively. Consolidated indexes for 1905 and for 1906, entitled "Inventions and Designs," are also on sale, price one rupee each. They contain a chronological list, subject-matter and name indexes of exclusive privileges for inventions, which have been obtained or applied for in the year, together with lists of designs applications.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitors' room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified: or, if the 10th day is a holiday, till the evening of the office day next following.

At the time of delivering or sending an application for leave to file a specification, the applicant shall cause a duplicate copy of the application to be delivered or sent therewith to the Secretary.

The Inventions and Designs Act (V of 1888), with the notifications and rules issued under its provisions and the notices of the office of Inventions and Designs, to which is added an explanatory memorandum for the guidance of persons applying for protection of Inventions and Designs. Royal 8vo volumes, paper cover, 13 annas or 1s. 1d. Postage extra. To be had of the Superintendent, Government Printing, 8, Hastings Street, Calcutta, or of the Superintendent, Patents Branch, Department of Commerce and Industry, 2, Bankshall Street, Calcutta.

H. G. GRAVES,
Secretary under the Inventions
and Designs Act, V of 1888.

CIVIL AND MILITARY STATION, BANGALORE.

Municipal Office.

NOTIFICATIONS

Bangalore, the 16th March 1907

No. 5729.—Under the provisions of section 44, sub-section (8) of the Bangalore Municipal Law, 1897, it is hereby notified that the Municipal Commission for the Civil and Military Station of Bangalore, with the sanction of the Honourable the Resident in Mysore, directs the following amendment to this office Notification No. 3874, dated 2nd September 1899 :—

For—

" (iv) A tax on 'piece-goods' at a uniform rate of Rs 1-9-0 per cent *ad valorem*, the term 'piece goods' not including made up clothing, drapery or haberdashery."

Read—

" (iv) A tax on piece-goods and other textile fabrics and manufactured articles of clothing and dress at a uniform rate of Rs 1-9-0 per cent. *ad valorem*, the term 'piece-goods' to include—

Kamblies.

Coarse cotton country carpets

Fabrics of hemp or jute.

Cotton and linen piece-goods

Wollen piece-goods.

Silken piece-goods.

Embroidery.

Other textile fabrics, manufactured articles of clothing and dress "

The 16th April 1907.

No. 295.—In exercise of the powers conferred under sections 88, 89, and 137 (1) of the Bangalore Municipal Law, 1897, the Municipal Commission for the Civil and Military Station of Bangalore have made the following bye-law, and the same having been confirmed by the Hon'ble the Resident in Mysore, as required by section 139, it is hereby notified for public information under section 180 (3) of the said law :—

CHAPTER III.—SANITATION AND OTHER PURPOSES.

BANGALORE MUNICIPAL LAW, SECTIONS 88, 89, and 137 (i) (1)

1. (a) All the provisions of this Bye-law shall apply to latrines or privies and drain belonging to or maintained for the use of any house, building or enclosure which is assessed in the Municipal books at an annual valuation of Rs 120 and more

(b) Only the provisions enacted by sections 2, 3, 4, 5, 6, 10, 13, 14, 15, 16, and 17 of this Bye-law shall apply to latrines and drains belonging to or maintained for the use of any house, building or enclosure which is assessed in the Municipal books at an annual valuation of less than Rs 120

2. Every place other than a water-closet or bathroom situated within any house, building or enclosure and habitually used for the purpose of nature or for keeping human excreta shall be considered to be a latrine within the meaning of this Bye-law

3. Every latrine shall be in conformity with the Municipal standard design or of such other pattern and size as may be approved of by the Municipal Commission

Provided that any existing latrine which, in the opinion of the President, has been erected on sanitary lines or is capable of being made sanitary at a reasonable cost, shall not be required to be reconstructed in accordance with the standard design

4. The floor of every latrine shall be made of cement or of asphalt or of bastard asphalt or of stone slabs pointed with asphalt or bastard asphalt and laid on a bed of concrete, three inches thick, and shall be so sloped, drained and constructed as to carry away the fluid with facility into the latrine drain.

5. Every latrine shall be provided with a seat so made as to compel the excreta to fall entirely into a suitable pan or receptacle of sufficient capacity placed beneath it.

6 The pan or receptacle shall be made of iron or of such other material as may be approved of by the President and shall not be cracked, broken, perforated, rotten or pervious to fluid

7 In the case of servants' latrines, the floor shall not be lower than one foot and six inches above the ground level

8 In servants' latrines attached to dwelling houses, a separate receptacle shall be kept for the deposit of the excreta from bathrooms. The receptacle shall be of a sufficient capacity and made of such design and material as may be approved by the President and it shall be provided with a properly fitting cover

9 All servants' latrines shall be provided with dry earth or ashes. The occupiers shall see that dry earth or ashes are used for all filth pans and receptacles under the seats

10 Occupiers shall be responsible that all moveable receptacles for latrines are tarred once in every month, kept in good order and renewed when required.

11 The walls of every latrine shall be plastered on the inside with cement or otherwise rendered impervious to fluid to a height of 2 feet from the floor

12 Every latrine shall be provided with a separate entrance, if required by the Commission, for the entry of scavengers for the purpose of conservancy

13 Every latrine shall be provided with a U-shaped cemented drain sufficiently large, well laid and watertight to prevent its contents from overflowing or stagnating or soaking into the ground. Such drain shall terminate with an iron pipe so that the contents of the drain may fall directly into a receptacle or a Municipal drain

14 All such drains shall be so constructed as to discharge their contents in a proper manner—

(1) into a Municipal drain approved by the Commission for the purpose, or

(2) into a moveable receptacle or bucket kept in the cistern constructed at the extremity of the drain as shown in the design

15 The President shall have power to order an house owner or occupier to provide a dust-bin

16 Whenever it is not otherwise expressly stated, the person responsible for satisfying the requirements of this Bye-law shall be the owner of the house or premises referred to

17 If the owner or occupier of any house, building or enclosure neglects within thirty days from the receipt of a notice issued by the President to comply with all or any of the provisions of this Bye-law, he shall be liable on conviction before a Magistrate to a fine which may amount to Rupees twenty and to a further fine which may amount to Rupees five for every day after such conviction during which the breach continues.

P. L. MOORE,

President, Municipal Commission.

P. C. MOLE,
Offg Examiner of Telegraph Accounts

YEARLY EXAMINATION OF CANDIDATES FOR FOURTH GRADE OF ACCOUNTANTS.

The yearly examination of candidates for fourth grade of Accountants, Public Works Department, will be held at the Civil Engineering College, Sibpur, on Monday and Tuesday, the 1st and 2nd July 1907, at 10-30 A.M. both days.—

| SUBJECTS | Full marks | Minimum pass marks. |
|---|------------|---------------------|
| Writing (neatness, clearness, and rapidity) | 100 | 50 |
| Dictation (spelling, punctuation, etc.) | 100 | 50 |
| Arithmetic (the whole) | 240 | 160 |
| Mensuration (a) (the whole) | 60 | 30 |
| Book-keeping (b) (mercantile) | 100 | 50 |
| TOTAL | 600 | ... |

Minimum required in all papers
collectively, 400

(a) Todhunter's Mensuration for Beginners

(b) "Book-keeping" by Bill and Hamilton

"Book-keeping" by double and single entry, by W. Inglis (Chamber's Educational Course).

1. The examination is held annually at the Civil Engineering College, Sibpur, on the 1st Monday in July. The examination will be conducted, either at the College or by an Examiner, Public Works Accounts (including Railway and Telegraph), in Bengal, Assam, and Burma only. The examination will be *ipso facto* vitiated, if it be not held (begun and completed) on the dates fixed, but the officer who will conduct the examination, may make his own arrangements, in regard to the *place* and *hour* of examination, with the candidates.

Candidates will not be examined in any of the Calcutta offices.

A candidate already in permanent Government employ* may be allowed to compete

* This term includes employment under Local Boards and foreign Bodies, if such is pensionable by the British Government.

in the examination, even if he is more than 25 years of age, and may be appointed to an accountantship if he passes it, but if he is not already in pensionable service, he will be eligible only for appointment to the non-pensionable

establishment on State Railway.

2. The candidate should apply to an Examiner of Public Works Accounts, not later than 30 days previous to the date fixed for the examination and obtain his consent to conduct his examination, if examination at the College is not convenient. The application must bear the address of the candidate, must be accompanied by a fee of Rs 10 and the following certificates, and must be forwarded by him, not direct to the Principal, but through the Examiner.

Certificates may be submitted in original or true copies attested by an officer of the Engineer or Accounts Branch, but none will be returned.—

(1) Certificate of good character signed by applicant's immediate official superior, or by the instructor under whom he has been educated, or by some other superior under whom he may have been brought up or employed or to whom he may be well known. (This certificate must have special reference to the two years immediately preceding the application.)

(2) Certificate of age (baptismal or of birth) not required, if the candidate is already in permanent Government employ.

(3) Certificate that the application is in the candidate's hand-writing.

NOTE.—A candidate already in Government service should, in like manner, submit his application, through his immediate official superior, to an Examiner of Accounts qualified to hold the particular examination, and should state whether he desires to be examined at the office of the Examiner of Accounts concerned or at the College.

It will rest with the Examiner of Accounts, to whom the candidate submits his application, to decide, on a consideration of the certificates submitted, whether the candidate should be allowed to appear for the examination, or whether his application should be rejected. The Examiner of Accounts will then forward to the Principal for registration the names of the accepted candidates. The names of these candidates should be entered in a statement showing their ages and their addresses, and also showing where each candidate is to be examined, whether at the College or at the office of the Examiner of Accounts. This statement, together with the fees, should be transmitted to the Principal not later than 15 days after the dates fixed in paragraph 2 for the submission of applications of candidates.

3. Examination papers that are issued for examination need not be returned.

4. Each examination is complete in itself. A candidate who has failed in an examination, and presents himself for examination on a subsequent occasion, must undergo the full examination and furnish fresh fee and certificates.

5. If from any cause a candidate fails to appear for the examination, the fee paid will not be refunded.

6. Passed candidates should apply, not to the Principal of the College, nor to the Accountant-General, Public Works Department, but direct to the Examiner of Public Works Accounts, in the province or railway under whom they may desire to be employed.

7. It must be distinctly understood that the passing of this examination does not give any claim to an appointment, and that in making appointments, preference will be given to qualified persons who are already employed in the Department.

8. The Civil Engineering College acts solely as an examining body in reference to admission to the 4th grade of Accountants, Public Works Department.

9. Candidates for the 4th grade Accountantship examination, who are not Government servants and over 25 years of age, are allowed to appear at the examination, at the Sibpur College centre only but, even if successful, they are debarred from employment in the service of Government, and their names will be excluded from the list of passed candidates which is furnished to the Accountant-General, Public Works Department.

10. Candidates over 25 years of age should apply in writing to the Principal of the Civil Engineering College, not later than 30 days previous to the examination; the application to be accompanied by the fee of Rupees ten.

B. H. AION,

Principal, Civil Engineering College, Sibpur.

SIBPUR,

The 1st May 1907.

ORDERS BY THE HON'BLE THE VICE-CHANCELLOR AND SYNDICATE OF THE CALCUTTA UNIVERSITY.

The undermentioned candidates have passed the B Sc. Examination:—

SENATE HOUSE,
The 13th May 1907.

G. THIBAUT,
Registrar, Calcutta University.

CALCUTTA UNIVERSITY.

NOTICE.

I. Candidates at the Entrance, F. A. and B. A. Examinations are informed that—

(a) Admission to Colleges will ordinarily be allowed only within three weeks of the opening of a College.

(b) Transfers will not ordinarily be allowed except at the end of an academical year.

(c) Students who fail will have to produce at the time of admission a certificate showing the subject or subjects in which they have failed.

Such a certificate will be obtained on applying to the Registrar with a fee of Annas four only.

II. The following extracts from the Regulations of the University are published for the information of the Candidates concerned:—

“No candidate shall be allowed to take up Mental and Moral Philosophy unless he has taken up Logic in the Intermediate Examination in Arts. No candidate shall be allowed to take up any subject in Group B, or Mathematics, who has not taken up the corresponding subject in the Intermediate Examination.” (*Last paragraph of Regulation 6, Chapter XXXII.*)

“No student shall be permitted to take Mathematics for the B.Sc. Examination unless he has taken it up for his Intermediate Examination.

No student shall be permitted to take up Physics or Chemistry for the B.Sc. Examination unless he has taken up both Mathematics and Physics for the Intermediate Examination.” (*Regulation 7, Chapter XXXVI.*)

SENATE HOUSE ; }
The 13th May 1907. }

G. THIBAUT,
Registrar.

JUDICIAL. •

No. 669—676.

The 17th May, 1907.

RESOLUTION—By the Government of India, Home Department.

The Government of India have had under their consideration for some time past the question of amending the Code of Civil Procedure. An amending Bill was introduced in the Council of the Governor General for making Laws and Regulations in 1901 and was reported on by a Select Committee in 1903. The Bill as revised by that committee was subjected to considerable criticism and has since been reconsidered and rearranged by the Legislative Department of the Government of India. It will in due course be again brought before the Legislative Council but before that is done the Governor General in Council has decided to remit it to a small committee of experts of such standing that an examination by them will, His Excellency in Council feels assured, command the public confidence. The Committee will be constituted as follows:

President.—The Hon'ble Mr. H. Erle Richards, K.C., Legal Member of the Council of the Governor General.

Members.—The Hon'ble Sir Francis W. Maclean, Kt., K.C.I.E., Chief Justice of Bengal,

The Hon'ble Sir Lawrence H. Jenkins, Kt., K.C.I.E., Chief Justice of Bombay;

The Hon'ble Mr. S. Ismay, C.S.I., and

The Hon'ble Dr. Rash Behari Ghose, C.I.E.

The committee will meet in Simla early in June and the Government of India hope to proceed with the Bill at Calcutta during the session of 1907-1908.

ORDER.—Ordered that a copy be forwarded to the Governments of Bombay and Bengal, the Finance and Legislative Departments, the Hon'ble the Chief Justice of Bengal, the Hon'ble Mr. Ismay and the Hon'ble Dr. Rash Behari Ghose, for information.

Ordered also that this resolution be published in the *Gazette of India*.

H. H. RISLEY,

Secretary to the Government of India.

DEPARTMENT OF REVENUE AND AGRICULTURE.

H. H. RISLEY,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 h. on Thursday, the 23rd May 1907, based on the Indian Daily Weather Reports of the period.

Ordinary hot weather conditions prevailed over the whole country and the rainfall of the week was of the nature usual at this time of year. Burma and northeast India received rain daily which in the latter area was most general in Eastern Bengal and Assam, and local rainfall accompanied by duststorms and thunderstorms occurred in other parts of the Indian region, chiefly in the south of the Peninsula and in northwest India. Temperature was below normal during the greater part of the week in the United and Central Provinces and Central India.

Burma.—Rain fell daily and every station except Thayetmyo received some rain during the week. Skies were moderately clouded and temperature was approximately normal.

Northeast India and Orissa.—Rain fell over the whole division, chiefly in the eastern half, and was most widespread on the 19th. Skies were clear or only lightly clouded in Chota Nagpur and Bihar and lightly to moderately clouded elsewhere, and temperature was nearly normal except on the 19th and 20th when it was lower than usual in the western districts.

The United Provinces, Central India and the Central Provinces.—Duststorms and thunderstorms gave light scattered falls of rain which were most numerous on the 20th. During the greater part of the week weather was cloudy and cooler than usual.

Northwest India.—Rain associated with thunderstorms and duststorms occurred in Rajputana and parts of the Punjab and of the Frontier Province. Skies were generally clear or only lightly clouded, and temperature was normal or in defect except on the 17th and 18th, when it was somewhat above normal over the greater part of the division.

The Peninsula.—Scattered falls of rain were reported on almost every day of the week from the south of the Peninsula and on the 19th, 20th and 22nd from the Circars coast. Skies were lightly to moderately clouded in the south and the coast districts, being nearly clear elsewhere, and temperature was nearly normal.

The rainfall for the rainfall period from the 3rd to the 23rd May has been in excess on the Burma coast and in the subdivisions of Burdwan and Jubbulpore, and normal in Burma (Wet) and the subdivisions of Calcutta, Patna and Jalpur; in all the remaining parts of the country it has been below the average.

The following summarises the chief rainfall amounts of the week, as reported at 8 h. each day :—

- May 17th. Mergui 2'50", Tavoy 1'55", Berhampore 1'76" and Purnea 1'82".
 „ 18th. Tavoy 1'42", Moulmein 1'88", Maymyo 2'58" and Kodaikanal 1'00".
 „ 19th. Calcutta 1'73", Hazaribagh 1'33", False Point 1'47", Udaipur 1'30" and Trivandrum 1'75".
 „ 20th. Tavoy 2'10", Rangoon 1'91", Toungoo 1'44", Sibsagar 1'00", Dhubri 3'31" and Berhampore 1'32".
 „ 21st. Tezpur 1'31", Burdwan 2'13" and Balasore 1'10".
 „ 22nd. Port Blair 1'83", Moulmein 2'31", Rangoon 1'47", Mymensingh 1'45" and Cuttack 1'00".
 „ 23rd. Port Blair 1'40", Mergui 2'20", Tavoy 2'55", Dhubri 1'00", Barisal 1'38", Bogra 1'30", Dinajpur 1'02", Cochin 1'83" and Trichinopoly 1'02".

GEORGE C. SIMPSON,
for Director General of Observatories.

J. WILSON,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, 18th May 1907.

Burma.—The rainfall was practically general; it was heavy in Bassein, Henzada, Tavoy, Amherst, Toungh, Maubin, Tharrawaddy, Myaungmya, Rangoon and Pegu and moderate in most other districts. Ploughing for wet weather paddy has commenced in Thaton, Myaungmya, Lower Chindwin and Kyaukse. Reaping of dry weather paddy is in progress in several districts of Upper Burma. Clearing and burning of hill sides for miscellaneous cultivation are completed and sowing of paddy commenced in the Arakan Hill Tracts. Sowing of hillside paddy is completed in Myitkyina. Reaping of island crops is completed in Magwe. Plucking of tobacco is completed in Sagaing and Myingyan, and ploughing for cotton in Meiktila and sowing of cotton and sesamum in Myingyan have commenced. The dry weather paddy crop is slightly damaged for want of rain in the Tigyain township of Katha. More rain is required for paddy nurseries in Kyaukse. The condition of the standing crops is on the whole satisfactory. The price of paddy has risen largely in Minbu and slightly in five districts; it has fallen slightly in one district.

Eastern Bengal and Assam.—The weather is hot. Slight to moderate rain fell in most districts. More rain is wanted in Faridpur, Malda, Cachar and Sylhet. Plucking and manufacture of tea are in progress and prospects are good in the Assam Valley and are generally fair in the Surma Valley, though red spider has appeared in some districts. Harvesting of early transplanted rice continues and prospects are fair. Sowing of rice is in progress. Sowing of jute is nearly finished and weeding is in progress in most places. Pressing of sugarcane still continues in Sibsagar. Potatoes are being gathered in the Khasia Hills and prospects are very good. Prices of common rice:—Manipur 10½; Kohima 9; Silchar 8½ to 9; Comilla 8½; Chittagong and Sibsagar 8; Faridpur 6½ to 8; Jalpaiguri, Bogra, Sylhet, Dhubri, Tezpur and Dibrugarh 7½; Barisal, Rangamati, Rampur Boalia, Malda and Gauhati 7; Tura 6 to 7; Noakhali 6½, and Shillong and Aijal 6 seers per rupee. Prices have risen in eight; fallen in one; and remain stationary in the remaining districts.

Bengal.—Rain was general in Bengal Proper and in Chota Nagpur, but scattered in Bihar and Orissa; the fall was light in most places. Moderate rain was received in Midnapur, Murshidabad, Jessore, Purnea, Darjeeling and Cooch Behar. The preparation of lands for the next season's crops still continues. Sowings of paddy and jute are in progress. More rain is wanted in parts of Burdwan, Bankura, Midnapur, Hooghly, the 24-Parganas, Nadia, Champaran and Muzaffarpur. In Daibhanga the number of persons on test works is 2,198; on gratuitous relief 11,220; and on famine-relief works 25,390. Fodder and water are generally sufficient. The price of common rice has risen in thirteen and fallen in four districts.

United Provinces.—Rain fell in twenty-six districts but except in Naini Tal the falls were light. Threshing and winnowing are nearing completion. Preparation of fields for autumn crops is in progress and sowings have commenced. Weeding and irrigation of extra crops and of sugarcane continue. The condition of agricultural stock is good except in parts of five districts. Fodder is scarce in Azamgarh and dear in Hardoi, Sitapur and Bara Banki. Supplies are adequate. Prices show a tendency to rise in several districts.

Punjab.—Light rain has fallen in Ambala and in parts of Rohtak, Gurgaon, Jullundur, Amritsar, Shahpur, Rawalpindi, Mianwali and Lyallpur. Prices of food-grains show a general tendency to rise. Harvesting of spring crops and sowings of cotton, sugarcane, etc., continue. Sugarcane is being weeded in Jullundur. The outturn of spring crops is generally good to average; in Shahpur, Lyallpur and Multan the outturn is below average. The condition of extra spring crops is good. Locusts have damaged extra spring crops in Rawalpindi and in parts of Mianwali, in the latter district abundant locust hoppers are also causing damage to fruit trees; the melon crop has been damaged by insects in Ferozepore. Locusts have been destroyed in Lyallpur. Cattle are in good condition. Fodder is sufficient except in Mianwali; green fodder is not available in Ferozepore. There are no complaints regarding the water-supply.

North-West Frontier Province.—Slight showers averaging from 1 to 82 cents fell all over the Province. Harvesting of spring crops goes on in Bannu; the outturn is good on unirrigated lands and average on irrigated lands. Extra spring crops are being sown.

Land is also being prepared for autumn sowings. Destruction of locusts still goes on in all districts except Hazara. The standing crops in Bannu and Dera Ismail Khan and in gardens in the latter have been injured slightly by locusts. The water and fodder supply is sufficient. The condition of cattle is generally good except in the Marwat tehsil. Prices are fluctuating. Prices:—wheat $16\frac{1}{8}$ to $20\frac{1}{4}$; gram $16\frac{1}{4}$ to $21\frac{1}{4}$; maize 24 to $32\frac{1}{4}$; and *bajra* 20 to 25 seers per rupee.

Jammu.—No rain. Prices are fluctuating. Prices:—wheat 9 to 23 and maize 11 to 36 seers per rupee. The condition of the standing crops is fair. Fodder is sufficient except in the Ramban and Kishtwar tehsils. Harvesting of spring crops is in progress.

Kashmir.—The weather is generally bright. Prices are almost stationary.

Rajputana.—Showers fell almost everywhere during the week, the maximum fall was one inch 30 cents in Mewar. Harvesting operations continue. Preparation of land for autumn crops has commenced in many places. Cattle are in good condition except in some places in Mewar. Pasturage and fodder are sufficient. Prices are rising in Marwar, Kotah, Jhalawar, Alwar, Karauli, Bharatpur and Dholpur and are steady elsewhere.

Central India.—No rain. Threshing of spring crops continues in Bhopawar and Baghelkhand and is completed in Bundelkhand and Gwalior. Land is being prepared for autumn crops in other Agencies. The standing crops and the probable outturn are fair to good. Crops have been damaged by hail and rust in Baghelkhand. Agricultural stock and pasturage are fair to good except in parts of Malwa. Prices are high in Baghelkhand; have risen slightly in Jaora and Rutlam; are rising in Bundelkhand and are normal elsewhere.

Central Provinces.—The weather is very hot and occasionally cloudy with high winds. There was no rain during the week, except in five districts where there were light showers. Threshing and winnowing of spring crops are almost completed throughout the Provinces. Rice sown as a second crop in the Sironcha tehsil (Chanda) is being threshed, the outturn is estimated at 90. Preparation of land for autumn sowings is in full swing everywhere. Fodder and water are adequate but fodder is very dear in Nagpur and Yeotmal being particularly scarce in the Yeotmal and Darwha taluqs of the latter district. The cost of staple food-grains remained stationary in fifteen districts and fluctuated slightly elsewhere exhibiting a tendency to rise; *juar* became dearer by 2 seers in Damoh and Hoshangabad and by 3 seers in Buldana; prices are still equal to or above the scarcity level in Nimar, Wardha, Chanda, Balaghat, Drug, Bilaspur, Amraoti and Buldana.

Native States.—Threshing and winnowing are finished except in Kawardha and Chhuikhadan. Preparation of land for next autumn crops is in rapid progress everywhere. Fodder and water are sufficient. There were no marked variations in prices during the week.

Bombay.—There was rain during the week in parts of Kaira, Kanara, East Khandesh, Satara, the Karnatak and Palanpur. The standing crops are generally in good condition except for slight damage by locusts in parts of Bijapur and Belgaum. Threshing of spring crops continues in parts of Sindh, Khandesh and Nasik. Cotton-picking is progressing in parts of Ahmedabad, the Panch Mahals, Palanpur and Cutch. Preparation of lands for autumn cultivation continues. The fodder supply is sufficient except in parts of Ratnagiri and Ahmednagar. Agricultural stock is generally in good condition. Drinking water is sufficient except in parts of Ratnagiri, Kanara, the Deccan and Bijapur. Water for irrigation purposes is insufficient in parts of Surat, the Deccan, the Karnatak and Baroda. The quantity of food-grains purchaseable per rupee is in the Karnatak 20 to 37 per cent; in the Deccan 21 to 31 per cent; and elsewhere 3 to 25 per cent less than the normal. Labourers get sufficient field employment. During the week ending the 11th instant, there were 26 persons on gratuitous relief in Belgaum.

Hyderabad.—Rainfall—Three cents. The late rice harvest is nearing completion. Lands are being prepared for monsoon sowings. Prices:—wheat $7\frac{1}{4}$; coarse rice $7\frac{1}{4}$; and *juar* $15\frac{1}{4}$ seers per rupee.

Mysore.—There was good rain in Mysore, Hassan, Kadur and Shimoga and slight rain elsewhere. Prices of food-grains are steady. The standing crops are in good condition. The prospects of the season are good. Cattle are healthy and water and fodder are available.

Coorg.—Rainfall—95 cents. Ploughing for rice continues. Prices of food-grains are normal. Water and fodder are sufficient.

Madras.—The rainfall of the week was good in Malabar; there was no rain in Kurnool, Cuddapah, Chingleput, Madras and South Arcot and light to fair rain elsewhere. Irrigation supplies are sufficient except in parts of the Circars, the Deccan, Nellore, South Arcot, North Arcot, Salem and Madura. Ploughing, sowing, weeding and transplanting are in progress in parts. The standing crops are generally good but some in Madura require more rain. Harvests continue with outturn poor to normal. Pasture is insufficient in parts of the Circars, the Deccan, Nellore, Chingleput, North Arcot, Salem, Madura and South Canara. Fodder is procurable. The condition of cattle is generally good. The price of rice is stationary in fourteen districts; has fallen in three; and has slightly risen in six. The prices of millets have fluctuated as follows:—*Ragi* is stationary in thirteen districts; has fallen in five; and has slightly risen in three. *Cholum* is stationary in four districts; has fallen in four; and has slightly risen in six. *Cumbu* is stationary in six districts; has fallen in one; and has slightly risen in eight.

The number of persons in receipt of relief during the preceding and present weeks in each province is shown in the following table :

J. WILSON,
Secretary to the Government of India.

No. 4298—80.

GOVERNMENT OF INDIA

DEPARTMENT OF COMMERCE AND INDUSTRY.

GENERAL

Simla, the 23rd May 1907.

RESOLUTION.

A report by the Secretary under the Inventions and Designs Act, 1888 (V of 1888), on the working of the Act during the calendar year 1906 is published for general information.

No. 1578-P., dated Calcutta, the 29th April 1907

From—H. G. GRAVES, Esq., Secretary under the Inventions and Designs Act,

To—The Secretary to the Government of India, Department of Commerce and Industry.

I have the honour to submit, for the information of the Government of India, the annual report of the Patent Office during the calendar year 1906.

2 The office has been in my charge during the year at 2, Bankshall Street, Calcutta.

3. The changes introduced into the practice of the office, which were indicated in my previous report, have only been seriously questioned in one instance by an applicant who felt himself aggrieved by the decision. His ~~previously stated, the innovations were intended to encourage the inventor and~~ ^{was not sustained on appeal to the Government of India.} As to protect both the inventor and the public. They have been worked, as far as possible with the view of obtaining a full and explicit disclosure of the invention from the inventor so that the public may benefit by the description, but may not be hampered by unduly enlarged claims. With the latter object in view, the attention of the inventor is drawn to the state of public knowledge, so that, in his own interest, he may limit his pretensions and define his claim to novelty more exactly. Naturally the inventor is loath to admit that his invention is not novel, and on the other hand the Patent Office with its very limited resources is far from being omniscient. Many privileges of doubtful validity are therefore necessarily obtained, but in cases of doubt it is only right that inventors should have the advantage when no cause can be shown against them by the office or the public. During the year, in 28 cases applicants have been warned that their inventions did not appear to be novel. From eight of them no reply was received, so that it may be assumed that the justice of the objection was admitted. In those instances when a reply was received the objection to the novelty was upheld in three cases on which leave to file a specification was refused. Three applications were amended more or less satisfactorily and were allowed. The balance of 4 cases are still under consideration. Objections to the grant were also filed by the public in several cases, but only in two was it considered to be necessary to hear the parties personally. Informal interviews are freely accorded to agents and applicants with very satisfactory results in settling doubtful points.

4. During the year 1906 the number of applications for leave to file specifications reached 620 as compared with 586 in the previous year. The increase was 34 or nearly 6 per cent., the same as shown in 1905, and the advance has gone on steadily since the Act came into operation. In 1889 there were only 336 applications and the total number under the present Act has been 8,344. In the year under consideration, 209 applications were made

by residents in India, 65 being filed by natives, and the remainder, 411, came from abroad. The figures for the previous year were 214, 71 and 372 respectively, showing a slight decrease of native applicants in the present year. As usual the greater number of external applications came from the United Kingdom, which supplied 194. The United States of America followed with 77 and then came British colonies with 53, France with 26, Germany with 25, and all other countries 36. In respect of invention in the country itself Calcutta and its suburbs were the most fertile, producing 67 applications supplemented by nine only from the rest of Bengal. In Bombay conditions were reversed, the town only giving 13 out of the total of 15 applications. Both from Bengal and Bombay, there were 19 applications from natives, leaving 57 and 26, respectively, for other residents. Madras and the Punjab each produced six native applications out of their totals of 26 and 16. The figures for the United Provinces are 5 out of 13, for Eastern Bengal and Assam 3 out of 7, and for the remainder of India 7 out of 26. The ratio of inventors to the population is very low in this country. Taking applications from residents only, approximately one application is made for every 2,000 inhabitants in the United Kingdom, 1,600 in the United States, and 3,000 in Germany. But in India the figure becomes 1,400,000 and, even at the best, does not get below 16,000 for Calcutta.

5. As usual the range of inventions, for which protection is sought, covers nearly all the arts and industries. Two-thirds of the applications came from abroad and only one-third can be denominated Swadeshi. Amongst the latter, railways have a predominating influence as there have been 21 applications relating to signals, 5 to other permanent-way and 10 to vehicles. The textile industries, which have been brought so prominently forward during the year, have supplied 10 applications for looms and an equal number concerned with the various steps in the preparation of the yarn and the fibre. Eight of the looms were designed by natives, mainly for rendering the picking, shedding and taking up motions automatic in very cheap constructions of hand or foot power, fly shuttle looms. Several of these were shown at the Industrial Exhibition opened in Calcutta in December 1906. Questions connected with latrines and sewage, etc., disposal resulted in nine indigenous inventions. Water lifts, especially mhotes, have been the subject of eight applications, one of which involved perpetual motion. Half a dozen inventions for presses and an equal number connected with the brick and the tile industry have also been put forward. The remainder are of a very miscellaneous character and defy classification on any broad lines. Almost the same may be said of applications from abroad, as the industries involved are so numerous, though inventions connected with motor cars are most noticeable. Several curious applications, all of which were not however brought on the register, were made during the year. They included perpetual motion, cure of snake bites by magnets, and use of the "Sun's wires in the form of garland rays" for enabling any person to understand any language.

6. Of the 620 applications made during the year, leave to file a specification was granted in 492 instances and refused in 20, whilst 24 were treated as abandoned and 84 were under or awaiting consideration on the 31st December 1906. The refusals, as will be seen in the annexed tables, were 5 fewer than in 1905 and 12 fewer than in 1904. This may be ascribed to the greater facilities now given to applicants for correcting their applications as indicated above in paragraph 3.

7. The number of references to experts, departmental and otherwise, has been reduced from 25 to 13 in view of the orders that such references were to be discontinued except in cases which were likely to affect native industries or which concerned the more ignorant classes of the population.

8. The number of specifications filed during the year was 538, an increase of 71 as compared with the previous year. Of these 238 were filed on applications made in 1905 and one on an application made in 1904, while the remainder, 299, were filed on applications made in the year under consideration. As the result of 8,344 applications under the present Act, 6,394 specifications were filed and brought on the register up to the end of 1906.

9. Exclusive privileges were kept alive by payment of prescribed fees in 556 cases, or 4 more than in the previous year, whilst 325, or 59 less than in 1905, ceased owing to non-payment of fees. Of the 6,394 specifications brought on the register, 2,514 are now in force, an increase of 209 as compared with 2,305 at the end of last year. The comparative age and number of these privileges for various years is shown in the appended table from which it would appear that the average life is about $5\frac{1}{2}$ years.

10. Fifteen applications for the registration of designs were received during the year, the same as in 1905. Of these five were refused or abandoned. Altogether seven applications were registered whilst three were still pending at the end of the year.

11. No reference was made to the law officers during the year. In 1904 and 1905 the number of references made were 3 and 1, respectively.

12. One application was made for the extension of a privilege beyond the normal period of 11 years. After due consideration it was refused.

13. The gross revenue for the year amounted to Rs7,890-3 as compared with Rs4,766-12 in 1905, an increase of Rs3,123-7. A refund of Rs20 was required, so that the total net income shows an increase of Rs3,103-7. Provided that due allowance is made for the exceptional inflation of the continuance fees in 1904 by the payment of Rs6,300 in advance, all the main items, consisting of fees on applications, the filing of specifications and the continuance of privileges are satisfactory, in that they show a steady growth from year to year. In any case, however, the increase in the number of applications is very satisfactory.

14. The usual statistics are appended.

Statement showing the proceedings under the Inventions and Designs Act of 1888 during the year 1906 as compared with the years 1905 and 1904.

J. S. MESTON,

Secretary to the Government of India.

DEPARTMENT OF COMMERCE AND INDUSTRY.

NOTIFICATIONS.

EMIGRATION.

Simla, the 30th May, 1907.

No. 4588—62.—The following draft of a Notification which it is proposed to issue in exercise of the powers conferred by section 80 of the Indian Emigration Act, 1883 (XXI of 1883), is published, as required by section 81 of the said Act, for the information of persons likely to be affected thereby, and notice is hereby given that the draft will be taken into consideration by the Governor General in Council on or after the 1st July 1907.

2. Any objection or suggestion which may be received from any person with respect to the draft before the date fixed aforesaid will be considered by the Governor General in Council.

DRAFT NOTIFICATION.

In exercise of the power conferred by section 80 of the Indian Emigration Act, 1883 (XXI of 1883), the Governor General in Council is pleased to direct that in Schedule G, Scale No. 3 (B), OF MISCELLANEOUS MEDICAL STORES, *showing instruments and appliances for Hospital and Dispensary to be supplied for every Emigrant Vessel*, of the Rules, as published with the Notification of the Government of India in the Department of Revenue and Agriculture, No. 94-E., dated the 18th March 1886, and subsequently amended, the following amendment shall be made :

In the last column of the entry relating to " Microscope " after the word " Demerara " the words " Trinidad, Fiji and Jamaica " shall be added.

TELEGRAPHS.

The 30th May, 1907.

No. 4499—80.—In exercise of the powers conferred by section 7 of the Indian Telegraph Act, 1885 (XIII of 1885), the Governor General in Council is pleased to direct that the following rules shall, with effect from the 1st July 1907, be substituted for the rules bearing the same numbers published with the Notification of the Government of India in the Public Works Department, No. 298-Telegraphs, dated the 22nd September 1904, namely :

Rule 91.—Directions about delivery.—For the registration of standing instructions regarding the delivery of telegrams during fixed hours, the same fee as for the registration of an abbreviated address is levied (*vide* Rule 31). If the fee for a registered abbreviated address has already been paid, that fee will cover the registration of special delivery instructions. In the case of Government officials, no charge is usually made for the registration of abbreviated addresses, but they will be required to pay the prescribed fee for the registration of standing instructions regarding the delivery of telegrams during fixed hours.

Rule 267.—Directions about delivery.—For the registration of standing instructions regarding the delivery of telegrams during fixed hours, the same fee as for the registration

of an abbreviated address is levied (*vide* Rule 31). If the fee for a registered abbreviated address has already been paid, that fee will cover the registration of special delivery instructions. In the case of Government officials, no charge is usually made for the registration of abbreviated addresses, but they will be required to pay the prescribed fee for the registration of standing instructions regarding the delivery of telegrams during fixed hours.

TELEGRAPH ESTABLISHMENTS.

The 30th May, 1907.

No. 4577—82.—The Governor General in Council is pleased to make the following promotions and reversion in the Superior establishment of the Indian Telegraph Department, with effect from the dates specified.

| Name. | From | To | Nature of promotion or reversion. | With effect from |
|-----------------------|---|--|-----------------------------------|---------------------|

MERCHANDISE MARKS ACT.

The 31st May, 1907.

No. 4610—4 —In exercise of the powers conferred by Section 19-A, sub-section (2) of the Sea Customs Act, 1878 (VIII of 1878 as amended by Act IV of 1881), the Governor General in Council is pleased to direct that the following rule shall be substituted for rule 2 of the rules published with the Notification of the Government of India in the Finance and Commerce Department, No. 1430, dated the 6th April 1831 :

"2. Other classes of piece-goods shall not be detained if unstamped; and unstamped cotton and woollen piece-goods imported for the personal use of individuals or private associations of individuals and not for trade purposes shall not be detained."

PRACTICAL ARTS AND MUSEUMS.*The 31st May, 1907.*

No. 4692—23.—In exercise of the power conferred by section 3 (b) of the Indian Museum Act, 1887 (IV of 1887), the Governor General in Council is pleased to appoint Mr. Lockhart Smith of the firm of Messrs. Williamson, Magor and Company, Calcutta, to be a Trustee of the Indian Museum, *vice* Mr. Norman McLeod, resigned.

**LEAVE AND APPOINTMENTS.
POST OFFICE.***The 31st May, 1907.*

No. 4708—123.—The following appointments in the Post Office of India are notified, consequent on the deputation of Mr. W. Maxwell, I.C.S., for service with the Telegraph Committee.

Mr. C. H. Harrison, I.C.S., to be sub *pro tem.* in the special 1st grade of Postmasters General from the 1st October 1906 to the 10th April 1907

Mr. C. J. Lalkaka to be sub *pro tem.* in the 1st grade of Postmasters General from the 28th September 1906 to the 28th February 1907.

Mr. G. R. Clarke, I.C.S., to be sub. *pro tem.* in the 1st grade of Postmasters General from the 1st March 1907 to the 10th April 1907.

Mr. W. F. Cockell to be sub. *pro tem.* in the 2nd grade of Postmasters General from the 28th to the 30th September 1906 inclusive

Mr. H. N. Hutchinson, I.C.S., to be sub *pro tem.* in the 2nd grade of Postmasters General from the 1st October 1906 to the 30th December 1906.

Mr. F. Hannington, I.C.S., to be sub. *pro tem.* in the 2nd grade of Postmasters General from the 31st December 1906 to the 28th February 1907.

Mr. E. R. Jardine to be sub. *pro tem.* in the 2nd grade of Postmasters General from the 1st March 1907 to the 10th April 1907.

POST OFFICE.**No 4519—4554-47.***The 29th May, 1907.*

RESOLUTION—By the Government of India, Department of Commerce and Industry.

In view of the satisfactory financial position of the Postal Life Insurance Fund, the Government of India have decided that, with effect from the 1st April 1907, the sums eventually payable in respect of existing policies in the Life Branch of the Fund shall be increased by ten *per cent.* Similarly, the premia payable in respect of sums assured on and after that date will be correspondingly reduced. The new premia rates giving effect to this decision are contained in the annexed table.

TABLE I. •

LIFE INSURANCE.

The payment of Rupees Fifty (50) at death can be secured by monthly subscriptions for a stated number of years, the amounts of which depend on the age of the subscriber, as shown below :—

| 1 | 2 | | 3 |
|-----------|--|-----------|--|
| Age. | BY PAYMENT OF A MONTHLY SUBSCRIPTION, COMMENCING AT THE AGE ENTERED IN COLUMN 1, AND CEASING AT THE AGE OF | | By payment of a monthly subscription, commencing at the age entered in Column 1, and continuing for remainder of life. |
| | 50 | 55 | |

| 49 | | | 0 3 7 |
| 50 | | | 0 3 9 |

Ordered, that this Resolution be communicated to the several Departments of the Government of India, to all Local Governments and Administrations,

* (Except the Director-General of the Post Office of India.) to all Heads of Departments subordinate to this Department,* and to the Examiner of Telegraph Accounts.

Ordered, also, that a copy be forwarded to the Director-General of the Post Office of India, for further necessary action, with reference to his letter No. 65-L. S., dated the 4th February 1907.

Ordered, further, that the Resolution be published in the *Gazette of India*, for general information.

POST OFFICE—VALUE PAYABLE POST.

The 31st May, 1907.

No. 4683—261.—In exercise of the powers conferred by the Indian Post Office Act, 1898 (VI of 1898), the Governor-General in Council is pleased to direct that

the following shall be substituted for rules 63, 64 and 66 of the rules published with the Notification of the Government of India in the Finance and Commerce Department, No. 1429-C.,S.R., dated the 30th March 1899, as subsequently amended :—

63. Registered and unregistered parcels, registered letters, registered book packets, newspapers prepaid at newspaper rates of postage, and fully prepaid unregistered book packets, may be transmitted by the inland post as value-payable postal articles, provided that the amount specified for remittance to the sender in the case of any such postal article shall not exceed Rs. 1,000 and shall not contain a fraction of an anna, except in the case of postal articles sent by, or addressed to, any department of the Government or a District, Local, or Municipal Board, and provided that such parcels, letters, and packets do not contain coupons, tickets, certificates or introductions designed for the sale of goods on what is known as the "snowball system."

Explanation.—The words "any department of the Government" include any official department of the Government of a Native State, the posts of which have been amalgamated with the Imperial Post.

64. Postal articles as aforesaid, with the exceptions noted below, may be transmitted by post to Ceylon, Portuguese India and the Somaliland Protectorate as value-payable postal articles, provided that the amount specified for remittance to the sender in respect of any such postal article shall not exceed Rs. 600 and shall not contain a fraction of an anna, and provided that such parcels, letters and packets do not contain coupons, tickets, certificates or introductions designed for the sale of goods on what is known as the "snowball system."

Exceptions.—

Ceylon.—Unregistered parcels.

Books and newspapers.—Fully prepaid at newspaper rates of postage.

65. No such postal article as aforesaid shall be accepted at any post office for transmission by post as a value-payable postal article unless the sender declares that it is sent in execution of a *bonâ fide* order received by him. At any post office notified from time to time in this behalf by the Director-General of the Post Office, the sender shall, in addition, be required to declare that the article is one the transmission of which by post as a value-payable postal article is permitted. No postal article as aforesaid shall be accepted at these offices without such further declaration.

Explanation.—An article may be sent by the value-payable post even though it possesses no intrinsic value. Thus legal documents, bonds, policies of insurance, promissory notes, railway goods and parcel receipts, bills of lading, or ordinary bills for collection may be sent as value payable postal articles. In the case of a railway receipt or bill of lading sent as a value-payable postal article it will be sufficient for the purposes of this rule if the article to which the railway receipt or bill of lading relates, has been sent in execution of a *bonâ fide* order. In the case of the other documents specified, the document must be sent in execution of a *bonâ fide* order to send the document itself.

66. Every postal article intended to be transmitted by post as a value-payable postal article shall be presented at the post office with a printed form, prescribed by the Director-General and obtainable at the post office, in which the sender shall specify the sum to be remitted to himself, fill in the required entries, and sign the declaration required by rule 64. If the article is an unregistered parcel, unregistered book packet or newspaper prepaid at newspaper rates of postage, a fee calculated according to the schedule below on the amount specified for remittance to the sender shall be prepaid by the sender by affixing postage stamps of the value of the fee to the form presented with the article in the space provided for this purpose. The sender of a postal article intended to be transmitted by post as value-payable shall write his name and address clearly on the article itself.

Schedule of fees.

| | | | | | | |
|--|---|---|-----|--------|-----|---------|
| Amount specified for remittance to sender. | { | Not exceeding Rs. 5 | ... | ... | ... | 1 anna |
| | | Exceeding Rs. 5, but not exceeding Rs. 10 | ... | ... | ... | 2 annas |
| | | " Rs. 10 | " | Rs. 15 | ... | 3 " |
| | | " Rs. 15 | " | Rs. 25 | ... | 4 " |
| | | " Rs. 25* | " | ... | ... | 4 " |

for each complete sum of Rs. 25 and 4 annas for the remainder provided that, if the remainder does not exceed Rs. 5, the charge for it shall be only 1 anna; if it does not exceed Rs. 10, the charge for it shall be only 2 annas, and if it does not exceed Rs. 15, the charge for it shall be only 3 annas.

EXPLOSIVES.

No. 4555—4.

The 31st May, 1907.

RULES TO REGULATE THE TRANSPORT AND IMPORTATION OF EXPLOSIVES.

In supersession of the Notification of the Government of India in the Home Department, No. 5528 (Public), dated the 11th October 1901, and of all amending notifications, and in exercise of the powers conferred by sections 5 and 7 of the Indian Explosives Act, 1884 (IV of 1884), the Governor General in Council is pleased to make the following rules to regulate the transport and importation of explosives.

Preamble.

These rules extend to the whole of British India, but the rules relating to the transport of explosives shall cease to apply to any port as defined in the Indian Ports Act, 1889 (X of 1889), for which special rules made by the Local Government are for the time being in force, in so far as they are expressly superseded by, or are inconsistent with, such special rules.

Extent of application.

Nothing in these rules shall apply to the packing, transport or importation of capped safety cartridge cases, if otherwise empty, when packed, transported or imported in the same consignment with arms covered by a license granted under the Indian Arms Act, 1878 (XI of 1878).*

General exemptions.

PRELIMINARY.

r. (1) For the purposes of these rules, explosives shall be classified as follows namely:—

Classification of explosives.

| | | | | | |
|---------|-----|-----|-----|-----|-------------------|
| Class 1 | ... | ... | ... | ... | Gunpowder. |
| " 2 | ... | ... | ... | ... | Nitrate-mixture. |
| " 3 | ... | ... | ... | ... | Nitro-compound. |
| " 4 | ... | ... | ... | ... | Chlorate mixture. |
| " 5 | ... | ... | ... | ... | Fulminate. |
| " 6 | ... | ... | ... | ... | Ammunition. |
| " 7 | ... | ... | ... | ... | Firework. |

(2) When any explosive falls within more than one of the said classes, it shall be deemed to belong exclusively to the latest of such classes.

2. The expression "gunpowder," as used in these rules, means exclusively gunpowder ordinarily so called.

Definition of "gunpowder" (class 1).

3. The expression "nitrate-mixture", as used in these rules, means any preparation other than gunpowder, which is formed by the mechanical mixture of nitrate with any form of carbon or with any carbonaceous substance not possessed of explosive properties,

Definition of "nitrate-mixture" (class 2).

* Further exemptions are made by section 14 of the Indian Explosives Act, 1884, which runs as follows:—

Saving for manufacture, possession, use, sale, transport or importation by Government.

"Nothing in this Act shall apply to the manufacture, possession, use, sale, transport or importation of any explosive—

(a) by order of the Government, or

(b) by any person employed under the Government in the execution of this Act, or as a keeper of a magazine, artisan, soldier, sailor, policeman or otherwise, or enrolled as a volunteer, under the Indian Volunteers Act, 1869, in the course of his employment or duty as such."

XX of 1869.

whether sulphur be or be not added to such preparation, and whether such preparation be or be not mechanically mixed with any other non-explosive substance.

Nitrate-mixture includes, among other explosives,—

| | |
|---------------------------|-----------------------------|
| Chilworth special powder, | Ripp-Lene, |
| Fortis explosive, | Safety blasting powder, and |
| Westfallite. | |

Definition and sub-division of "nitro-compound" (class 3). 4. (1) The expression "nitro-compound" as used in these rules, means any chemical compound which is possessed of explosive properties or is capable of combining with metals to form an explosive compound, and is produced by the chemical action of nitric acid (whether mixed or not with sulphuric acid), or of a nitrate mixed with sulphuric acid upon any carbonaceous substance, whether such compound is mechanically mixed with other substances or not.

(2) Nitro-compound shall, for the purposes of these rules, be sub-divided as follows, namely:

(a) Division 1, comprising—

(i) such explosives as—

| | |
|--------------------|----------------------|
| Amberite No. 1, | Dynamite, |
| Ballistite, | Gelatine dynamite, |
| Blasting gelatine, | Gelignite, |
| Carbonite, | Lithofracteur, |
| Cordite, | Nitro-glycerine, and |
| Stonite, and | |

(ii) any chemical compound or mechanically mixed preparation which consists, either wholly or partly, of nitro-glycerine or some other liquid nitro-compound, and

(b) Division 2, comprising—

(i) such explosives as—

| | |
|----------------------------------|--------------------------------|
| Amberite No. 2, | Nitrated-gun-cotton, |
| Ammonite, | Picrates, |
| Bellite, | Picric powder, |
| Coopal's powder, | Roburite, |
| Cotton gunpowder, | Sawdust and gun-cotton powder, |
| E. C. powder, | Schultz's powder, and |
| Gun-cotton ordinarily so-called, | Tonite (or cotton powder), and |

(ii) any nitro-compound, as hereinbefore defined, which is not comprised in Division 1.

Definition and sub-division of "chlorate-mixture" (class 4). 5. (1) The expression "chlorate-mixture", as used in these rules, means any explosive of containing a chlorate.

(2) Chlorate-mixture shall, for the purposes of these rules, be sub-divided as follows, namely:

(a) Division 1, comprising—

(i) such explosives as—

Horsley's blasting powder, and
Brain's blasting powder, and

(ii) any chlorate preparation which consists partly of nitro-glycerine or of some other liquid nitro-compound, and

(b) Division 2, comprising—

(i) such explosives as—

| | |
|-------------------------------------|---------------------------------|
| Horsley's original blasting powder, | Hochstadter's blasting charges, |
| Erhardt's powder, | Reichen's blasting charges, |
| Reveley's powder, | Teutonite, and |

Chlorated gun-cotton, and

(ii) any chlorate-mixture, as hereinbefore defined, which is not comprised in Division 1.

6. (1) The expression "fulminate", as used in these rules, means any chemical compound or mechanical mixture, whether included in any of the foregoing definitions or not, which, from its great susceptibility to detonation, is suitable for employment in percussion-caps or any other appliance for developing detonation, or which, from its extreme sensibility to explosion and from its great instability (that is to say, readiness to undergo decomposition from very slight exciting causes), is especially dangerous.

Definition of
sub-division of
"fulminate" (class 5).

(2) Fulminate shall, for the purposes of these rules, be sub-divided as follows, namely:

- (a) Division 1, comprising such compounds as the fulminates of silver and of mercury, and preparations of those substances such as are used in percussion-caps, and any preparation consisting of a mixture of a chlorate with phosphorus, or certain descriptions of compounds of phosphorus, with or without the addition of carbonaceous matter, and any preparation consisting of a mixture of a chlorate with sulphur, or with sulphuret, with or without carbonaceous matter; and
- (b) Division 2, comprising such substances as the chloride and the iodide of nitrogen, fulminating gold and silver, diazobenzol, and the nitrate of diazobenzol.

7. (1) The expression "ammunition", as used in these rules, means any explosive included in any of the foregoing definitions, when the same is enclosed in any case or contrivance, or is otherwise adapted or prepared, so as to form—

Definition of
"ammunition,"
"percussion-cap,"
"detonator,"
"safety fuze" and
"safety cartridge,"
and sub-division of
"ammunition"
(class 6).

- (a) a cartridge or charge for small-arms, cannon or any other weapon, or for blasting or
- (b) a safety or other fuze for blasting or for shells, or
- (c) a tube for firing explosives, or
- (d) a percussion-cap, a detonator, a fog signal, a shell, a torpedo, a war-rocket, or any other contrivance other than a firework.

(2) The expression "percussion-cap", as used in these rules, does not include a detonator.

(3) The expression "detonator", as used in these rules, means a capsule or case which is of such strength and construction, and contains fulminate in such quantity, that the explosion of one capsule or case would communicate the explosion to other like capsules or cases.

(4) The expression "safety fuze", as used in these rules, means a fuze for blasting which burns and does not explode, and which does not contain its own means of ignition, and which is of such strength and construction, and contains an explosive in such quantity, that the burning of such fuze would not communicate laterally with other like fuzes.

(5) The expression "safety cartridge", as used in these rules,—

- (i) means a cartridge for small arms, the case of which can be extracted from the small-arm after firing, and which is so closed as to prevent any explosion in one cartridge being communicated to other cartridges; and
- (ii) includes a rifle-calibre machine-gun cartridge, if it is as described in clause (i) whether it is for use with a machine-gun having chambers identical with those of rifles or with a machine-gun having special chambers.

Provided, that the diameter of the cartridge in either case (i) or case (ii) does not exceed one inch.

(6) Ammunition shall, for the purposes of these rules, be sub-divided as follows, namely:

(a) Division 1, comprising exclusively—

Safety cartridges,
Safety fuzes for blasting,
Railway fog-signals, and
Percussion-caps; and

(b) Division 2, comprising any ammunition, as hereinbefore defined, which does not contain its own means of ignition and is not included in Division 1, such as—

Cartridges for small-arms, other than safety cartridges,
Cartridges and charges for cannon, shells, mines, blasting or other like purposes,
Shells and torpedoes containing any explosive,
Fuzes for blasting, other than safety fuzes,
Fuzes for shells,
Tubes for firing explosives, and
War-rockets,

which do not contain their own means of ignition; and

- (c) Division 3, comprising any ammunition, as hereinbefore defined, which contains its own means of ignition and is not included in Division 1, such as—

Detonators,

Cartridges for small-arms, which are not safety cartridges,

Fuzes for blasting, which are not safety fuzes,

Fuzes for shells, and

Tubes for firing explosives,

containing their own means of ignition.

Explanation—The expression “ammunition containing its own means of ignition” means ammunition having an arrangement, whether attached to or forming part of the ammunition, which is adapted to explode or fire the ammunition by friction or percussion.

Sub-division of
“firework” (class
7).

8. Fireworks shall, for the purposes of these rules, be sub-divided as follows, namely.

- (1) Division 1, comprising firework compositions, that is to say,—

(a) any chemical compound or mechanically mixed preparation of an explosive or inflammable nature, which is used for the purpose of making manufactured fireworks, and is not included in any of the foregoing definitions,

(b) any star, and

(c) (except as declared in the proviso to this rule) any coloured fire composition; and

- (2) Division 2, comprising manufactured fireworks, that is to say, any explosive of class 1, 2, 3, 4, 5 or 6 and any firework composition, when such explosive or composition is enclosed in any case or contrivance, or is otherwise manufactured so as to form a squib, cracker, toy cap or amorce, serpent, rocket (other than a war-rocket) maroon, lance, wheel, Chinese fire, Roman candle, or other article specially adapted for the production of pyrotechnic effects or pyrotechnic signals or sound signals:

Provided that a substantially constructed and hermetically closed metal case containing not more than one pound of coloured fire composition of such a nature as not to be liable to spontaneous ignition shall be deemed to be a “manufactured firework” and not a “firework composition”.

TRANSPORT.

Packing of explosives
for conveyance.

9. The following general rules shall be observed with respect to the packing of explosives for conveyance.—

- (1) Unless the context otherwise requires,—

the expression “outer package” means a box, barrel, case or cylinder, of wood, metal or other solid material, of such strength, construction and character that it will not be broken or accidentally opened, nor become defective or insecure whilst being conveyed, and will not allow any explosive to escape;

the expression “inner package” means a substantial case, bag, canister or other receptacle, made and closed so as to prevent any explosive from escaping;

the expression “authorized explosive” means exclusively an explosive included in a List of Authorized Explosives prepared by the Chief Inspector of Explosives with the Government of India, and published annually in the *Gazette of India*, and in force for the time being;

the expression “propellant” means an authorized explosive of class 3 adapted and intended exclusively for use as a propelling charge in cannon or small arms; and the expression “special authority” means a written authority granted by the Chief Inspector of Explosives, to which may be attached such conditions as may, in the opinion of the Chief Inspector of Explosives, be necessary to meet the special requirements of the case.

- (2) The interior of every package shall be free from grit and otherwise clean.

(3) Save as hereinafter provided, there shall not be any iron or steel in the construction of any package unless the same is covered with suitable material so as effectually to prevent the exposure of such iron or steel.

(4) Every package when actually used for the packing of one explosive shall not be used for the packing of any other explosive or any other article or substance.

Provided that this rule shall not prevent the packing of inner packages containing a propellant in an outer package with inner packages containing gunpowder or another propellant:

Provided also that this rule shall not prevent the packing of any article which is not of an inflammable or explosive nature, or liable to cause fire or explosion, in the same package as an explosive of the 1st Division of the 6th (ammunition) class.

(5) Subject to the foregoing provisions, the following shall be the method of packing authorized explosives of various classes, respectively, and the maximum amounts which may be in any one package —

| Class. | Method of packing | Amount in any one outer package | Amount in any one inner package |
|---|---|--|---------------------------------|
| Class 1 | When the quantity in any one consignment does not exceed 5 lbs in amount, a single outer package, otherwise a double package, the inner and outer packages being as above denoted | 100 lbs Provided that where gunpowder and propellant are packed together the amount shall not exceed— | 100 lbs gunpowder |
| Class 2 | As for class 1 | 50 lbs. | 25 lbs. |
| Class 3, Division 1, other than propellants | As for class 1, provided that either the outer or inner package shall be thoroughly waterproof and both shall be without metal in the construction thereof | 50 lbs. | 5 lbs. |
| Class 3, Division 1, propellants | As for class 1 | 50 lbs. | 50 lbs. |
| Class 3, Division 2, other than Picric Acid and Wet Gun cotton | As for class 1 | 50 lbs. | 50 lbs. |
| Picric Acid | As for class 1 | Unlimited | Unlimited |
| Gun cotton so wetted with water as to be absolutely unflammable | As for class 1, provided that the inner or outer package or both of them shall be of such a nature, and so closed, as to prevent any material loss of moisture during conveyance. | Unlimited | Unlimited. |
| Class 4 | As for class 1 | 50 lbs. | 50 lbs. |
| Class 5 | Packed in water. A treble package the innermost package being a box permeable to water, enclosed in a case containing sufficient water to ensure the explosive being kept constantly wet, and the outer package containing sufficient water constantly to surround the case. Both the case and the outer package shall be of such construction as will not allow water to escape. If the explosives of such character that it cannot be packed in a thoroughly wet condition, it shall be packed in accordance with conditions set forth in a special authority. | 100 lbs. | 25 lbs. |
| Class 6 Division 1, other than Fire-cartridges for pistols | A single outer package Provided that the above general rule (2) shall not apply to explosives of this Division. Provided also that bullet cartridges of a calibre exceeding 0.5 inch and belonging to this Division shall be packed in such a manner that the point of any bullet cannot come in contact with the cap of another cartridge | Unlimited. | |
| Fire-cartridges for pistols. | (a) Not exceeding 50 in number in any one consignment — So packed in a single package that the bases lie alternately in opposite directions. The bases and pins shall be so fitted into perforations in millboard or other suitable material as to prevent the firing of any one of the said cartridges by an explosion in any other of the said cartridges. | 50 in number. | ... |

| Class. | Method of packing. | Amount in any one outer package. | * Amount in any one inner package. |
|--|---|----------------------------------|---|
| | (b) Exceeding 50 in number :—In an inner and outer package, the cartridges being packed in inner packages with millboard as above required. | 2,500 in number. | 50 in number. |
| Class 6, Division 2 . . . | Explosives made up into cartridges or charges for cannon, shells, torpedoes, mines, blasting or other like purposes shall be packed in such manner and in such quantity as is required for the same explosive when not so made up; provided that where a double package is required, the enclosing case of such cartridges or charges may, if it satisfies the conditions required for an inner package, be held to be such inner package. | | |
| | Other ammunition of this Division :—A single outer package. | 100 lbs. | |
| Class 6, Division 3, other than Detonators and Electric Detonators | As for class 1 Provided that bullet cartridges of a calibre exceeding 0.5 inch and belonging to this Division shall be packed in such a manner that the point of any bullet cannot come in contact with the cap of another cartridge. | 50 lbs. | 2 lbs. or 10 in number, whichever be the greater. |
| Detonators | (a) Not exceeding 1,000 in any one consignment :—As for class 1, provided that the detonators and the spaces between the same and between the sides of the inner package and the said detonators shall all be filled, as far as practicable, with fine sawdust or other similar material, a layer of felt or other soft yielding material shall be placed between both ends of all the detonators and the interior of the inner package in which the same are placed, in such manner, and so secured, that both ends of the detonators will rest upon the said cotton wool or other material, every inner package, if of metal, to be lined throughout with paper or other soft material, and (b) Exceeding 1,000 detonators :— The detonators shall be packed in inner packages, with sawdust and cotton wool as above described. Such inner packages shall be placed inside a substantial case of wood or metal, made and closed so as to prevent any of the inner packages escaping therefrom, and such case shall be placed inside an outer package in such manner and so secured as to leave a clear space of not less than three inches between the case and every part of the interior of the said outer package, notwithstanding that such clear space may if preferred, be filled with sawdust, straw, or other similar material, or may contain a light framework or battens of wood to keep the case aforesaid in position in the outer package; and (c) where the number of detonators exceeds 5,000, such outer package shall be provided with handles or other contrivance, by means of which it can be safely and conveniently carried. | 1,000 in number. | 100 in number. |
| | | 10,000 in number. | 100 in number. |

| Class. | Method of packing. | Amount in any one outer package | Amount in any one inner package |
|---------------------|---|---------------------------------|---------------------------------|
| Electric Detonators | As for class 1, provided that where the number in any outer package exceeds 3000, such outer package shall be provided with handles or other contrivance, by means of which it can be safely and conveniently carried | 5,000 in number. | 100 in number |
| Class 7, Division 1 | Double package, the inner package being hermetically closed, and contained in an outer package as above defined | 20 lbs. | 1 lb |
| Class 7, Division 2 | Single outer package provided that the above general rule (3) shall not apply to explosives of this Division. | 100 lbs | |

(6) Nothing in this rule shall be deemed to prohibit the use of an additional package whether inner or outer, provided that such additional package shall not be of such character as shall have been prohibited in writing by the Chief Inspector of Explosives.

(7) An explosive which is not an authorized explosive shall be packed in such manner, as may be directed by a special authority with reference to such explosive.

(8) On the outermost package there shall be affixed in conspicuous characters, by means of a brand or securely attached label or other mark, the word "Explosive," the name of the explosive, the number of the class and division to which it belongs, and the name of the manufacturer or sender.

In the case of explosives of classes 3 and 4, there shall be added the date of manufacture or issue from the factory, or such sign indicating such date as may be approved by the Chief Inspector of Explosives.

Provided first, that in the case of cartridges or charges for cannon, shells, mines blasting or other like purpose, which do not contain their own means of ignition, the marking shall be as for the explosive when not so made up.

Provided, secondly, that in the case of explosives of class 6 Division 1 (Safety Fuzes excepted), there shall be added the words "Not liable to explode in bulk."

Provided, thirdly, that in the case of Pin-fire cartridges for pistols there shall be added the words "Pin-fire cartridges."

Provided, fourthly, that in the case of Safety Fuzes or Gunpowder the word "Explosive" and the number of the class and division may be omitted, and

Provided, fifthly, that, where an outer package contains more than one explosive, the marking above required shall be affixed separately in respect of each explosive so contained.

(9) To meet special cases exemption may be granted by special authority from the observance of any one or more of the conditions imposed by this rule.

10. Whoever commits a breach of any of the foregoing rules relating to the packing of explosives for conveyance shall be punishable with fine which may extend to Rs. 1,000. Penalty.

11. The following general rules shall be observed with respect to the conveyance of explosives. Mode of conveyance.

I.—No explosive shall be conveyed from place to place unless packed in the manner provided for in the foregoing rules.

II.—There shall not be conveyed in any carriage or vessel which is being used for the conveyance of an explosive, any explosive of a different class and division, of whatsoever nature, which contains its own means of ignition, unless it is sufficiently separated therefrom to prevent any fire or explosion which may take place in one such explosive being communicated to another.

III.—Except in the case of small consignments carried by railway which may be unloaded at any time, explosives shall be loaded or unloaded only between sunrise and sunset. For the purposes of this rule no consignment of more than half a wagon-load booked to one station shall be deemed to be a small consignment.

IV.—Whilst the explosive is being loaded on or unloaded out of any carriage or vessel, no fire or artificial light, or any article which is liable to cause or communicate fire or explosion [such as charcoal, lucifer matches, articles for striking a light, petroleum to which the Indian Petroleum Act, 1899 (VIII of 1899), or any other Act for the time being in force regarding the importation, possession, and transport of petroleum, applies, or any spirit or oil or substance that gives forth an inflammable vapour at a temperature below 100 [Fahrenheit] shall be, or shall be allowed to be, brought, had or used dangerously near to such carriage, ship, or boat, and no smoking shall be allowed in, on, or dangerously near to, the same :

Provided that when the use of a light for the purposes of such loading or unloading is unavoidable, a lamp of such construction, position, or character as not to cause any danger from fire or explosion may be used; and no person, while handling any explosive (except an explosive of Division 1, Class 6, if packed in accordance with the packing rules) shall wear boots or shoes with iron or steel nails, heels or tips.

V.—In the loading or unloading of any explosive, the casks and packages containing the same shall be passed from hand to hand and not rolled upon the ground; they shall not be thrown or dropped down, but shall be carefully deposited and stowed.

VI.—The explosive shall not be conveyed except in the interior of a carriage so enclosed on all sides with wood or metal, or in the hold of a ship or boat having a close deck so closed, as effectually to protect the explosive against accident by fire from without. If the explosive cannot be so secured, it shall be completely covered with painted cloth, tarpaulin, or other suitable material so as to effectually protect it against communication of fire.

VII.—There shall not be any iron or steel in the interior of the portion of the carriage or vessel with which the case containing the explosive is or may come in contact, unless the same is effectually covered with leather, wood, cloth, or other suitable material.

VIII.—In the stowing of the explosive, due precautions shall be taken by means of a partition or otherwise and by careful stowing to secure such explosive from being brought into contact with, or endangered by, any other article or substance conveyed in such carriage or vessel which is liable to cause fire or explosion; and if the explosive is dangerously affected by water, due precautions shall be taken to exclude water from coming into contact with such explosive.

IX.—The amount of the explosives conveyed in any one carriage or vessel at any one time shall not exceed 2,000 lbs. unless the carriage be so enclosed on all sides with wood or metal, or the vessel have a close deck so closed, as effectually to protect the explosive against accident by fire from without, in which case the amount of the explosives conveyed shall not exceed the following:*

| | | | | | Tons. |
|----------------------------------|-----|-----|-----|-----|-------|
| In any one carriage on a railway | ... | ... | ... | ... | 10 |
| In any one other carriage | ... | ... | ... | ... | 2 |
| In any one vessel | ... | ... | ... | ... | 20 |

* Note.—This rule shall, in the case of dynamite conveyed by railway, be read subject to paragraph XII of Rule 13.

X.—Nothing in the foregoing rules (except Rule I) shall apply to any explosive of the 1st Division of the 6th (Ammunition) Class:

Provided that all due precautions are taken for the prevention of accidents.

*Conveyance other-
wise than by rail-
way.*

12. The following rules shall be observed with respect to the conveyance of explosives otherwise than by railway:

I.—No explosive shall be conveyed in a carriage or boat whilst carrying or plying for public passengers, unless the quantity is less than 5 lbs. and notice has been given beforehand to the person in charge of such carriage or boat: and all due precautions are taken for the prevention of accidents by fire or explosion:

Provided that there shall not be conveyed in any such carriage or boat any explosive of the 5th (Fulminate) Class or any explosive of the 3rd Division of the 6th (Ammunition) Class or of the 1st Division of the 7th (Firework) Class, except detonators packed according to Rule 9 to the number of 200.

Provided that the amount of explosive of the 5th (Fulminate) Class in the detonators shall in no case exceed in the aggregate 3 oz. (a certificate to this effect being given by the agent of the company by whom the detonators are tendered for transport).

Provided also that no other explosive is carried in the same compartment.

II.—With respect to the conveyance by carriage or vessel of explosives of the 5th (Fulminate) Class, or of the 3rd Division of the 6th (Ammunition) Class or of the 1st Division of the 7th (Firework) Class, or of larger quantities than 5 lbs. of any other explosive, the following regulations shall be observed:

(1) The person in charge of the carriage or vessel shall not drive or conduct the same in a dangerous or reckless manner and shall take all due precautions to avoid fire and explosion, and no person shall do any act or thing in relation to the explosive which tends to cause fire or explosion, and is not reasonably necessary for the conveyance of the explosive or for work immediately connected with such conveyance; and a person who is intoxicated shall not have charge of any carriage or vessel conveying explosive, and shall not be permitted to be in, or on, or attending the same.

(2) A person shall not forward to any warehouseman or carrier a consignment of explosive, unless he has given notice to such warehouseman or carrier beforehand, stating the name and quantity of the explosive proposed to be conveyed, and the name and address of the proposed consignee, and has had an intimation that the warehouseman or carrier is prepared to receive the

consignment, and a warehouseman or carrier shall not make such an intimation nor receive such consignment, unless he is prepared to receive it, and forthwith to despatch the same, or to deposit it in a magazine or at a place at which a person is licensed to possess the same.

- (3) The carriage or vessel conveying the explosive shall be in charge of, and constantly attended by, some competent person, or by a sufficient number of competent persons, and such persons shall not, if the amount of the explosive conveyed exceed 100 lbs., stop or delay for a longer time than may be reasonably necessary or stop unnecessarily at any place where such stopping would be attended with special public danger.

III.—No explosive belonging to class 1 (gunpowder class), class 2 (nitrate-mixture class), class 3 (nitro-compound class), class 4 (chlorate mixture class) or class 5 (fulminate class), shall be carried, otherwise than by rail, across any railway bridge over which reasonable facilities for the conveyance thereof by rail are afforded by the Railway Administration.

Provided that this prohibition shall not apply in respect of quantities of explosives of class 1 (gunpowder class) or class 3 (nitro-compound class) not exceeding 5 lbs. in weight.

13. The following rules shall be observed with respect to the conveyance of explosives by public railways:

*Conveyance
public railways.*

I.—No person shall send for carriage upon any railway any consignment of an explosive, unless he has given to the officer in charge of the railway station previous notice in writing which, at the option of the Railway Administration, may extend to 48 hours, of his intention to send such consignment, and stating the true name, description, quantity, and mode of packing of the explosive proposed to be conveyed, and his own name and address, and also the name and address of the proposed consignee, and unless he has had an intimation in writing from an authorized officer of the railway that such consignment will be received.

II.—No explosive which a Railway Administration shall, by any notice or regulation for the time being in force, notify that they will not receive, shall be brought, sent, or forwarded to or upon any railway of the said Railway Administration.

III.—Consignments of explosives shall be sent to the forwarding station and shall be received by the railway servants only at such times, between sunrise and sunset, as the Railway Administration may appoint; and every package containing any explosive proposed to be conveyed on any railway shall immediately on arrival at the station be unloaded and placed in a safe place under the special direction of the officer in charge of the station.

All gunpowder under despatch or receipt by a Government arsenal, dépôt, or factory shall be loaded or unloaded in the railway vans by Government servants employed in such arsenal, dépôt, or factory. In each van used by the railway for the transport of gunpowder the packages of gunpowder shall be secured in such a way as to prevent concussion when the train is in motion.

IV.—An explosive shall be removed by the consignee from the receiving station during the twelve hours of daylight after arrival: if this condition is not strictly complied with, the Railway Administration may return the consignment to the consignor at his risk and expense. And such packages shall in the meanwhile be kept as far away from the station buildings as possible, in the wagon they were conveyed in, or, if unloaded, shall be completely covered with tarpaulins or other suitable material, and if necessary, shall be protected by a police guard.

V.—The Railway Administration may refuse to receive any packages which they suspect to contain any explosive packed or sent in contravention of these regulations. And in case any package, which the Railway Administration suspect, shall be upon any railway, the Railway Administration may open, or require to be opened, such package to ascertain the fact, at the risk and expense of the consignor and may return the explosive contained in the package to the consignor at his risk and expense, keeping the packages, pending such return in the manner prescribed in the preceding rule.

VI.—Subject to the exception provided for in clause (e), no explosive shall be conveyed by passenger train except of the kinds and in the manner hereinafter specified in this rule:

- (a) Safety-cartridges and percussion-caps and safety-fuses (for blasting), also fog signals for railway use which may be conveyed in ordinary wagons or carriages.

- (b) Explosives of the 3rd (nitro-compound) class which may be carried in the form of cartridges up to the limit of 5 lbs.:

Provided that no detonators are carried in the same compartment.

- (c) Detonators packed according to Rule 9 may be carried to the number of 200:

Provided that in no case the amount of fulminate of mercury in the package or packages containing the detonators exceeds in the aggregate 3 oz. (a

certificate to this effect being given by the company, firm, or person tendering the detonators for transport or by its or his agent):

Provided also that no other explosive is carried in the same compartment.

(d) Sporting gunpowder or non-safety cartridges packed in double cases as before provided, so long as the gunpowder is contained in one-pound tin canisters packed in a stout wooden case with an outer covering of tin or zinc completely spark-proof, or in metal-lined cases of a pattern approved by the Railway Administration. But no outer case shall contain more than 25 lbs. of gunpowder, and the total consignment of gunpowder or non-safety cartridges by one train shall not exceed 80 lbs.

(e) Explosive may be carried by mixed trains on any line on which goods trains are not running, subject to the conditions that they are loaded in properly constructed powder vans; that not more than one powder-van containing explosives is forwarded at any one time by a mixed train; that there are not less than three vehicles between the powder-van and either the engine or the passenger coaches, that the powder van is close coupled to the adjoining vehicles and that directly a powder-van containing explosives arrives at a section on which goods trains are running, it is detached from the mixed train.

VII.—Not more than five carriages containing explosives shall be loaded or unloaded at any railway station, or be conveyed by any one train at any one time; and the quantity of explosive to be contained in any one carriage shall not exceed two thirds of the normal load, unless the carriages shall be specially built and approved by the Railway Board for the conveyance of explosives. But nothing in this clause shall be held to apply to separate consignments of safety cartridges for small arms.

VIII.—There shall not be conveyed in the same carriage with any explosive any lucifer or other matches, fuzes, pipelights, acids, naphtha, paraffine, petroleum to which the Indian Petroleum Act, 1899 (VIII of 1899), or any other Act for the time being in force regarding the importation, possession, and transport of petroleum, applies or any other volatile spirit substance liable to give off an inflammable vapour or liable to spontaneous ignition, or to cause or communicate fire or explosion.

IX.—The consignor shall attach to the consignment note a certificate or (provided the original is produced for verification) copy of a certificate, signed by an officer authorized by the Local Government in this behalf that the explosive if it is an explosive of class 3 or 4, is of the standard purity; and further in the case of dynamite, and all nitro-glycerine compounds, that there are no signs of exuded nitro-glycerine or of liquifaction. The consignor shall also certify that the explosive has been packed in accordance with the packing rules in force in England or in British India.

X.—In the case of explosives under clauses 3 and 4, the outer packages shall be marked with the date of the manufacture of the explosives. The abovementioned certificate shall contain sufficient information to admit of all packages being easily recognized.

XI.—The certificate referred to in Rule 13 (IX) shall be valid for six months after date, if the examination has been made between the 15th October and 31st March, but any Railway Administration which accepts dynamite and other nitro-glycerine compounds for transport may demand a fresh certificate for these explosives, if presented for conveyance between 1st April and 15th October (both inclusive).

XII.—Packages containing dynamite and other blasting explosives of the 3rd (nitro-compound) class, or explosives of the 4th (chlorate-mixture), 5th (fulminate) classes or of the 1st division of the 7th (firework) class shall be stowed in one layer only and secured so as to prevent movement during transit, and the gross load in any one wagon shall not exceed 3 tons:

Provided that, if the packages of explosive are in rectangular form and are properly secured so as to prevent movement during transit, they may be stowed in any number of layers not exceeding five, and the gross load in any one wagon shall not exceed 5 tons.

XIII.—No explosive of the 5th (fulminate) class or of the 3rd division of the 6th (ammunition) class, or of the 7th (firework) class shall be carried in the same train with any explosive not of the class and division to which it belongs, unless it be sufficiently separated therefrom to prevent any fire or explosion which may take place in one such explosive being communicated to another.

XIV.—Wagons used for the carriage of explosives shall be examined to see that they are spark-proof, and have been cleaned out before they are loaded. Hair, cloth, hides, or other suitable materials shall be spread on the floor of the wagon and between each layer of packages, except when the packages are covered with gunny or felt, or contain safety cartridges for small arms packed in tin-lined service-pattern boxes.

XV.—Wagons containing explosives shall be loaded and unloaded on sidings distant as far as possible from the station buildings.

XVI.—Packages containing explosives other than those referred to in Rule 13 (XII) shall not be stored in more than three layers one above the other. But if the packages are in rectangular form and of uniform size (provided they are double packages, and are so secured as to prevent movement during transit) they may be packed in five layers one above the other. But in the case of safety cartridges, for small arms packed in tin-lined service pattern boxes, there is no restriction. Subject to the provisions of Rule 11 (III), the loading and unloading of explosives when once begun shall be diligently proceeded with until the same is completed.

XVII.—When the train is being marshalled, wagons loaded with explosives may be shunted by a locomotive, if they are separated from the engine by not less than three wagons containing no explosive nor easily inflammable substance. This precaution is not necessary with wagons specially constructed for the carriage of explosives. The speed of these movements shall be restricted to five miles an hour, they shall be superintended by a duly authorized officer, who shall be held responsible for the observance of these orders. Flying shunts are strictly prohibited.

XVIII.—Wagons containing explosives shall be placed at the end of the train away from the locomotive, and shall be close-coupled to one another as well as to the adjoining wagons, and shall be preceded and followed by three wagons not loaded with explosives or other traffic of an inflammable nature.

Provided as follows

(a) On the Darjeeling-Himalayan Railway, wagons containing explosives and adjoining wagons need not be close coupled to one another; and

(b) On the Nilgiri Railway only one wagon need intervene between the locomotive and wagons containing explosives.

XIX.—If the wagons employed in the transport of explosives are provided with brakes other than iron brakes the brakes thereon shall on no account be worked while the wagons are running with a train, nor shall brakes, other than iron brakes, on vehicle immediately adjoining such wagons, be worked while such wagons are so running.

XX.—Wagons shall in every case be locked when loaded with explosives.

XXI.—All operations connected with the transshipment of explosives at junction stations shall take place during daylight.

14. Whoever commits a breach of any of the foregoing rules relating to the mode of conveyance of explosives shall be punishable with a fine which may extend to Rs. 100. *Penalty.*

IMPORTATION.

15. Subject to the following provisos, an explosive shall not be imported by sea or land into British India, except under and in accordance with the conditions of a license to import the explosive. *License when required for importation.*

Provided that explosives may be imported by sea, previous to the grant of an importation license, in accordance with rules I, II, III, and IV of this rule.

I.—Any explosive other than an explosive specified in rule 18 may, previously to the grant of license, to import if it is included in a list published under clause (1) of rule 9 and for the time being in force, and if it is certified to be of British manufacture or, if not of British manufacture, if it is imported from the United Kingdom and covered by the certificate granted by one of His Majesty's Inspectors of Explosives in England, be landed in accordance with such regulations as the Local Government may prescribe in this behalf and be stored in a place set apart by the Local Government for this purpose, or in any private magazine declared by the Local Government to be suitable therefor.

II.—Any such explosive of British manufacture, may also be transported by rail to any such private magazines previously to the grant of a license to import.

III.—The Governor-General in Council may extend to any such explosive not of British manufacture regarding which he is satisfied that it has been manufactured under adequate official supervision the privilege of landing granted by rule I, but such explosive may not be transported by rail until an importation license has been granted.

IV.—Before any explosive is landed under rules I and III, the consignee shall give to the Chief Customs officer of the port such undertaking, with or without security, as the said officer thinks sufficient, to obey, in the event of the explosive failing to satisfy the prescribed tests, such directions as to its disposal as the Local Government may see fit to prescribe.

If samples are taken, the procedure shall be that described in rule 23.

Provided, also, that explosives of British manufacture may be imported by land, previous to the grant of an importation license, in accordance with rules V and VI of this rule.

V.—Explosives (except those specified in rule 18) included in a list published under rule 9 (1); and certified to be of British manufacture, may, previously to the grant of a license, be imported and conveyed under such conditions as the Local Government may prescribe, to a magazine appointed in this behalf by the Local Government.

VI—Before an explosive is imported under rule V, the consignee shall give to the Magistrate of the District in which the magazine appointed under rule V is situate, or to the Commissioner of Police if such magazine is situate in a Presidency town or Rangoon, such notice of his intention to import the explosive as the Local Government may prescribe, and shall give such undertaking, with or without security, as the said District Magistrate or Commissioner of Police may require, that he will, in the event of the explosive failing to satisfy the prescribed tests, comply with such directions as to its disposal as the Local Government may issue.

If samples are taken, the procedure laid down in rule 24 shall be followed.

Penalty.

16. Whoever imports an explosive in contravention of rule 15 shall be punishable with fine which may extend to three thousand rupees.

Ports at which importation is lawful.

17. An explosive shall not be imported by sea except at one of the ports of Calcutta (including Moyapur and Diamond Harbour), Madras, Bombay, Rangoon, Calcut, Karachi, Aden and (in the case of crackers only) Negapatam and Moulmein. But a license to import an explosive by sea from Rangoon into the port of Akyab, Sandoway, Kyauk Phyo, Tavoy, Mergui or Victoria Point as the case may be, may be granted by the Magistrate of the District in which such port is situated. The fee payable in respect of each such license shall be one rupee, and the license shall be in Form A in the schedule hereto annexed.

Grant of licenses for importation in certain cases.

18. If the explosive is gunpowder or an explosive of the 1st division of the 6th (ammunition) class or of the 7th (firework) class, the license to import the same may be granted,—

- (a) if the importation is by sea, by the Commissioner of Police of Calcutta, Madras, Bombay or Rangoon, or the District Magistrate of Calcut, Karachi, Aden, Negapatam or Moulmein as the case may be, and
- (b) if the importation is by land, by the officer appointed to grant licenses under rule 21.

Fees for licenses granted under Rule 18.

19. The fee payable in respect of each such license shall be Rs. 10; but if any explosive imported under a license into a British port is exported thence to another British port named in Rule 17 the necessary license for such re-import may be granted on payment of a fee of one rupee instead of Rs. 10.

Grant of licenses for importation by sea in cases not provided for by rule 18.

20. Licenses for the importation by sea of any explosives other than those specified in Rule 18 shall be granted by the Local Government or by some officer specially authorized by the Local Government in this behalf.

Grant of licenses for importation by land and fees for such licenses.

21. Licenses for the importation of explosives into British India by land shall be granted by the Magistrate of the District to which the explosives are consigned, or, if the explosives are consigned to a Presidency-town, or Rangoon by the Commissioner of Police. The fee payable in respect of each such license shall be Rs. 10.

Conditions for granting licenses under Rule 20.

22. No license shall be granted for the importation of any explosives of the description referred to in Rule 20 unless—

- (a) it is an explosive authorized for manufacture in, or importation into, the United Kingdom for general sale,
- (b) its importation is recommended by the Chief Inspector of Explosives with the Government of India, and
- (c) if it is an explosive for which a test or examination has been prescribed by or under the orders of the Government of India, samples of it taken as hereinafter provided are certified by the Chemical Examiner or some other officer appointed by the Local Government in this behalf to have passed the test or examination from time to time prescribed.

Testing of importations by sea in certain cases.

23. On the arrival in any port at which the importation of explosives is lawful, of a ship having on board an explosive other than an explosive of the description referred to in Rule 18, such officer as the Chief Customs Officer authorizes in this behalf shall, as soon as may be, proceed on board and shall, if testing or examination is requisite under the last preceding rule, obtain samples of the explosive.

All explosives of which samples are taken for examination shall forthwith be deposited in a place or magazine set apart or notified under rule 15-1, and shall not be distributed for use until the importer has received from the licensing authority notice that it may be so distributed.

The master of the ship shall give to the said officer, without charge, such samples as he may require. The said officer shall affix to each such sample the name of the ship and of the consignee and such other distinguishing marks as he may think necessary, and shall forward the same to the Chemical Examiner or officer, as aforesaid, for report.

The Chemical Examiner or officer as aforesaid, after testing the said samples, shall without delay forward to the licensing authority, through the Chief Customs Officer, a report under his signature certifying whether the explosive has satisfied the prescribed test.

Testing of importations by land in certain cases.

24. When an explosive imported by land has been conveyed to, and deposited in, the magazine referred to in rule 15-V, the person owning or being in charge of such magazine shall forthwith, if the testing or examination of the explosive is required by Rule 22,

deliver free of charge to such officer or person as may be appointed by the Local Government in this behalf such samples as he may require. No explosive of which a sample has been so taken, shall be removed to its destination or distributed for use until the importer or the person in charge of the magazine has received from the licensing authority a notice that it may be so removed or distributed.

The officer or person appointed as aforesaid shall affix to the sample received by him the name of the consignee and such other distinguishing marks as he may think necessary, and shall forward the sample for report to the Chemical Examiner or other officer appointed by the Local Government in this behalf.

The Chemical Examiner or such other officer as aforesaid shall, after testing the sample, without delay forward to the licensing authority, through the officer or person from whom he received the sample, a report under his signature certifying whether the prescribed test has been satisfied.

25. Explosives, other than those referred to in Rule 18, which have already undergone the test prescribed by Rules 23 and 24 at the ports of Calcutta (including Moyapur and Diamond Harbour), Madras, Bombay, Rangoon, Calicut, Karachi, or Aden, may be re-imported by sea into any other of those ports under a license granted under Rule 20 without re-testing, but subject, in the case of such explosives as are mentioned in Rule 13, Clause IX, to the production of the certificate prescribed in that clause. *Re-importation from one prescribed port into another.*

Such certificate shall be valid for six months after date, if the examination has been made between the 15th October and 31st March; but in the case of dynamite, a fresh certificate may be demanded if the consignment is imported between the 1st April and 15th October (both inclusive).

26. The period for which a license to import an explosive, granted under Rules 20 and 21 shall continue in force shall not exceed such period as may seem necessary to the authority granting the license. *Duration of license granted under Rules 20 and 21.*

27. The fee payable on a license granted under Rule 20 shall be Rs. 10, but if any explosive imported under a license into a British port is exported thence to another British port named in Rule 17, the necessary license for such re-import may be granted on payment of a fee of one rupee instead of Rs. 10. *Fees for licenses granted under Rule 20.*

28. Every license granted under Rules 18, 20 and 21, shall be in Form A in the Schedule hereto annexed, and shall be subject to the conditions therein prescribed, and also to such additional conditions with respect to the time and place of unloading, landing, delivery and conveyance of the explosive, and such other conditions as may in each case be thought by the licensing officer to be necessary for the public safety or in the interest of the State. *Form of licenses under Rules 18, 20 and 21.*

29. Whoever commits a breach of any condition, subject to which a license under Rules 18, 20 and 21 is granted, shall be punishable with fine which may extend to three thousand rupees. *Penalty.*

30. (1) Any of the officers mentioned in clause (2) of this rule may, within the areas respectively specified in that clause, but subject to the provisions of the Indian Arms Act, 1878 (XI of 1878), and of any rules for the time being in force thereunder, in cases to which that Act applies,— *Powers of inspection, search, seizure, etc.*

(a) enter, inspect and examine any carriage or vessel in which an explosive is being transported or imported under a license granted under these rules or any prior rules made under the Indian Explosives Act, 1884 (IV of 1884), or in which he has reason to believe that an explosive has been or is being transported or imported in contravention of the said rules or Act, and may enter, inspect and examine any magazine or place in which explosives are stored under the provisions of rule 15;

(b) search for explosives in any such carriage, vessel, magazine, or place;

(c) take samples of any explosives found therein, on payment of the value thereof, if payment can be made at the time the samples are taken; and

(d) seize, detain, remove and, if necessary, destroy or otherwise render harmless any explosive found therein in respect of which he has reason to believe that any of the provisions of the said rules or Act have been contravened.

(2) The officers and areas referred to in clause (1) of this rule are:—

Officers.

Areas.

The Chief Inspector and Inspectors of Explosives. In all parts of British India.

All District Magistrates.

Within their respective districts.

All Magistrates subordinate to the District Magistrate.

Within the areas respectively subject to their jurisdiction.

The Commissioner of Police, and all Police-officers of rank not below that of Inspector, if specially deputed in this behalf by the Commissioner of Police.

In Presidency towns and Rangoon.

All Police-officers of rank not below that of Inspector.

Within the respective areas over which their authority extends.

(3) Whenever the Chief Inspector or an Inspector of Explosives, or any Magistrate subordinate to the District Magistrate, or any Police-officer seizes, detains or removes any explosive under this rule, he shall report the fact to the District Magistrate or (in a Presidency town or its suburbs or in Rangoon) the Commissioner of Police.

(4) Neither the Chief Inspector nor an Inspector of Explosives, nor any Magistrate subordinate to the District Magistrate nor any Police-officer shall under these rules destroy or otherwise render harmless any explosive without the previous sanction of the District Magistrate or (in a Presidency-town or its suburbs or in Rangoon) the Commissioner of Police unless the matter appears urgent and fraught with serious public danger.

(5) Whenever any officer destroys any explosive or otherwise renders it harmless, he shall take and keep a sample thereof, and shall if required, give a portion of the sample to the person owning the explosives or having the same under his control at the time of seizure, and, whenever any officer other than the District Magistrate or Commissioner of Police so deals with any explosive, he shall report the circumstances to the District Magistrate or (in a Presidency-town or its suburbs or in Rangoon) the Commissioner of Police.

GENERAL.

Forfeiture of licenses. 31 Every license granted under these rules shall be liable to be forfeited on breach of any of the conditions subject to which it is granted.

Exemption from penalties of persons carrying on business of deceased or disabled licensees. 32. If a person licensed to import an explosive dies or becomes bankrupt or becomes mentally incapable or otherwise disabled, the person carrying on the business of such licensee shall not be liable to any penalty or forfeiture under the Indian Explosives Act, 1884 (IV of 1884), or the rules thereunder for acting under the license during such reasonable time as may be necessary to allow him to make an application to the authority granting the license for a new license in his own name during the currency of the unexpired portion of the original license. Such new license shall be granted on payment of one rupee.

Method of levying fees. 33. All fees chargeable for licenses under these rules shall ordinarily be levied by means of impressed stamps. An application for the grant or the renewal of a license shall bear the proper stamp provided that, if it is refused, the value of the separate stamp (if any) which may have been already provided by the applicant for the desired license or renewed license, *minus* the deductions prescribed by section 54 of the Indian Stamp Act, 1899 (II of 1899), may be refunded to the applicant. An application should not be made on the stamped paper intended for the license or renewed license, but, where this has been wrongly done, the value of the stamp may be refunded *minus* —

- (i) the value of the stamp which should have been affixed to the application, and
- (ii) the deductions prescribed as aforesaid.

Where the fees leviable under these rules have been made over to any local body, the fees shall be paid in such manner as that local authority may from time to time direct.

Grant of duplicate licenses. 34. When a license granted in accordance with these rules is lost, or accidentally destroyed, a duplicate may be granted to the licensee on payment of a fee of 8 annas.

Production of licenses. 35 Any person holding a license, or acting under a license granted in accordance with these rules, shall be bound to produce the same when called upon to do so by any Magistrate, or by any Police officer in charge of a Police station, or by any Police officer of higher rank.

Control over officers. 36 All Magistrates or other authorities acting under these rules shall perform their duties subject to the control of their executive superiors and of the Local Government.

Power to extend effect of license. 37. Any authority empowered to grant a license under the foregoing rules may, if he thinks fit, direct by an order written on the license that it shall have the effect of a like license under the Indian Arms Act, 1878 (XI of 1878).

Importation without license. 38. Any persons lawfully entitled under the Indian Arms Act, 1878 (XI of 1878), or the rules thereunder, to possess any explosive coming under the head of ammunition, as defined in that Act, may import without license under these rules any such explosive in such quantities as may be prescribed by that Act or the rules thereunder, or, when no quantities are prescribed, in reasonable quantities for his own private use; but, when an explosive is so imported, the Collector of Customs or any other officer empowered by the Local Government in this behalf by name or by virtue of his office may at any time detain such explosive until he receives the orders of the Local Government thereon.

FORM A.

(See Rules 18, 20, 21 and 28.)

FEE TEN RUPEES IN STAMPS.

License to import Explosives

 _____ of _____

CONDITIONS.

1. This license is given subject to the provisions of the Indian Explosives Act, 1884 (IV of 1884), and the rules thereunder. Certain general rules are quoted separately below.
2. This license shall become void after expiry of the period named thereon.
3. This license is valid for importation only; if the articles named herein are to be transported to any place outside the ^{Presidency town} _{town of}, they must be protected by a transport license, to be issued in accordance with the rules under the Indian Arms Act, 1878 (XI of 1878), except in the case of explosives despatched to places or magazines set apart or notified under the proviso to rule 15.
4. On the outside of each package there shall be affixed in conspicuous characters by means of a brand or securely attached label or mark the word "Explosive," followed by the name of the explosives or other description of the contents and the name and address of the owners or senders.

GENERAL RULES.

- * * * * *
31. Every license granted under these rules shall be liable to be forfeited on breach of any of the conditions subject to which it is granted. *Forfeiture of license.*
 32. If a person licensed to import an explosive dies or becomes bankrupt or becomes mentally incapable or otherwise disabled, the person carrying on the business of such licensee shall not be liable to any penalty or forfeiture under the Indian Explosives Act, 1884 (IV of 1884) or the rules thereunder for acting under the license during such reasonable time as may be necessary to allow him to make an application to the authority granting the license for a new license in his own name during the currency of the unexpired portion of the original license. Such new license shall be granted on the payment of one rupee. *Exemption from penalties of persons carrying on business of deceased or disabled licensee.*

* Note.--In the case of explosives imported into a town other than a Presidency town as defined in the General Clauses Act, 1897 (X of 1897), section 3, clause (41), the name of the town should be inserted.

Method of levying fees.

33. All fees chargeable for licenses under these rules shall ordinarily be levied by means of impressed stamps. An application for the grant or the renewal of a license shall bear the proper stamp: provided that, if it is refused, the value of the separate stamp (if any) which may have been already provided by the applicant for the desired license or renewed license, *minus* the deductions prescribed by section 54 of the Indian Stamp Act, 1899 (II of 1899), may be refunded to the applicant. An application should not be made on the stamped paper intended for the license or renewed license; but where this has been wrongly done, the value of the stamp may be refunded *minus*—

(i) the value of the stamp which should have been affixed to the application, and

(ii) the deductions prescribed as aforesaid.

Where the fees leviable under these rules have been made over to any local body, the fees shall be paid in such manner as that local authority may from time to time direct.

Grant of duplicate licenses.

34. When a license granted in accordance with these rules is lost, or accidentally destroyed, a duplicate may be granted to the licensee on payment of a fee of 8 annas.

Production of licenses.

35. Any person holding a license, or acting under a license granted in accordance with these rules, shall be bound to produce the same when called upon to do so by any Magistrate, or by any Police officer in charge of a Police station, or by any Police officer of higher rank.

Rule for Testing Explosives.

With reference to Rule 22 of the Rules to regulate the transport and importation of explosives published with this Notification and in supersession of the Notification of the Government of India in the Home Department, No 5529 (Public), dated the 11th October 1901, the Governor-General in Council is pleased to make the following rule on the subject of the tests which explosives should be required to pass before their importation is permitted.

RULE.

Class 1.—Gunpowder class. Gunpowder is not required to pass a test.

Class 2.—Nitrate-mixture class. Nitrate-mixture explosives are not ordinarily required to pass a test. The Local Government, however, or the authorized officer granting the import license under Rules 20 and 21 of the Rules to regulate the transport and importation of explosives published with this Notification may in any particular case or class of cases require that a sample of the explosive which is to be imported be sent first to the Chemical Examiner for an analysis of its constituent parts.

Class 3.—Nitro-compound class. It is for explosives of this class that testing is chiefly required in respect to the purity of their composition and their liability to liquefaction or exudation. The tests prescribed for nitro-compound explosives are contained in Schedule A attached to this rule.

Class 4.—Chlorate-mixture class. See Schedule A for remarks regarding the testing of this class (*).

Class 5.—Fulminate class. No test has been laid down for explosives of the Fulminate class (*).

Class 6.—Ammunition class. No test is required for explosives of the 1st Division of this class. If the substances of which explosives of the 2nd and 3rd Divisions are composed have to be tested under the preceding rules, they will be equally liable to be tested when enclosed in any case or contrivance and thus falling under the Ammunition class.

Class 7.—Firework class. Explosives of this class are not required to pass a test.

SCHEDULE A.

Heat Test as applied to Explosives of the Nitro-compound Class.

GENERAL INSTRUCTIONS.

Apparatus required.

1. A water bath, consisting of a spherical glass or copper vessel [(a) Fig. 1] of about 8 inches diameter, and with an aperture of about 5 inches; the bath is filled with water to within a quarter of an inch of the edge. It has a loose cover of sheet copper about 6 inches in diameter (b), and rests on a tripod stand about 14 inches high (c), which is covered with coarse iron wire gauze (e), and is surrounded with a screen of thin sheet tin or copper (d). Within the latter is placed an Argand burner (f), with glass chimney. The cover (b) has

(a) Licenses are not at present given for the importation into British India of any explosives of these classes.

four holes arranged as seen in Fig. II, No. 4 to receive the regulator, No. 3 the thermometer, Nos. 1 and 2 the test-tubes containing the gun-cotton or other materials to be tested. Around holes 1 and 2 on the under side of the cover are soldered three pieces of brass wire with points slightly converging (Fig. III); these act as springs and allow the test-tubes to be easily placed in position and removed.

Fig. I.

Fig. II.

Fig. IV.

Fig. III.

* 2. Scheibler's or Page's temperature regulator.

* 3. Two cells of Le Clanché's battery No. 1

* 4. A few yards of insulated copper wire

} if Scheibler's regulator is used.

5. Test-tubes from $5\frac{1}{2}$ to $5\frac{3}{4}$ inches long, and of such diameter that they will hold from 20 to 22 cubic centimetres of water when filled to a height of 5 inches.

6. India-rubber stoppers, fitting the test-tubes and carrying an arrangement for holding the test-paper, *viz.*, a narrow glass tube passing through the centre of the stopper, drawn out so as to form a hook, or terminating in a platinum wire hook (Fig. IV).

7. A thermometer, with range not less than from 30° to 212° Fahrenheit.

8. A minute clock.

Materials required.

(a) *Test-paper.*—The test-paper is prepared as follows:—45 grains of white maize starch (cornflour), previously washed with cold water, are added to $8\frac{1}{2}$ ounces of distilled water, the mixture is stirred, heated to boiling, and kept gently boiling for 10 minutes; 15 grains of pure potassium iodide (*i.e.*, which has been re-crystallized from alcohol) are dissolved in $8\frac{1}{2}$ ounces of distilled water. The two solutions are thoroughly mixed and allowed to get cold. Strips, or sheets, of best white English filter paper, weighing air dry, from 4.1 to 4.6 grammes per 100 square inches, previously washed with water and re-dried, are dipped into the solution thus prepared, weighing, air dry, about 6.5 grammes per 100 square inches, and allowed to remain in it for not less than 10 seconds; they are then allowed to drain and dry in a place free from laboratory fumes and dust. The upper and lower margins of the strips, or sheets, are cut off, and the paper is preserved in well-stoppered or cork bottles and in the dark.† The dimensions of the pieces of test-paper used are about $\frac{1}{10}$ inch by $\frac{1}{10}$ inch (10 mm. by 20 mm.).

* This is not absolutely required, as the temperature of the bath can be kept constant by proper attention to the heating flame.

† When a paper is freshly prepared, and as long as it remains in good condition, a drop of dilute acetic acid, put on the paper with a glass rod, produces no coloration. In process of time, however, the stronger the light to which the paper is exposed, the sooner a drop of acid produces a brown or bluish coloration (a single hour of direct sunlight produces a marked effect), and whenever this is the case the paper should be rejected. After preparation the paper should be kept in the dark for a month before being taken into use. After that, if carefully kept in the dark, it will remain good for six months or more, but should be tested from time to time as above.

(b) *Standard tint paper.*—A solution of caramel in water is made of such concentration that when diluted one hundred times (10 cc. made up to 1 litre) the tint of this diluted solution equals the tint produced by the Nessler test in 100 cc. water containing 0.000075 grm. of ammonia or 0.00023505 grm. of chloride of ammonium. With this caramel solution lines are drawn on strips of white filter paper* by means of a clean quill pen. When the marks thus produced are dry the paper is cut into pieces of the same size as the test-paper previously described, in such a way that each piece has a brown line across it near the middle of its length, and only such strips are preserved in which the brown line has a breadth varying from $\frac{1}{8}$ mm. to 1 mm ($\frac{1}{16}$ of an inch to $\frac{1}{16}$ of an inch).

I.—Testing Dynamite, Blasting Gelatine, and other Explosives of the First Division of the Nitro-compound class.

A. DYNAMITE, ETC., ETC.

Nitro-Glycerine preparations, from which the nitro-glycerine can be extracted in the manner described below, *must* satisfy the following test.

This test, however, though at present looked upon as the most important, as far as testing the purity of the nitro-glycerine is concerned, is in England only one of several which any given sample of nitro-glycerine preparation has to satisfy in order to establish its compliance with the definition in the Authorised List.

Apparatus required.

A funnel 2 inches across (d), a cylindrical measure divided into grains (e). (See sketch.)

Mode of operation.

About 300 to 400 grains of dynamite (b) finely divided are placed into the funnel which has previously been loosely plugged by some freshly-ignited asbestos (a).

The surface is smoothed by means of a flat-headed glass rod or stopper, and some clean washed and dried Kieselguhr (c) is spread over it to the depth of about $\frac{1}{8}$ inch.

Water is next carefully dropped from a wash bottle upon this Kieselguhr, and when the first portion has been soaked up more is added; this is repeated until sufficient nitro-glycerine has been collected in the graduated measure (e) below.

If any water should have passed through with the nitro-glycerine, it should be removed with a piece of blotting paper, and the nitro-glycerine, if necessary, filtered through a dry paper filter.

Application of the Test.

The thermometer is fixed so as to be inserted through the lid of the water bath described under I, into the water (which is to be steadily maintained at a temperature of 160° Fahr †) to a depth of 2 $\frac{1}{4}$ inches. Fifty grains of nitro-glycerine to be tested are weighed into a test-tube in such a way as not to soil the sides of the tube. A test-paper

*This paper must be carefully washed with distilled water in the first instance, to remove any traces of bleaching matter, and dried.

† For explosives supplied for His Majesty's Military and Naval Services the temperature is fixed by the War Office at 180°.

is fixed on the hook of the glass rod so that when inserted into the tube it will be in a vertical position. A sufficient amount of a mixture of half distilled water and half glycerine to moisten the upper half of the paper is now applied to the upper edge of the test-paper by means of a camel's-hair pencil, the cork carrying the rod and paper is fixed into the test-tube and the position of the paper adjusted, so that its lower edge is about half-way down the tube; the latter is then inserted through one of the perforations of the cover to such a depth that the lower margin of the moistened part of the paper is about five-eighths of an inch above the surface of the cover. The test is complete when the faint brown line, which after a time makes its appearance at the line of boundary between the dry and moist part of the paper, equals in tint the brown line of the standard tint paper.

The nitro-glycerine under examination will not be considered to have satisfied the test unless the time necessary to produce the standard tint as above described is at *least* 15 minutes.

B.—BLASTING GELATINE, GELATINE DYNAMITE, AND ANALOGOUS PREPARATIONS.

Fifty (50) grains of blasting gelatine are to be intimately incorporated with one hundred (100) grains of French chalk.* The mixture is to be gradually introduced into a test-tube of the dimensions prescribed above for the dynamite heat test, with the aid of gentle tapping upon the table, between the introduction of successive portions of the mixture into the tube, so that when the tube contains all the mixture it shall be filled to the extent of $1\frac{1}{4}$ inches (one inch and three quarters) of its height. The test-paper is then to be inserted and the heat is to be applied in the manner prescribed above for the dynamite heat test, and the sample tested is to withstand exposure to 160° Fahr. for a period of ten (10) minutes, before producing a discoloration of the test-papers corresponding in tint to the standard colour test which is employed for governing the results of the dynamite heat test.

(For Exudation and Liquefaction test for Blasting Gelatine, etc., etc., see Appendix).

N. B.—Non-gelatinized nitro-glycerine preparations from which the nitro-glycerine cannot be expelled by water, are tested without any previous separation of the ingredients, the temperature being as above (160° Fahr.) and the time being seven (7) minutes.

C.—CORDITE AND BALLISTITE.

1. Apparatus required.

The apparatus necessary for the application of the heat test to cordite is identical with that described above for explosives of the nitro-compound class generally† with the addition of mill and a nest of sieves‡ similar to those used at Waltham Abbey for preparing the cordite for testing (see instructions below).

2. Preparation of the sample to be tested.

Pieces half an inch long are cut from one end of every stick selected for the test; in the case of the thicker cordites, each piece so cut is further sub-divided into about four portions. These cut pieces are then passed once through the mill, the first portion of material, which passes through being rejected on account of the possible presence of foreign matter from the mill. The ground material is put on the top sieve of the nest of sieves and sifted. The portion which has passed through the top sieve and been stopped by the second is taken for the test. If the mill is properly set the greater portion of the ground material will be of the proper size.

If the volatile matter in the explosive exceed 0.5 per cent. the sifted material should be dried at a temperature not exceeding 140° Fahr. until the proportion does not exceed 0.5 per cent.

* This can be readily effected by carefully working the two materials together with a wooden pestle in a wooden Mortar.

The French chalk should be of good commercial quality, and, after being carefully washed with distilled water and dried in a water oven, it should be exposed under a bell jar to moist air until it has taken up about 0.5 per cent. of moisture. It should then be bottled for use; and with ordinary care the limits of 0.5 per cent. can be maintained in keeping.

† In the Waltham Abbey apparatus the cover (Fig. II) has all the holes around the circumference instead of having one in the centre and three around the circumference.

‡ A nest of two sieves with the holes drilled in sheet copper. The holes in the top sieve have a diameter = 14 B. W. G.; those in the second = 21 B. W. G.

If too hard for the mill, it may be softened by exposure to the vapour of acetone, or reduced to the necessary degree of sub-division by means of a sharp moderately coarse rasp. Should it have become too soft in the acetone vapour for the mill, it should be cut up into small pieces which may be brought to any desired degree of hardness by simple exposure to air.

Explosives which consist partly of gelatinized collodion cotton and partly of ungelatinized gun-cotton are best reduced to powder by a rasp, or softened by exposure to mixed ether and alcohol vapour at a temperature of 90° to 100° Fahr.

After each sample has been ground, the mill must be taken to pieces and carefully cleaned.

3. Application of the Test.

The thermometer is fixed so as to be inserted through the lid of the water bath described under 1, so as to be immersed in the water to a depth of $2\frac{1}{4}$ inches. The water is maintained at a constant temperature of 180° Fahr. When this temperature is reached 2 grains of the sifted cordite are put into one of the test-tubes, and collected at the bottom by gentle tapping. A test-paper is fixed on to the hook of the glass rod, so that when inserted into the tube, it will be in a vertical position. A mixture of equal parts of distilled water and pure glycerine (Price's) is now applied to the upper edge of the test paper by means of a camel's hair pencil, in sufficient amount to moisten the upper half; the stopper carrying the rod and paper is fixed into the test-tube and the position of the paper adjusted so that its lower edge is about half-way down the tube; the latter is then inserted through one of the perforations of the cover to the same depth as the thermometer. The lower margin of the moistened part of the paper should then be about five-eighths of an inch above the surface of the cover. The test is completed when the faint brown line, which after a time makes its appearance at the margin between the wet and dry portions of the test-papers, equal in depth of tint the brown line drawn on the standard tint paper.

4 The time which elapses between the insertion of the test-tube and the completion of the test must not be less than 15 minutes.

N. B.—In the case of ballistite the treatment is the same, except that when it is in a very finely granulated condition it need not be cut up.

II.—Testing Gun-cotton, Schultz's Gun Powder, E. C. Powder, and other explosives of the 2nd Division of the Nitro-compound class.

A.—COMPRESSED NITRO-CELLULOSE, TONITE, ETC., ETC.

Sufficient material to serve for two or more tests is removed from the centre of the cartridge by gentle scraping, and, if necessary, further reduced by rubbing through a sieve with a clean hard brush.

The fine powder thus produced is spread out in a thin layer upon a paper tray 6 inches by $4\frac{1}{4}$ inches which is then placed outside a water oven, kept, as nearly as possible, at 120° Fahr.

The wire gauze shelves in the oven should be about 3 inches apart. The sample is allowed to remain at rest for 15 minutes in the oven, the door of which is left wide open.

After the lapse of 15 minutes the tray is removed and exposed to the air of the room for two hours, the sample being at some point within that time rubbed upon the tray with a brush, in order to reduce it to a fine and uniform state of division.

Application of the Test.

The cover of the water bath is fitted with the gas regulator which is inserted through the centre hole (No. 4). The thermometer is fixed into hole No. 3. The water in the bath is then heated to 170° Fahr., and the regulator set to maintain that temperature. Twenty grains of the sample to be tested are weighed out, placed in the test-tube, and gently pressed down until the specimen occupies a space of not more than $1\frac{5}{16}$ inches in a test-tube of the dimensions specified. A test-paper is affixed to the hook of the glass rod or tube, and moistened by touching the upper edge with a drop of distilled water containing 50 per cent. of Price's glycerine. The quantity of liquid used must be only sufficient to moisten about half of the paper. The cork carrying the rod and test-paper is then fixed into the test-tube, and the latter inserted into a bath to a depth of $2\frac{1}{4}$ inches, measured from the cover, the regulator and thermometer being inserted to the same depth. The test-paper is to be kept near the top of the test-tube, but clear of the cork, until the tube has been immersed for about five minutes. A ring of moisture will about this time be deposited upon the sides of the test-tube a little above the cover of the bath; the glass rod must then be lowered until the lower margin of the moistened part of the paper is on a level with the bottom of the ring of moisture in the tube; the paper is now closely watched. The test is complete when the faint brown line which makes its appearance at the line of boundary between the dry and moist parts of the paper, equals in tint the brown line of the standard tint paper.

The interval of time between the first insertion of the tube containing the sample of gun-cotton in the water at 170° and the production of the standard tint constitutes the test and this interval of time must be *not less than 10 minutes*, or the sample will not be considered to have satisfied the test.

B.—GELATINIZED AND SEMI-GELATINIZED NITRO-CELLULOSE PREPARATIONS.*

Twenty-five grains introduced into the test-tube* of the dimensions prescribed for the dynamite heat test, then proceed as for Blasting Gelatine, etc., taking the temperature at 180° Fahr., and the time as 15 minutes.

*C.—NITRO-CELLULOSE NOT INCLUDED IN A. OR B., SCHULTZ'S POWDER, E. C. POWDER, ETC., ETC.

Sufficient of the sample, without further mechanical division, is dried in the oven as above, and then exposed for two hours to the air. The test as directed above for Compressed Nitro-Cellulose, etc., is then applied, the minimum duration of test being the same, *vis.*, 10 minutes.

D.—PICRIC ACID.

(1) The material shall contain not more than 0.3 part of mineral or non-combustible matter in 100 parts by weight of the material dried at 160° Fahr.

(2) It should not contain more than a minute trace of lead.

(3) One hundred parts of the dry material shall not contain more than 0.3 part of *total* (free and combined) sulphuric acid, of which not more than 0.1 part shall be *free* sulphuric acid.

(4) Its melting point should be between 248° and 253° Fahr.

E.—AMMONITE, BELLITE, ROBURITE, AND EXPLOSIVES OF SIMILAR COMPOSITION.

These are required to stand the same heat test as Compressed Nitro-Cellulose.

III.—Testing Chlorate Mixtures.

The material must not be too sensitive † and must show no tendency to increase in sensitiveness on keeping.

The material must contain nothing liable to reduce the chlorate.

Chlorides calculated as Potassium Chloride must not exceed 0.25 per cent.

The material must contain no free acid, or substance liable to produce free acid.

Explosives of this class containing nitro-compounds will be subject to the Heat test as if they belonged to Class III.

APPENDIX.

Exudation and Liquefaction Test for Blasting Gelatine, Gelatine Dynamite and analogous Preparations.

TEST FOR LIQUEFACTION.

A cylinder of blasting gelatine is to be cut from the cartridge to be tested, the length of the cylinder to be about equal to its diameter and the ends being cut flat.

The cylinder is to be placed on end on a flat surface without any wrapper, and secured by a pin passing vertically through its centre.

In this condition the cylinder is to be exposed for one hundred and forty-four (144) consecutive hours (six days and nights) to a temperature ranging from 85° to 90° Fahr. (inclusive), and during such exposure the cylinder shall not diminish in height by more than one-fourth of its original height, and the upper cut surface shall retain its flatness and the sharpness of its edge.

Note.—If the blasting gelatine and the gelatine dynamite to be tested be not made up in a cylindrical form, the above test is to be applied with the necessary modifications.

TEST FOR LIABILITY TO EXUDATION.

There shall be no separation from the general mass of the blasting gelatine or gelatine dynamite of a substance of less consistency than the bulk of the remaining portion of the materials under any conditions of storage, transport, or use, or when the material is subjected three times in succession to alternate freezing and thawing, or when subjected to the liquefaction test hereinbefore described.

B. ROBERTSON,

Offg. Secretary to the Government of India.

* If in a compressed form it should be broken up in the same manner as cordite and ballistite.

† They will be considered too sensitive if they can be exploded however partially by means of a glancing blow with a broomstick on soft wood (such as deal).

ARMY DEPARTMENT.

Simla, the 31st May 1907.

APPOINTMENTS.

CANTONMENT MAGISTRATES' DEPARTMENT.

No. 463.—Major R. R. Vaughan to be officiating Cantonment Magistrate, 2nd grade, with staff pay at Rs. 600 a month, *vice* Lieutenant-Colonel W. F. C. C. Plowden, on privilege leave ; with effect from the 26th April 1907.

INDIAN ARMY.

No. 464.—The undermentioned officers of the Unattached List are admitted to the Indian Army, with effect from the dates specified, subject to confirmation by the Secretary of State for India :

(a) Figures for the week ending the 17th May 1907.

(b) Imported.

H. H. RISLEY,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 h. on Thursday, the 30th May 1907, based on the Indian Daily Weather Reports of the period.

The depression which normally exists at this time in northwest India owing to local high temperature moved eastwards on the 25th and caused unsettled weather in the extreme north and along the western Himalayas, where thunder and hailstorms occurred up to the 28th. Duststorms in some cases accompanied by light rain, were also reported from the plains of northwest India. Rainfall was more or less general during the greater part of the week in Burma and Eastern Bengal and Assam, and on one or two occasions extended over the western half of northeast India, while a few falls occurred in the United and Central Provinces and Central India. Thunderstorms were fairly numerous in the south of the Peninsula on the 27th but very little rain fell there on the remaining days of the week.

Burma.—Only a few stations reported rain on the 24th, but rainfall increased on the following day and was nearly general during the rest of the week. Skies were thickly clouded and temperature was nearly normal, except on the 24th when it was slightly high in Upper Burma and on the 29th when it was slightly low over the same area.

Northeast India and Orissa.—Rain fell every day in Eastern Bengal and Assam and on most days in Orissa; occasional rain occurred in the remainder of the division. Skies were thickly clouded in the eastern half of the division and were generally clear or only lightly clouded in the west. Temperature was approximately normal except on the 25th and 26th when weather was cooler than usual in the western and central districts.

The United Provinces, Central India and the Central Provinces.—Scattered falls of rain were reported from the 26th to the 29th during which period skies were cloudy, more especially in the United Provinces, but on the remaining days skies were almost clear. Temperature was nearly normal in Central India and the Central Provinces; in the United Provinces it was in slight excess on the 24th and 25th, slightly to considerably below normal on the following four days and normal on the 30th.

Northwest India.—Light precipitation occurred in Kashmir, the Punjab, the Frontier Province and Rajputana. Skies were lightly clouded throughout the week in Gujarat and moderately clouded in the west Himalayas; they were clear elsewhere on most days of the week. Weather was on the whole warmer than usual on the first three days, but on the 28th and 29th temperature was below normal in the Punjab and the Frontier Province, and normal in the remainder of the division.

The Peninsula.—Rain occurred in the Circars and the south of the Peninsula, but was of a very local character except on the 28th, when thunderstorms were fairly numerous in the interior districts of south India. Skies were almost clear in the north Deccan and lightly to moderately clouded elsewhere, and temperature was approximately normal except for an excess in the south of the east coast during the first four days of the week.

More rain than usual has fallen during the past week in Burma, on the Madras coast and along the western Himalayas. The rainfall of the period from the 3rd to the 30th May is in excess on the Burma coast, normal in Burma (Wet) and the sub-divisions of Calcutta, Burdwan, Jubbulpore, Jaipur, Waltair and Madura, and in defect elsewhere, the deficiency being largest in the Brahmaputra Valley (7.42") and the subdivision of Calicut (4.90").

The following summarises the chief rainfall amounts of the week, as reported at 8 h. each day :—

| | |
|-----------|--|
| May 24th. | Akyab 1.86", Barisal 1.85" and Cocanada 1.04". |
| " 25th. | Tavoy 1.70", Sibsagar 1.13" and Darjeeling 1.06". |

GEORGE C. SIMPSON,
for Director General of Observatories.

J. WILSON,
Secretary to the Government of India.

SIMLA;
The 30th May 1907.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, 25th May 1907.

Burma.—The rainfall of the week was nearly general; it was heavy in Tavoy, and moderate to light in most places. Reaping of dry weather paddy is completed in Katha and Sagaing, and transplanting of early wet weather paddy in Kyaukse. Ploughing for wet weather paddy has commenced in Pegu, Bassein, Toungoo, Amherst and Tavoy, and sowing has commenced in Myitkyina. Agricultural operations are making headway. Plucking for miscellaneous crops has commenced in Minbu, and Magwe; sowing of cotton and early sesamum has commenced in Sagaing. The condition of the standing crops is on the whole good. The price of paddy has risen considerably in Toungoo, and slightly in three districts; it has fallen considerably in Pyapon and Minbu, and slightly in three districts; elsewhere it is stationary.

Eastern Bengal and Assam.—The weather is hot. Rain was general during the week. The standing crops have been benefited by the rains, but more rain is wanted in the Surma Valley and Lakhimpur. Plucking and manufacture of tea are in progress, and prospects are good in the Assam Valley, and generally fair in the Surma Valley, though red spider is still doing damage in Cachar, Kamrup and Lakhimpur. Sowing of rice is in progress. Sowing of jute is nearly finished, and weeding is in progress in most places. Pressing of sugarcane is finished. Potatoes are being gathered in the Khasi Hills, and prospects are very good. Prices of common rice :—Manipur and Kohima 9; Chittagong 8½; Comilla 8½; Silchar 8 to 8½; Dacca 8½; Malda and Sibsagar 8; Rangamati 7 to 8; Mymensingh 7½; Jalpaiguri, Sylhet, Dhubri, Gauhati, Tezpur and Dibrugarh 7½; Dinajpur 7½; Barisal 7; Pabna and Nowgong 7; Faridpur 6½ to 7; Tura 6 to 7; Rampur Boalia 6½; Bogra 6½; Rangpur 6½; and Shillong and Aijal 6 seers per rupee. Prices have risen in ten; fallen in four; and remain stationary in the remaining districts.

Bengal.—Light rain fell generally in the Province, excepting in South Bihar. The rainfall was moderate in Burdwan, Midnapur, Jessore, Khulna, Purnea and Cooch Behar. More rain is wanted in parts of Bankura, Hooghly, the 24-Parganas, Nadia, Champaran and Bhagalpur. Sowings of the next season's crops are in progress. In Darbhanga the number of persons on gratuitous relief is 11,593; on test works 2,415; and on famine-relief works 23,461. Fodder and water are generally sufficient. The price of common rice has risen in ten and fallen in three districts.

United Provinces.—Light rain has fallen in most districts. Threshing and winnowing have been completed in places. Preparation of fields for autumn crops continues, and sowings have begun in parts. Extra crops and sugarcane are being weeded and irrigated. The condition of agricultural stock is generally good. Fodder is still scarce in Azamgarh, and dear in Hardoi, Sitapur and Bara Banki. Markets are well supplied in twenty-three districts. Prices are rising.

Punjab—Light to moderate rain has fallen in all districts except Delhi, Ferozepore, Amritsar and Multan. Prices of food-grains are generally unsettled; wheat is rising in Rohtak, Ambala, Lahore, Rawalpindi, Mianwali, Lyallpur and Multan, and falling in Hissar and Jullundur. Harvesting of spring crops and sowings of cotton, sugarcane and other autumn crops continue; indigo is being sown in Delhi and Multan, and sugarcane weedings are going on in Jullundur and Sialkot. Labour is scarce in Shahpur. The condition and prospects of the extra spring crops are good; the outturn of spring crops is average to poor; it is fair in Ambala. Spring crops have been slightly damaged by locusts in Lahore and Rawalpindi, and by hoppers in two tehsils of Mianwali. The condition of cattle is good. Fodder is sufficient except in Mianwali; green fodder is not available in Ferozepore. There are no complaints regarding the water-supply.

North-West Frontier Province.—Showers fell all over the Province. Harvesting of spring crops is in progress; in Bannu the outturn is good on unirrigated lands and average on irrigated lands, in Peshawar the outturn is reported to be average. Sowing of extra spring crops continues. Land is also being prepared for autumn sowings. Destruction of locusts goes on except in Bannu, where the work has been stopped to allow people to harvest their

crops ; in Bannu they are doing damage to the extra spring crops, but swarms are leaving the district. The water and fodder supply is sufficient. Cattle are generally in good condition, except in the Marwat tehsil in the Bannu district. Prices, except of wheat which shows a tendency towards falling, are stationary. Prices:—wheat $16\frac{1}{2}$ to $21\frac{1}{2}$; gram $16\frac{1}{2}$ to $21\frac{1}{2}$; maize 24 to $32\frac{1}{2}$; and *bajra* 20 to 25 seers per rupee.

Jammu.—There was slight rain at Jammu. Prices are stationary. Prices:—wheat 9 to 23 and maize 11 to 36 seers per rupee. The condition of the standing crops is fair. Fodder is sufficient, except in the Ramban and Kishtwar tehsils where it is scarce. Harvesting of spring crops is in progress. Locusts appeared in the Mirpur, Riasi and Ramnagar tehsils but no damage is yet reported.

Kashmir—The weather is generally bright. Spring crops are in good condition, and oilseeds are being harvested. Sowings for autumn crops are in progress. Prices are almost stationary.

Rajputana.—There were showers almost everywhere during the week; the maximum fall was 52 cents in Jaipur. Harvesting operations continue. Land is being prepared for autumn crops. Cattle are in good condition except in some places in Mewar, Jhalawar and Merwara. Pasturage and fodder are sufficient. Prices are rising in Marwar, Mewar, Partabgarh, Kotah, Jhalawar, Bharatpur, Ajmer-Merwara, and are nearly steady everywhere.

Central India.—There was slight rain in parts of Gwalior and Bundelkhand. Threshing of spring crops continues in Bhopawar and Baghelkhand. Land is being prepared for autumn crops in other Agencies. The standing crops and the probable outturn are fair to good. Crops have been damaged by hail and rust in Baghelkhand. Agricultural stock and pasturage are fair to good except the former in Indore, and in parts of Malwa and Bhopawar. Prices are high in Baghelkhand; are rising in Bundelkhand, have risen slightly in Jaora, Sitamau and Sailana, have fallen in Rutlam, and are normal elsewhere.

Central Provinces—The weather is very hot and cloudy with high winds; light showers not exceeding 76 cents were received during the week in five districts. Threshing of rice sown as a second crop in the Sironcha tehsil (Chanda) is completed. Usual preparation and manuring for autumn sowings are in rapid progress everywhere. Fodder and water are adequate, but fodder continues very dear in Nagpur and Yeotmal, being specially scarce in the Yeotmal and Darwha taluqs of the latter district. Prices of staple food-grains are stationary in eleven districts, and fluctuate slightly elsewhere with a tendency to rise, the principal variations were wheat and gram which became cheaper by 2 seers in Hoshangabad and Narsinghpur respectively, prices still exceed the scarcity rate in Nimar, Wardha, Chanda, Balaghat, Drug, Bilaspur, Amraoti and Buldana.

Native States.—Preparation of land for sowings of autumn crops is progressing everywhere. Fodder and water are sufficient. *Kodon* (millet) in Kawardha and rice in Bastar became dearer, and wheat in Bastar and Sarangarh cheaper by 2 seers per rupee.

Bombay.—There was rain during the week in parts of Ahmedabad, Broach, Belgaum and Dharwar. The standing crops are generally in good condition. Threshing of spring crops continues in parts of Sindh. Preparation of lands for autumn cultivation is in progress. The fodder-supply is sufficient, except in parts of Ratnagiri and Ahmednagar. Agricultural stock is generally in good condition. Drinking water is sufficient, except in parts of Ratnagiri, Kanara, the Deccan and Bijapur. Water for irrigation purposes is insufficient in parts of Surat, the Deccan, the Karnatak and Baroda. The quantity of food-grains purchasable per rupee is in the Karnatak 20 to 37 per cent; in the Deccan $2\frac{1}{2}$ to 31 per cent; and elsewhere 3 to 25 per cent less than the normal. Labourers get sufficient field employment. During the week ending the 18th May 25 persons were on gratuitous relief in Belgaum.

Hyderabad.—No rain. The late rice harvest is almost completed. Lands are being prepared for monsoon sowings. Prices:—wheat $7\frac{1}{2}$; coarse rice $7\frac{1}{2}$; and *juar* $15\frac{1}{2}$ seers per rupee.

Mysore.—There was slight rain in parts of the State. Prices of food-grains are steady. The standing crops are in good condition, but rain is needed in Mysore, Hassan, and Chitaldroog. The prospects of the season are good. Cattle are healthy, and water and fodder are available.

Coorg.—Rainfall —7 cents. Ploughing for rice continues. Prices of food-grains are normal. Water and fodder are sufficient.

Madras.—Rainfall good in Ganjam and Trichinopoly; no rain in Guntur, the Deccan, Nellore, Madras and North Arcot; and light to fair rain elsewhere. Irrigation supplies

are sufficient, except in parts of the Circars, the Deccan, Nellore, South Arcot, North Arcot, Salem, Madura and South Canara. Ploughing, sowing, weeding and transplanting are in progress in parts. The standing crops are generally good but some require more rain in parts of Vizagapatam and Madura. Harvests continue except in Vizagapatam and Malabar with outturn poor to normal. Pasture is insufficient except in Guntur, South Arcot, Coimbatore, Trichinopoly, Tanjore, Tinnevely, Malabar and the Nilgiris. Fodder is procurable. The condition of cattle is generally good. The price of rice is stationary in thirteen districts; has fallen in four; and has slightly risen in six. The prices of millet have fluctuated as follows: *Ragi* is stationary in eleven districts; has fallen in one; and has slightly risen in nine. *Cholum* is stationary in five districts; has fallen in four; and has slightly risen in five. *Cumbu* is stationary in seven districts; and has fallen in three.

The number of persons in receipt of relief during the preceding and present weeks in each province is shown in the following table:

LEGISLATIVE DEPARTMENT.

NOTIFICATION.

Simla, the 6th June, 1907.

No. 10.—The following Statute is published for general information:

THE ARMY (ANNUAL) ACT, 1907.

[7 EDW. 7, CH. 2.]

AN ACT TO PROVIDE, DURING TWELVE MONTHS, FOR THE DISCIPLINE AND REGULATION OF THE ARMY.

[29th April, 1907.]

WHEREAS the raising or keeping of a standing army within the United Kingdom of Great Britain and Ireland in time of peace, unless it be with the consent of Parliament, is against law:

And whereas it is adjudged necessary by His Majesty and this present Parliament that a body of forces should be continued for the safety of the United Kingdom and the defence

of the possessions of His Majesty's Crown, and that the whole number of such forces should consist of one hundred and ninety thousand including those to be employed at the depôts in the United Kingdom of Great Britain and Ireland for the training of recruits for service at home and abroad, but exclusive of the numbers actually serving within His Majesty's Indian possessions :

And whereas it is also judged necessary for the safety of the United Kingdom, and the defence of the possessions of this realm, that a body of Royal Marine forces should be employed in His Majesty's fleet and naval service, under the direction of the Lord High Admiral of the United Kingdom, or the Commissioners for executing the office of Lord High Admiral aforesaid :

And whereas the said marine forces may frequently be quartered or be on shore or sent to do duty or be on board transport ships or vessels, merchant ships or vessels, or other ships or vessels, or they may be under other circumstances in which they will not be subject to the laws relating to the government of His Majesty's forces by sea :

And whereas no man can be forejudged of life or limb, or subjected in time of peace to any kind of punishment within this realm, by martial law, or in any other manner than by the judgment of his peers and according to the known and established laws of this realm ; yet neverth less, it being requisite, for the retaining all the before-menti ned forces, and other persons subject to military law, in their duty, that an exact discipline be observed, and that persons belonging to the said forces who mutiny or stir up sedition, or desert His Majesty's service or are guilty of crimes and offences to the prejudice of good order and military discipline be brought to a more exemplary and speedy punishment than the usual forms of the law will allow

44 & 45 Vict., c. 58. And whereas the Army Act will expire in the year one thousand nine hundred and seven on the following days.

- (a) In the United Kingdom, the Channel Islands, and the Isle of Man, on the thirtieth day of April, and
- (b) Elsewhere in Europe, inclusive of Malta, also in the West Indies and America, on the thirty first day of July, and
- (c) Elsewhere, whether within or without His Majesty's dominions, on the thirty-first day of December.

Be it therefore enacted by the King's most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal and Commons, in this present Parliament assembled, and by the authority of the same, as follows

Short title.

1. This Act may be cited as the Army (Annual) Act, 1907.

2. (1) The Army Act shall be and remain in force during the periods hereinafter mentioned, and no longer, unless otherwise provided by Parliament (that is to say).

Army Act to be in force for specified times.

- (a) Within the United Kingdom, the Channel Islands, and the Isle of Man, from the thirtieth day of April one thousand nine hundred and seven to the thirtieth day of April one thousand nine hundred and eight, both inclusive ; and
- (b) Elsewhere in Europe, inclusive of Malta, also in the West Indies and America, from the thirty first day of July one thousand nine hundred and seven to the thirty-first day of July one thousand nine hundred and eight, both inclusive ; and
- (c) Elsewhere, whether within or without His Majesty's dominions, from the thirty-first day of December one thousand nine hundred and seven to the thirty-first day of July one thousand nine hundred and eight, both inclusive.

(2) The Army Act, while in force, shall apply to persons subject to military law, whether within or without His Majesty's dominions.

(3) A person subject to military law shall not be exempted from the provisions of the Army Act by reason only that the number of the forces for the time being in the service of His Majesty, exclusive of the marine forces, is either greater or less than the number hereinbefore mentioned.

3. There shall be paid to the keeper of a victualling house for the accommodation provided by him in pursuance of the Army Act the prices specified in the First Schedule to this Act.

Prices in respect of bulleting.

Amendments of Army Act.

4. In section forty-three of the Army Act (which deals with the mode of complaint by a soldier) after the words "to the prescribed general officer" there shall be inserted the words "or in the case of a soldier serving in India to such officer as the Commander-in-Chief of the forces in India with the approval of the Governor General of India in Council may appoint."

5. In sub-section (b) of section forty-six of the Army Act (which enables the accused person to demand that the evidence taken against him before the commanding officer shall be taken on oath), for the words "where the power of summary award by a commanding officer exceeds a sentence of seven days' detention" there shall be substituted the words "where the commanding officer has power to deal with the case summarily."

6. In sub-section (2) of section one hundred and thirty-three of the Army Act (which relates to the power of a Secretary of State to make rules with respect to military prisons and prisoners), for the words "military prisoners" there shall be substituted the words "military or other prisoners".

7. Paragraph (c) of sub-section (2) of section one hundred and eighty of the Army Act (which relates to sentences on officers of the Indian Staff Corps) shall be repealed.

8. For paragraph (2) of Part I of the Second Schedule to the Army Act (which relates to billeting) there shall be substituted the paragraph set forth in the Second Schedule to this Act, and in the third paragraph of the said part of the said Schedule to the Army Act for the words "a hot meal" there shall be substituted the words "a meal".

9. (1) For the purpose of giving effect to the provisions of the Army (Annual) Act, 1905, relating to the punishment of detention, the modifications set out in the Third Schedule to this Act shall be made in the Army Act.

(2) Section 135A of the Army Act is hereby repealed.

10. In the provisions of the Army Act relating to punishments on active service, the following amendments shall be made:

(1) In section forty-four (which relates to the scale of punishments by courts-martial)—

(a) There shall be substituted for proviso (5) the following proviso

"(5) Where a soldier on active service is guilty of any offence it shall be lawful for a court-martial to award for that offence such field punishment other than flogging as may be directed by rules to be made from time to time by a Secretary of State, and such field punishment shall be of the character of personal restraint or of hard labour, but shall not be of a nature to cause injury to life or limb";

(b) The words "field punishment" shall be substituted for the words "summary punishment" wherever those words occur in provisos (9) and (10);

(c) Provisos (6), (7), and (8) shall be repealed;

(d) The following proviso shall be added as a new proviso after proviso (5)

"(6) In addition to or without any other punishment in respect of an offence committed by a soldier on active service, it shall be lawful for a court-martial to order that the offender forfeit all ordinary pay for a period commencing on the day of the sentence and not exceeding three months."

(2) In section forty-six (which relates to the powers of commanding officers)—

(a) At the end of sub-section (2) there shall be added the following paragraph:

"and

"(d) In the case of an offence by a soldier (not being a non-commissioned officer) on active service, may award to the offender field punishment within the meaning of section forty-four of this Act for any period not exceeding twenty-eight days, and may in addition to or without any other punishment order that the offender forfeit all ordinary pay for a period commencing on the day of the sentence and not exceeding twenty-eight days;"

- (b) In sub-section (3) the words "not on duty and it is not an aggravated offence of drunkenness within the meaning of section forty-four of this "Act" shall be repealed, and after the word "unless" there shall be added the words "the offence was committed on active service or on duty, or after the offender was warned for duty, or unless by reason of the drunkenness the offender was found unfit for duty, or unless."
- (3) In paragraph (d) of sub-section (1) of section forty-nine (which relates to field general courts-martial), the words "field punishment" shall be substituted for the words "summary punishment."
- (4) At the end of section seventy-four (which relates to provost marshals) the following proviso shall be added:—
 "Provided that a provost marshal and his assistants shall, as respects any soldier in his or their custody and undergoing field punishment, have the same powers as the governor of a military prison."
- (5) At the end of section one hundred and thirty-three (which relates to the establishment and regulation of military prisons) there shall be added as a new sub-section:—
 "(7) In any country in which operations against the enemy are being conducted the powers of a Secretary of State under this section with respect to military prisons and detention barracks shall be exercisable by the officer commanding-in-chief in the field, and shall include a power of declaring any place to be a military prison or a detention barrack, and the limitations on the power of making rules as to the punishment of prisoners and soldiers undergoing detention and as to the severity of imprisonment and detention shall not apply: Provided that nothing in this sub-section, or in any rules made thereunder, shall authorise flogging or other corporal punishment to be inflicted for any offence."
- (6) In section one hundred and thirty-eight (which relates to penal stoppages from ordinary pay of soldiers)—
 (a) In paragraph (1), after the word "detention" in both places where it occurs, there shall be inserted the words "or field punishment";
 (b) At the end the following proviso shall be added:—
 "and
 "(c) where a soldier who is sentenced or ordered in respect of an offence on active service to forfeit all ordinary pay is liable to any other penal deductions from pay, the sentence or order shall apply only to so much of his ordinary pay as remains after those other deductions have been made."
- (7) In section one hundred and eighty-three of the Army Act (which contains special provisions as to non-commissioned officers)—
 (a) In paragraph (2), after the words "may appoint" there shall be inserted the words "and on active service the officer commanding-in-chief in the field and any general officer he may appoint";
 (b) In paragraph (4), after the words "penal servitude" there shall be inserted the words "field punishment".

SCHEDULES.

FIRST SCHEDULE.

Notes.—An officer shall pay for his food.

SECOND SCHEDULE.

Section 8.

Paragraph to be substituted for paragraph 2 of Part I of Second Schedule to Army Act:

"(2) Shall, if required by the soldier, furnish him for every day of the march, and for not more than two days, if the soldier is halted at an intermediate place on the march for more than two days, and on the day of arrival at the place of final destination, with breakfast, hot dinner, and supper on each day, such meals to consist of such quantities of food and drink as may from time to time be fixed by His Majesty's Regulations, not exceeding—

"(a) For breakfast, six ounces of bread, one pint of tea with milk and sugar, four ounces of bacon ;

"(b) For hot dinner, one pound of meat previous to being dressed, eight ounces of bread, eight ounces of potatoes or other vegetables, one pint of beer or mineral water of equal value ;

"(c) For supper, six ounces of bread, one pint of tea with milk and sugar, two ounces of cheese, and "

THIRD SCHEDULE.

Section 9.

MODIFICATIONS OF ARMY ACT.

| Modification to be made. | Provisions of Army Act to be modified. |
|--|---|
| I. | |
| The following substitution of words shall be made : | |
| "person" for "prisoner" ... | Sections twenty ; twenty-one ; sixty-eight, sub-section (1) ; one hundred and thirty, sub-section (5) , and one hundred and thirty-one, sub-section (2). |
| "imprisonment or detention" for "or imprisonment". | Sections fifty-seven, sixty-eight, sub-section (1) , seventy ; one hundred and fifty-eight, sub section (2) , one hundred and eighty-three, sub section (4), and proviso (a) ; and one hundred and eighty-seven. |
| "that person's" for "the prisoner's". | Section twenty-one. |
| "order the offender" for "commit such offender to prison there". | Section twenty-eight. |
| "accused person's" for "accused's". | Section fifty-two, sub-section (1). |
| "detention" for "imprisonment". | Section eighty-three, sub-section (7). |
| II | |
| The following insertion of words shall be made : | |
| "or soldier" ... | After the words "such prisoner" in section sixty-seven, sub-section (1). After the word "prisoner" in section sixty-seven, sub-sections (2) and (3). After the word "prisoner" (except where that word follows the word "military") in section one hundred and seventy-two. |
| "or detention barrack" ... | After the word "prison" in sections sixty-seven, sub-section (2) ; one hundred and thirty, sub-section (5) ; and one hundred and thirty-one, sub section (2). After the words "a military prison" in section one hundred and thirty-three, sub-section (1). After the words "military prison" in section one hundred and thirty-three, sub-section (3). |
| "and detention barracks" ... | After the word "prisons" in sections one hundred and thirty-three, sub-sections (2) and (5) ; and one hundred and eighty-seven. |
| "or detention, as the case may be". | After the words "for the purposes of the provisions of this Act relating to imprisonment" in sections sixty-four and sixty-five. |

| Modification to be made. | Provisions of Army Act to be modified. |
|--|--|
| "or detention " ... | After the words " of imprisonment " in sections sixty-four, sixty-five, sixty-six, and sixty-seven. After the word "imprisonment " in sections sixty-eight, one hundred and thirty, one hundred and thirty-one, one hundred and thirty-three, sub section (2), and one hundred and forty. |
| " or soldier undergoing detention". | After the word "prisoner" in sections sixty-four, paras. (2) (d), (3) (c), and (4) (c); sixty-five, paras. (4) (c), (5) (a), and (6) (b); and sixty-six. After the words "military prisoner" in sections sixty-seven, sub-section (1); and one hundred and seventy-two, sub-sections (2) and (4). |
| "or, in the case of a soldier to undergo detention". | After the word "labour" in section twenty-eight. |
| " or undergoing detention" ... | After the word "imprisoned" in section one hundred and thirty, sub-section (5). |
| "and soldiers undergoing detention". | Before the word "therein" in section one hundred and thirty-three, sub-section (2). |
| " or soldiers" ... | After the words "such prisoners" in section one hundred and thirty-three, sub-section (2). |
| " made to undergo detention" ... | After the word "imprisoned" in section one hundred and fifty-eight, sub-section (2). |
| "or a soldier undergoing detention." | After the words "military prisoner" in section one hundred and seventy-two, sub-section (5). |

III.

The following section shall be substituted for section sixty-three :

"63. (1) Where a sentence of imprisonment is passed by court-martial, the person on whom that sentence has been passed (in the provisions of this Act relating to imprisonment referred to as a military prisoner) shall undergo the term of his imprisonment either in military custody or in a detention barrack or in a public prison, or partly in one way and partly in another, and, where a sentence of detention is passed by a court-martial or a commanding officer, the person on whom that sentence has been passed (in the provisions of this Act relating to detention referred to as a soldier undergoing detention) shall undergo the term of his detention either in military custody or in a detention barrack, or partly in one way and partly in the other, but not in a prison.

" (2) Any person liable to be imprisoned in a military prison may be confined in a detention barrack.

" (3) The order of the committing authority hereafter mentioned shall be a sufficient warrant for the transfer of a military prisoner to a public prison or a detention barrack, or a soldier undergoing detention to a detention barrack.

" (4) A military prisoner while in a public prison shall be confined, kept to hard labour and otherwise dealt with in the like manner as an ordinary prisoner under a like sentence of imprisonment; and, where the hospital or place for the reception of sick persons in a public prison or a detention barrack is detached from the prison or detention barrack, a military prisoner or a soldier undergoing detention may be detained in that hospital or place, and conveyed to or from the same as circumstances require.

" (5) A military prisoner or a soldier undergoing detention, during his conveyance from place to place, or when on boardship or otherwise, may be subjected to such restraint as is necessary for his safe custody and removal.

" (6) The discharging authority hereafter mentioned may, at any time during the period of the imprisonment of a military prisoner, or of the detention of a soldier undergoing detention, by order discharge the prisoner or soldier.

" (7) The committing authority or any other prescribed authority may at any time by order remove a military prisoner from one public prison or detention barrack to another prison or detention barrack, or a soldier undergoing detention from one detention barrack

to another, so that he be not removed from a prison or detention barrack in the United Kingdom to a prison or detention barrack elsewhere.

"(8) The removing authority hereafter mentioned may, at any time during the period of the imprisonment of a military prisoner or of the detention of a soldier undergoing detention, from time to time by order provide for his being brought before a court-martial, or any civil court, either as a witness, or for trial or otherwise, and an order of such authority shall be a sufficient warrant for delivering him into military custody and detaining him in custody until he can be returned, and for returning him to the place from whence he is brought, or to such other place as may be determined by the removing authority."

T. W. RICHARDSON,

Offg. Secretary to the Government of India.

HOME DEPARTMENT.

NOTIFICATIONS.

PUBLIC.

Nos. 1269-1279.

Simla, the 3rd June, 1907.

RESOLUTION—By the Government of India, Home Department.

Certain circumstances attending the recent outbreaks of lawlessness in the Panjab and Eastern Bengal have forced upon the attention of the Government of India the deliberate efforts made by a number of newspapers, both English and Vernacular, to inflame the minds of the people, to encourage ill-will between classes, to promote active hostility to the Government, and to disturb the public tranquillity in many different ways. The Governor General in Council has no desire whatever to restrict the legitimate liberty of the Press to criticise the action of the Government, and he would be most reluctant to curtail the freedom of the many well-conducted papers because of the misbehaviour of a few disloyal journals. But he is responsible for the maintenance of law and order among a vast and heterogeneous population, and he is unable to tolerate the publication of writings which tend to arouse the disorderly elements of society and to incite them to concerted action against the Government. On these grounds he has determined that the dissemination of sedition, and the promotion of ill-will between classes must be repressed by firm and sustained action under the penal law. Accordingly, in supersession of previous orders on the subject, His Excellency in Council empowers Local Governments to institute prosecutions in consultation with their legal advisers in all cases where the law has been wilfully infringed. He hopes that the warning now given may, in great measure, avert the necessity for numerous prosecutions, but if that hope should unhappily not be realised, he relies upon the local authorities to deal with the evil effectively.

ORDER.—Ordered that a copy of this Resolution be communicated to all Local Governments and Administrations for information and guidance.

Ordered also that the Resolution be published in the *Gazette of India*, for general information.

The 5th June, 1907.

No. 1285.—In exercise of the powers conferred by the Indian (Foreign Jurisdiction) Order in Council, 1902, the Governor General in Council is pleased to apply the Prevention of Cruelty to Animals Act, 1890 (XI of 1890), so far as it is applicable, to Berar :

Provided, first, that all references to "British India" and the "Local Government" shall be construed as referring to "Berar" and the "Chief Commissioner of the Central Provinces" respectively ; and

Provided, secondly, that references to the Code of Criminal Procedure, 1882, shall be construed as referring to the Code of Criminal Procedure as applied to Berar.

ESTABLISHMENTS.

The 7th June, 1907.

No. 700.—The services of Mr. Abdullah *ibn* Yusuf Ali, of the Indian Civil Service, are placed temporarily at the disposal of the Finance Department.

MEDICAL.

The 4th June, 1907.

No. 482.—The services of Captain C. G. Seymour, I.M.S., are replaced at the disposal of His Excellency the Commander-in-Chief in India.

The 7th June, 1907.

No. 489.—The services of Captain A. C. MacGilchrist, M.B., I.M.S., are placed permanently at the disposal of the Government of Bengal, with effect from the 1st July 1906.

PORT BLAIR.

The 7th June, 1907.

No. 365.—Assistant Surgeon Satish Chandra Basu, junior medical officer, Port Blair, is appointed to be an assistant superintendent in the Settlement, with effect from the 18th May 1907 and so long as he holds his present office, or until further orders.

No. 367.—Mr. A. R. Brown, extra assistant conservator of forests, Port Blair, is appointed to be an assistant superintendent in the Settlement so long as he holds his present office, or until further orders.

POLICE.

The 4th June, 1907.

No. 573.—The services of Lieutenant W. R. Savage, 22nd Punjabis, are placed at the disposal of the Government of Burma for employment in the Burma military police.

ECCLESIASTICAL.

The 7th June, 1907.

No. 248.—The Reverend G. C. Peake, a junior chaplain on the Bengal (Lahore) ecclesiastical establishment, is permitted to resign his service, with effect from the 11th April 1907.

No. 250.—The following are substituted for rules I and XXI (b) (2), (3) and (4) in part IV of the ecclesiastical rules published with the notification in the Home Department no. 178, dated the 21st May 1897 :

Rule I.—All State charges for churches (except those referred to in rule XXI (b) (2) which are debitable to "23—Ecclesiastical") in civil, military or State railway stations are provided from Public Works funds from the ordinary grant for Imperial Works under "45—Civil Works."

Rule XXI (b) (2).—In such cases the plans and specifications shall be submitted to the Executive Engineer for the approval of the proper officers in the Public Works Department, who shall sanction them on satisfying themselves that they are safe and suitable and can be executed for the estimated amount. The construction of the building may then be left to the managers or trustees of the private contributions raised, with whom must rest the responsibility for excess, if any, over the amount of this sanctioned estimate. The grant-in-aid will be paid by the Civil Department on the certificate of the Executive Engineer, *vide* rule XXI (b) (3) below, and adjusted as a civil charge under the head "23—Ecclesiastical" as stated in rule I above.

Rule XXI (b) (3).—In such cases the grant will ordinarily not be paid in full by the civil account officer until the Executive Engineer has certified that the building has been completed in accordance with the sanctioned plans and specifications, and the trust deed referred to in clause (4) below, where required, has been duly executed; but the Executive Engineer may authorize advances out of the sanctioned grant on receiving sufficient proof that the building is proceeding satisfactorily, and on the managers or trustees certifying that all subscriptions relied on in support of the application for the grant have been paid up in full or guaranteed by sufficient security.

Rule XXI (b) (4).—When a grant is made under clause (b) of this rule for a church intended partly for the use of non-official residents and others for whom grants are not admissible under these rules, there shall be a trust deed, duly executed by the Chief Magistrate of the district in which the church is situated and the chaplain, and registered,—(1) declaring that the building is granted in trust for Church purposes only: (2) giving to Government a prior lien on the building for the recovery of the grant in the event of the former being diverted to other purposes: (3) providing for the legal ownership of the building: and (4) indicating sufficient sources for its proper maintenance.

H. II. RISLEY,

Secretary to the Government of India.

DEPARTMENT OF REVENUE AND AGRICULTURE.

NOTIFICATION.

CIVIL VETERINARY ADMINISTRATION.

Simla, the 6th June, 1907.

Captain S. H. Jacob, a Political Assistant of the 3rd class, to be a Political Assistant of the 2nd class.

Consequent on the retirement of Lieutenant-Colonel C. G. F. Fagan, a Political Agent of the 3rd class, and with effect from the 15th February, 1907,

Major B. E. M. Gurdon, C.I.E., D.S.O., a Political Agent of the 4th class, to be a Political Agent of the 3rd class.

Major C. T. Ducat, a Political Agent of the 4th class, substantive *pro tempore*, is confirmed in that grade.

Captain A. B. Minchin, C.I.E., a Political Assistant of the 2nd class, to be a Political Assistant of the 1st class.

Captain L. B. H. Haworth, a Political Assistant of the 3rd class, to be a Political Assistant of the 2nd class.

Consequent on the retirement of Major L. A. Forbes, a Political Agent of the 4th class, and with effect from the 24th February, 1907,

Major S. G. Knox, a Political Assistant of the 1st class, to be a Political Agent of the 4th class.

Major W. G. Grey, a Political Assistant of the 2nd class, to be a Political Assistant of the 1st class.

Captain E. H. S. James, a Political Assistant of the 3rd class, to be a Political Assistant of the 2nd class.

These arrangements are made without prejudice to superior acting appointments, if any, held by any of the above-mentioned officers on the dates specified.

No. 1613-G.—The following substantive changes are made in the civil cadre of the Political Department :

Consequent on the reversion to the Provincial List of Major C. P. Thompson, a Political Agent of the 2nd class, and with effect from the 7th November, 1906,

Mr. C. L. S. Russell, a Political Agent of the 3rd class, to be a Political Agent of the 2nd class.

Mr. F. P. Rennie, a Political Agent of the 4th class, to be a Political Agent of the 3rd class.

Mr. R. E. Holland, a Political Assistant of the 1st class, to be a Political Agent of the 4th class.

Mr. S. E. Pears, a Political Assistant of the 1st class, substantive *pro tempore*, is confirmed in that grade.

Mr. P. B. Warburton, a Political Assistant of the 2nd class, substantive *pro tempore*, is confirmed in that grade.

Mr. J. H. R. Fraser, a Political Assistant of the 2nd class, substantive *pro tempore*, is confirmed in the Political Department as a Political Assistant of the 3rd class.

Consequent on the transfer to the Provincial List of Mr. R. Hughes-Buller, a Political Agent of the 2nd class, and with effect from the 7th December, 1906,

Mr. W. P. Parton, a Political Agent of the 3rd class, to be a Political Agent of the 2nd class.

Mr. S. W. Gracey, a Political Agent of the 4th class, to be a Political Agent of the 3rd class.

Major G. O. Roos-Keppel, C.I.E., a Political Assistant of the 1st class, to be a Political Agent of the 4th class.

Mr. L. W. Reynolds, a Political Assistant of the 1st class, substantive *pro tempore*, is confirmed in that grade.

Consequent on the reversion to the Provincial List of Mr. S. W. Gracey, a Political Agent of the 3rd class, and with effect from the 25th February, 1907,

Mr. F. W. Johnston, a Political Agent of the 4th class, to be a Political Agent of the 3rd class.

Mr. R. I. R. G'ancy, a Political Assistant of the 1st class, to be a Political Agent of the 4th class.

Mr. L. M. Crump, a Political Assistant of the 2nd class, to be a Political Assistant of the 1st class.

Mr. J. H. R. Fraser, a Political Assistant of the 3rd class, to be a Political Assistant of the 2nd class.

Mr. J. A. O. Fitzpatrick, a Political Assistant of the 2nd class, substantive *pro tempore*, is confirmed as a Political Assistant of the 3rd class.

These arrangements are made without prejudice to superior acting appointments, if any, held by any of the above-mentioned officers on the dates specified.

L. W. DANE,

Secretary to the Government of India.

FINANCE DEPARTMENT.

NOTIFICATIONS.

No. 3543-Ex.

Simla, the 7th June, 1907.

RESOLUTION—By the Government of India, Finance Department.

The rules and orders regarding exchange compensation allowance promulgated with the Resolutions by the Government of India in the Finance and

Commerce Department, No. 2422-Ex., dated the 31st May 1897, and No. 3692-Ex., dated the 22nd August 1898, provide that a European appointed in England is entitled to the allowance unless his salary is fixed in sterling, or unless he is specifically excluded from it by the terms of his engagement. His Excellency the Governor General in Council is now pleased to direct that henceforth no person appointed under a written contract in England shall be entitled to exchange compensation allowance unless he is explicitly admitted thereto under the terms of the contract or unless the appointment which he holds gives him a claim to the allowance under any general rule or decision of the Government of India. The rules hitherto in force should be modified accordingly.

ORDERED that the Resolution be published in the *Gazette of India*, and that it be circulated to all Local Governments and Administrations, to all Departments of the Government of India (including the Military Finance Branch), to Heads of Departments subordinate to the Finance Department, and to all Accountants-General and Comptrollers.

CANTONMENTS.

REGULATIONS.

No. 491—In exercise of the powers conferred by section 23 of the Cantonments Act, 1889 (XIII of 1889), the Governor General in Council is pleased to extend to the Roorkee cantonment the provisions of sections 38, 63 to 65, 70 to 73 and 187 of the United Provinces Municipalities Act, 1900 (United Provinces Act I of 1900), in the restricted and modified form set forth below.

EXTENDED SECTIONS.

1. (1) The cantonment authority may, from time to time, concur with the municipal board in appointing, out of their respective bodies a joint committee for the supervision of octroi and in appointing a chairman of the committee and in delegating to such committee any power which might be exercised by either the authority or the board and in framing and modifying regulations as to the proceedings of such committee and as to the conduct of correspondence relating to the purpose for which the Committee is appointed.

(2) If any difference of opinion arises between the authority and the board in acting under the section, the decision thereon of the Commissioner shall be final.

2. An octroi shall not be invalid for defect of form, and, when any property is described for the purpose of assessing any octroi, it shall be sufficient to describe it so that it shall be generally known, and it shall not be necessary to name the owner.

3. The municipal board, by a resolution passed at a special meeting and confirmed by the Local Government may provide that all or any persons may be allowed to compound for octroi.

4. (1) The municipal board may exempt, in whole or in part, for any period not exceeding one year, from the payment of octroi, any person who, by reason of poverty, may, in its opinion, be unable to pay the same, and may renew such exemption as often as may be necessary.

(2) The municipal board may by a resolution passed at a special meeting and confirmed by the Local Government, and the Local Government may, by order, exempt, in whole or in part from the payment of octroi any person or class of persons or any property or description of property.

5. Arrears of octroi may be recovered on application to a magistrate having jurisdiction within the limits of the cantonment or in any other place where the defaulter may for the time being be resident by the distress and sale of any movable property within the limits of such magistrate's jurisdiction belonging to such defaulter.

6. (1) An appeal against the assessment or levy of octroi shall lie to the Collector or to such other officer as may be empowered by the Local Government in this behalf provided that, when the Collector or such other officer as aforesaid is a member of the board, the appeal shall lie to the Commissioner.

(2) If, on the hearing of an appeal under this section, any question as to the liability to or the principle of assessment of, an octroi arises, on which the officer hearing the appeal entertains reasonable doubt, he may, either of his own motion or on the application of any person interested, draw up a statement of the facts of the case and the point on which doubt is entertained and refer the statement with his own opinion on the point for the decision of the High Court.

(3) On reference being made under sub-section (2), the subsequent proceedings in the case shall be as nearly as may be in conformity with the rules relating to references to the High Court contained in chapter XLVI of the Code of Civil Procedure.

(4) In every appeal the costs shall be in the discretion of the officer deciding the appeal.

(5) Costs awarded under this section to the board shall be recoverable by the cantonment authority as though they were arrears of octroi due from the appellant.

(6) If the board fail to pay any costs to an appellant within ten days after the date of the order for payment thereof, the officer awarding the costs may order the person having the custody of the balance of the cantonment fund to pay the amount.

7 No appeal shall lie in respect of an octroi unless it is preferred within sixty days from the time when the demand of the tax is made.

Limitation of appeal (section 72).

8 No objection shall be taken to any valuation or assessment of octroi, nor shall the liability of a person to be taxed to octroi be questioned in a civil court or by any other authority than is provided in these adapted sections.

Octroi not to be questioned except under these adapted sections (section 73)

9. (1) The Local Government, with the previous sanction of the Governor General in Council may make rules for the assessment and collection of, and for the compounding for octroi, and for preventing the evasion of the same.

Power of Local Government to make octroi rules (section 187)

United Provinces Municipalities Act 1901 (United Provinces Act of 1901) for the assessment and collection of, and for the compounding for octroi, and for preventing the evasion of the same.

(2) In making rules under sub-section (1) the Local Government may enact that a breach of any provision thereof shall be punished with fine which may extend to fifty rupees.

COMMANDS.

No. 492—Brigadier General J. S. S. Barker, C.B., Colonel-on-the-Staff, Royal Artillery, Eastern Command, to be a Brigade Commander and to continue to hold the temporary rank of Brigadier-General whilst so employed. Dated 1st June 1907.

dated the 24th March 1906.

Railway Board's notification No. 183, dated the 8th September 1906, and Railway Board's circular No. R. T. ^{80 A.}, dated the 8th September 1906.

Railway Board's notification No. 205, dated the 5th October 1906, and Railway Board's circular No. R. T. $\frac{101}{7}$, dated the 26th September 1906.

Railway Board's notification No. 263, dated the 27th November 1906, and Railway Board's circular No. R. T. $\frac{89}{3}$, dated the 16th November 1906.

Letter from the Senior Government Inspector of Railways, Madras, No. 646-M., dated the 28th March 1907.

Railway Board's letter No. 153-R. T., dated the 6th May 1907.

Letter from the Senior Government Inspector of Railways, Madras, No. 940-M., dated the 15th May 1907.

RESOLUTION.—The Agent and Manager of the Madras Railway Company has recommended the adoption on the Madras Railway of the revised General Rules of 1906 for working open lines of railway in British India which were promulgated under Railway Board's circular No. R. T. $\frac{89}{3}$, dated the 8th September 1906, and published under their notification No. 183, dated the 8th September 1906, and also of the addendum to Rule 86, Chapter III, Part I, of the said General Rules, promulgated under Railway Board's circular No. R. T. $\frac{101}{7}$, dated the 26th September 1906, and published under their notification No. 205, dated the 5th October 1906.

2. In exercise of the powers conferred by the notification of the Government of India in the Department of Commerce and Industry, No. 801, dated the 24th March 1905, read in the preamble above, the Railway Board sanction, with effect from 1st July 1907, under section 47, sub-section (4), of the Indian Railways Act, 1890 (IX of 1890), the adoption of the General Rules of 1906 for working open lines of railway, and of the addendum to Rule 86, Chap. III, Part I, cited in paragraph 1 above, on such portions of the Madras Railway and on such portions of the lines worked by it, as are situate in British territory.

ORDER.—Ordered that this resolution be published under a notification in Part I of the *Gazette of India* as required by Section 47, sub-section (3) of the Indian Railways Act, 1890 (IX of 1890), also that the General Rules, including the addendum, cited in paragraph 1, which have already been published in the *Gazette of India*, be kept at railway stations as directed by sub-section (6) of the same section and that this resolution be communicated to the Senior Government Inspector of Railways, Madras, for information.

The 7th June, 1907.

No. 136.—The following is published for general information

No. 296 R. T., dated the 27th May 1907.

RESOLUTION—By the Railway Board.

Revised General Rules of 1906 for working open lines of railway and the addendum and amendments thereto.

Read—

Section 47 of the Indian Railways Act, 1890 (IX of 1890).

Government of India, Department of Commerce and Industry, notification No. 801, dated the 24th March 1905.

Railway Board's notification No. 183, dated the 8th September 1906, and Railway Board's circular No. R. T. $\frac{89}{3}$, dated the 8th September 1906.

H. H. RISLEY,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 h. on Thursday, the 6th June 1907, based on the Indian Daily Weather Reports of the period.

The most interesting feature in the meteorology of the past week was a storm in the Arabian Sea associated with a temporary advance of monsoon winds. Indications of the existence of low pressure conditions, probably at some distance from the coast, were first given by southerly winds, a rising sea and rainfall in Malabar on the 31st May. The disturbance advanced northward and on the 31d June the observations received from the Kathiawar stations indicated that a storm had developed. The storm moved slowly in a northerly direction and while doing so intensified, and on the morning of the 6th its centre was shown within a few miles of Karachi. It occasioned strong winds and a very high sea on the Kathiawar, Cutch and Sind Coasts but the rainfall given by it was comparatively light.

Rain has fallen daily in Burma and the east India more particularly in Eastern Bengal and Assam, and the progress of the storm in the Arabian Sea was marked on the west coast by rainfall which extended into Mysore and the Deccan on the 5th. Weather was disturbed in the extreme north of India during the greater part of the week and light falls of rain occurred along the western Himalayas, accompanied by unusually low temperature in northwest India.

Burma.—Rain fell on every day of the week, but was local in character except on the 31st May and 1st June when it was more widespread. Skies were more or less thickly clouded and temperature was approximately normal.

Northeast India and Orissa.—Weather was dry in the western districts, with the exception of a few falls of rain on the 1st in Lahu but in Eastern Bengal and Assam and Bengal rain was of daily occurrence, Assam being the region where it was heaviest and most general, Cherra Poonjee registered 42½" during the week, 19" of which fell in the twenty-four hours ending at 8 a.m. on June 6th. Skies were moderately to thickly clouded over the greater part of the division, and temperature was fairly normal except on the first two days of the week when it was in excess in the southwestern districts and in defect in the northeastern.

The United Provinces, Central India and the Central Provinces.—Light falls of rain were reported from Benares on the 1st and from Chakrata and Koorkee on the 31d. Skies were cloudy in the western districts on the 4th and 5th but were clear elsewhere and temperature was normal except at a few stations.

Northwest India.—Showery weather prevailed in the Ka-shmir Himalayas during the greater part of the week with a few falls in the Punjab Himalayas, and the storm in the Arabian Sea occasioned light to moderate rain on the 4th, 5th and 6th in Gujarat and Lower Sind. Skies were lightly to moderately clouded and temperature was on the whole below normal.

The Peninsula.—Light local rain fell in all parts of the division during the week except in the eastern districts. On the 5th rainfall occurred, chiefly in the Deccan and Mysore and temperature fell rapidly in those areas and on the east coast where the weather had up to that time been warmer than usual. Temperature was practically normal elsewhere.

The rainfall of the past week was below the normal on the west coast but was considerably above it in Gujarat and Sind. For the whole period from the 3d May to the 6th June rainfall is in defect everywhere except on the Burma coast and in Gujarat where it is in excess, and in Burma (West), the North West Dry Area and the subdivisions of Sibsagar, Narayanganj, Calcut, Jaipur and Madurai where it is practically normal.

The following summarizes the chief rainfall amounts of the week, as reported at 8 h. each day.

GEORGE C SIMPSON,
for Director General of Observatories.

J. WILSON,
Secretary to the Government of India.

SIMLA;
The 6th June 1907.

E

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, 1st June 1907.

Burma.—The rainfall was practically general; it was heavy in Akyab, Kyaukpadaung, Sandoway, Tavoy and Thabon, and moderate to light in other districts. Ploughing for wet weather paddy is progressing in several Lower Burma districts, and has begun in Katha and Shwabo. Sowing of hill-side paddy is completed in the Arakan Hill Tracts. Reaping of dry weather paddy in Mandalay, and transplanting in the Pauk township of Pakokku are completed. Sowing and transplanting of early wet weather paddy are finished in the Shwetaung tract of Mandalay. Sowing of cotton and peas has commenced in Lower Chindwin. The standing crops in Upper Burma are in good condition. The price of paddy has risen considerably in Shwabo, it has fallen slightly in Mandalay.

Eastern Bengal and Assam—The weather is generally hot and cloudy. Rain has fallen in all districts. The standing crops have been much improved by recent rain. Plucking and manufacture of tea are in progress and prospects are generally good except in Cachar where red spider still prevails. Sowing of rice is in progress. Sowing of jute is finished, except in Rajshahi and Mallah, and weeding is in progress. Sugarcane is being planted. Potatoes are being gathered in the Khasi Hills, and prospects are very good. Prices of common rice.—Mamur and Kohima 9, Chittagong 8½, Faridpur and Sibsagar 8; Comilla 7½, Dacca, Barisal, Rangpur, Jalpuguri, Sylhet, Dhubri, Gauhati, Tezpur and Dibrugarh 7½; Dinapur and Malda 7½, Mymensingh 7½; Nowgong 7; Silchar 5½ to 7; Tura 6 to 7, Rampur Boalia 6, Pabna 6½, Rangpur 6½, Bogra 6½, and Shillong and Aijal 6 seers per rupee. Prices have risen in nine, fallen in three, and remain stationary in the remaining districts.

Bengal.—Rain was fairly general in the Province. The fall was slight in most districts, it was heavy in Cooch Behar, and moderate in Hooghly, Jessore, Khulna and Darjeeling. Preparation of lands for the next season's crops is still going on. Sowings of paddy and jute continues. The state of the standing crops is generally good and prospects are satisfactory. More rain is wanted in Burdwan, Bankura, Hooghly, the 24 Parganas and Ranchi. In Darbhanga the number of persons on gratuitous relief is 12,037, on test works 2,318, and on famine-relief works 19,445. Fodder and water are generally sufficient. The price of common rice has risen in eleven and fallen in five districts.

United Provinces.—Rain has fallen in most districts. Threshing and winnowing are almost completed. Ploughing of fields for autumn crops continues, and sowings have commenced in places. Irrigation and weeding of extra crops and sugarcane are in progress in Bara Banki and Azamgarh. The mango crop has been damaged and the extra crops have been injured in Budaun by untimely rain. Fodder continues scarce in Azamgarh, and dear in Hardoi, Sitapur and Bara Banki. Supplies are adequate. Prices continue to rise.

Punjab.—Rain has fallen in all districts except Ferozepore, Lahore, Amritsar and Shahpur. Prices of food-grains are rising in Hissar, Ambala, Jullundur, Ferozepore, Lahore, Rawalpindi, Mianwali and Lyallpur, and are unchanged elsewhere. Harvesting of spring crops, and sowings of cotton, sugarcane, indigo and other autumn crops continue. Cutting of extra spring crops has commenced in Gurgaon, and weeding of standing crops is going on in Jullundur and Sukot. The outturn of spring crops is average to poor. The condition and prospects of extra spring crops are good. Locusts appeared, but did no damage in Kolak, Ferozepore and Lyallpur, but are still damaging the standing crops in Shahpur, Rawalpindi and Multan; locusts have disappeared in Mianwali, some damage to wheat by rain is reported from Multan, and slight loss by rick-burning in Lahore. The condition of cattle is good. Fodder is sufficient except in parts of Mianwali; green fodder is not available in Ferozepore. There are no complaints regarding the water-supply.

North-West Frontier Province—The rainfall of the week ranged from 9 cents in Bannu to 67 cents in Hazara. The spring harvest is being collected; the outturn of crops is average to good, except on irrigated lands in Bannu where it is below average owing to high winds. Lands for autumn crops are being prepared in Bannu. Sowing of extra spring crops are finished in Dera Ismail Khan but continue elsewhere. Hail fell in the Tank tehsil but did no damage. The water-supply is normal. Fodder is sufficient. The condition of cattle is good. Prices are generally rising. Prices:—wheat 15½ to 21½; gram 16½ to 17½; bajra 20 to 22; and maize 24 to 30 seers per rupee.

Jammu.—No rain. Prices are stationary. Prices:—wheat 9 to 23 and maize 11 to 36 seers per rupee. The condition of the standing crops is fair. Fodder is sufficient.

except in the Ramban and Kishtwar tehsils. Harvesting and threshing of spring crops are in progress. Locusts appeared in the Jammu, Riasi, Rampur, Akhnoor and Kotli tehsils and damaged the standing crops in the Rampur and Riasi tehsils.

Kashmir.—The weather is generally bright. Prices are almost unchanged. Crops are in good condition.

Rajputana.—Showers fell in many places; the maximum fall was 97 cents in Karauli. Harvesting operations are nearly over. Land is being prepared for autumn sowings. Cattle are in good condition, except in some places in Marwar, Jhalawar and Merwara. Pasturage and fodder are sufficient. Prices are rising in Marwar, Mewar, Jaipur, Kishengarh, Karauli and Ajmer, and are nearly steady elsewhere.

Central India.—Rain was general in Gwalior and there were light showers in Dhar. Threshing of spring crops and preparation of land for autumn crops are in progress. The standing crops and probable outturn are fair to good. Crops have been damaged by hail and rust in Baghelkhand. Agricultural stock and pasturage are fair to good except in parts of Indore, Malwa and Bhopawar. Prices are high in Baghelkhand; have risen in Bhopal and parts of Bhopawar; are falling in Dhar; fluctuating in Malwa; are normal in Gwalior; and are steady elsewhere.

Central Provinces.—The weather is hot and sultry. There was no rain except in four districts where there were light local showers not exceeding 17 cents. Preparation of land for sowings of autumn crops continues vigorously throughout the Provinces. Fodder and water are adequate everywhere, but fodder is very dear in Wardha, Nagpur, Akola and Yeotmal, being particularly scarce in the Yeotmal and Darwha taluqs of the Yeotmal district. Prices are generally steady or fluctuate very slightly with a tendency to rise; gram became dearer by 2 seers in Chhindwara; prices are still equal to or exceed the scarcity level in Seoni, Nimar, Wardha, Chanda, Bhandara, Balaghat, Drug, Bilaspur, Amraoti and Buldana.

Native States.—Sarangarh, Sakti and Udaipur had light showers during the week. Preparation of land for next autumn sowings is progressing, and sowing of rice has commenced in parts of Udaipur. Fodder and water are sufficient. Wheat became cheaper by 2 seers in Sarangarh.

Bombay.—There was slight rain during the week in parts of Larkana, Upper Sind Frontier, Ahmedabad, Panch Mahals, Surat, the Konkan, West Khandesh, Satara, the Karnatak, Kathiawar and Mahi Kantha. Preparation of lands for autumn cultivation is in progress. Sowing of autumn crops has commenced in parts of Karachi, Hyderabad, Thar and Parker, Ratnagiri, Kanara and Belgaum. The fodder-supply is sufficient, except in parts of Ratnagiri and Ahmednagar. Agricultural stock is generally in good condition. Drinking water is sufficient, except in parts of Ratnagiri, Kanara, the Deccan and Bijapur. Water for irrigation purposes is insufficient in parts of Surat, the Deccan, the Karnatak and Baroda. The quantity of food-grains purchasable per rupee is in the Karnatak 20 to 37 per cent; in the Deccan 21 to 31 per cent; and elsewhere 3 to 34 per cent less than the normal. Labourers get sufficient field employment. During the week ending the 25th May 25 persons were on gratuitous relief in Belgaum.

Hyderabad.—No rain. Lands are being prepared for monsoon sowings. Prices:—wheat 7½; coarse rice 7½; and *juar* 15 seers per rupee.

Mysore.—There was good rain in Bangalore and slight rain elsewhere. Prices of food-grains are steady. The standing crops are in good condition, but more rain is needed in Hassan and Chitaldroog. The prospects of the season are good. Cattle are healthy, and water and fodder are available.

Coorg.—Rainfall:—16 cents. Ploughing for rice continues. Prices of food-grains are normal. Water and fodder are sufficient.

Madras.—The rainfall was good in Trichinopoly, the Nilgiris, Salem and Coimbatore; there was no rain in Guntur, Kurnool, Bellary, Nellore, Chingleput and Madras; and light to fair rain elsewhere. Irrigation supplies are sufficient, except in parts of Ganjam, Vizagapatam, Godavari, Kistna, Kurnool, Bellary, Anantapur, Nellore, South Arcot, North Arcot, Salem, Madura and South Canara. Ploughing, sowing, weeding, manuring and transplanting are in progress in parts. The standing crops are generally good but some require more rain in parts of Vizagapatam and Madura. Harvests continue generally with outturn poor to normal and bumper. Pasture is sufficient except in parts of Ganjam, Vizagapatam, Godavari, Kistna, the Deccan, Nellore, Chinglepur, North Arcot, Madura and South Canara. Fodder is procurable. The condition of cattle is generally good. The price of rice is stationary in eleven districts; has fallen in three; and has slightly

risen in nine. The prices of millets have fluctuated as follows: *Ragi* is stationary in nine districts, has fallen in five; and has slightly risen in seven. *Cholum* is stationary in five districts, has fallen in two; and has slightly risen in seven. *Cumbu* is stationary in eight districts; has fallen in four; and has slightly risen in three.

The number of persons in receipt of relief during the preceding and present weeks in each province is shown in the following table:

| Name of province | PRECEDING WEEK (REVISED FIGURES) | | | PRESENT WEEK. | | | Increase or decrease. |

HOME DEPARTMENT.

NOTIFICATIONS.

ESTABLISHMENTS.

Nos. 732-34.

Simla, the 10th June, 1907.

RESOLUTION—By the Government of India, Home Department.

In the Home Department Resolution, nos. 1047-1049, dated the 3rd October 1905, it was declared that two posts of District Judge should be placed on the list of appointments open to members of the Provincial Civil Service in Burma, and that the pay of the appointments when held by such officers should be fixed at Rs. 1,000 a month. The Governor General in Council, with the approval of the Secretary of State, is now pleased to announce that two appointments of Deputy Commissioner shall also be thrown open to the Provincial Civil Service in that province, and that the pay of these latter appointments when held by officers of that service will be Rs. 1,000, Rs. 1,200, or Rs. 1,600 a month

according as the officers are serving in the third, second or first grade of Deputy Commissioners.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Government of Burma, and the Finance Department for information, and that it be published in the *Gazette of India* for general information.

H. H. RISLEY,

Secretary to the Government of India.

The 14th June, 1907.

The 12th June, 1907

No. 1668-G.B.—The Governor General in Council is pleased to recognise the appointment of Mr. C. E. L. Kappelhoff as Acting Consul for Germany at Aden.

The 14th June, 1907.

No. 1860-F.—Khan Sahib Ahmad Din is appointed Native Attaché to His Britannic Majesty's Consul-General and Agent of the Government of India in Khorasan, with effect from the 1st April 1902.

No. 2196-I.B.—In exercise of the powers conferred by the Indian (Foreign Jurisdiction) Order in Council, 1902, the Governor General in Council is pleased to apply to the Hyderabad Residency Bazars and the Cantonment of Secunderabad the provisions of the Indian Tramways Act, 1886 (XI of 1886), and the Indian Electricity Act, 1903 (III of 1903), in so far as the same may be applicable :

Provided, first, that references to the Local Government in the said enactments as so applied shall be read as referring to the Resident at Hyderabad, references to British India as referring to the Hyderabad Residency Bazars and the Cantonment of Secunderabad and references to the official Gazette or the local official Gazette as referring to the Hyderabad Residency Orders :

Provided, secondly, that the further modifications set forth in the schedule hereto annexed shall be made in the Indian Electricity Act, 1903 (III of 1903), as so applied :

Provided, thirdly, that for the purpose of facilitating the application of the said enactments, any Court in the said Hyderabad Residency Bazars and the Cantonment of Secunderabad may construe the provisions thereof with such alterations not affecting the substance, as may be necessary or proper to adapt them to the matter before the Court.

THE SCHEDULE.

| 1 | 2 |
|---|---|
| The Indian Electricity Act, 1903 (III of 1903). | <p>(1) For section 1, sub-section (3), the following shall be substituted, namely :</p> <p>“ 3. It shall come into force at once.”</p> <p>2 For section 32 the following shall be substituted, namely :</p> <p>“ 32 (1) The Resident at Hyderabad may with the previous sanction of the Governor General in Council by notification in the Hyderabad Residency Orders constitute an Advisory Board.</p> <p>(2) Every such Board shall consist of—</p> <p>(a) a Chairman and two other members, or where the Board is to consist of only three members, one other member nominated by the Resident at Hyderabad, and</p> <p>(b) two members or, where the Board is to consist of only three members, one member nominated by such local authorities, Chambers of Commerce or other Association, as the Resident at Hyderabad may by rule prescribe.</p> <p>(3) The Resident at Hyderabad may give directions as to the payment of traveling expenses incurred by any member of an Advisory Board in the performance of his duty as such member.”</p> <p>3. For section 33, sub-section (1), the following shall be substituted, namely :</p> <p>“ 33 (1) The Resident at Hyderabad, with the previous sanction of the Governor General in Council, may make rules to regulate the generation, supply and use of energy and generally to carry out the purposes and objects of this Act.”</p> <p>4 In section 33, sub-section (3), the words “the Governor General in Council or” and the words “as the case may be” shall be omitted.</p> <p>5. For section 34, sub-section (3), the following shall be substituted, namely :</p> <p>“ (3) Where an Advisory Board has been constituted under section 32, any rule to be made under this Act shall before it is published for criticism under sub-section (2) be referred to such Board and the rule shall not be so published until the Board has reported as to the expediency of making the proposed rule and as to the suitability of its provisions.”</p> <p>6. In section 34, sub-section (4), the words “the Gazette of India or” shall be omitted.</p> |

No. 2178-E.A.—The following Order of His Majesty in Council which was published in the *London Gazette* of the 10th May, 1907, is republished for general information.

ORDER IN COUNCIL.

AT the Court at *Buckingham Palace*, the 7th day of May, 1907.

PRESENT

The KING'S Most Excellent Majesty.

Lord President.

Earl of Sefton.

Paul Beauchamp.

Lord Tweedmouth.

Lord Allendale.

Lord Justice Kennedy.

Mr. Winston Churchill.

WHILE AS by Treaty, grant, usage, sufferance, and other lawful means, His Majesty The King has jurisdiction in that portion of the coast and islands of the Persian Gulf and Gulf of Oman which is within the dominions of His Majesty the Shah of Persia.

Now, therefore His Majesty by virtue and in exercise of the powers in this behalf by "The Foreign Jurisdiction Act, 1860" or otherwise in His Majesty vested, enacted, by and with the advice of His Privy Council, to order, and it is hereby ordered, as follows:

PART I.—PRELIMINARY AND GENERAL.

1. This Order is divided into parts, as follow:

| Parts | Subject | Articles |
|-------|---|----------|
| I | Preliminary and General | 1-3 |
| II | Application of Law of British India and of the United Kingdom | 4-6 |
| III | Criminal Matters | 7-10 |
| IV | Civil Matters | 11-12 |
| V | Persian and Foreign Subjects and Immunities | 13-14 |
| VI | Registration | 15-17 |
| VII | Miscellaneous Provisions | 18-19 |
| | Schedules | |

2. The limits of this Order are the coast and islands of the Persian Gulf and Gulf of Oman, being within the dominions of His Majesty the Shah of Persia, including the territorial waters of Persia adjacent to the said coast and islands.

3. In the construction of this Order the following words and expressions have the meanings hereby assigned to them, unless there be something in the subject or context repugnant thereto, that is to say:

"Administration" means letters of administration, including the same with will annexed or granted for special or limited purposes or limited in duration.

"British possession" means any part of His Majesty's dominions exclusive of the United Kingdom.

"British ship" means a merchant ship being a British ship within the meaning of the Merchant Shipping Act, 1894, and includes a ship belonging to any British subject as hereinafter defined.

"British subject" includes a British protected person, that is to say, a person who either (a) is a native of any Protectorate of His Majesty; or (b) by virtue of section 15 of

the Foreign Jurisdiction Act, 1890 or otherwise enjoys His Majesty's protection within the Persian coast and islands

"Consul General" means the person for the time being holding the office of His Majesty's Consul General for Persia and the coasts and islands of the Persian Gulf, and of Political Resident in the Persian Gulf

"Consular Seal" means the official seal of the Consul-General.

"The Court" means a court held by the Consul-General or the Judicial Assistant.

"Foreigner" means a subject or citizen of a State in amity with His Majesty, other than Persia.

"Imprisonment" means imprisonment of either description as defined in the Indian Penal Code

"Inland Persia" means the territories and dominions of the Shah of Persia, so far as not included within the limits of this Order.

"Judicial Assistant" means an officer appointed by the Secretary of State, or, with his previous or subsequent assent by the Governor General of India in Council, to be a Judicial Assistant to the Consul-General

"Month" means calendar month

"Offence" means any act or omission punishable by a Criminal Court.

"Persian coast and islands" means all places within the limits of this Order.

"Persian or Foreign Court" means a Court of the Government of Persia, or of any foreign State in amity with His Majesty and exercising lawful jurisdiction within the Persian coasts and islands, and includes every member or officer of such a Court

"Persian subject" means a subject of His Majesty the Shah of Persia.

"Person" includes corporation.

"Secretary of State" means one of His Majesty's Principal Secretaries of State.

"Ship" includes any vessel used in navigation, however propelled, with her tackle, furniture, and apparel, and a y boat or other craft.

"The Treasury" means the Lord High Treasurer or the Commissioners of His Majesty's Treasury for the time being, or any two of them.

"Will" means will, codicil, or other testamentary instrument

4—(1) In this Order, words importing the plural or the singular may be construed as referring to one person or thing, or to more than one person or thing, and words importing the masculine as referring to the feminine (as the case may require).

(2.) Where this Order confers any power or imposes any duty, then, unless a contrary intention appears the power may be exercised and the duty shall be performed from time to time as occasion requires

(3.) Where this Order confers a power, or imposes a duty on, or with respect to, a holder of an office, as such, then, unless a contrary intention appears, the power may be exercised and the duty shall be performed by, or with respect to, the holder for the time being of the office or the person temporarily acting for the holder.

(4.) Where this Order confers a power to make any rules, regulations, or orders, the power shall, unless a contrary intention appears, be construed as including a power exercisable in the like manner and subject to the like consent and conditions, if any, to rescind, revoke, vary or amend the rules, regulations, or orders.

(5.) This Article shall apply to the construction of any regulations, rules, or orders made under this Order, unless a contrary intention appears.

5 The jurisdiction conferred by this Order extends to the persons and matters following, in so far as by Treaty, grant, usage, sufferance, or other lawful means, His Majesty has jurisdiction in relation to such matters and things, that is to say:

(1) British subjects, as herein defined, within the limits of this Order.

(2.) The property and all personal or proprietary rights and liabilities within the said limits of British subjects, whether such subjects are within the said limits or not.

(3.) Persian subjects and foreigners in the cases and according to the conditions specified in this Order and not otherwise

(4.) Foreigners, with respect to whom any State, King, Chief, or Government, whose subjects, or under whose protection they are, has by any Treaty as herein defined or

otherwise agreed with His Majesty for, or consents to, the exercise of power or authority by His Majesty.

(5.) British ships with their boats, and the persons and property on board thereof, or belonging thereto, being within the limits of this Order.

6. All His Majesty's jurisdiction exercisable within the Persian coast and islands for the hearing and determination of criminal or civil matters, or for the maintenance of order, or for the control or administration of persons or property or in relation thereto, shall be exercised, under and according to the provisions of this Order, so far as this Order extends and applies.

PART II.—APPLICATION OF LAW OF BRITISH INDIA AND OF THE UNITED KINGDOM.

7—(1.) Subject to the other provisions of this Order, and to any Treaties for the time being in force relating to the Persian coast and islands, His Majesty's criminal and civil jurisdiction within the Persian coast and islands shall, so far as circumstances admit, be exercised on the principles of, and in conformity with, the enactments for the time being applicable as hereinafter mentioned of the Governor General of India in Council, and of the Governor of Bombay in Council and in accordance with the powers vested in, and the course of procedure and practice observed by and before, the Courts in the Presidency of Bombay beyond the limits of the ordinary original jurisdiction of the High Court of Judicature at Bombay according to their respective jurisdiction and authority, and, so far as such enactments, powers, procedure and practice are inapplicable, shall be exercised in accordance with justice, equity, and good conscience.

(2.) The enactments mentioned in the First Schedule to this Order are hereby made applicable to the Persian coast and islands as from the commencement of this Order.

(3.) Any other existing or future enactments of the Governor General of India in Council, or of the Governor of Bombay in Council, shall also be applicable to the Persian coast and islands, but shall not come into operation until such times as may in the case of any of such enactments respectively be fixed by the Secretary of State, or, with his previous or subsequent assent, by the Governor General of India in Council.

(4.) The Court may construe any such enactment with such alterations not affecting the substance, as may be necessary or proper to adapt the same to the matter before the Court.

8. The enactments described in the first schedule to "The Foreign Jurisdiction Act, 1890," shall apply to the Persian coast and islands as if they were a British colony or possession, but subject to the provisions of this Order, and to the exceptions, adaptations, and modifications following, that is to say:

(i) The Consul-General is hereby substituted for the Governor of a colony or British possession, and the Court of the Consul-General is hereby substituted for a Superior Court or Supreme Court, and for a Magistrate or Justice of the Peace of a colony or British possession.

(ii.) For the portions of the Merchant Shipping Acts, 1854 and 1867, referred to in the said Schedule shall be substituted Part XIII of "The Merchant Shipping Act, 1894."

(iii.) In section 51 of "The Conveyancing (Scotland) Act, 1871," and any enactment for the time being in force amending the same, the Court of the Consul-General is substituted for a Court of Probate in a Colony.

(iv.) With respect to "The Fugitive Offenders Act, 1881,"—

(a.) So much of the 4th and 5th sections of the said Act as relates to sending a report of the issue of a warrant, together with the information or a copy thereof, or to the sending of a certificate of committal and report of a case, or to the information to be given by a Magistrate to a fugitive, shall be excepted, and in lieu of such information the person acting as the Magistrate shall inform the fugitive that in the British possession or Protectorate to which he may be conveyed he has the right to apply for a writ of *habeas corpus* or other like process.

(b.) So much of the 6th section of the said Act as requires the expiration of fifteen days before issue of warrant, shall be excepted.

(c.) The Consul-General shall not be bound to return a fugitive offender to a British possession unless satisfied that the proceedings to obtain his return are taken with the consent of the Governor of that possession.

(d.) For the purposes of Part II of the said Act, the Persian coast and islands, and British India, shall be deemed to be one group of British possessions.

9. Where, by virtue of any Imperial Act, or of this Order, or otherwise, any provisions of any Imperial Acts, or of any Law in force in India, or of any Orders in Council other than this Order, are applicable within the limits of this Order, or any forms, regulations, or procedure prescribed or established by or under any such Act, Law or Order, are made applicable for any purpose of this Order, or any other Order relating to the Persian coast and islands, such Acts, Laws, Orders, forms, regulations, or procedure may be construed or used with such alterations and adaptations not affecting the substance as may be necessary having regard to local circumstances, and anything required to be done by, to, or before any Court, Judge, officer or authority may be done by, to, or before a Court, Judge, officer or authority having the like or analogous functions or by, to, or before any officer designated by the Secretary of State or by the Court (as the case may require) for that purpose and the Consular seal may be substituted for any other seal, and in case any difficulty occurs in the application the Secretary of State, or with his previous or subsequent assent the Governor General of India in Council, may direct by, to, or before whom and in what manner anything is to be done, and such Act, Law, Order, form, Regulation, or procedure shall be construed accordingly.

Where under any such Imperial Act, Law, or Order any publication is required to be made, as respects any judicial proceeding in any "Gazette" or otherwise, such publication shall be made by such mode as the Court shall think fit to direct.

PART III.—CRIMINAL MATTERS.

10. Subject to the other provisions of this Order, the Code of Criminal Procedure and the other enactments relating to the administration of criminal justice in British India for the time being applicable to the Persian coast and islands, shall have effect as if the Persian coast and islands were a district in the Presidency of Bombay, the Consul-General shall be deemed to be the Sessions Judge, and the Judicial Assistant shall be deemed to be the District Magistrate and additional Sessions Judge, the High Court of Judicature at Bombay (hereafter called the High Court of Bombay) shall be deemed to be the High Court, and the powers both of the Governor General in Council and of the Local Government under the enactments shall be exercisable by the Secretary of State, or, with a power of appeal, by the Governor General of India in Council.

11. When any person is committed to the High Court of Bombay for trial, the Consul-General may, in any case, direct, in accordance with the provisions of section 4 of the Foreign Jurisdiction Act, 1876, that the person be committed for trial, and may if he thinks fit, himself try the case or cause it to be tried by a Judge or Judges, or any of them, in their own or any other Court.

12. (1) The Consul-General may, in any case, direct the manner in which, and the place in which, any person committed to the High Court of Bombay, or to any other Court, shall be tried, and may, if he thinks fit, direct that the person be committed to the custody of the Consul-General, or of any other person, and may, if he thinks fit, direct that the person be committed to the custody of the Consul-General, or of any other person, and may, if he thinks fit, direct that the person be committed to the custody of the Consul-General, or of any other person.

(2) The Court may, in any case, by warrant sealed with the Consular seal, cause an offender to be removed and sentenced to imprisonment before the Court to be removed to, and imprisoned in, any place within the Persian coast and islands.

13. Where an offender committed before any Court established under this Order is sentenced to imprisonment, and the Consul-General proceeding under section 7 of the Foreign Jurisdiction Act, 1876, has authority to that effect being hereby given to him, on the application of the offender, the sentence shall be carried into effect within His Majesty's dominions, and the offender is accordingly sent to imprisonment to a place in His Majesty's dominions, the place shall be either a place in the Presidency of Bombay, or a place in any other part of His Majesty's dominions, the Government whereof consents that offence may be tried there under this Article.

14. (1) In cases of murder or culpable homicide, if either the death or the criminal act was wholly or partly committed within the Persian coast and islands, a Court, acting under this Order, shall have the like jurisdiction over any British subject who is charged with being a principal offender or an abettor as if both such criminal act and the death had happened within the Persian coast and islands.

(2) In the case of any crime committed on the high seas or within the Admiralty jurisdiction by any British subject who at the time of committing such crime was on board a British ship or on board a foreign ship to which he did not belong, a Court, acting under this Order, shall have jurisdiction as if the crime had been committed within the Persian coast and islands.

(3) In cases tried under this Article no different sentence can be passed from the sentence which could be passed in England if the crime were tried there.

(4) The foregoing provisions of this Article shall be deemed to be adaptations, for the purposes of this Order and of the Foreign Jurisdiction Act, 1890, of the following enactments, namely

The Admiralty Offences (Colonial) Act, 1849

The Admiralty Offences (Colonial) Act, 1860,

The Merchant Shipping Act, 1894, Part XIII.

And those enactments shall apply accordingly, and be administered within the Persian coast and islands.

15. Where a warrant or order of arrest is issued by a competent Consular authority in inland Persia for the apprehension of a person who is accused of crime committed in inland Persia, and who is or is supposed to be, within the limits of this Order, and such warrant or order is produced to any Court acting under this Order, the Court may back the warrant or order, and the same when so backed shall be sufficient authority to any person to whom it was originally directed, and also to any constable or officer of the Court by which it is backed, and to any person named on the back of the warrant or order, to apprehend the accused person at any place within the limits of this Order, and to carry him to and deliver him up within the jurisdiction of the authority issuing the warrant or order.

16. Where a British subject is convicted of an offence, the Court before which he is convicted may, if it thinks fit at any time before he is discharged, require him to give security to the satisfaction of the Court for his future good behaviour, and for that purpose may, if it thinks fit, cause him to come or be brought before the Court.

17. (1.) Where it is shown by evidence on oath, to the satisfaction of the Court, that any person subject to this Order has committed, or is about to commit, an offence against this Order, or is otherwise conducting himself so as to be dangerous to peace and good order, or is endeavouring to excite enmity between the people of Persia and His Majesty, or is intriguing against His Majesty's power and authority within the limits of this Order, the Court may, if it thinks fit, by order under the Consular seal, prohibit that person from being within the limits of this Order, during any time therein specified, not exceeding two years.

(2.) The Court, by order in writing under the Consular seal, may vary any order of prohibition (not extending the duration thereof), and may revoke any order of prohibition or removal.

(3.) The Consul-General shall forthwith report to the Secretary of State every order made by him under this Article, and the grounds thereof, and the proceedings thereunder.

18. (1.) If a British subject fails to give security for good behaviour or for keeping the peace when lawfully required to do so, or fails to comply with an order of prohibition made under this Order, the Court may, if it thinks fit, order that he be deported from the Persian coast and islands.

(2.) The Judicial Assistant, on making an order of deportation, shall forthwith report to the Consul-General the order and the grounds thereof.

(3.) Thereupon the person ordered to be deported shall, unless the Consul-General thinks fit otherwise to direct, be as soon as practicable, and in the case of a person convicted either after execution of the sentence or while it is in course of execution, removed in custody under warrant to the place named in the warrant.

(4.) The place shall be a place either in the Presidency of Bombay, or in the part of His Majesty's dominions to which the person belongs, or in a British possession or protectorate, the Government whereof consents to the reception therein of persons deported under this Order.

(5.) The Court, on making an order of deportation, may, if it thinks fit, order the person to be deported to pay all or any part of the expenses of his deportation to be fixed by the Court in the order. Subject thereto, the expenses of deportation shall be defrayed as the Secretary of State, with the concurrence of the Treasury, directs.

(6.) The Consul-General shall forthwith report to the Secretary of State every order of deportation made under this Order, and the grounds thereof, and the proceedings thereunder.

(7.) If a person deported under this Order returns to the Persian coast and islands without permission in writing of the Consul General, or the Governor-General of India in Council, or the Secretary of State, he shall be punished with imprisonment for a term which may extend to two months, or with a fine which may extend to 1,000 rupees (459 77 dollars), or with both.

(8.) He shall also be liable to be forthwith again deported under the original or a new Order, and a fresh warrant.

19. (1.) Where under this Order a person is to be sent or removed or deported from the Persian coast and islands, he shall, by warrant of the Court sealed with the Consular seal, be detained, if necessary, in custody, or in prison, until a fit opportunity for his removal or deportation occurs, and then be put on board a vessel belonging to, or in the service of His Majesty, or if no such vessel is available, then on board some other British or other fit vessel.

(2.) The warrant shall be sufficient authority to the person to whom it is directed or delivered for execution, and to the Commanding Officer or master of the vessel, to receive

and detain the person therein named, in the manner therein prescribed, and to send or remove and carry him to the place therein named, according to the warrant.

(3.) In case of sending or removal for any purpose other than deportation, the warrant shall be issued in duplicate, and the person executing it shall, as soon as practicable after his arrival at the place therein named, deliver, according to the warrant, with one of the duplicates of the warrant, to a constable, or proper officer of police, or keeper of a prison, or other proper authority or person there, the person named in the warrant, to be produced on the order of the proper Court or authority there, or to be otherwise dealt with according to law.

20. An appeal shall not lie against an order of prohibition, or removal, or deportation made under this Order.

21. If any person subject to criminal jurisdiction under this Order does any of the following things, namely :—

- (i.) Wilfully by act or threat obstructs any Officer of or person executing any process of the Court in the performance of his duty ; or
- (ii.) Within or close to the room or place where the Court is sitting wilfully misbehaves in a violent, threatening, or disrespectful manner to the disturbance of the Court, or to the intimidation of suitors or others resorting thereto ; or
- (iii.) Wilfully insults any member of the Court, or any assessor, or any person acting as a Clerk or Officer of the Court during his sitting or attendance in Court, or in his going to or returning from Court ; or
- (iv.) Does any act in relation to the Court or a Judge thereof, or a matter pending therein, which, if done in relation to a Superior Court in England, or in India would be punishable as a contempt of such Court, or as a libel on such Court or the Judges thereof, or the administration of justice therein ; such person shall be liable to be apprehended by order of the Court with or without warrant, and, on enquiry and consideration and after the hearing of any defence which such person may offer, without further process or trial, to be punished with a fine not exceeding one hundred rupees (45·97 dollars), or with imprisonment not exceeding twenty-four hours.

A Minute shall be made and kept of every such case of punishment, recording the facts of the offence and the extent of the punishment, and a copy of the Minute shall be forthwith sent to the Governor-General of India in Council.

Provided that, if the Court thinks fit, instead of proceeding under the preceding provisions, it may direct or cause the offender to be tried in a separate criminal prosecution or proceeding in which the offender shall be liable to any punishment to which he would be liable if the offence were committed in relation to the Court of a Sessions Judge in India.

Nothing herein shall interfere with the power of the Court to remove or exclude persons who interrupt or obstruct the proceedings of the Court.

22. If a British subject smuggles or imports into or exports from the Persian coast and islands any goods whereon any duty is charged or payable to the Government of Persia, with intent to evade payment of the duty on any goods, the importation or exportation whereof is prohibited by law, he shall be punished with imprisonment for a term which may extend to two months, or with fine which may extend to one thousand rupees, or a sum equal to treble the value of the goods (whichever shall be the greater), or with both imprisonment and fine.

23. (1.) If a British subject—

- (i.) Publicly derides, mocks, or insults any religion established or observed within the limits of this Order ; or
- (ii.) Publicly offers insult to any religious service, feast, or ceremony established or kept in any place within those limits, or to any place of worship, tomb, or sanctuary belonging to any religion established or observed within those limits, or to the ministers or professors thereof ; or
- (iii.) Publicly and wilfully commits any act tending to bring any religion established or observed within those limits, or its ceremonies, mode of worship, or observances, into hatred, ridicule, or contempt, and thereby to provoke a breach of the public peace ;

he shall be guilty of an offence, and on conviction thereof, liable to imprisonment which may extend to two years, with or without a fine not exceeding 500 rupees, or to a fine alone not exceeding 500 rupees.

(2.) Consular officers shall take such precautionary measures as seem to them proper and expedient for the prevention of such offences. •

24. Any British subject being within the limits of this Order may be proceeded against, tried, and punished under this Order for piracy wherever committed.

25. If any British subject within the limits of this Order violates or fails to observe any stipulation of any Treaty between His Majesty, His predecessors, heirs, or successors, and the Shah of Persia for the time being in force, in respect of the violation whereof any penalty is stipulated for in the Treaty, he shall be deemed guilty of an offence against the Treaty, and on conviction thereof under this Order shall be liable to a penalty in accordance with the stipulations of the Treaty.

26. Where a person entitled to appeal to the High Court of Bombay from any judgment or order passed in the exercise of criminal jurisdiction under this Order, desires so to appeal, he shall present his petition of appeal to the Court which passed the judgment or order; and the petition shall with all practicable speed be transmitted by or through the Consul-General to the High Court, with certified copies of the charge (if any) and proceedings, of all documentary evidence admitted or tendered, of the depositions, of the notes of the oral testimony, and of the judgment or order, and any argument on the petition of appeal that the appellant desires to submit to the High Court.

27. The Court against whose judgment or order the appeal is preferred may postpone the execution of the sentence pending the appeal, and shall, if necessary, commit the person convicted to prison for safe custody, or detain him in prison for safe custody or shall admit him to bail, and may take security, by recognizance, deposit of money, or otherwise for his payment of any fine.

PART IV.—CIVIL MATTERS.

28. Subject to the other provisions of this Order, the Code of Civil Procedure, and the other Indian enactments relating to the administration of civil justice and to insolvency and bankruptcy for the time being applicable to the Persian coast and islands, shall have effect as if the Persian coast and islands were a district in the Presidency of Bombay; the Consul-General shall be deemed to be the District Judge, and the Judicial Assistant shall be an additional District Judge of the district, and the Court, whether held by the Consul-General or by the Judicial Assistant, shall be deemed to be the District Court or Principal Civil Court of Original Jurisdiction in the district, the High Court of Bombay shall be deemed to be the highest Civil Court of Appeal for the district, and the Court authorized to hear appeals from the decisions of the District Court; and the powers, both of the Governor General in Council and the Local Government, under those enactments, shall be exercisable by the Secretary of State, or, with his previous or subsequent assent by the Governor General of India in Council.

29. The following enactments of the Colonial Courts of Admiralty Act, 1890, that is to say, section 2, sub-sections (2) to (4), sections 5 and 6, section 16, sub-section (3), shall apply to the Court as if in the said sections the Court were mentioned in lieu of a Colonial Court of Admiralty, and the Persian coast and islands were referred to in lieu of a British possession.

30 (1.) The Court shall endeavour to obtain, as early as may be, notice of the deaths of all British subjects leaving property within the Persian coast and islands, and all such information as may serve to guide the Court with respect to the securing and administration of their property.

(2.) On receiving notice of the death of such a person, the Court shall put up a notice thereof at the Court House, and shall keep the same there until probate or administration is granted, or, where it appears to the Court that probate or administration will not be applied for or cannot be granted, for such time as it thinks fit.

(3.) The Court shall, where the circumstances of the case appear so to require, as soon as may be, take possession of the property within the Persian coast and islands of the deceased, or put it under the Consular seal (in either case, if the nature of the property or other circumstances so require, making an inventory), and so keep it until it can be dealt with according to law.

(4.) All expenses incurred on behalf of the Court in so doing shall be the first charge on the property of the deceased, and the Court shall, by sale of part of that property, or otherwise, provide for the discharge of these expenses.

(5.) When a British subject dies within the limits of this Order or elsewhere intestate, his property, or so much thereof as is within those limits, shall, until administration is granted, vest in the Consul-General.

31. If a person named executor in a will, and to the establishment of whose title, as such, it is necessary to obtain probate of that will, takes possession of and administers or

otherwise deals with any part of the property of the deceased, and does not obtain probate within one month after the death or after the termination of any proceeding respecting probate or administration, he shall be punished with fine, which may extend to 1,000 rupees (459·77 dollars).

32 If any person, other than the person named executor, or the administrator, or a person entitled to represent the deceased without obtaining probate or letters of administration, or an officer of the Court, takes possession of and administers or otherwise deals with any part of the property of the deceased, he shall, as soon as practicable, notify the fact and the circumstances to the Court, and shall furnish to the Court all such information as the Court requires, and shall conform to any direction of the Court in relation to the custody, disposal, or transmission of the property or the proceeds thereof, and, in case of any contravention of this Article, he shall be punished with fine, which may extend to 1,000 rupees (459·77 dollars).

33. (1.) When the peculiar circumstances of the case appear to the Court so to require for reasons recorded in its proceedings, the Court may, if it thinks fit, of its own motion or otherwise, grant letters of administration to an officer of the Court.

(2.) The officer so appointed shall act under the direction of the Court, and shall be indemnified thereby.

(3.) He shall publish such notices, if any, as the Court thinks fit, within the Persian coast and islands, Bombay, the United Kingdom, and elsewhere.

(4.) The Court shall require and compel him to file in the proper office of the Court his accounts of his administration, at intervals not exceeding three months, and shall forthwith examine them and report thereon to the Consul-General.

(5.) The accounts shall be audited under the direction of the Court.

(6.) All expenses incurred on behalf of the Court in execution of this Article shall be the first charge on the estate of the deceased within the Persian coast and islands; and the Court shall, by the sale of that estate or otherwise, provide for the discharge of those expenses.

34. (1.) Where any person entitled to appeal to the High Court of Bombay from any decree or order made in exercise of civil jurisdiction under this Order desires so to appeal, he shall present his memorandum of appeal to the Court which made the decree or order, and subject to the provisions hereinafter contained, that Court shall receive the same for transmission to the High Court in manner hereinafter provided.

(2.) The appellant shall, within such time as the Court directs, give security to the satisfaction of the Court, and to such amount as the Court thinks reasonable, for prosecution of the appeal, and for payment of any costs which may be ordered by the High Court of Bombay on the appeal, to be paid by the appellant to any person.

(3.) The appellant shall pay into the proper office of the Court which passed the decree or order such sum as the Court thinks reasonable, to defray the expense of the making up and transmission to the High Court of Bombay of the record.

35. The appellant may, with his memorandum of appeal, file any argument which he desires to submit to the High Court of Bombay in support of the appeal.

36. (1.) The memorandum of appeal and the argument (if any) shall be served on such persons as respondents as the Court in which they are filed directs.

(2.) A respondent may, within fourteen days after service, file in that Court a memorandum (if any) of cross-appeal, and such arguments as he desires to submit to the High Court of Bombay against the appeal, or in support of the cross-appeal.

(3.) Copies thereof shall be furnished by the Court in which they are filed to such persons as the Court thinks fit.

37.—(1.) On the expiration of the time for the respondent filing his argument, the Court shall, without the application of any party, make up the record of appeal, which shall consist of the memorandum of appeal and the arguments (if any), and certified copies of the following, namely, the plaint, written statements (if any), all proceedings, all written and documentary evidence admitted or tendered, the notes of the oral evidence, the judgment, and the decree or order.

(2.) The several pieces shall be fastened together, consecutively numbered, and the whole shall be secured by the Consular seal, and be forthwith forwarded by him to the High Court of Bombay.

(3.) The Court may, if for special reasons it thinks fit, send any portion of the documentary evidence, in original, to the High Court.

PART V.—PERSIAN AND FOREIGN SUBJECTS AND TRIBUNALS

38. (1.) Where a Persian subject or foreigner desires to bring in a Court established under this Order a suit against a British subject, or a British subject desires to bring in such a Court a suit against a Persian subject or foreigner the Court shall entertain the same, and shall hear and determine it.

(2.) Provided that the Persian subject or foreigner if required by the Court, first obtains and files in the proper office of the Court the consent, in writing, of the competent authority (if any), on behalf of his own nation to his submitting, and that he does submit by writing, to the jurisdiction of the Court, and if required by the Court, gives security to the satisfaction of the Court, and to such reasonable amount as the Court thinks fit, by deposit or otherwise, to pay fees, costs, and damages, and abide by, and perform, the decision to be given by the Court or on appeal.

(3.) A cross-suit shall not be brought in the Court against a plaintiff, being a foreigner.

(4.) Where a Persian subject or foreigner obtains in a Court established under this Order, a decree or order against a defendant being a British subject, and in another suit that defendant is plaintiff and the Persian subject or foreigner is defendant, the Court may, if it thinks fit, on the application of the British subject, stay the enforcement of the decree or order pending that other suit, and may set off any amount decreed or ordered to be paid by one party in one suit against any amount decreed or ordered to be paid by the other party in the other suit.

(5.) Where a plaintiff, being a Persian subject or foreigner, obtains a decree or order, in a Court established under this Order, against two or more defendants, being British subjects, jointly and in another suit one of them is a plaintiff and the foreigner is defendant, the Court may, if it thinks fit, on the application of the British subjects stay the enforcement of the decree or order pending that other suit, and may set off any amount decreed or ordered to be paid by one party, in one suit against any amount decreed or ordered to be paid by the other party in the other suit, without prejudice to the right of the British subject to obtain contribution from his co-defendants under the joint liability.

(6.) Where in a suit a Persian subject or foreigner is co plaintiff with a British subject who is within the Persian coast and islands, it shall not be necessary for the Persian subject or foreigner to give security under this Article as regards fees and costs unless the Court so directs, but the co-plaintiff British subject shall be responsible for all fees and costs.

39. (1.) Where it is proved that the attendance of a British subject to give evidence, or for any other purpose connected with the administration of Justice, is required before a Persian or foreign Court, a Court established under this Order may if it thinks fit, in a case and in circumstances in which the Court would require the attendance of that person before the Court, order that he do attend as required.

(2.) If the person ordered to attend, having reasonable notice of the time and place at which he is required to attend, fails to attend accordingly and does not satisfactorily excuse his failure to the satisfaction of the Court, he shall, independently of any other liability, be liable to be punished with imprisonment for a term which may extend to two months, or with fine which may extend to 1,000 rupees (459 77 dollars), or with both.

40. When a British subject invokes or submits to the jurisdiction of a Persian or foreign Tribunal and engages in writing to abide by the decision of that Tribunal, or to pay any fees or expenses ordered by that Tribunal to be paid by him, the Court may, on such evidence as it thinks fit to require, enforce payment of such fees and expenses in the same manner as if they were fees payable in a proceeding in the Court, and shall pay over and account for the same when levied to the proper Persian or foreign authority as the Court may direct.

41. (1.) If a British subject wilfully gives false evidence in a proceeding before a Persian or foreign Court, or in an arbitration between a British subject on the one hand, and a Persian subject or foreigner on the other hand, he shall, on conviction before a competent Court of Criminal Jurisdiction, be liable to be punished with imprisonment for a term which may extend to two months, or with fine which may extend to 1,000 rupees (459 77 dollars), or with both.

(2.) Nothing in this Article shall exempt a person from liability under any other British or British Indian Law to any other or higher punishment or penalty:

Provided that no person shall be punished twice for the same offence.

42. (1.) Every Agreement for reference to arbitration between a British subject on the one hand and a Persian subject or a foreigner on the other hand, may, on the application of any party, be filed for execution in the office of the Court.

(2.) The Court shall thereupon have authority to enforce the Agreement, and the award made thereunder, and to control and regulate the proceedings before and after the award, in such manner and on such terms as the Court may think fit :

(3.) Provided that the Persian subject or foreigner, if so required by the Court, first obtains and files, in the proper office of the Court, the consent, in writing, of the competent authority (if any) on behalf of his own nation to his submitting, and that he does submit by writing, to the jurisdiction of the Court, and, if required by the Court, gives security to the satisfaction of the Court, and to such reasonable amount as the Court thinks fit, by deposit or otherwise, to pay fees, costs, damages, and expenses, and abide by and perform the award.

PART VI.—REGISTRATION.

43 (1) A register of British subjects shall be kept at each of such Consular offices within the limits of this Order, and in respect of such [Consular] districts respectively, as may be prescribed by Regulations.

(2) Every British subject, resident or arriving within the said limits, being of the age of twenty-one years or upwards, or being married, or a widower or widow, though under that age, may, subject to the provisions of this Order, be registered in a Consular register.

(3) The registration of a man shall comprise the registration of his wife, or wives, if living with him ; and the registration of the head of a family shall comprise the registration of all females and minors, being his relatives in whatever degree, living under the same roof with him at the time of his registration.

(4) A British subject resident within the said limits shall not be registered elsewhere than in the register of the Consular district in which he resides ; but a person arriving within the said limits may be registered either in the register of the Consular district in which he first arrives, or in that of the district in which he goes to reside.

(5) A person arriving within the said limits, and not already registered, must apply for registration within one month after arrival ; a person resident within the said limits must apply for registration in January in every year : provided that a person who fails to obtain registration within the time so limited may be registered at any time if he excuses his failure to the satisfaction of the Consular officer.

(6) A person registered in any register of British subjects established under any Order in Council repealed by this Order, shall be registered under the provisions of this Order, unless the Consular officer is satisfied, after inquiry, that the previous registration was erroneous, or that such person is not entitled to registration under the provisions of this Order.

(7) Every person applying to be registered under this Order shall, unless excused by the Consular officer, attend personally for that purpose at the Consular office on each occasion of registration.

(8) Every person shall, on every registration of himself, pay a fee of one rupee, or such other fee as the Secretary of State from time to time appoints. The amount of the fee may be uniform for all persons, or may vary according to the position and circumstances of different classes if the Secretary of State from time to time so directs, but may not in any case exceed three rupees.

44. (1) The Consular Officer shall on every registration give to the person registered a certificate of registration signed by him, and sealed with his Consular seal.

(2) The name of a wife, if her registration is under the provisions of this Order comprised in her husband's, shall be indorsed on the husband's certificate.

(3) The names and descriptions of females and minors, whose registration is under the provisions of this Order comprised in that of the head of a family, shall be indorsed on the certificate of the head of the family.

45. If any British subject fails to obtain registration under the provisions of this Order, he shall not be entitled to be recognized or protected as a British subject, but he shall, although not registered, be subject to the jurisdiction of the Court.

46. (1) A person, not of Asiatic descent, arriving within the limits of this Order, and applying to be registered as a British subject, shall be so registered if the Consular officer is satisfied, after such inquiry as he may deem fit, that he is entitled to the status of a British subject.

(2) A person of Asiatic descent arriving within the said limits, and applying to be registered as a British subject, shall be so registered if he (a) produces a passport as a British subject from British India or a British possession ; or (b) files an affidavit or sworn declaration showing that he was born within His Majesty's dominions or within the territory of any Prince or State in India under the suzerainty or in alliance with His

Majesty, or that he has been naturalized in the United Kingdom; and (c) in either case gives satisfactory evidence of his identity.

(3) A person born within the said limits, being the child of a person of Asiatic descent who arrived within the said limits, may be registered as a British subject if it is proved that the father (a) was registered as a British subject at the time of the child's birth; or (b) being entitled was prevented from being so registered by causes for which he was not responsible.

Any child of a person registered under the provisions of this Article shall not be entitled to be registered as a British subject by reason only that his father and grandfather were so registered.

(4) A woman, being the widow of a person of Asiatic descent, who was in his lifetime registered as a British subject, shall be registered as a British subject if her name appears on the last certificate given to her husband before his death, but not otherwise.

47. All registers kept under any Order repealed by this Order shall continue in force until superseded by registers kept under this Order.

PART VII.—MISCELLANEOUS PROVISIONS.

48. Subject to the control of the Secretary of State, the Consul-General may, from time to time, with the previous sanction of the Governor General of India in Council, make Rules of Procedure and other Rules, consistent with this Order, for the better execution of the provisions herein contained in respect of any matter arising in the course of any civil or criminal case, including insolvency and bankruptcy proceedings.

49. (1) Subject to the control of the Secretary of State acting with the concurrence of the Treasury, the Consul-General may, from time to time, with the previous sanction of the Governor General of India in Council, make rules imposing fees leviable in respect of any proceedings in, or processes issued out of, any Court established under this Order.

(2) But a Court before which any matter is pending may, in any case, if it thinks fit, on account of the poverty of a party, or for any other reason, dispense in whole or in part with the payment of any fees chargeable in respect of such matter.

(3) Nothing in this Order shall affect any Order in Council for the time being in force prescribing a table of fees to be taken by Consular officers; and where a fee is taken under that Order, no fee shall be taken in respect of the same matter under this Order.

50. (1) All fees, charges, expenses, costs, fines, damages, and other money payable under this Order, or under any law made applicable by this Order, may be enforced under order of the Court by attachment and sale of the movable property of the person by whom they are payable, and in case of deficiency by imprisonment for a term which may extend to one month.

(2) Any bill of sale or mortgage, or transfer of property, made with the view of avoiding such attachment or sale, shall not be effectual to defeat the provisions of this Order.

(3) All fees, penalties, fines, and forfeitures levied under this Order shall be paid to the public account, and shall be applied in such manner as the Secretary of State with the consent of the Treasury may direct.

51. Whenever an Acting Consul-General or Acting Judicial Assistant has commenced the hearing of any cause or matter, civil or criminal, he may, unless the Consul-General otherwise directs, continue and complete the hearing and determination thereof, notwithstanding that his authority to act as Consul-General or as Judicial Assistant has otherwise ceased by reason of the expiration of the time for which he was appointed to act, or by reason of the happening of any event by which his authority is determined.

52. (1) If an officer of the Court, employed to execute a decree or order, loses, by neglect or omission the opportunity of executing it, then, on complaint of the person aggrieved and proof of the fact alleged, the Court may, if it thinks fit, order the officer to pay the damages sustained by the person complaining, or part thereof.

(2) The order may be enforced as an order directing payment of money.

53. (1) If a clerk or officer of the Court, acting under pretence of the process or authority of the Court, is charged with extortion, or with not paying over money duly levied, or with other misconduct, the Court may, if it thinks fit, inquire into the charge in a summary way, and may for that purpose summon and enforce the attendance of all necessary persons as in a suit, and may make such order for the repayment of any money extorted, or for the payment over of any money levied, and for the payment of such damages and costs as the Court thinks fit.

(2) The Court may also, if it thinks fit, on the same enquiry, impose on the clerk or officer such fine, not exceeding 50 rupees (22 99 dollars) for each offence, as the Court thinks fit.

(3) A clerk or officer punished under this Article, shall not, without the leave of the Court, be liable to a civil suit in respect of the same matter, and any such suit, if already or afterwards begun, may be stayed by the Court in such manner and on such terms as the Court thinks fit.

(4) Nothing in this Article shall be deemed to prevent any person from being prosecuted under any other British or British Indian law for any act or omission punishable under this Article, or from being liable under that other law to any other or higher punishment or penalty than that provided by this Article.

Provided that no person shall be punished twice for the same offence.

54. The Court shall have jurisdiction from time to time to make an order requiring a person to contribute in such manner as the Court directs to the support of his wife, or to the support of his or her child, whether legitimate or not, being, in the opinion of the Court, under the age of sixteen years. Any such order may be made in a summary way as if the neglect to provide for the support of such wife or child were an offence, and any failure to comply with any such order shall be deemed to be an offence, and shall be punishable with a fine not exceeding 10 rupees (4 59 dollars) for any one default, and the Court may direct any penalty imposed for such offence to be applied for the support of such wife or child in such manner as the Court thinks fit.

55. The Consul General under this Order shall have power to make and alter Regulations (to be called King's Regulations) for the following purposes (that is to say):—

- (a) For the peace, order, and good government of British subjects within any such place in relation to matters not provided for by this Order and to matters intended by this Order to be prescribed by Regulations.
- (b) For securing the observance of any Treaty or arrangement, for the time being in force, relating to any place within the limits of this Order, or of any native or local law or custom, whether relating to trade, commerce, revenue, or any other matter.
- (c) For amending, modifying, or repealing with respect to places within the limits of this Order any Acts or enactments which are made applicable or have been brought into operation in those places by or under any of the provisions of Article 7 of this Order.
- (d) For regulating or preventing the importation or exportation in British ships or by British subjects of arms or munitions of war, or any parts or ingredients thereof, and for giving effect to any Treaty relating to the importation or exportation of the same.
- (e) For requiring Returns to be made of the nature, quantity and value of articles exported from or imported into his district, or any part thereof, by or on account of any British subject who is subject to this Order, or in any British ship and for prescribing the times and manner at or in which, and the person by whom, such Returns are to be made.
- (f) For the governance, visitation, care and superintendence of prisons.

56. (1) Any Regulations made under the preceding Article may provide for forfeiture of any goods, receptacles, or things in relation to which, or to the contents of which, any breach is committed of such Regulations, or of any Treaty or any native or local law or custom, the observance of which is provided for by such Regulations.

(2) Any person committing a breach of any such Regulations shall, in addition to any forfeiture prescribed thereby, be liable, on conviction, to imprisonment, for a period not exceeding three months, or to a fine, or to both.

(3) Any fine imposed for a breach of Regulations shall not exceed 1,500 rupees: provided that in the case of any breach of any native or local law relating to customs law, or under which the importation or exportation of any goods is prohibited or restricted, the fine may extend to a sum equivalent to treble the value of the goods in relation to which the breach is committed.

(4) King's Regulations shall not take effect until they are allowed by a Secretary of State: provided that in case of urgency declared in any such Regulations, the same shall take effect before such allowance, and shall continue to have effect unless and until they are disallowed by the Secretary of State, and until notification of such disallowance is received and published by the Consul-General, and such disallowance shall be without prejudice to anything done or suffered under such Regulations in the meantime.

(5) All King's Regulations shall be published by the Consul-General in such manner and at such places as he may think proper.

(6) In this Article "breach of the Regulations" includes the breach of any native or local law or custom, the observance of which is required by any King's Regulations.

57. Judicial notice shall be taken of this Order and of the commencement thereof, and of the appointment of the Consul-General and Judicial Assistant and of the constitution and limits of the Courts and districts, and of Consular seals and signatures, and of any Rules and Regulations made or in force under this Order, and no proof shall be required of any of such matters.

58. Nothing in this Order shall deprive the Consul-General, or an officer subordinate to him, either as such or as Political Resident in the Persian Gulf, of the right to observe, and to enforce the observance of, or shall deprive any person of the benefit of any reasonable custom existing within the Persian coast and islands, unless this Order contains some express and specific provision incompatible with the observance thereof.

59. Nothing in this Order shall—

(i) Affect any power or jurisdiction conferred by, or referred to in, the Act of the Governor General of India in Council, entitled the Foreign Jurisdiction and Extradition Act, 1879 (Act XXI of 1879), or in the Indian (Foreign Jurisdiction) Order in Council, 1902; or

(ii) Affect any jurisdiction for the time being exercisable by the Consul-General under any Imperial Act other than the Foreign Jurisdiction Act, 1890; or

(iii) Prevent any Consular officer of His Majesty within the Persian coast and islands from doing anything which His Majesty's Consuls in the dominions of any State in amity with His Majesty are for the time being, by law, usage, or sufferance, entitled or enabled to do.

60. Criminal or civil proceedings pending at the commencement of this Order shall, from and after that time, be regulated by the provisions of this Order as far as the nature and circumstances of each case admit.

61. The Consul-General may within the limits of this Order exercise any power conferred on any Justice of the Peace within His Majesty's dominions by any Act of Parliament for the time being in force regulating merchant seamen or the mercantile marine.

62. If a question arises whether any place is or is not within the Persian coast and islands for the purposes of this Order it shall be referred to the Consul-General, and a certificate under his hand and seal shall be conclusive on the question, and shall be taken judicial notice of by the High Court of Bombay, and by any Court established under this Order.

63. Not later than the thirty-first day of March in each year, or such other day as the Secretary of State directs from time to time, the Consul-General shall send to the Governor General of India in Council, for transmission to the Secretary of State, a Report on the operation of this Order up to the thirty-first day of December in the previous year, or such other date as the Secretary of State directs from time to time, showing for the last twelve months the number and nature of the proceedings, criminal and civil, taken under this Order, and the result thereof, and the number and amount of fees received, and containing an abstract of the list of registered British subjects and such other information, and being in such form as the Secretary of State from time to time directs.

64.—(1.) A printed copy of this Order, and of all Rules of Procedure and other Rules for the time being in force under this Order, shall be kept open to inspection free of charge in the office of the Consul-General, and of each Court established under this Order.

(2.) Printed copies thereof shall be sold within the Persian coast and islands at such reasonable price as the Consul-General from time to time directs.

65.—(1.) This order shall be published in the *Gazette of India* within such time after the passing thereof as the Secretary of State may prescribe, and shall come into force on such day (in this Order referred to as the commencement of this Order), within six months after that publication, as the Governor General of India in Council may, by notification in the said "*Gazette*," appoint in this behalf.

(2.) But any appointment under this Order may be made at any time after its passing, and no proof shall, in any proceedings, be required of any of the matters prescribed by this Article.

66. As from the commencement of this Order the Orders in Council mentioned in the Second Schedule to this Order shall be repealed to the extent therein mentioned; but this repeal shall not—

(a) Affect the past operation of those Orders, or either of them, or any appointment made, or any right, title, obligation, or liability accrued, or the validity or invalidity of anything done or suffered under any of those Orders, before the making of this Order;

(b) Interfere with the institution or prosecution of any proceeding or action, criminal or civil, in respect of any offence committed against or forfeiture incurred or

liability accrued under or in consequence of any provision of any of those Orders, or any Regulation confirmed by any such Order or made thereunder

(c) Take away or abridge any protection or benefit given or to be enjoyed in relation thereto.

(2) Notwithstanding the repeal of the Orders aforesaid, all Rules and Regulation approved or confirmed by or under any Order so repealed, shall continue and be as if the Order had not been made, but so that the same may be revoked, altered, or otherwise dealt with under this Order, as if they had been made under this Order.

(3) Criminal or civil proceedings begun under any of the Orders repealed by this Order, and pending at the time when this Order comes into operation, shall, from and after that time, be regulated by the provisions of this Order, as far as the nature and circumstances of each case admit.

67. This Order may be cited as "The Persian Coast and Islands Order in Council 1907."

And the Right Honourable Sir Edward Grey, Baronet, and the Right Honourable John Morley, two of His Majesty's Principal Secretaries of State, are to give the necessary directions herein as to them may respectively appertain

A. W. FitzRoy.

FIRST SCHEDULE.

INDIAN ACTS APPLIED.

Acts XXXV and XXXVI of 1858 relating respectively to lunatics and lunatic asylums.

The Indian Penal Code (Act XLV of 1860)

"The Whipping Act, 1864" (Act VI of 1864).

The Indian Succession Act (Act X of 1855).

RESOLUTION.—The Agent of the Southern Mahratta Railway Company has recommended the adoption on the Southern Mahratta railway and the lines worked by it of the revised General Rules of 1906 for working open lines of railway in British India which were promulgated under Railway Board's circular No. R. T. $\frac{20A}{3}$, dated the 8th September 1906, and published under their notification No. 183, dated the 8th September 1906; of the addendum to Rule 86 Chapter III, Part I of the said General Rules, promulgated under Railway Board's circular No. R. T. $\frac{163B}{2}$, dated the 26th September 1906, and published under their notification No. 205, dated the 5th October 1906; and also of the amendments in rule 16, sub-rule (4), Chapter III, Part II of the said General Rules, promulgated under Railway Board's circular No. R. T. $\frac{281C}{2}$, dated the 8th April 1907, and published under their notification No. 91, dated the 19th April 1907.

2. In exercise of the powers conferred by the notification of the Government of India in the Department of Commerce and Industry, No. 801, dated the 24th March 1905, read in the preamble above, the Railway Board sanction, under section 47, sub-section (1), of the Indian Railways Act, 1890 (IX of 1890), the adoption, with effect from the 1st July 1907, of the General Rules of 1906 for working open lines of railways, of the addendum to rule 86, Chapter III, Part I, and of the amendments to rule 16, sub-rule (4), Chapter III, Part II, cited in paragraph 1 above, on such portions of the Southern Mahratta railway and of the railways worked by it as are situate in British territory.

ORDER.—Ordered that this resolution be published under a notification in Part I of the *Gazette of India* as required by section 47, sub-section (3), of the Indian Railways Act, 1890 (IX of 1890), also that the General Rules including the addendum and amendments cited in paragraph 1 which have already been published in the *Gazette of India*, be kept at railway stations as directed by sub-section (6) of the same section and that this resolution be communicated to the Government of Bombay for information.

The 12th June, 1907.

No. 143.—The following is published for general information :

No. 367 R. T., dated the 6th June 1907.

RESOLUTION.—By the Railway Board.

— — — — —

Revised General Rules of 1906 for working open lines of railway and the addendum thereto.

Read—

Section 47 of the Indian Railways Act, 1890 (IX of 1890).

Government of India Department of Commerce and Industry, notification No. 801, dated the 24th March 1905.

Railway Board's notification No. 183, dated the 8th September 1906, and Railway Board's circular No. R. T. $\frac{20A}{3}$, dated the 8th September 1906.

Railway Board's notification No. 205, dated the 5th October 1906, and Railway Board's circular No. R. T. $\frac{163B}{2}$, dated the 26th September 1906.

Railway Board's notification No. 263, dated the 27th November 1906, and Railway Board's circular No. R. T. ⁸⁰/₃ ^{P.}, dated the 16th November 1906.

Letters from the Government of Bengal, Railway Department, Nos. 616-R. and 1019-R., dated, respectively, the 16th March and 16th May 1907.

RESOLUTION.—The Manager and Engineer of the Bengal Provincial Railway Company has recommended the adoption on the Bengal Provincial railway of the revised General Rules of 1906 for working open lines of railway in British India which were promulgated under Railway Board's circular No. R. T. ⁸⁰/₃ ^{P.}, dated the 8th September 1906, and published under their notification No. 183, dated the 8th September 1906, and also of the addendum to Rule 86, Chapter III, Part I of the said General Rules, promulgated under Railway Board's circular No. R. T. ¹⁰³/₁₁, dated the 26th September 1906, and published under their notification No. 205, dated the 5th October 1906.

2. In exercise of the powers conferred by the notification of the Government of India in the Department of Commerce and Industry, No. 801, dated the 24th March 1905, read in the preamble above, the Railway Board sanction, with effect from the 1st July 1907, under section 47, sub-section (4), of the Indian Railways Act, 1890 (IX of 1890), the adoption of the General Rules of 1906 for working open lines of railway, and of the addendum to rule 86, Chapter III, Part I, cited in paragraph 1 above, on the Bengal Provincial railway.

ORDER.—Ordered that this resolution be published under a notification in Part I of the *Gazette of India* as required by section 47, sub-section (3) of the Indian Railways Act, 1890 (IX of 1890), also that the General Rules including the addendum cited in paragraph 1 which have already been published in the *Gazette of India*, be kept at railway stations as directed by sub-section (6) of the same section and that this resolution be communicated to the Government of Bengal for information.

R. C. F. VOLKERS,
Secretary, Railway Board,

GOVERNMENT OF INDIA.
HOME DEPARTMENT.

SANITARY.
PLAGUE.

Simla, the 13th June, 1907.

The following statement of plague seizures and deaths reported in India, during the week ending the 8th June 1907, is published for general information :

(b) Figures for the two weeks ending 7th June 1907.

H. H. RISLEY,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 h. on Thursday, the 13th June 1907, based on the Indian Daily Weather Reports of the period.

The storm which was shown lying close to Kurrachee on the morning of the 6th passed inland during the day and advanced northwards into the Kashmir Himalayas where it finally disappeared on the 9th. It gave rain in Baluchistan, Upper Sind and the southwest Punjab on the 7th and, in conjunction with another disturbance which apparently passed into northwest India from the west, gave widespread and moderately heavy rainfall in the west and central Punjab, the Frontier Province and Kashmir on the 8th. Precipitation continued next day in Kashmir and the adjoining districts but the remainder of the week was practically rainless in northwest India. Advances of monsoon winds took place during the week in the Arabian Sea and the Bay of Bengal, in both of which areas they were associated with low pressure conditions which however up to the end of the week had failed to develop into a storm. Rainfall was of daily occurrence on the west coast of the Peninsula, in Burma and northeast India and a few falls were reported from the interior of south India, the Deccan, the Circars coast and the Central Provinces.

The precipitation given by the two disturbances in northwest India caused abnormally low temperatures in the regions where it occurred, especially in the extreme north where maximum temperatures were from 20° to 30° below normal at many stations.

Burma.—Rain fell on every day of the week, but was only local in character on the 10th and 11th. Skies were more or less thickly clouded. Temperature was much lower than usual in upper Burma from the 6th to the 10th but otherwise it was approximately normal.

Northeast India and Orissa.—Rain was reported during the week from all parts of the division except Bihar and was of daily occurrence in Assam. Skies were almost clear in the western districts on the 6th and 7th but on the remaining days they were moderately to thickly clouded everywhere. Temperature was generally in excess in Chota Nagpur and the adjacent districts and below normal in the northeastern districts.

The United Provinces, Central India and the Central Provinces.—Weather was dry except on the 12th and 13th when light to moderate rain fell in the south and east of the Central Provinces. Skies were almost clear from the 6th to the 9th but on the remaining days of the week they were lightly to moderately clouded over the greater part of the division. Temperature was normal or in excess.

Northwest India.—Rain fell in Baluchistan, upper Sind and the southwest Punjab on the 7th, in Kashmir, the Frontier Province and the west and central Punjab on the 8th and a few falls were reported from the extreme north on the 9th and 12th. Skies were lightly to moderately clouded over the greater part of the division. Unusually cool weather prevailed, especially in upper Sind, the west Punjab, the Frontier Province and Kashmir, where remarkably low maximum temperatures were recorded.

The Peninsula.—Rain was most general on the west coast, but was only light to moderately heavy in amount, and a few falls occurred in the interior of south India, the Deccan and on the north Madras coast. Skies were more or less thickly clouded and temperature was normal except in the Deccan and the adjacent districts of the east coast where it was in excess: rainfall however caused a rapid fall of temperature in the latter area on the 11th and 12th.

The rainfall of the period from the 3rd May to the 13th June is in excess on the Burma coast, in the North West Dry Area, Baluchistan and the subdivision of Ahmedabad,

practically normal in the remainder of Burma and in the subdivisions of Narayanganj, Sibsagar, Simla, Waltair, Madura and Calicut, and is in more or less defect elsewhere.

The following summarises the chief rainfall amounts of the week, as reported at 8 h. each day.

- June 7th. Tavoy 4'61", Yamethin 2'20", Sibsagar 3'50", Silchar 3'36", Cherra Poonjee 3'00", Jacobabad 1'74", Quetta 0'72" and Mangalore 3'96".
- „ 8th. Cherra Poonjee 5'42", Silchar 3'40", Narayanganj 2'12", Rawalpindi 1'84", Murree 3'39", Srinagar 2'59", Gulmarg 2'58", Montgomery 1'33", Multan 1'25", Madura 1'76", Calicut 5'15", Cochin 3'40" and Trivandrum 2'45".
- „ 9th. Yamethin 1'20", Mandalay 1'05", Silchar 5'67", Murree 2'64" and Bellary 1'02".
- „ 10th. Tavoy 3'08", Cherra Poonjee 6'03", Cuttack 1'70", Cocanada 2'97", Masulipatam 1'82", Calicut 2'96" and Hanumkonda 1'12".
- „ 11th. Calcutta 1'96" and Mangalore 4'32".
- „ 12th. Toungoo 2'47", Poona 0'99", Karwar 2'40" and Calicut 3'62".
- „ 13th. Mandalay 1'07", Silchar 2'52", Shillong 2'10", Darjeeling 2'54", Jalpaiguri 2'10", Bellary 1'54", Karwar 4'50" and Mormugão 2'56".

GEORGE C. SIMPSON,

for Director General of Observatories.

J. WILSON,

Secretary to the Government of India.

SIMLA;

The 13th June 1907.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, 8th June 1907.

Burma.—The rainfall was general; it was heavy in Tavoy, and moderate in most other districts. Reaping of dry weather paddy is completed in Bhamo. Sowing of hill side paddy has commenced in Bhamo and the Southern Shan States, and is completed in Katha and the Chin Hills. Ploughing for wet weather paddy has commenced in Kyaukpju, Sandoway, Tharrawaddy, Prome and Lower Chindwin, and is progressing in several districts of Lower and Upper Burma. Sowing of wet weather paddy has commenced in Bassein. Ploughing for and sowing of miscellaneous crops have commenced in Thayetmyo, ploughing for gram and maize has commenced in Pakokku; sowing of cotton and early sesamum is in progress. Standing crops in Upper Burma are generally in good condition, but heavy rain in the Pyawbwe township of Yamethin did some damage. The price of paddy has risen considerably in Tharrawaddy, and slightly in Prome and Mandalay, it has fallen slightly in Henzada.

Eastern Bengal and Assam.—The weather is cloudy and rainy. Heavy rains have fallen in the Surma Valley, the Jaintia Parganas in Sylhet and low lying areas in Cooch Behar have been flooded; slight to moderate rain has fallen elsewhere except in Malda where rain is wanted for the standing crops. The prospects of the standing crops are generally good except in the Surma Valley where floods have caused great damage. Plucking and manufacture of tea are in progress, prospects are good in Nowgong, poor in Cooch and Lakhimpur, and fair elsewhere. Preparation of land for winter rice and planting of sugarcane are going on. Sowing of rice and weeding of jute are in progress. Potatoes are being gathered in the Khisi Hills, and prospects are very good. Prices of common rice; Chittagong and Kohima 9, Manipur 8½; Fardpur 8, Dacca 7½, Comilla 7½, Barisal, Rangamati, Jalpaiguri, Dhubri, Gauhati and Tezpur 7½; Dinajpur, Malda and Dibrugarh 7½, Mymensingh 7½, Sylhet, Nowgong and Sibsaigar 7, Rampur Boalia 6½, Noakhali and Rangpur 6½, Bogra 6½, Silchar 6 to 6½, Ajal 6; and Shillong 5½ seers per rupee. Prices have risen in eight; fallen in three; and remain stationary in the remaining districts.

Bengal.—There was moderate rain in Murshidabad, Jessore, Darjeeling and Cooch Behar, light rain in Burdwan, Midnapore, Hooghly, Howrah, Khulna, the Sonthal Parganas, Balasore, Angul and Sambalpur; and practically no rain in Behar. Preparation of land for the next season's crops has not yet been completed. Sowing of jute is reported to be finished in Purnea, and is still going on in other jute growing districts. Rain is wanted in most districts of the Burdwan Division and also in the 24 Parganas, Murshidabad, Saran, Champaran, Bhagalpur, the Sonthal Parganas and Balasore. In Darbhanga the number of persons on gratuitous relief is 11,403, on test works 2,706, and on famine relief works 21,720. Fodder is reported to be insufficient in parts of Nadia and Manbhum. The water supply is sufficient everywhere, except in Jharia in the district of Manbhum. The price of common rice has risen in nine districts, fallen in three; and has remained stationary in the remaining twenty-two districts.

United Provinces.—Slight rain has fallen in six districts. Fields are being prepared for autumn crops, and sowings are in progress in the hill districts, and elsewhere in irrigated tracts. Extra crops and sugarcane are being weeded and irrigated and are in good condition. Fodder is still scarce in Azamgarh, and dear in Hardoi, Sitapur, Kheri and Bara Banki. Markets are well stocked. Prices are rising.

Punjab.—Rain has fallen in all districts except Rohtak, Gurgaon, Delhi and Rawalpindi. Prices of food-grains are generally rising in Hissar, Rohtak, Jullundur, Lahore, Sialkot and Multan; the price of wheat is falling in Rawalpindi. Harvesting and threshing of spring crops, and sowings of cotton, sugarcane and other autumn crops continue. Cutting of extra spring crops is in progress in Gurgaon and Delhi, cotton, sugarcane and extra spring crops are being weeded in Jullundur and Sialkot. The outturn of spring crops is average to poor. The condition and prospects of extra spring crops are good to average. Locusts damaged the extra spring crops in Shahpur; cotton and sugarcane in Lyallpur and indigo and the great millet crops in Multan; they also appeared in Ambala, Jullundur, Lahore, Amritsar and Rawalpindi, but did no damage. Some damage has also been done to wheat by rain in Ferozepore, Lyallpur and Multan; to wheat ricks and extra spring crops by flood in the Jhelum river in Shahpur; extra spring crops have been destroyed by hoppers in parts of Mianwali and by hailstorm in two villages of Lyallpur. The condition of cattle is generally good.

Fodder is sufficient except in parts of Mianwali; green fodder is not available in Ferozepore. The water-supply is insufficient in parts of Ambala.

North-West Frontier Province.—Rain averaging from 18 cents in Peshawar to 2 inches and 58 cents in Bannu fell all over the Province, and was beneficial to the standing late spring crops. Harvesting of spring crops is still carried on; the outturn of crops is reported from average to good. Land is being prepared for autumn sowings in Bannu; in Dera Ismail Khan autumn sowings have commenced. Young locusts appeared in large swarms in Peshawar and damaged gardens and extra spring crops in some villages, steps are being taken for their destruction. The water-supply and fodder are sufficient; the Kot Hafiz distributary of the Paharpur canal in Dera Ismail Khan was started during the week. Cattle are generally in good condition except in the Marwat tehsil in the Bannu district. Prices are fluctuating. Prices.—wheat $17\frac{1}{2}$ to $22\frac{1}{2}$, gram $15\frac{1}{2}$ to 21 , maize 24 to $32\frac{1}{2}$; and *bajra* 20 to 22 seers per rupee.

Jammu.—There was slight rain during the week. Prices are stationary. Prices:—wheat 9 to 25 and maize 11 to 36 seers per rupee. The condition of the standing crops is fair. Fodder is sufficient except at Raniban. Harvesting and threshing of spring crops are in progress. Locusts have appeared in Riasi, Jasmergarh, Udampur, Mirpur, Kothua, Dasohli, Kotli, Jammu and Samba tehsils and damaged the cotton and melon crop in Kotli and Mirpur.

Kashmir.—The weather is rainy. Prices are almost stationary. The standing crops are in good condition.

Rajputana.—Showers fell in many places; the maximum fall was 46 cents in Jaipur. Harvesting operations are nearly over. Land is being prepared for autumn crops. Slight damage by locusts is reported from one tehsil of Bharatpur. Cattle are in good condition, except in some places in Mewar, Jhalawar and Merwara. Pasturage and fodder are sufficient. Prices are rising in Sirohi, Mewar, Tonk, Shahpura, Kotah, Jhalawar, Kishangarh, Alwar, Bharatpur, Dholpur and Ajmer-Merwara, and are nearly steady elsewhere.

Central India.—Light showers fell in parts of Gwalior, Malwa and the Bhopawar Agencies. Threshing is completed except in Bhopawar. Preparation of land for autumn sowings is in progress. The standing crops and probable outturn are fair to good. Crops have been damaged by hail and rust in Baghelkhand. Agricultural stock and pasturage are fair to good except in parts of Indore, Malwa and the Bhopawar Agencies. Prices are high in Baghelkhand; are rising in Bhopal and part of Malwa; are falling in Dhar; and are stationary elsewhere.

Central Provinces.—The weather is very hot and cloudy with occasional high winds. Light local showers not exceeding 25 cents were received in five districts. Preparation of land for the next autumn crops is in rapid progress everywhere, and sowing of rice has been started in parts of Drug and Raipur. Water is scarce in parts of Sohagpur (Hoshangabad) but suffices elsewhere. Fodder continues scarce in the Yeotmal and the Darwaha taluqs of the Yeotmal district, and is exceptionally dear in Akola, and dear in Hoshangabad, Wardha and Nagpur. The prices of staple food-grains are stationary in the districts and fluctuate slightly, elsewhere exhibiting a tendency to rise. Prices are still equal to or above the scarcity level in Mandla, Seoni, Nimar, Wardha, Chanda, Bhandara, Balaghat, Drug, Bilaspur and Amraoti.

Native States.—Chhuikhadan, Rajnandgaon, Raigarh and Sarangarh received light showers during the week. Preparation of land for sowing of autumn crops is in full swing. Fodder and water are scarce in Kawardha, elsewhere they are adequate. Wheat and rice in Bastar, and wheat in Sarangarh became dearer by 2 seers per rupee.

Bombay.—There was good rain during the week in parts of Larkana, the Upper Sind Frontier, Ahmedabad, Kanara, Dharwar and Mahi Kantha; moderate in parts of Karachi, Hyderabad, Surat, West Khandesh and Nasik; and slight in parts of Sukkur, Thar and Parker, Panch Mahals, Kaira, Broach, Thana, Kolaba, Ratnagiri, East Khandesh, Ahmednagar, Poona, Sholapur, Satara, Belgaum, Bijapur, Kathiawar, Palanpur, Cutch, Rewa Kantha and Sawantwadi. Preparation of lands for autumn cultivation is in progress. Sowing of autumn crops continues in parts of Sind, the Konkan and the Karnatak. The fodder-supply is generally sufficient. Agricultural stock is generally in good condition. Drinking water is sufficient, except in parts of Kanara, the Deccan, Bijapur, Palanpur and Cutch. Water for irrigation purposes is insufficient in parts of Surat, the Deccan, the Karnatak and Baroda. The quantity of food-grains purchaseable per rupee is in the Karnatak 20 to 43 per cent; in the Deccan 22 to 31 per cent; and elsewhere 3 to 45 per cent less than normal. Labourers get sufficient field employment. During the week ending 1st June 1907 25 persons were relieved gratuitously in Belgaum.

Hyderabad.—Rainfall:—25 cents. Lands are being prepared for monsoon sowings. Prices:—wheat 7½; coarse rice 7½; and *juar* 14½ seers per rupee.

Mysore.—Rain good throughout the State. Prices of food-grains are generally steady. The standing crops are in good condition, but more rain is needed in parts of Hassan. Prospects of the season are good. Cattle are healthy. Water and fodder are available.

Coorg.—Rainfall 73 cents. Ploughing for rice continues. Prices of food-grains are normal. Water and fodder are sufficient.

Madras.—Rainfall good in Malabar, South Canara, Nilgiris, Salem, Coimbatore, Bellary and North Arcot; no rain in the Vizagapatam littoral, Kistna, Nellore and Madras; and light to fair rain elsewhere. Irrigation supplies are sufficient, except in parts of Ganjam, Vizagapatam, Godavari, Kistna, Kurnool, Bellary, Anantapur, Nellore, South Arcot, North Arcot, Salem, Madura and South Canara. Ploughing, sowing, weeding, manuring and transplanting are in progress in parts. The standing crops are generally fair but some require more rain in parts of Vizagapatam and Madura. Harvests continue generally with outturn bad to normal and bumper. Pasture is sufficient except in parts of Ganjam, Vizagapatam, Godavari, Kistna, the Deccan, Nellore, Chingleput, North Arcot, Madura and South Canara. Fodder is procurable. The condition of cattle is generally good. The price of rice is stationary in thirteen districts; has fallen in five; and has slightly risen in five. The prices of millets have fluctuated as follows:—*Ragi* is stationary in ten districts; has fallen in three; and has slightly risen in eight. *Cholum* is stationary in four districts; has fallen in four; and has slightly risen in six. *Cumbu* is stationary in seven districts; has fallen in three, and has slightly risen in five.

The number of persons in receipt of relief during the preceding and present weeks in each province is shown in the following table:

| Name of province. | PRECEDING WEEK. (REVISED FIGURES.) | | | PRESENT WEEK. | | | Increase or decrease. |

J. WILSON,

Secretary to the Government of India.

GOVERNMENT OF INDIA,

Department of Revenue and Agriculture.

Memorandum on the abnormal features of recent weather, with a forecast of the probable character of the south-west monsoon rains of 1907.

Attention was drawn in the June forecast of last year to the influence upon the monsoon in India of various abnormal features during the months preceding its arrival, and tables were given which established conclusively the prejudicial effect of late snowfall in the mountain areas to the north and west of India; of heavy rain at Zanzibar and Seychelles, especially when occurring in May; of high pressure at Mauritius; and of low pressure in South America, as represented by Santiago and Cordoba. It was established that there was a close connection between late snowfall and excessive rainfall in the subequatorial regions, these two factors showing a strong tendency to be prominent in the same years; but in the case of the two pressure factors little was done to determine the extent to which they were dependent upon one another or upon the two factors first mentioned.

2. Further examination of past records has confirmed the impression that variations in monsoon rainfall were connected with widespread and longlasting changes in the pressure distribution over large portions of the earth's surface. Abundant rains in India are on the average associated with low pressure in the same years in Australia, the Indian Ocean, east Africa and India, and with high pressure in the central North Atlantic (as represented by the Azores), the southern half of South America, and the central Pacific (as represented by Honolulu). When the Indian monsoon data are compared with the pressure data of the succeeding months it is seen that the association of good rains with low pressure in India persists quite strongly through the first half of the year following: and, as was pointed out last June, the high pressure at Cordoba and Santiago also persists into the succeeding year.*

When however the rainfall of one year is compared with the India pressure of previous months it appears that a good monsoon is on the average associated with high pressure during the eighteen months terminating at the beginning of the year in question; and the connection is so close that, as given by the records of thirty years, one half of the variations of the monsoon rainfall are given by the pressure departure of the year terminating six months before the arrival of the monsoon in question. With pressure in the previous year in other parts of the world the connection though appreciable is not so close: thus only one-ninth of the monsoon variations are determined by the pressure departures at Cordoba and Santiago.

3. When the effect of a number of factors is considered it is obvious that the question of their independence of one another is vital: if one among them is completely determined by the rest nothing can be gained by taking it into account. In general however the amount of independence is partial and statistical methods must be employed for determining the various relationships and allowing for them in drawing conclusions.†

* It might appear that in this section excessive reliance was placed upon the indications afforded by single stations of the pressure conditions of the area represented by them. Experience shows however that these conditions when averaged over fairly long periods are extremely uniform; thus the curve of annual pressure of India given by taking the average of Calcutta, Bombay and Madras is practically undistinguishable from that given by using the data of 170 stations.

† For an account of these reference may be made to:

G. U. YULE — On the Theory of Correlation. *Journal of the Royal Statistical Society*, LX, pages 1-44, December 1897.

K. PEARSON AND L. N. G. FILON — Mathematical contributions to the Theory of Evolution. IV. On the Probable Errors of Frequency Constants and on the Influence of Random Selection on Variation and Correlation. *Phil. Transactions of the Royal Society*, London, CXCII, A, pages 279-311. 1898.

A full bibliography of the subject will be found in:

C. B. DAVENPORT. *Statistical method*, with special reference to Biological Variation. New York; John Wiley & Sons, London; Chapman and Hall, 1904.

In the present case an attempt has been made to obtain some insight into the interdependence of the main factors of the problem by considering six elements.

- (i) Pressure in May in the Indian Ocean as represented by Mauritius.
- (ii) Pressure in the portion of South America represented by Santiago and Cordoba during the period April and May.
- (iii) Rainfall in May in the subequatorial region as represented by Zanzibar and Seychelles.
- (iv) The area covered by snow in the mountain regions to the north and north-west of India in May.
- (v) The pressure distribution of the previous calendar year as indicated by the departure from normal of pressure in India.
- (vi) The amount of monsoon rainfall in India in the previous year.

The direct influence of the first five factors on monsoon rainfall is fairly close; the last is included because of its near relationship with the fifth factor.

4. In order to express the extent of interdependence of two quantities the phrase 'correlation coefficient' is used; it may be defined as the proportion of the variations of either quantity which are determined by those of the other.* Thus if the factors are independent the coefficient is zero, if they always move by exactly proportionate amounts either increasing or decreasing together it is +1, and if by proportionate amounts in opposite directions it is -1. If one-half of the variations of one quantity are governed by those of another and the other half by accidental circumstances the coefficient is $\frac{1}{2}$. In the case of the six factors enumerated in the previous paragraph some idea of their influence upon Indian rainfall and upon each other may be gathered from the following table in which the correlation coefficient between two quantities is to be found at the intersection of the row and column corresponding to the quantities:

| | Monsoon rainfall. | Mauritius pressure, May. | South America pressure, April, May | Subequatorial rainfall, May | Snowfall, May. | India pressure, previous year | Monsoon rainfall, previous year |
|-------------------------------------|-------------------|--------------------------|------------------------------------|-----------------------------|------------------|-------------------------------|---------------------------------|
| Monsoon rainfall .. | +1'00 | - '45 | + '45 | - '5 | $\frac{1}{2}$ '3 | + '5 | - '2 |
| Mauritius pressure, May . | - '45 | + 1'00 | '0 | + '25 | + '05 | - '45 | + '15 |
| South America pressure, April, May. | + '45 | '0 | + 1'00 | - '05 | - '5 | + '15 | + '2 |
| Sub-equatorial rainfall, May | - '5 | + '25 | - '05 | + 1'00 | + '45 | + '15 | + '05 |
| Snowfall, May . | - '3 | + '05 | - '5 | + '45 | + 1'00 | + '15 | - '2 |
| India pressure, previous year | + '5 | - '45 | + '15 | + '15 | + '15 | + 1'00 | - '5 |
| Monsoon rainfall, previous year. | - '2 | + '15 | + '2 | + '05 | - '2 | - '5 | + 1'00 |

5. It must be remembered that the number of years for which data are available is not sufficient to give much accuracy in the above table: the probable error varies from '12 in the case of small coefficients to '09 when the coefficient is '5: thus errors amounting to '2 are quite possible in individual cases. The characters of the relations, when tolerably close, are mostly in accordance with what might be anticipated; the prejudicial effect of snowfall upon the total monsoon precipitation is* perhaps rather larger than might have been expected, but the coefficient of + '45 between subequatorial rainfall and snowfall is clearly justified by experience and that of + '25 between subequatorial rainfall and high pressure

* If x_1, x_2, \dots be the departures from normal of one quantity, and y_1, y_2, \dots corresponding departures of the second quantity then the value of the correlation coefficient is—

$$\frac{(x_1 y_1 + x_2 y_2 + x_3 y_3 + \dots) + X_m Y_m}{\dots}$$

where X_m, Y_m , denote the mean values of the departures X, Y .

at Mauritius suggests that when the latter occurs there is a stronger circulation between the equator and the region of high pressure in the southern Indian Ocean, air rising in greater quantities at Zanzibar and Seychelles, and descending more rapidly at Mauritius and to the south of it. The fact that this year subequatorial rain has not been heavy in spite of excessive snow is thus explained by the abnormally low pressure at Mauritius.*

* 6. Some justification may perhaps be required for not including in this analysis the question of the effect of solar activity upon the amount of rainfall. It has been believed for many years that there is a tendency over the greater part of the earth for precipitation to be more abundant when sunspots are numerous, and when the Indian monsoon rainfall of the past 30 years is examined statistically it appears that about one-fifth of its variations are determined by the number of spots, *i.e.*, one-fifth of the departure of rainfall from the normal amount is proportional to the departure from normal of the number of spots, while four-fifths are determined by causes independent of this. The number of years for which reliable data are available is not sufficiently large for this result to be more than approximate, but in the case of Abyssinia and the adjacent western districts the variations of monsoon rainfall may be judged by the height of the Nile for which data extend continuously back to 1749, with the exception of the period 1801-1824. There one-sixth of the variations of rainfall change proportionally with the number of sunspots and the probable error in this fraction is only one-twentieth. As the rainfall in Abyssinia is provided by a portion of the Arabian Sea monsoon which is contiguous with that which supplies north-west India the evidence of the solar influence upon the Nile strongly supports the view that there is a corresponding influence upon Indian monsoon rainfall amounting to about a sixth.

A rather interesting fact may here be mentioned. If two charts of the world are taken and upon one of them is indicated by numbers at various representative stations the extent of the correlation between India monsoon rainfall and pressure at the individual stations, while upon the other chart is indicated the correlation between the number of sunspots and pressure at the same stations, these two charts will be approximately the same except that the closeness of the connections will be rather greater in the former than in the latter case. Statistical analysis shows further that when estimating the amount of monsoon rainfall corresponding to a given pressure distribution and a given frequency of sunspots, the influence of the solar activity upon Indian rainfall is almost exactly that which corresponds to the disturbance in the pressure distribution caused by the solar activity. In other words it is not necessary to take the condition of the sun separately into account, for its influence has been adequately represented in the modification of the pressure distribution.

CONDITIONS AFFECTING THE MONSOON RAINFALL OF INDIA.

7. The following is a statement of the information received concerning :

- (a) Australia.
- (b) The Indian Ocean as represented by Mauritius, Zanzibar, Seychelles and the logs of vessels.
- (c) South-East Africa, East Africa and North-East Africa.
- (d) Siberia.

* In order to determine the most likely rainfall departure corresponding to given values of the six factors in the above table the following expression has been calculated for it

$$\left\{ \text{Monsoon rainfall} \right\} = 35 \left\{ \text{S. Amer. press.} \right\} - 6 \left\{ \text{subeq. rain} \right\} + 1 \left\{ \text{snowfall} \right\} + 55 \left\{ \text{Ind. press. prev. yr.} \right\} + 05 \left\{ \text{Ind monsoon prev. yr.} \right\}$$

Here it is to be understood that this equation connects the proportional departures of the quantities within brackets $\left\{ \right\}$, the proportional departure being the ratio of the actual departure to the mean value of the departure over the series of years. It will be noticed that the term involving Mauritius pressure has vanished, and that involving snowfall is inappreciable. The physical reason of this appears to be that high pressure at Mauritius tends to follow low pressure in India in the previous year, and also to be associated with ascensional movement at the equator; while snowfall is associated with ascensional movement at the equator and low pressure in South America.

- (e) The area in South America represented by Santiago, Buenos Ayres and Cordoba.
 (f) Snowfall to the north and north-west of India in May.
 (g) Pressure and monsoon rainfall in India in the year 1906.

(a) AUSTRALIA.

8. The average pressure of Sydney, Adelaide, Perth and Port Darwin was in defect in April by '02" and in excess in May by '07".

In South Australia temperature during the summer period November to March was extremely low, as it had been in the two previous summers: rains of the last monsoon were above the average up to the end of the year but were scanty from January to March.

(b) THE INDIAN OCEAN.

9. *Mauritius*.—Mean pressure was in defect in May by about '05". Winds were approximately normal in strength but their direction was much less easterly than usual. Rainfall for the month was nearly 20 per cent. above normal.

10. *Zanzibar*.—Pressure averaged 03" below normal in April and May. Winds were of about normal intensity during the first 25 days of May, but fell off considerably thereafter: they were nearly 20 per cent. weaker than usual during the last six days. Their direction was somewhat more westerly than usual. The rainfall was 6.68" or 49 per cent. below normal in April and 7.23" or 29 per cent. below in May.

11. *Seychelles*.—Pressure here, as at Zanzibar, has been in defect, the amounts being '03" in April and '02" in May. Winds were variable during the first eleven days of May and nearly 20° more easterly than usual during the rest of the month. They were appreciably stronger than usual, especially during the last thirteen days. The rainfall of April was 4.89" which was in defect by 1.62", and of May 4.33", of which the deficiency was 1.88".

12. *Logs of vessels*.—The marine information for the equatorial region is as usual very scanty. It appears however to show that during the first three weeks of May the air movement was of decidedly above its normal intensity in the eastern half of the belt, and was very unsteady in the western half. During the fourth week a rapid change occurred in the latter area, with the result that normal circulation was established. The steamship *Musician* crossed the region between the 22nd and the 27th and experienced south-east to east winds of force 6 to 4 with showery squally weather to the south of the equator.

In the Arabian Sea winds were generally unsteady during the first half of the month, and from about the normal direction though weak during the second half.

In the Bay of Bengal a temporary advance of monsoon winds occurred during the first fortnight of May and resulted in the formation of two storms, both of which passed into Burma; the advance appeared however to be feeble.

During the first week in June an advance of monsoon winds was in progress over the Arabian Sea and gave rise to a storm of moderate intensity which passed over Kurrachee on the 6th. The rainfall due to the advance was insignificant and monsoon conditions had not as yet been established.

(c) AFRICA.

13. *Natal*.—Rainfall was exceedingly heavy in April and in small defect in May: it began at the normal time. In April pressure at Durban was in excess by '01" and in May in defect by '07".

14. *Nyassaland*.—Weather has been normal except for some prolonged heavy rain in April.

15. *German East Africa*.—Rainfall in April was deficient in the north and in excess in the south: in May it was in general slightly deficient.

16. *Uganda Protectorate*.—Rainfall was slightly above the average in amount in April and May; at Entebbe and Mbarara it was very greatly in excess in April.

17. *North-East Africa*.—Rainfall in the equatorial region in April was in excess inland and in defect on the coast. The permanent rise of the Blue Nile occurred later than usual, on the 21st May, and the height of the river is now below normal. Pressure in Egypt was in slight excess in May.

(d) SIBERIA.

18. The information given refers to the mean of the six stations of Orenburg, Tashkent, Omsk, Barnoul, Tomsk and Irkutsk, selected as representative. Pressure was in excess in April by 0.2 mm., while in May it was in defect by 1.6 mm.; temperature was in excess in April by 1.0° Cent. and in May by 0.1°.

(e) THE ARGENTINE REPUBLIC AND CHILI.

19. The monthly departures of pressure in the Argentine Republic, as indicated by Buenos Ayres and Cordoba, were + 0.5 mm. in February, - 0.2 mm. in March, + 0.6 mm. in April and + 1.6 mm. in May. For Santiago (Chili) the corresponding departures were + 0.4 mm., - 0.2 mm., + 0.5 mm. and + 0.6 mm.

(f) DATA OF THE YEAR 1906.

20. Pressure in India during the past year averaged .002 in excess, and the departure of monsoon rainfall was - 0.74". At Santiago the annual pressure departure was + .2 mm., or + .008".

(g) SNOWFALL DATA.

21. (1) The winter commenced much later than usual in Baluchistan, and terminated somewhat after the normal date. The precipitation there was well above the average from February to April and in decided defect in December, January and May.

(2) The precipitation was unusually light in Afghanistan as represented by Kabul during January, and in marked excess during the succeeding three months. There are no data available for May, but the prevalence of abnormally low temperature in upper India and Baluchistan during the first two weeks is very strongly suggestive of the occurrence of snowfall in the Afghan region. Similar weather apparently prevailed in the mountainous region of the North-West Frontier Province.

(3) The precipitation of the season was above normal in Kashmir, the excess occurring mainly in February, March and April. There were a few falls of snow in May, but they were confined to the higher ranges. In Gilgit the conditions were slightly different, the weather being remarkably dry during the first three months and somewhat more unsettled than usual in April and May.

(4) In the Punjab hills moderate to heavy snow fell during the period February to April, and light to moderate snow in January and May. The fall was exceptionally heavy in Kulu, where snow is reported to have fallen at as low an elevation as 3,500 feet in March. In the Chandra Valley snow lay right down to the stream on both banks at the end of May. The accumulations at the end of April were greater than usual in the Simla and Kulu hills: even as late as the 24th May the thickness of snow on the mountains visible from Simla was greater than on the 30th April 1906, although the snow did not descend so far down the lower slopes.

(5) In the Kumaon hills the snowfall was light in January and May and unusually heavy in the intervening period. The snow line on the 18th of May was at a much lower elevation than on the same date last year. The accumulations at the end of May were unusually great and most of the passes remained

closed. Large drifts of snow were lying unmelted down to 8,000 feet in the Kali Valley.

(6) The information for the Assam Himalayas is as usual very limited, but appears to indicate that snowfall during the winter months was normal in Darrang, less than usual in the hills to the north of Lakhimpur, and excessive on the ranges to the north and east of Sadiya.

(7) *Summary.*—The available information thus indicates—

(a) that although the snowfall was generally light up to the end of January it was excessive during the following three months, particularly in the Punjab and Kumaon hills;

(b) that the fall was apparently below normal in May;

(c) that at the present time on the Punjab and Kumaon hills the snow covered area is larger than usual, while in the Afghan and Kashmir hills it is approximately normal; and

(d) that the depth of snow on the peaks and the higher passes at the beginning of June was unusually great in some districts, but was normal or even below it in other places.

(8) It is noteworthy that temperature in the Punjab was below normal by 5.1° in April and 3.2° in May.

INFERENCES FROM THE PRECEDING CONDITIONS.

22. It will be seen that as in 1906 there have been fairly consistent indications that the establishment of the Arabian Sea branch of the monsoon would be somewhat delayed. The setting in of the rains in Abyssinia and of south-east winds at Seychelles, the disappearance of northerly winds in the westerly portion of the Arabian Sea and the permanent rise of the Blue Nile have all occurred after their normal dates and the monsoon has only today given its first burst of heavy rain on the Malabar coast. Delay, especially in north-west India, is usually associated with abnormally heavy snowfall, and it may therefore be expected that the rains brought by the Arabian Sea monsoon will as a rule be established somewhat after the dates based on the average of the past 25 years.* As regards the Punjab and Kashmir it seems likely that the abnormal series of disturbances which have passed over Kashmir and have given rain in the extreme north of India will last for some time longer, and that before the monsoon arrives there weather may be somewhat less settled than usual in June.

23. The outlook for the total monsoon rainfall does not appear on the whole to be unfavourable.† If the local conditions alone were considered the excessive snowfall of recent months would lead to some misgivings in spite of the normal pressure of the past year; but the most important features of the pressure distribution over the world, as far as they are known, are favourable to rainfall in India, and the fact that the subequatorial rainfall has been slightly less than the average would appear to indicate that the prejudicial influence of the heavy snowfall upon the total monsoon precipitation has been fully counterbalanced by the lowness of the pressure at Mauritius. It is obvious that the amount of precipitation which occurs in an oceanic region over 2,000 miles long and 600 miles wide cannot be estimated with certainty from raingauges on two small islands, but the data of subequatorial rainfall are in agreement with inferences from Indian snowfall and Mauritius pressure based on the observations of about 25 years; and it has been verified that the favourable impression as to the prospects for 1907 is not seriously diminished if the data of subequatorial rainfall are neglected, and an analysis is

* It may be convenient for reference to append the average dates of establishment of the monsoon over the whole of India:

| | June. | | June. | | June. |
|--------------|--------|-------------------|--------|------------------------|--------|
| Malabar | ... 3 | Central Provinces | ... 10 | Gujarat | ... 15 |
| Konkan | ... 5 | Bengal | ... 15 | Rajputana | ... 15 |
| North Madras | ... 7 | Bihar | ... 15 | United Provinces, East | ... 16 |
| Lower Burma | ... 9 | Chota Nagpur | ... 15 | United Provinces, West | ... 25 |
| Upper Burma | ... 10 | Central India | ... 15 | Punjab, East | ... 30 |

† The purely numerical analysis would indicate an excess of 3½ inches, but very much reliance cannot be placed upon it.

carried out similar to that referred to in paragraph 5 with five factors instead of six, the omitted factor for the whole series of years being that of the subequatorial rainfall.

24. Pressure at Mauritius has been phenomenally unsteady during the past month, and it seems a natural inference that the monsoon may be less steady than usual. This view is supported by the consideration that breaks in the rains tend to follow immediately after periods of snowfall in the Himalayas, and a certain amount of snowfall during the monsoon appears to be not improbable this year in view of the unusual prolongation of unsettled weather in the extreme north of India.

FORECAST.

- (a) It appears likely that some effect of the heavy and late snowfall will show itself in north-west India, either in delay in the establishment of the monsoon, or in diminished total rainfall.
- (b) The probability of one or more breaks in the rains appears to be somewhat larger than usual.
- (c) The total rainfall of India during the period June to September appears likely to be up to the normal.

The 18th June, 1907.

No. 150.—The following is published for general information :

No. 383 R. T., dated the 10th June 1907.

RESOLUTION—By the Railway Board.

Revised General Rules of 1906 for working open lines of railway and the addendum thereto.

Read—

Section 47 of the Indian Railways Act, 1890 (IX of 1890).
Government of India, Department of Commerce and Industry, notification No. 801, dated the 24th March 1905.
Railway Board's notification No. 183, dated the 8th September 1906, and Railway Board's circular No. R. T. ²⁰A., dated the 8th September 1906.

Railway Board's notification No. 205, dated 5th October 1906, and Railway Board's circular No. R. T. ¹⁰³/₂, dated the 26th September 1906.

Railway Board's notification No. 268, dated 27th November 1906, and Railway Board's circular No. R. T. ²²/₅, dated the 16th November 1906.

Letter from the Government of Bombay, Public Works Department, Railway Branch, No. 1180, dated the 2nd April 1907.

RESOLUTION.—The Agent of the Bombay, Baroda and Central India Railway Company has recommended the adoption, with effect from the 1st July 1907, on the Bombay, Baroda and Central India Railway, of the revised General Rules of 1906 for working open lines of railway in British India which were promulgated under Railway Board's circular No. R. T. ²¹/₆, dated the 8th September 1906, and published under their notification No. 183, dated the 8th September 1906, and also of the addendum to Rule 86, Chapter III, Part I, of the said General Rules promulgated under Railway Board's circular No. R. T. ¹⁰³/₂, dated the 26th September 1906, and published under their notification No. 205, dated the 5th October 1906.

2. In exercise of the powers conferred by the notification of the Government of India in the Department of Commerce and Industry, No. 801, dated the 24th March 1905, read in the preamble above, the Railway Board sanction, under section 47, sub-section (4), of the Indian Railways Act, 1890 (IX of 1890), the adoption, with effect from the 1st July 1907, of the General Rules of 1906 for working open lines of railway, and of the addendum to rule 86, Chapter III, Part I, cited in paragraph 1 above, on such portions of the Bombay, Baroda and Central India Railway, and of the railways worked by it, as are situate in British territory.

ORDER.—Ordered that this Resolution be published under a notification in Part I of the *Gazette of India* as required by section 47, sub-section (3) of the Indian Railways Act, 1890 (IX of 1890), also that the General Rules, including the addendum cited in paragraph 1 which have already been published in the *Gazette of India*, be kept at railway stations as directed by sub-section (6) of the same section and that this Resolution be communicated to the Government of Bombay for information.

The 21st June, 1907.

No. 151.—The following is published for general information :

Circular No. 462 R. T., dated the 20th June 1907.

RESOLUTION—By the Railway Board.

Reduction of Railway freight charges for the conveyance of salt.

RESOLUTION.—The Government of India have from time to time made substantial reductions in the duty on salt with a view to cheapen the cost of salt to the consumer. In 1903 the duty was reduced from Rs. 2-8 per maund to Rs. 2. In 1905 it was further reduced by 8 annas per maund and with the reduction made in the current year it now stands at Re. 1 per maund.

2. The Government of India consider that the time has now arrived for a general reduction in the rates charged for the carriage of salt by railways, in order that the freight may be more in keeping with the present value of the commodity carried, and also to still further cheapen the cost of salt to the consumer.

3. The Railway Board accordingly direct that the *maxima* and *minima* rates shown below, which were prescribed for coal in paragraph 1 (b) of Schedule A, promulgated with the Government of India, Public Works Department, Circular

No. 8 Railway, dated the 4th May 1895, and Public Works Department Resolution No. 547-R.T., dated the 8th July 1897, as modified by paragraph 2 of Railway Board's Circular, No. R.T.-29, dated the 26th August 1905, be made applicable to salt, on and after the 1st December 1907, on the railways* administered directly by the State:—

Consignments in full wagon loads—

| | | | <i>Maxima rates per maund per mile</i> |
|---|-----|-----|--|
| For all distances up to 400 miles inclusive | ... | ... | 0.15 pie |
| For distances above 400 miles— | | | |
| For the first 400 miles | ... | ... | 0.15 „ |
| For the distance in excess of 400 miles | ... | ... | 0.10 „ |
| The charge shall be made on the full carrying capacity of the wagons employed | | | |
| | | | <i>Minima rates per maund per mile</i> |
| For distance up to 300 miles | ... | ... | 1 ¹ / ₁₀ th pie or 0.10 |
| Plus for any distance in excess of 300 miles and up to | | | |
| 500 miles inclusive | ... | ... | 1 ¹ / ₇ th pie or 0.066 |
| Plus for any distance in excess of 500 miles | ... | ... | 1 ¹ / ₁₀ th pie or 0.05 |
| For consignments of less than a wagon load the <i>minima</i> rates quoted above shall apply, and from the same date the <i>maxima</i> rate for such consignments shall be | | | |
| | ... | ... | 1 ¹ / ₂ pie per maund per mile |

These rates shall be subject to revision at the end of two years from the 1st December 1907.

4. The Railway Board further direct that the rates for the carriage of salt on Railways administered directly by the State in force on the 30th November 1907, shall be reduced by 30 per cent. from the 1st December 1907, subject to the *minima* prescribed in this Resolution. In cases where the reduction of 30 per cent. on the rate in force on the 30th November does not bring the reduced rate within the *maxima* prescribed in this Resolution, the *maxima* rates therein laid down shall be adopted.

5. In order to secure uniformity in the charges for salt, on the several railways, the Railway Board desire that the administrations of the railways* detailed in the margin, whose contracts provide for the regulation by the Secretary of State of *maxima* and *minima* rates thereon, and of all railways over which Government may hereafter reserve control in such matters, may be moved to accept the revised rates, and that the administrations of all other railways which are not specially referred to, may likewise be moved to adopt the same.

- * Bombay, Baroda and Central India Railway (including Rajputana Malwa Railway).
- Madras Railway, North East line, Azikhah-Mangalore section and Calicut Azikhah section.
- Assam-Bengal Railway.
- Bengal and North Western Railway, Tirhoot section.
- Bengal-Nagpur Railway.
- Burma Railways.
- East Indian Railway, Delhi-Umballa Kalka and South Behar Railways.
- Great Indian Peninsula Railway (including Indian Midland Railway).
- South Indian Railway.
- Lucknow-Barilly Railway.
- Southern Punjab Railway.

ORDER.—Ordered that a copy of this Resolution be communicated to the

The Governments of Madras, Bombay and Burma,
Public Works Department, Railway Branch
The Governments of Bengal, the United Provinces, and Eastern Bengal and Assam, Public Works Department
The Government of Bengal, Marine Department.
The Honourable the Resident at Hyderabad.
The Honourable the Agent to the Governor-General for Rajputana.

Finance Department and to the Local Governments and Administrations noted in the margin, and the Accountant-General, Public Works Department, for information.

R. C. F. VOLKERS,
Secretary, Railway Board.

SUPPLEMENT TO
The Gazette of India.

No. 25.]

SIMLA, SATURDAY, JUNE 22, 1907.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 h. on Thursday, the 20th June 1907, based on the Indian Daily Weather Reports of the period.

The weather of the past week was controlled chiefly by two storms, one of which formed in the Arabian Sea and the other in the Bay of Bengal, both of them developing in the areas of low pressure accompanying advances of monsoon winds, referred to in last week's rainfall summary. The storm in the Arabian Sea was first shown as a definite depression on the morning of the 17th and, as far as can be judged from the data available, it pursued a very irregular course and on the 20th was lying south of Kurrachee.

The storm in the Bay appears to have developed off the Ganjam coast and travelling in a northeasterly direction its centre crossed the Bengal coast slightly to the east of Saugor Island during the 18th. The storm then moved in a westnorthwesterly direction and by the morning of the 20th was shown near Hazaribagh.

The Arabian Sea storm gave rain in the west of the Peninsula, in Gujarat and lower Sind, but no large amounts were reported except from the Malabar and Konkan coasts, where falls in twenty-four hours ranging from 3 to 6 inches were recorded at several stations. The Bay storm was the cause of widespread rain over the rest of the Peninsula, in the Central Provinces, and in northeast India, the precipitation in the latter region being heavy on the 19th and 20th, but it drew winds away from Burma where rainfall in consequence was comparatively light and local in character.

Burma.—Rainfall occurred on every day of the week, but the 17th was the only day on which it was nearly general. Skies were thickly clouded and temperature was approximately normal.

Northeast India and Orissa.—Rain fell over the whole division and was moderate to heavy on the 19th and 20th. Skies were thickly clouded, and temperature was fairly normal except on the last two days of the week when it was considerably lower than usual in Chota Nagpur and Bihar.

The United Provinces, Central India and the Central Provinces.—Rain fell daily in parts of the Central Provinces and a few falls were reported from Central India and the United Provinces. Skies were on the whole moderately clouded, and temperature was normal except on the 14th and 15th when it was higher than usual in the United Provinces.

Northwest India.—Practically no rain occurred during the week except in Gujarat and lower Sind, where skies were more or less thickly clouded; in other parts of the division they were generally clear. Temperature was below normal in the extreme north on the 14th and 15th, and in Sind and Cutch on the 19th and 20th; in the remaining parts of the division it was normal or in excess.

The Peninsula.—Rainfall occurred in all parts of the division, especially in the western districts, and skies were thickly clouded everywhere while temperature was approximately normal, except in the central parts of the east coast and the adjoining districts of the Deccan where weather was much cooler than usual on the first four days of the week.

The rainfall of the whole period from the 3rd May to the 20th June is practically equal to the normal in Burma, the greater part of northeast India, on the west coast of the Peninsula and in Gujarat; it is in excess in Baluchistan, the North West Dry Area and the subdivisions of Patna and Waltair; and is in defect elsewhere.

The following summarises the chief rainfall amounts of the week, as reported at 8 h. each day:

- June 14th. Mergui 2'15", Silchar 2'38", Dinajpur 3'02", Rajkot 1'86", Karwar 2'05", Calicut 2'63", Cochin 2'26" and Trivandrum 2'40".
- " 15th. Mergui 3'52", Darbhanga 3'16", Amraoti 1'29", Cocanada 5'26", Masulipatam 2'03", Mormugão 4'90" and Goa 4'00".
- " 16th. Port Blair 3'97", Moulmein 2'94", Sibsagar 2'88", Indore 1'83", Amraoti 2'71", Cocanada 5'95", Ahmednagar 2'04", Bombay 3'14", and Mormugão 4'20".
- " 17th. Tavoy 3'10", Diamond Island 3'80", Bhamo 3'29", Minbu 1'03", Seoni 1'70", Akola 1'47", Bombay 4'09" and Ratnagiri 3'46".
- " 18th. Barisal 2'16", Saugor Island 3'17", Bombay 4'12" and Ratnagiri 4'00".
- " 19th. Akyab 3'99", Narayanganj 3'14", Barisal 4'76", Calcutta 3'19", Bogra 3'08", Dinajpur 2'40", Ranchi 2'44", Balasore 2'63", Bhuj 1'20" and Bombay 6'62".
- " 20th. Akyab 4'34", Toungoo 2'65", Patna 5'88", Gaya 6'24", Darjeeling 2'83", Dinajpur 2'75", Purnea 2'56", Darbhanga 3'77", Hazaribagh 8'79", Raipur 1'81" and Pachmarhi 1'83".

GEORGE C SIMPSON,
for Director General of Observatories.

J. WILSON,
Secretary to the Government of India.

SIMLA;
The 20th June 1907.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, 15th •
June 1907.

Burma.—The rainfall was general and seasonable and mostly sufficient. Reaping of dry weather paddy is completed in Shwabo; ploughing for wet weather paddy has commenced in Akyab and sowing has commenced in Pegu; sowing of wet weather paddy in nurseries has commenced in Bhamo and Kyaukse. Agricultural operations are progressing satisfactorily everywhere. Transplanting of early wet weather paddy and sowing of peas are completed in the Northern Shan States. Sowing of sesamum and other miscellaneous crops has commenced in Minbu; sowing of cotton, sesamum and ground-nuts is completed in parts of Myingyan. Reaping of early sesamum has commenced in Kyaukse. The standing crops in Upper Burma are on the whole doing well. The price of paddy has risen considerably in Henzada, and slightly in five districts, and is generally much about normal.

Eastern Bengal and Assam.—The weather is cloudy and rainy. Heavy rain has fallen in the Surma Valley, Upper Assam Hill districts, Jalpaiguri, Rangpur and Dinajpur, and slight to moderate rain has fallen elsewhere. The flood is subsiding in Cachar, but in Sylhet it is still deterring cultivation. The prospects of the standing crops are generally good except in the Surma Valley. Plucking and manufacture of tea are in progress; prospects are poor in Cachar and Darrang, and fair to good elsewhere. Preparation of land for winter rice and planting of sugarcane are going on. Sowing of rice is in progress, and transplantation has begun in places. Weeding of jute is practically finished. Harvesting of early rice has begun. Potatoes are being gathered in the Khasi Hills, and prospects are very good. Prices of common rice:—Manipur 0½; Kohima 9; Chittagong 8½; Dacca 7½; Silchar 7 to 7½; Mymensingh, Dinajpur, Tezpur and Dibrugarh 7½; Rangamati, Jalpaiguri, Malda, Sylhet, Dhubri, Gauhati, Nowgong and Sibsagar 7; Tura 6 to 7; Rampur Boalia 6½; Pabna 6½; Noakhali, Rangpur and Bogra 6½; and Shillong and Aijal 6 seers per rupee. Prices have risen in eight; fallen in four; and remained stationary in the remaining districts.

Bengal.—Rain was fairly general in the Province, the fall being light in most districts; in Cooch Behar and Darjeeling the rainfall was heavy, while in Midnapore, the 24 Parganas, Darbhanga, Purnea, Cuttack and Balasore it was moderate. More rain is wanted in Burdwan, Hooghly, Murshidabad, Champaran, Muzaffargarh, Bhagalpur, the Sonthal Parganas and Ranchi. Sugarcane is doing well, but it is reported to have been injuriously affected for want of rain in parts of Burdwan. In Darbhanga the number of persons on gratuitous relief is 11,208; on test works 2,675; and on relief works 20,684. Fodder and water are generally sufficient. In parts of Ranchi fodder is reported to be scarce. The price of common rice has risen in three and has fallen in five districts.

United Provinces.—Rain has fallen in nineteen districts. Preparation of fields for autumn crops continues, and sowings are in progress. Irrigation and weeding of sugarcane and extra crops are going on. Flights of locusts are reported to have passed through Naini Tal, Pundlshahr and Fyzabad, but no damage was done. Except in parts of Gathwal, Naini Tal, Bulandshahr and Etah the condition of agricultural stock is good. Fodder is scarce in Muzaffarnagar and Azamgarh, and dear in Hardoi and Sitapur. Supplies are adequate, and conditions generally are satisfactory. Prices show a rise in eighteen districts.

Punjab.—(Report not received).

North-West Frontier Province.—Rain ranging from 3 cents in Bannu to 2 inches and 56 cents in the Dera Ismail Khan district fell all over the Province except in Kohat. The condition of the standing crops is generally good. Harvesting of spring crops is still carried on; the outturn of crops is reported from average to good. Sowings of autumn crops are in progress. Young locusts have injured the extra spring crops in some places in Peshawar, but they are now moving away. A heavy hailstorm in the Tank and Kulachi tehsils of the Dera Ismail Khan district has damaged the late spring crops. The water-supply is ample and fodder is sufficient. Cattle are generally in good condition except in the Marwat tehsil of the Bannu district. Prices are fluctuating. Prices:—wheat 17½ to 20; gram 16½ to 21; maize 24 to 32; and bajra 18½ to 23 seers per rupee.

Jammu.—Slight rain fell during the week. Prices are stationary. Prices:—wheat 9 to 23 and maize 15 to 36 seers per rupee. The condition of the standing crops is fair.

Fodder is sufficient. Threshing of spring crops is nearly over, and land is being prepared for autumn sowings. Locusts appeared in the Kotli tehsil and did some little damage to cotton.

Kashmir.—The weather is generally bright. Prices are almost stationary. Crops are in good condition.

Rajputana.—Showers fell in many places during the week, the maximum fall was 60 cents in the hill tracts of Mewar. Harvesting operations are almost over, and land is being prepared for autumn sowings. Cattle are in good condition, except in some places in Mewar, Jhalawar and Merwara. Pasturage and fodder are sufficient except in Alwar. Prices are falling in Marwar; rising in Jhalawar; and are nearly steady elsewhere.

Central India.—There were light showers in Bhopal, Malwa and Bhopawar. Preparation of land for autumn sowings is in progress. Agricultural stock and pasturage are fair to good except in parts of Indore, Malwa and Bhopawar Agencies. Prices are high in the Rampura district of Indore and Baghelkhand; are rising in Bundelkhand, Bhopal and Malwa Agencies; and are stationary elsewhere.

Central Provinces.—The weather is still hot and cloudy with fitful winds. Light to moderate rain fell in all districts, Amraoti received 6½ inches, Chhindwara 4 inches, Seoni 3½ inches, Akola 2½, and Wardha 2½ inches; in Mandla, Bhandara, Nagpur, Balaghat, Yeotmal and the Chhattisgarh districts the quantity received was between one and one and-a-half inches; the remaining districts received from 9 to 80 cents. Preparation of land for sowings of autumn crops continues throughout the Provinces, and sowings of cotton have begun in Wardha, Amraoti and Buldana and of rice in parts of Bhandara, Balaghat and Chhattisgarh districts. Locusts appeared in Damoh, Akola and Buldana but did no damage as there are no standing crops. The water-supply is adequate everywhere except in parts of Sohagpur (Hoshangabad). Fodder is scarce in Nimar and Hoshangabad and in parts of Yeotmal, Chanda, Chhindwara, Wardha, Nagpur and Akola. Prices of staple food-grains remain stationary in ten districts and fluctuate slightly elsewhere with a tendency to rise. The principal variations were:—rice was cheaper by 5 seers in Jubbulpore and by 2 seers in Seoni and dearer by 2 seers in Chhindwara; *juar* was cheaper by 3 seers in Bhandara and dearer by 2 seers in Nagpur and Chanda; prices are still equal to or above the scarcity level in Mandla, Nimar, Wardha, Nagpur, Chanda, Balaghat, Drug, Bilaspur and Amraoti.

Native States.—Rajnandgaon had 1½ inches of rain, and light showers not exceeding 77 cents were also received in Kawardha, Chhuikhadan, Khairagarh, Kanker, Raigarh, Sakti and Udaipur. Preparation of land for next autumn sowings proceeds rapidly, and sowing of rice has started in Raigarh, Sarangarh, Sakti and Udaipur. Fodder and water are scarce in Kawardha and Chhuikhadan; elsewhere the supply is sufficient. Prices are stationary.

Bombay.—There was good rain during the week in parts of Surat and the Konkan; moderate in parts of Kaira, Broach, the Deccan, Dharwar, Kathiawar, Baroda and Mahi Kantha; and slight in parts of Hyderabad, Ahmedabad, Panch Mahals, Bijapur, Palanpur, Cutch and Rewa Kantha. Preparation of lands for autumn cultivation is still in progress; sowing of autumn crops continues in parts of Sind, the Konkan and the Karnatak, and has commenced in Gujarat, Nasik and Satara. The fodder-supply is adequate, and agricultural stock is generally in good condition. Drinking water is sufficient except in parts of the Deccan and Bijapur. Water for irrigation purposes is insufficient in parts of Surat, the Deccan, the Karnatak and Baroda. The quantity of food-grains purchasable per rupee is in the Karnatak 20 to 43 per cent; in the Deccan 25 to 31 per cent; and elsewhere 11 to 45 per cent less than the normal. Labourers get sufficient field employment. During the week ending the 8th instant 25 persons were relieved gratuitously in Belgaum.

Hyderabad.—Rainfall:—75 cents. Lands are being generally prepared for monsoon sowings, which have commenced in seven talukas. Prices:—wheat 7½; coarse rice 7; and *juar* 14½ seers per rupee.

Mysore.—There was good rain in Hassan, Kadur and Shimoga, and slight rain elsewhere. Prices of food-grains are generally steady. The standing crops are in good condition, but more rain is needed in parts of Mysore and Hassan. The prospects of the season are good. Cattle are healthy. Water and fodder are available.

Coorg.—Rainfall 8 inches 23 cents. Sowing of rice has commenced. Prices of food-grains are normal. Water and fodder are sufficient.

Madras.—The rainfall was very heavy in Malabar, South Canara and Godavari; heavy in Kistna, the Vizagapatam littoral and the Nilgiris; good in Guntur, Ganjam, Madras,

the Vizagapatam Agency and Bellary; none in Madura; and light to fair elsewhere. Irrigation supplies are sufficient, except in parts of Kistna, the Deccan, Nellore, South Arcot, North Arcot, Salem and Madura. Ploughing, sowing, weeding, manuring and transplanting are in progress in parts. The standing crops are generally fair but some in parts of Madura require more rain. Harvests continue with outturn poor to normal. Pasture is sufficient except in parts of the Circars, the Deccan, Nellore, Chingleput, Salem, Madura, Tinnevely and South Canara. Fodder is procurable. The condition of cattle is generally good. The price of rice is stationary in ten districts; has fallen in two; and has slightly risen in ten. The prices of millets have fluctuated as follows:—*Ragi* is stationary in eight districts; has fallen in two; and has slightly risen in eleven. *Cholum* is stationary in four districts; has fallen in two; and has slightly risen in eight. *Cumbu* is stationary in four districts; has fallen in two; and has slightly risen in nine.

The number of persons in receipt of relief during the preceding and present weeks in each province is shown in the following table:

SIMLA, FRIDAY, JUNE 28, 1907.

ARMY DEPARTMENT

NOTIFICATION.

Simla, the 28th June, 1907

REWARDS.

INDIAN DISTINGUISHED SERVICE MEDAL.

His Majesty the King Emperor has been graciously pleased to institute a Distinguished Service Medal for the Indian Army.

Royal Warrant.

Edward R. and I.

Edward by the grace of God, of the United Kingdom of Great Britain and Ireland, and of the British Dominions beyond the Seas, King, Defender of the Faith, Emperor of India, to all to whom these presents shall come, greeting.

Whereas We have taken into Our Royal consideration that the means of adequately rewarding the distinguished services of Indian commissioned and non-commissioned officers and men of Our Indian Regular Forces including the reserve of the Indian Army, Border Militia and Levies, Military Police, and Imperial Service troops when employed under the orders of Our Government of India, who have distinguished themselves in peace or on active service, are limited.

Now, for the purpose of attaining an end so desirable as that of rewarding individual instances of such distinguished service, We have instituted and created, and by these presents, for Us, Our heirs and successors institute and create a new

Indian Military decoration to be distinguished as hereinafter described, which We are desirous should be highly prized by Our Indian commissioned and non-commissioned officers and men—and We are graciously pleased to make, ordain and establish the following rule and ordinance for the government of the same, which shall henceforth be inviolably observed and kept.

Firstly.—It is ordained that the decoration shall henceforth be styled and designated the **Indian Distinguished Service Medal**.

Secondly.—It is ordained that the decoration shall be a silver medal of the same size as a war medal having thereon Our Effigy. On the reverse side a laurel wreath with the words "For Distinguished Service" in relief thereon.

Thirdly.—It is ordained that the medal shall be worn on the left breast, immediately on the right of all war medals, suspended by a red ribbon $1\frac{1}{4}$ inch wide of the colour of the ribbon of the Order of British India, edged with blue, $\frac{3}{8}$ inch wide, of the colour of the ribbon of the Indian Order of Merit.

Fourthly.—It is ordained that the regulations regarding the forfeiture of war medals shall apply to the medal hereby created.

Fifthly.—It is ordained that the power of conferring the medal upon an individual, or of depriving an individual to whom the medal has been granted, of such medal, as provided in Article 4, shall be exercised on Our behalf by the Governor General of India with the same force as if exercised by Us, and the name of an individual so granted the medal or deprived of the medal shall be published in the Official Gazette of India.

Given at Our Court at St. James's this twenty-fifth day of June, in the seventh year of Our reign, and in the year of Our Lord one thousand nine hundred and seven.

His Excellency the Viceroy and Governor General, in virtue of the authority conferred upon him, is pleased to sanction the award of the above Distinguished Service Medal to the following officers, non-commissioned officers and men :

Risaldar Thakur Zalim Singh, 3rd Skinner's Horse.

Jemadar Shahzad Mir, 11th King Edward's Own Lancers (Probyn's Horse).

Secretary to the Government of India.

RAILWAY BOARD.

NOTIFICATIONS.

Simla, the 24th June, 1907.

No. 156.—Mr. E. F. Jacob, C.I.E., Manager, Oudh and Rohilkhand Railway, is promoted from special class, 2nd grade, to special class, 1st grade, of the Superior Revenue Establishment of State Railways, with effect from the 1st April 1907.

The 27th June, 1907.

No. 157—Mr. George Thomson is appointed an Assistant Locomotive Superintendent (on probation) in class III, grade 4, of the Superior Revenue Establishment of State Railways, with effect from the 25th February 1907, and posted to the North-Western Railway. Mr. Thomson is transferred to the Oudh and Rohilkhand Railway, with effect from the 4th May 1907.

No. 158—The following is published for general information :

Circular No. 519 R. T., dated the 27th June 1907.

RESOLUTION—By the Railway Board.

Amendment in rule 359, sub-rule (1), Chapter XXI, Part I, and in rule 33, sub-rule (1), Chapter IV, Part II, of the General Rules of 1906 for working open lines of railway.

Read—

Section 47 of the Indian Railways Act, 1890 (IX of 1890).

Government of India, Public Works Department, notification No. 118, dated the 21st March 1895, and Government of India, Public Works Department, circular No. 6 Railway, dated the 12th March 1895.

Government of India, Department of Commerce and Industry, notification No. 801, dated the 24th March 1905.

Railway Board's notification No. 183, dated the 8th September 1906, and Railway Board's circular No. R. T. ^{89-A}₅, dated the 8th September 1906.

Memorandum from the Consulting Engineer to the Government of India for Railways, Calcutta, No. 2893, dated the 16th May 1907.

RESOLUTION.—In the judgment delivered in a recent case in which a railway servant was prosecuted for a breach of rules 263 and 264, Chapter XVII, Part I of the General Rules for working open lines of railway, promulgated under Government of India, Public Works Department, circular No. 6 Railway, dated the 12th March 1895, it was ruled that a breach of any general rule framed under section 47 of the Indian Railways Act, 1890 (IX of 1890), did not constitute a criminal offence and that a Railway Administration is empowered to enforce general rules of its own making by imposing fines on its own servants.

2. Rule 359, sub-rule (1), Chapter XXI, Part I, and rule 33, sub-rule (1), Chapter IV, Part II, of the General Rules for working open lines of railway, promulgated under Railway Board's circular No. R. T. ^{89-A}₅, dated the 8th September 1906, prescribe that any railway servant committing a breach of any of the rules therein respectively referred to, shall be liable to penalty "on conviction before a Magistrate," which is inconsistent with the judgment referred to above.

3. In exercise, therefore, of the powers conferred by the notification of the Government of India in the Department of Commerce and Industry, No. 801, dated the 24th March 1905, read in the preamble above, the Railway Board sanction, under section 47, sub-sections (1) and (4) of the Indian Railways Act, 1890 (IX of 1890), as in force in British India or as locally applied, the adoption, by the Administrations of all lines of railway administered by the Government, of the amendments specified in the annexure hereto in the General Rules for working open lines of railway, which were promulgated with Railway Board's circular No. R. T. ^{89-A}₅, dated the 8th September 1906.

4. The Railway Board also desire that the said amendments may be brought to the notice of the administrations of the several railways not administered by Government and that the Agents and Managers of those railways may be invited to submit formal applications for the adoption of the said amendments.

ORDER.—Ordered that this circular, with the accompanying amendments, be published under a notification in Part I of the *Gazette of India*, as required by section 47, sub-section (3) of the Indian Railways Act, 1890 (IX of 1890), and that a copy thereof be kept open for inspection at railway stations as directed by

The Governments of Madras, Bombay and Burma, Public Works Department, Railway Branch.

The Governments of Bengal, the United Provinces and Eastern Bengal and Assam, Public Works Department.

The Government of Bengal, Marine Department.

The First Assistant to the Hon'ble the Resident at Hyderabad.

The Secretary to the Hon'ble the Agent to the Governor General, Rajputana, Public Works Department.

The Consulting Engineers to the Government of India for Railways, Calcutta and Lucknow.

The Managers of the North-Western, Oudh and Rohilkhand and Eastern Bengal (State) Railways.

sub-section (6) of the same section; also that a copy of this circular, and of its enclosure, be communicated to the Local Governments, Administrations and the officers noted on the margin, for information.

[Enclosure to Railway Board's circular No. 519 R. T., dated the 27th June 1907.]

Amendment in rule 359, sub-rule (1), Chapter XXI, Part I, and in rule 33, sub-rule (1), Chapter IV, Part II, of the General Rules for working open lines of railway promulgated under Railway Board's circular No. R. T. ^{87-A}/₅, dated the 8th September 1906.

RULE 359, CHAPTER XXI, PART I.—*Expunge the words "on conviction before a Magistrate" in the third line of this rule.*

RULE 33, CHAPTER IV, PART II.—*Expunge the words "on conviction before a Magistrate" in the third line of this rule.*

R. C. F. VOLKERS,

Secretary, Railway Board.

GOVERNMENT OF INDIA.
HOME DEPARTMENT.

SANITARY.

PLAGUE.

H. A. STUART,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 h. on Thursday, the 27th June 1907, based on the Indian Daily Weather Reports of the period.

The storm which on the 20th June was lying to the south of Kurrachee crossed the Sind coast about sixty miles southeast of that port at about midnight on the 20th, but had filled up almost completely by 8 h. on the 21st. The storm from the Bay of Bengal, shown near Hazaribagh on the 20th, advanced as far as the east of the United Provinces and then disappeared, being succeeded immediately by another which formed at the head of the Bay and developed during the next two days into a storm of considerable severity, the deficiency of pressure in its central area being as much as three quarters of an inch. The storm crossed the Bengal coast on the 24th and then pursued a westerly course, but it commenced filling up rapidly on the 25th and by the morning of the 27th was shown only as a diffused area of low pressure lying over the Central Provinces. It occasioned very strong winds on the Bengal coast and gave heavy rain on the 25th and 26th in the districts over which its centre passed, but rainfall was only light and local in other parts of northeast India, and the storm deflected the rain producing current from the interior of Burma where the weather was comparatively dry during the greater part of the week. On the other hand the Arabian Sea monsoon current which had weakened considerably after the disappearance of the storm off the Sind coast was roused into greater activity by the appearance of the storm in northeast India, and rain became nearly general in the western districts of the Peninsula and extended to the southern and eastern districts of the Central Provinces.

Burma.—Rainfall was nearly general on the coast and only local in the interior. Skies were moderately to thickly clouded, and temperature was approximately normal except during the latter part of the week in south Tenasserim where weather was warmer than usual.

Northeast India—Rain fell in all parts of the division and was heavy in south Bengal and Chota Nagpur. Skies were moderately to heavily clouded and temperature was below normal in Chota Nagpur and the adjoining districts on the 21st, 22nd, 26th and 27th, and nearly normal elsewhere.

The United Provinces, Central India and the Central Provinces—Local falls of rain occurred throughout the week in the Central Provinces and during the first three days of the week in the United Provinces and Central India. Skies were almost clear in the west of the United Provinces and were more or less thickly clouded elsewhere. Weather was cooler than usual in the east of the division on the 21st and 22nd, but temperature then rose and in the United Provinces on the 24th there was shown an excess which extended into Central India and the Central Provinces, weather being much warmer than usual by the end of the week over practically the whole division.

Northwest India.—Light scattered falls of rain were reported on the first four days of the week but on the remaining days weather was dry. Skies were lightly to moderately clouded in lower Sind, Gujarat and Rajputana and were occasionally clouded in other parts of the division. Temperature was normal or in defect up to the 25th on the 26th it rose and was in excess on that day and on the 27th in the Frontier Province, the Punjab and Rajputana.

The Peninsula.—Rainfall was on the whole light and confined chiefly to the west coast districts. Skies were moderately to thickly clouded and temperature was approximately normal.

The rainfall of the week was heavier than usual on the Burma coast and in the districts of northeast India and of the Central Provinces affected by the storm from the Bay. For the whole period from the 3rd May to the 27th June rainfall is normal or in excess in Burma, the greater part of northeast India, the north of the east coast, the North West Dry Area, Baluchistan and the west and extreme south of the Peninsula: elsewhere it is below normal.

The following summarises the chief rainfall amounts of the week, as reported at 8 h. each day:

- June 21st. Bassein 2·82", Akyab 4·36", Patna 4·10" and Gaya 3·39".
- „ 22nd. Tavoy 3·90", Moulmein 3·15", Bassein 4·22", Sambalpur 2·85" and Mount Abu 1·96".
- „ 23rd. Saugor Island 3·42", False Point 6·73", Benares 1·07" and Jhansi 1·05".
- „ 24th. Akyab 3·71" and Purnea 1·62".
- „ 25th. Moulmein 3·25", Saugor Island 5·03", Calcutta 8·62", Burdwan 3·14" and Ranchi 2·16".
- „ 26th. Akyab 9·25", Hazaribagh 2·68", Ranchi 6·19", Chaibassa 4·68", Sambalpur 2·09" and Calicut 3·62".
- „ 27th. Moulmein 4·48", Rangoon 3·08", Akyab 9·18", Myitkyina 2·93", Cherra Poonjee 7·73", Pendra 2·55", Malegaon 1·50", Goa 3·00", Mormugão 3·02" and Calicut 2·91".

J. PATTERSON,
for Director General of Observatories.

J. WILSON,
Secretary to the Government of India.

SIMLA;
The 27th June 1907.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, 22nd June 1907.

Burma.—The rainfall was very heavy in Kyaukpyu; heavy in Akyab, Bassein, Myaungmya, Pyapon, Thaton and Amherst; and moderate for the most part elsewhere. Reaping of dry weather paddy has commenced in Minbu. Ploughing for wet weather paddy has commenced in Hanthawaddy, Amherst and Upper Chindwin, and is now practically general, and sowing has commenced in Amherst and the Northern Shan States. Sowing of early wet weather paddy is completed in the canal tract of Mandalay and in the Thabeitkyin township of the Ruby Mines district. Transplanting of wet weather paddy has commenced in Shwebo. Sowing of hill side paddy is completed in the Singu and Mawmyo sub-divisions of Mandalay. Ploughing for miscellaneous crops is progressing satisfactorily. The standing crops in Upper Burma are in good condition except in parts of Meiktila, where young sesamum plants have been destroyed by excessive rain. The price of paddy has risen slightly in Rangoon and Mandalay and fallen slightly in Amherst; elsewhere it is stationary.

Eastern Bengal and Assam.—The weather is cloudy and rainy. The rainfall was general and heavy in places in Eastern Bengal. Floods are subsiding slowly in Sylhet. The prospects of the standing crops are generally fair to good, but prospects of jute are bad in Sylhet. Plucking and manufacture of tea are in progress; prospects are poor in Cachar and fair to good elsewhere. Ploughing for and transplanting of winter rice and harvesting of early rice are in progress. Potatoes are being gathered in the Khasi Hills, and prospects are very good. Prices of common rice:—Manipur 9½; Kohima and Chittagong 9; Sibsagar 8; Comilla 7½; Dacca, Sylhet and Dhubri 7½; Cachar 7 to 7½; Mymensingh, Tezpur and Dibrugarh 7½; Rangamati, Jalpaiguri, Gauhati and Nowgong 7; Jura 6 to 7; Noakhali, Rampur Boalia, Rangpur and Pabna 6½; Bogra 6½; Shillong 6 and Ajial 5½ seers per rupee. Prices have risen in five; fallen in five; and remain stationary in the remaining districts.

Bengal.—Rain was general throughout the Province, the fall being very heavy in South Behar, in the Bhagalpur and Presidency Divisions and in Birbhum, Howrah, Saran, Puri, Palamau and Manbhum. The rain although heavy in many districts is reported to have benefited the standing crops and to have been generally good for agricultural operations. Damage has been done by heavy floods to *marua* (millet) and other crops in parts of Gaya, and by storms to jute in Jessore. Sugarcane is doing well. Weeding of jute has commenced. In Darbhanga the number of persons on gratuitous relief is 11,380; on test works 870; and on famine relief works 5,507. Fodder and water are sufficient. The price of common rice has risen in twelve districts and fallen in one.

United Provinces.—Rain has fallen throughout the Provinces. Harvesting of extra crops is in progress and in parts is nearing completion. Fields continue to be prepared for autumn crops and sowings are going on. Sugarcane is being irrigated. Slight damage to standing crops by locusts is reported from Dehra Dun, Tehri and Garhwal. Fodder is still dear, in Hardoi and Sitapur and scarce in Bara Banki and Azamgarh. Markets are well stocked and prices are stationary with a tendency still to rise.

Punjab.—Good to moderate rain has fallen in all districts except Delhi, Mianwali and Multan. A slight fall is also reported from Rawalpindi. Prices of food-grains are generally rising in Hissar, Rohtak, Ambala, Jullundur, Lahore and Rawalpindi. Harvesting and threshing of spring crops and sowings of cotton, sugarcane and other autumn crops continue. Extra spring crops are being cut in Gurgaon. Cotton and sugarcane crops are being weeded in Jullundur and Sialkot. Reaping of tobacco has commenced in Amritsar. The outturn of spring crops is generally average; it is however below average in Sialkot, Shahpur, Lyallpur and Multan. The condition of the extra spring crops excepting melons in Ambala, Jullundur and Amritsar is good to average. Locusts appeared in Jullundur, Lahore, Shahpur and Multan and damaged the crops in the latter two districts. Crops in two tehsils of Mianwali have also been destroyed by hoppers, and the wheat crop in Lyallpur has been damaged by rain. The condition of cattle is generally good. Fodder is sufficient, but green fodder is not available in Ferozepore. The water-supply is insufficient in parts of Ambala.

North-West Frontier Province.—There was slight rain at Peshawar only during the week. The condition of the standing crops is good. Harvesting of spring crops goes on and the outturn is reported from average to good. Sowings of autumn crops continue. Young locusts have injured the extra spring crops in some places in the Peshawar district but are moving away. The river Indus is rising; the Kilapani supply in the Tank tehsil is abundant; there is no irrigation from the Kot Hafiz distributary of the Paharpur canal. The water-supply and fodder are sufficient. Cattle are in good condition. Prices are fluctuating. Prices:—wheat 16½ to 20½; *bajra* 13 to 22; maize 20 to 32½; and gram 15½ to 21 seers per rupee.

Jammu.—There was slight rain in certain tehsils. Prices are fluctuating. Prices:—wheat 9 to 23 and maize 15 to 36 seers per rupee. The condition of the standing crops is fair. Fodder is sufficient. Harvesting and threshing of spring crops are nearly over. Land is being prepared for autumn sowings.

Kashmir.—The weather is generally bright. Spring crops are being harvested. Autumn sowings are in progress. The standing crops are in good condition. Prices are almost stationary.

Rajputana.—Showers fell in many places the maximum fall was 88 cents at Bharatpur. Land is being prepared for autumn crops. Cattle are in good condition excepting in some places in Mewar and Jhalawar. Pasturage and fodder are sufficient. Prices are particularly steady throughout the Agencies.

Central India.—The rainfall was general in Bhopal, Baghelkhand and Bhopawar and partial elsewhere. Preparation of land for autumn sowings is in progress. Agricultural stock and pasturage are fair to good except in parts of Indore, Malwa and Bhopawar Agencies. Prices continue high in Baghelkhand and Sitamau; are rising in Gwalior, Bundelkhand and Barwani; are above normal in Bhopal; and are stationary elsewhere. Locusts appeared in parts of Panna but caused no damage.

Central Provinces.—The weather is still hot and cloudy with high winds. Light to moderate rain again fell during the week throughout the Provinces; the principal falls were Raipur 6½, Bilaspur 4½, Drug 4, Narsinghpur 3½, Damoh and Hoshangabad each 3, Balaghat 2½, Saugor, Mandla, Nagpur each 2½, and Bhandara 2 inches; the rainfall in the remaining districts ranged from 1½ inches in Chanda to 6 cents in Nimar. Preparations of land for sowings of autumn crops still continue in seven districts. Sowings of *juar*, cotton, rice, *tur*, *kodon* and *kutki* have been started in parts of Saugor, Chhindwara, Mandla, Nimar and in the Nagpur country, and are in progress in Chhattisgarh and Berar. Early rice is germinating in Raipur. Locusts passed over the Mandla district and also appeared in parts of Buldana and Yeotmal but did no damage. Water is sufficient everywhere except in parts of Sohagpur (Hoshangabad). Fodder is inadequate in Nimar and in parts of Chhindwara, Chanda, Yeotmal, Wardha and Nagpur. Prices are generally steady but *juar* became dearer by 2 seers in Yeotmal. The prices of staple food-grains are still equal to or above the scarcity rates in Mandla, Nimar, Wardha, Nagpur, Chanda, Balaghat, Drug, Bilaspur, Amraoti and Yeotmal.

Native States.—The rainfall measured (in inches) was:—Sakti 10½, Sarangarh 6½, Kankar 6, Raigarh 5½, Udaipur 5, Rajnandgaon 4½, Khairagarh 3, Chhuikhadan 2½ and Kawardha 2. Preparation of land for autumn sowings is in rapid progress, and sowings of rice and *kodon* are proceeding rapidly. Rust has attacked the sugarcane crop in the Sawa pargana (Sarangarh). Heavy rain in Sakti has damaged the early rice in places necessitating re-sowing. Fodder and water are sufficient except in Kawardha where fodder is still scarce. Prices are steady.

Bombay.—There was good rain during the week in parts of Karachi, the Konkan, East Khandesh, Nasik, Poona, Satara, Belgaum, Kathiawar and Cutch; moderate in parts of Hyderabad, Surat, West Khandesh, Ahmednagar and Rewa Kantha; and slight in parts of Sukkur, Thar and Parkar, Ahmedabad, Kaira, Panch Mahals, Broach, Sholapur, Bijapur, Dharwar, Baroda, Palanpur and Mahi Kantha. More rain is needed for commencement of sowings in parts of the Deccan, the Karnatak, Kathiawar, Mahi Kantha and Rewa Kantha. Preparation of lands for autumn cultivation is in progress in parts of Gujarat, Thana, Nasik, Sholapur, Baroda and Rewa Kantha. Sowing of autumn crops generally continues. Seedlings are in good condition. The fodder-supply is adequate. Agricultural stock is generally in good condition. Drinking water is sufficient and the supply of water for irrigation is improving. The quantity of food-grains purchasable per rupee is in the Karnatak 20 to 50 per cent; in the Deccan 14 to 26 per cent; and elsewhere 8 to 45 per cent less than the normal. During the week ending the 15th June 25 persons were relieved gratuitously in Belgaum.

Hyderabad.—Rainfall:—two inches 5 cents. Prospects are good. Autumn sowings have commenced generally. Prices:—wheat 7½; coarse rice 7½; and *juar* 14½ seers per rupee.

Mysore.—There was good rain in Hassan, Kadur and Shimoga, and slight rain elsewhere. Prices of food-grains are generally steady. The standing crops are in good condition, and the prospects of the season are good. Cattle are healthy. Water and fodder are available.

Coorg.—Rainfall 4 inches 87 cents. Sowing of rice continues. Prices of food-grains are normal. Water and fodder are sufficient.

Madras.—The rainfall was very heavy in South Canara, Godavari, Malabar and Kistna; heavy in Vizagapatam Agency; good in Ganjam, Vizagapatam littoral, Nilgiris and Guntur; none in Coimbatore, Trichinopoly, Tanjore and Madura; and light to fair elsewhere. Irrigation supplies are sufficient except in parts of the Deccan, Nellore, South Arcot, North Arcot, Salem, Madura and South Canara. Ploughing, manuring, sowing, weeding and transplanting are in progress. The standing crops are generally fair but some in parts of Kistna have been damaged by recent rain and some in parts of Madura require more rain. Harvests continue with outturn poor to normal. Pasture is sufficient except in parts of Godavari, Kistna, the Deccan, Nellore, Madura and South Canara. Fodder is procurable. The condition of cattle is generally good. The price of rice is stationary in fourteen districts; has fallen in two; and has slightly risen in seven. The prices of millets have fluctuated as follows:—*Ragi* is stationary in nine districts; has fallen in three; and has slightly risen in nine. *Cholam* is stationary in five districts; has fallen in two; and has slightly risen in seven. *Cumbu* is stationary in seven districts; has fallen in one; and has slightly risen in seven.

The number of persons in receipt of relief during the preceding and present weeks in each province is shown in the following table:

| Name of province. | PRECEDING WEEK (REVISED FIGURES) | | | PRESENT WEEK. | | | Increase or decrease. |

The Gazette of India.

PUBLISHED BY AUTHORITY.

CALCUTTA, SATURDAY, JUNE 1, 1907.

Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART II.

Notifications by High Court, Comptroller General, etc.

GAZETTE OF INDIA.

NOTICE.

The 26th March 1907.

From the 6th April next till further notice, Parts I, IV, V, and VI of the *Gazette of India* and the Weather and Crop Report will be published at Simla. After the 30th March all notifications and other matter intended for publication in the *Gazette* should be addressed to the Officiating Publisher, at Simla.

Attention is invited to the following Circular Memorandum of the Government of India Home Department, of August 1901:—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's *Gazette*, and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No. 777—79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 P.M. on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's *Gazette*. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next *Gazette*."

J. P. HEWETT,

Secretary to the Government of India

Rates of subscription.

GOVERNMENT OF INDIA. DEPARTMENT OF COMMERCE AND INDUSTRY.

INVENTIONS and DESIGNS.

Calcutta, the 30th May 1907.

NOTIFICATIONS.

No. 2025 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act during the week ending 27th May 1907 :—

No. 269 of 1907.—Michael Woods, engineer, of 309 Pigdon street, Princes Hill, Carlton, and Thomas Jefferson Gilbert, dealer, of 1 Minnie street, Brunswick, both in the state of Victoria, commonwealth of Australia. *An improved moving machine for treating without removal railway or other rail deformities.*

No. 270 of 1907.—John Little, engineer, of "Kelvingrove," Nelson road, Camberwell, near Melbourne, in the state of Victoria, Australia. *Improved air and water cooling apparatus.*

No. 271 of 1907.—John Little, engineer, of "Kelvingrove," Nelson road, Camberwell, near Melbourne, in the state of Victoria, Australia. *Improved air and water cooling apparatus.*

No. 272 of 1907.—The Badische Anilin and Soda Fabrik, of Ludwigshafen-on-Rhine, in the German Empire. *Improvements in, and means for, the production of long stable electric arcs.*

No. 273 of 1907.—The Badische Anilin and Soda Fabrik, of Ludwigshafen-on-Rhine, in the German Empire. *Improvements in, and means for, the production of long stable electric arcs.*

No. 274 of 1907.—Harry Parsons, engineer, of 150 Millbrook road, in the city and county of Southampton, England. *An improved device for application to the tyres of motor-cars, cycles, and other vehicles for protecting them and preventing puncturing and skidding, or side-slip.*

No. 275 of 1907.—Kalle & Co., Aktiengesellschaft, of Biebrich-on-the-Rhine, in the German Empire. *The manufacture and production of a fatty substance from micro-organisms*

No. 276 of 1907.—Gustave Richard Bonnard, Managing Director of Public Companies, of 80 Coleman street, in the city of London, England, and Gardiner Henderson Mackillop, civil engineer, of Long Marston, Stratford-on-Avon, in the county of Warwick, England, late of Woodbine, Maidenhead, in the county of Berks, England. *Improvements in apparatus for pulverising, crushing, stamping, and other operations, performed by a weight, or weights, which is, or are lifted and then allowed to fall.*

No. 277 of 1907.—The Badische Anilin and Soda Fabrik, of Ludwigshafen-on-Rhine, in the German Empire. *Improvements in dyeing with sulphur colouring matters.*

No. 278 of 1907.—John Bunyan Wright, mechanic, and Frans Oscar Lawson, accountant, both of Arcade Benbow, Greensboro, in the county of Guilford, state of North Carolina, United States of America. *Improvements in mechanism for automatically operating air brakes.*

No. 279 of 1907.—Gajendra Kumar Paul, watch maker, Comilla, Eastern Bengal. *Improved box harmonium.*

No. 280 of 1907.—Frederick Clarence Jenkins, merchant, of No. 7 Koenigstrasse, Hamburg, Germany. *Improvement in indoor-ventilators:*

No. 281 of 1907.—William Henry Featherstone, engineer, of 5 James street, Rochester, in the county of Kent, England. *Improvements in, and relating to, the actuation of fire main valves and the like.*

No. 2026 P.—SPECIFICATIONS of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Madras, Bombay, and Burma, and the Director of the Department of Land Records and Agriculture, United Provinces of Agra and Oudh. These and other specifications are open to public inspection, from 11 A.M. to 3 P.M., at the Secretary's office, 2 Bankshall street, Calcutta, on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying :—

- No. 218 of 1906.—Carl Forstmann, landed proprietor, of Beechwood Estate, Darjeeling, in the province of Bengal. *The manufacture of a portable saw for cutting trees and sawing fallen or log timber on the hill sides where such timber lies.* (Specification filed 29 November 1906.)
- No. 461 of 1906.—August Deidesheimer, Director, of Pleicherglacistrasse, 1, Wurzburg, in the kingdom of Bavaria, and Franz Jurschina, manufacturer, of Goethestrasse, 13 Wurzburg, aforesaid. *Improvements in the manufacture of artificial stones, bricks or like articles.* (Specification filed 16 May 1907.)
- No. 531 of 1906.—Harry Pitt Kennedy, Sub-Marine engineer, Bombay, Baroda and Central India Railway, residing at Panjoo, Thana District, and William John Greengrass, of the Vacuum Oil Company, residing at Byculla, Bombay. *Manufacturing an anticorrosive or rust preventing composition to be called "Greengrass and Kennedy's anticorrosive cement composition."* (Specification filed 16 May 1907.)
- No. 563 of 1906.—Augustus Rosenberg, engineer, of 259 High Holborn, London, W.C., England. *Improvements in, and relating to gas generating apparatus.* (Specification filed 16 May 1907.)
- No. 595 of 1906.—Edoardo Mazza, civil engineer, of via Biamonti 7, Turin, Italy. *Improved apparatus for separating the constituent elements of gaseous mixtures.* (Specification filed 16 May 1907.)
- No. 620 of 1906.—Edward Jacob Hill, engineer, of 11 Victoria street, Westminster, London, England. *Improvements in or relating to couplings for railway vehicles.* (Specification filed 16 May 1907.)
- No. 24 of 1907.—Alfred William Carpenter, banker, of 28 Bedford street, Strand, London, England. *Improvements in elastic tyres for vehicle wheels.* (Specification filed 17 May 1907.)
- No. 85 of 1907.—Adolf Vogt, electrician, of 149 Tulse Hill, in the county of London, England. *Method of, and means for, increasing the volumetric efficiency of pumps, compressors, internal combustion engines, and other cylinder and piston machines drawing in charges of elastic fluid.* (Specification filed 19 April 1907.)
- No. 118 of 1907.—Edmund Scott Gustave Rees, Director, of Thomas Parker, Limited, electrical engineers, of Wolverhampton, in the county of Stafford, England. *Improvements in centrifugal, turbine and similar pumps.* (Specification filed 17 May 1907.)
- No. 185 of 1907.—John Hamilton Brindle, manufacturers' Agent, of 49 Deansgate, Manchester, county of Lancaster, England. *Improvements relating to long collars for the spindles of textile machinery.* (Specification filed 16 May 1907.)
- No. 187 of 1907.—Albert Thomas Hughes, engineer, of 10 Furzedown Terrace, Rectory Lane, Tooting, London, England. *Improved means for locking nuts to bolts.* (Specification filed 16 May 1907.)
- No. 188 of 1907.—The Butler Pumping Company, a corporation organized under the laws of the state of Texas; United States of America, carrying on business as manufacturers at 816 Main street, Fort Worth, Texas, United States of America, and Thomas Butler, a citizen of the United States, manufacturer, residing at Fort Worth, Texas, United States of America. *Improvements in pumps.* (Specification filed 16 May 1907.)

No. 2027 P.—THE fees prescribed in the fourth schedule to the Inventions and Designs Act of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each :—

- No. 111 of 1897.—Donald Black. *An improved swing door hinge to be known as "The improved gravity door hinge."* (From 22 May 1907 to 22 May 1908.)

- No. 382 of 1898.—Thomas Oswald Mein. *Improvements in mechanism for controlling the action of railway waggon and other fall-down doors and flaps.* (From 9 June 1907 to 9 June 1908.)
- No. 203 of 1902.—John King Macdonald. *Improvements in sewing machines.* (From 15 July 1907 to 15 July 1908.)
- No. 114 of 1903.—Bhagwat Prasad. *A perpetual calendar pen and pencil.* (From 26 October 1907 to 26 October 1908.)
- No. 118 of 1903.—Charles Felton Scott. *Improvements in alternating currents for electrical apparatus.* (From 25 June 1907 to 25 June 1908.)
- No. 176 of 1903.—The Brown Hoisting Machinery Company. *Composite piling.* (From 23 October 1907 to 23 October 1908.)
- No. 195 of 1903.—Mather & Platt, Limited. *Improved apparatus for treating fibres, fabrics or the like with bleaching, dyeing or like liquors.* (From 19 June 1907 to 19 June 1908.)
- No. 196 of 1903.—Mather & Platt, Limited. *Apparatus for bleaching, dyeing, washing, and otherwise treating fibres, filaments and woven fabrics by means of circulating liquids.* (From 19 June 1907 to 19 June 1908.)
- No. 153 of 1895.—Charles Henry Palmer, John William Denmead and Joseph Alvirus Baughman. *Improvements in and relating to machines for filling boxes with matches.* (From 31 May 1907 to 31 May 1908.)
- No. 19 of 1900.—Ludwig Weber. *Improvements in roofing tiles.* (From 7 July 1907 to 7 July 1908.)
- No. 431 of 1900.—Marconi's Wireless Telegraph Company, Limited. *Improvements in apparatus for wireless telegraphy.* (From 18 June 1907 to 18 June 1908.)
- No. 175 of 1901.—Joseph Fuhrer. *Improvements in explosives.* (From 22 June 1907 to 22 June 1908.)
- No. 125 of 1902.—John Andrews and Sydney Andrews. *Improvements in conditioning or improving the quality of grain or recently ground flour, semolina or the like.* (From 7 July 1907 to 7 July 1908.)
- No. 260 of 1902.—The Vacuum Cleaner Company, Limited. *Improvements relating to the extraction of dust from carpets and other materials.* (From 12 August 1907 to 12 August 1908.)
- No. 343 of 1902.—Sir Oliver Joseph Lodge, Alexander Muirhead and Edward Ernest Robinson. *Receivers for wireless telegraphy.* (From 27 May 1907 to 27 May 1908.)
- No. 440 of 1902.—Henry Bland. *Improvements in apparatus for elastic fluid compression.* (From 8 June 1907 to 8 June 1908.)
- No. 447 of 1902.—William Chalmers Forbes. *An improved distance and course recorder for ships.* (From 29 May 1907 to 29 May 1908.)
- No. 166 of 1903.—Tore Gustaf Emanuel Lindmark. *Improvements in elastic fluid turbines.* (From 11 August 1907 to 11 August 1908.)

No. 2028 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act of 1888, the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2), of the said Act the exclusive privilege of making, selling, and using the said inventions in British India, and of authorising others so to do, has ceased:—

- No. 436 of 1901.—Vasudev Kasinath Kirloskar. *An apparatus for raising water from wells or riverbeds for irrigation or other purposes called trolley mote.* (Specification filed 19 August 1902.)
- No. 20 of 1902.—William Martin Glynn. *A new or improved process for equalising tea leaf and apparatus therefor.* (Specification filed 24 February 1903.)
- No. 228 of 1902.—Francis Gascoigne Lynde. *An improved wheel.* (Specification filed 18 February 1903.)
- No. 295 of 1902.—Lieutenant James Walker. *An automatic flood gate.* (Specification filed 23 February 1903.)
- No. 327 of 1902.—Robert Cooke Sayer. *Improvements in the construction of shapes, moulds, or vessels for taking fluids, fluid pressures, or other strains.* (Specification filed 18 February 1903.)

No. 345 of 1902.—Charles Alister Trotter. *Improved appliances for ascertaining distances and calculating altitudes, the same being specially applicable in range-finding for rifles.* (Specification filed 18 February 1903.)

No. 364 of 1902.—William Algernon Ede-Clendinnen. *Improved nicotine trap and smoke cooling appliance for tobacco pipes and cigar holders.* (Specification filed 18 February 1903.)

No. 510 of 1902.—Paul Lucas and Allgemeine Beleuchtungs and Heizindustrie Aktien-gesellschaft. *Improvements in incandescent petroleum burners.* (Specification filed 19 February 1903.)

No. 3 of 1903.—William Henry Gaze. *Improvements in illuminating gas.* (Specification filed 18 February 1903.)

Fee in respect of the continuance of an exclusive privilege—

4 (a) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of Rs 50 for each of the above inventions.

No. 130 of 1901.—William Leonard. *Opening or closing simultaneously by one action all the doors or openings giving access into or exit from a range of cubicles, cells or other separate compartments of a building in a line or circular curve and which permits also of any separate and individual door or opening in the range being opened or closed without opening or closing the remainder.* (Specification filed 22 February 1902.)

Fee in respect of the continuance of an exclusive privilege—

4 (b) After the expiration of the fourth year and before the expiration of the fifth year from the date of the filing of the specification—

The sum of Rs 50 for the above invention.

No. 7 of 1901.—Charles Scott Snell. *Improvements in apparatus for compressing gas, air, or the like.* (Specification filed 19 February 1901.)

Fee in respect of the continuance of an exclusive privilege—

4 (c) After the expiration of the fifth year and before the expiration of the sixth year from the date of the filing of the specification—

The sum of Rs 50 for the above invention.

No. 478 of 1899.—Benjamin Garver Lamme. *Improvements in systems of electrical distribution.* (Specification filed 23 February 1900.)

Fee in respect of the continuance of an exclusive privilege—

4 (d) After the expiration of the sixth year and before the expiration of the seventh year from the date of the filing of the specification—

The sum of Rs 50 for the above invention.

NOTICES.

All communications relating to applications for leave to file specifications and for registration of designs under the Inventions and Designs Act, 1888 (V of 1888), or in continuation of such applications, should be addressed to the Patents Secretary, 2, Bankshall Street, Calcutta.

The Office of the Secretary under the Inventions and Designs Act, 1888, will in future be open for the transaction of business from 11 A.M. to 3 P.M. on all days, except Sundays and gazetted holidays.

The Government of India are advised that, as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash and applicants are warned that they must be responsible for any delay in cashing cheques.

Cheques and money orders will only be accepted if made payable *at Calcutta* to the Secretary under the Inventions and Designs Act.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's Office are now on sale to the public at one anna and eight annas a copy, respectively. Consolidated indexes for 1905 and for 1906, entitled "Inventions and Designs," are also on sale, price one rupee each. They contain a chronological list, subject-matter and name indexes of exclusive privileges for inventions, which have been obtained or applied for in the year, together with lists of designs applications.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitors' room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified: or, if the 10th day is a holiday, till the evening of the office day next following.

At the time of delivering or sending an application for leave to file a specification, the applicant shall cause a duplicate copy of the application to be delivered or sent therewith to the Secretary.

The Inventions and Designs Act (V of 1888), with the notifications and rules issued under its provisions and the notices of the office of Inventions and Designs, to which is added an explanatory memorandum for the guidance of persons applying for protection of Inventions and Designs. Royal 8vo volumes, paper cover, 13 annas or 1s. 1d. Postage extra. To be had of the Superintendent, Government Printing, 8, Hastings Street, Calcutta, or of the Superintendent, Patents Branch, Department of Commerce and Industry, 2, Bankshall Street, Calcutta.

H. G. GRAVES,
Secretary under the Inventions
and Designs Act, V of 1888.

C. STEWART-WILSON,
Director-General of the Post Office of India

REVENUE AND FINANCIAL SECRETARY TO THE CHIEF COMMISSIONER, NORTH-WEST FRONTIER PROVINCE.

NOTIFICATION.

Peshawar, the 24th May 1907.

No. 2622.—In exercise of the powers conferred by Sections 5 and 5A of the Scheduled Districts Act, 1874 (XIV of 1874), and with the previous sanction of the Governor General in Council, the Chief Commissioner of the North-West Frontier Province is pleased to extend the Punjab Act No. I of 1905 to the Districts of the North-West Frontier Province subject to the following modification, namely :—

- (1) All references to the Local Government shall be construed as referring to the Chief Commissioner of the North-West Frontier Province.

The 24th May 1907.

No. 2677.—Whereas it appears to the Chief Commissioner that the existing records of rights in the Canals in the Bannu District require special revision, the Chief Commissioner, in exercise of the powers conferred upon him by Section 28 of the Punjab Minor Canals Act, III of 1905, as extended to the North-West Frontier Province by Chief Commissioner's Notification No. 780, dated 19th February 1907, hereby directs that the records of rights of the canals in the Bannu district shall be specially revised.

No. 2678.—In exercise of the powers conferred upon him by Section 35 of the Punjab Minor Canals Act, III of 1905, as extended to North-West Frontier Province by his Notification No. 780, dated 19th February 1907, the Chief Commissioner hereby declares that all the provisions of Section 28 (as to the preparation and revisions of records) of the said Act will apply to all canals under Schedule II in the Bannu District.

E. INGLIS,

Offg. Revenue and Financial Secretary to the Chief Commissioner, N.-W. Frontier Province.

Gandhi has been temporarily entertained for one year on Rs100 per mensem plus plague allowance at Rs2 per diem for employment on plague duty in the North-West Frontier Province and was placed on plague duty in the Peshawar District on the forenoon of the 21st May 1907.

A. M. CROFTS, Lieut.-Col., I.M.S.,

Administrative Medical Officer, N.-W. F. Province.

NORTH-WEST FRONTIER PROVINCE—PUBLIC WORKS DEPARTMENT.

NOTIFICATION.

Peshawar, the 23rd May 1907.

No. 169.—Whereas it appears to the Honourable the Agent to the Governor General and Chief Commissioner, North-West Frontier Province, that land is required by Government for a public purpose, namely, for the Police Lock-up at Saggu on the North-West Frontier Road from Dera to Pezu.

It is hereby declared that the undermentioned land is required for the said purpose :—

Specification of land.

| District. | Pargana. | Mauza. | Area in acres. | Direction. | Boundaries | Place where the plans may be inspected. |
|-----------|-------------------|--------|----------------|--|---|---|
| Derajat | Dera Ismail Khan. | Saggu | 0.15 | East of North-West Frontier Road Dera to Pezu. | <p><i>North</i>—Land of Malik Nur Hasam.</p> <p><i>South</i>—Land of Malik Nur Hasam.</p> <p><i>East</i>—Land of Malik Nur Hasam.</p> <p><i>West</i>—Land of Malik Nur Hasam.</p> | Assistant C. R. E.'s office, Derajat District M. W. S., Dera Ismail Khan. |

This declaration is made under the provision of Section 6, Act I of 1894, and under Section 7 of the said Act the Deputy Commissioner, Dera Ismail Khan, is hereby directed to take order for the acquisition of the land specified above.

J. W. D. DUNDEE, Lieut.-Colonel,

Offg. Secretary to the Honourable the Agent to the Governor General and Chief Commissioner, North-West Frontier Province, Public Works Department.

REVENUE COMMISSIONER'S OFFICE—NORTH-WEST FRONTIER PROVINCE.

NOTIFICATION.

Peshawar, the 27th May 1907.

No. 2681.—The Court of Wards for the North-West Frontier Province having in exercise of the powers conferred by Section 6 of Punjab Act II of 1903 as read with Regulation No. V of 1904, made an order assuming the superintendence of the person and property of Fateh Mohamed Khan, son of Mir Hassan Khan of Tangi in the Peshawar district of the North-West Frontier Province, the said Fateh Mohamed Khan being a landholder and minor within the meaning and for the purposes of the said Punjab Act II of 1903, it is hereby notified under section 9 of the said Act that the Court of Wards, with effect from the date of issue of this notification, assumes superintendence of the person and property of the said minor.

The said Court further specifies the Peshawar district as the district, the Deputy Commissioner of which is hereby put in charge on behalf of the said Court from the date above mentioned.

E. INGLIS,

Offg. Revenue Commissioner, North-West Frontier Province.

NORTH-WEST FRONTIER PROVINCE—MEDICAL DEPARTMENT.

Office of the Inspector of Schools, Dacca Range.

NOTIFICATION.

Dacca, the 22nd July 1943.

Rules for the Admission of Private Candidates to the Test Examination to be held for the Matriculation Examination of the Calcutta University for 1944.

Students, who are residents of the Dacca and Mymensingh districts and who have not attended any school, recognised or unrecognised, for at least one year previous to the date of the Matriculation Examination of the Calcutta University at which they intend to appear, will be regarded as Private Candidates and will ordinarily be eligible for admission to the Test Examination which will be held on Monday, 13th December 1943.

Female students satisfying the above conditions are not required to undergo any Test Examination. They may apply to the Registrar, Calcutta University, for necessary instructions.

Ordinarily, students who had discontinued their studies while reading in a school, will have to wait till the usual time when, if they had continued their studies in the recognised schools, for completing the Matriculation course, to take up the Test Examination.

2. Teachers of recognised schools or madrasahs intending to appear at the Matriculation Examination of 1944 as Private Candidates are not required to appear at the Test Examination. They may apply to the Registrar, Calcutta University, through the Secretaries of their respective institutions for necessary instruction.

3. Private Candidates hailing from outside the territorial limits of the Calcutta University may also be admitted to the Test Examination of this Division on production, in original, of the orders of the Syndicate of the Calcutta University permitting them to appear at the Matriculation Examination.

4. Test Examination of Private Candidates will be held in each of the Government High English Schools situated at the district or subdivisional headquarter towns of this Division as shown below:—

- (1) Dacca Collegiate School.
- (2) Jamalpur Government High English School.
- (3) Mymensingh Zilla School.

5. Candidates shall be examined in the following subjects:—

- (a) Major vernacular language, viz., Bengali—Two-half papers.
- (b) English—Two papers.
- (c) Geography—Half paper.
- (d) History of India and History of England—Half paper.
- (e) Mathematics—One paper.
- (f) A Classical language (viz., Sanskrit, Arabic and Persian)—One paper.

6. Application for admission to the Test Examination should be written neatly and legibly in the attached form (Appendix A) containing the following particulars:—

- (i) Full name of the candidate.
- (ii) Full name of his father or guardian with address.
- (iii) Home address of the candidate in full—
 - (a) Name of village.
 - (b) Post Office.
 - (c) Police-station.
 - (d) District.
- (iv) Present address in full.
- (v) Name of subject in terms of paragraph 5 (including the name of the major vernacular language).
- (vi) Name of the Classical language in terms of paragraph 5 (f).
- (vii) Name of the Government school where he desires to appear at the Test Examination (*vide* rule 4).

(viii) Name of the centre where he desires to appear at the Matriculation Examination of 1944.

7. The following documents must be submitted along with their applications for permission:—

(i) In case of candidates who appeared at the Matriculation previously—Admission Card, in original, granted by the Controller of Examinations or in case of its loss, a duplicate copy of it.

(ii) In case of candidates who appeared previously at the Test Examination conducted by this office—The Admit Card, in original, issued by this office.

(iii) In case of candidates who read in schools but discontinued their studies—The Transfer Certificate issued by the Head Master of the recognised school where the candidates last read.

(iv) In case of candidates who never read in any school—

(a) An affidavit sworn by the father of the candidate (or by the guardian in case the father is not alive) before a competent court to the effect that the candidate never read in any school in his life and that his age on the 1st March next will be year and months.

(b) A certificate from a responsible Government officer to the effect that—

“The candidate has prosecuted a regular course of study and has been subject to proper discipline and that he has not been attached to any school for at least one year or since the last Matriculation Examination held in March 1943”.

The certificate should also state about the character and conduct of the boy. The gentleman furnishing such certificate should state his social and professional status.

8. Each candidate will have to pay Rs. 5 only along with his application for permission to appear at the Test Examination of Private Candidates. The fee should be remitted so as to reach this office on or before the 15th November 1943, at the latest. No application nor fees for the examination will be accepted in this office after the above date.

Where possible, candidates should deposit their fees in the local Government Treasury under the head “XXVI—Education (General)—Miscellaneous—Examination Charges” and submit to this office within the prescribed date a duplicate Treasury chalan along with their applications.

Fees once deposited will under no circumstances be refunded.

All applications received in this office in incomplete form or applications submitted without the remittance of examination fees will be rejected without any reference.

9. No Private Candidate will be admitted to the Test Examination unless he is duly identified beforehand to the satisfaction of the Head Master of the school where he is to appear at the Test Examination.

10. Students who do not belong to this Division should furnish a certificate from a respectable gentleman of the locality to the effect that they are residing in this Division for at least one year prior to the date of the Matriculation Examination. Gentlemen furnishing such certificates should state their social or professional status.

11. The results of the Test Examinations will be published on the Notice Board of this office as well as on those of the schools where the candidates will appear for the Test Examination.

12. The fees of the Final Examination must be deposited with the Head Master of the school where the candidates appear at the Test Examination with the cost of remittance to the University.

Intermediate and B.A. Examinations, 1944.

Bona fide teachers of recognised English schools and inspecting officers of the Education Department, who have been employed as such for at least three academical years (32 calendar months) preceding the dates of examinations, will be admitted

FREDERICK NOËL-PATON

Director-General of Commercial Intelligence

B. ROBERTSON

Offy. Secretary to the Government of India

Calcutta, May 31, 1907

COMMERCIAL INTELLIGENCE DEPARTMENT, INDIA.

Calcutta, May 30, 1907.

Final General Memorandum on the Wheat crop of the season 1906-07.

The provinces to which this memorandum relates commonly contain 99·7 % of the reported area under wheat in India.

The net effect of the reports is disappointing. At the end of February when the previous reports were rendered, everything indicated a good yield over an area substantially increased, although rust was already reported from certain quarters. Dull weather has rendered this bane very serious over wide extents of country, and while the total area under wheat at 29,444,200 acres shows an advance of 3,148,400 acres or 12 per cent. on the figure for 1905-06, it is estimated that the total outturn will not exceed 8,508,040 tons which is short of the previous year's figure by 70,500 tons or 0·8 per cent. This outturn is, however, 10·9 per cent. greater than the average for the five years ending 1904-05.

The area under wheat in British India is 24,268,200 acres which exceeds that for the previous year by 1,792,600 acres or 7·9 per cent. but the outturn is computed at 7,459,500 tons which is less by 341,500 tons or 4·4 per cent. than in 1905-06.

The reports from the Native States appear to be more favourable and consistent for while the area increased by 1,355,800 acres or 35·5 per cent. to a total of 5,176,000 acres, the outturn is believed to have risen by 34·9 per cent. or 271,000 tons to 1,048,540 tons.

The following is a summary of the provincial reports. The figures in brackets following the name of each province indicate what percentage of the total area under wheat in India is ordinarily cultivated in that province; the ratio of irrigated to total wheat acreage in the province is also stated.

Panjab (29·3% ; ratio of irrigated to total wheat acreage=51%).—The total area sown is reported to be 9,037,800 acres (4,399,600 irrigated) as compared with 8,572,100 acres (4,615,400 irrigated) last year—an increase of 5·4 per cent. The early promise of the crop was excellent; but this has been marred by various calamities. Rain was excessive in a number of districts during March and April. This in conjunction with prolonged spells of cloudy weather has developed rust in Rohtak, Sialkot, Gujranwala and elsewhere. Local hailstorms have done damage in Gurgaon, Mianwali and Montgomery; while Lahore and Gurgaon have also suffered from hot winds prevailing locally in the early days of April. The total outturn is estimated at 3,282,900 tons as against 3,510,300 tons last year—a decrease of 6·5 per cent. It is a question whether realisation will equal even this estimate having regard to the widespread and disastrous visitation of plague and its effect upon the labour supply. The grain in some districts is reported to be shrivelled and discoloured; but the districts furthest to the north describe the crop as excellent.

North-West Frontier Province (3·5% ; ratio of irrigated to total wheat acreage = 27·3 per cent.).—The total area is reported to be 1,146,400 acres as compared with 1,024,600 acres last year—an increase of 12 per cent. On the whole, the crop of the year is above the average both in area and in outturn, although hailstorms and locusts did some slight damage in several districts. The total outturn is estimated to be 305,200 tons compared with 279,700 tons last year—an increase of 9·6 per cent.

United Provinces (27·9% ; ratio of irrigated to total wheat acreage=50·9 per cent.) The total area sown amounts to 7,039,100 acres compared with 6,478,900 acres last year, this representing an increase of 8·6 per cent. The crop was exceedingly promising until February, but the rest of the season was very unfavourable. The months of February and March were unusually wet. Continued cloudy weather and rain favoured the spread of rust which has damaged the crop very seriously. Hailstorms were also frequent during February and March, but the loss from this cause was confined to a few localities. The total outturn is estimated at 2,164,500 tons as against 2,428,700 tons last year—a decrease of 11 per cent. The quality of grain is generally reported to be bad.

Bengal (5% ; ratio of irrigated to total wheat acreage 2·4 per cent.).—The total area sown is reported to be 1,402,600 acres compared with 1,248,300 acres last year—an increase of 12·3 per cent. The season on the whole has been an unfavourable one, the crop having suffered through cloudy weather, rain and hail in February and March. The total yield is estimated at 388,700 tons as against 396,600 tons last year—a decrease of 2 per cent.

Eastern Bengal (0·7%) reports 158,700 acres compared with 159,800 acres last year—a decrease of 0·7 per cent. The yield is estimated at 44,000 tons compared with 50,000 tons last year, which represents a decrease of 12 per cent.

Central Provinces and Berar (11·4% ; ratio of irrigated to total wheat acreage = 0·8 per cent.). The total area sown is reported to be 3,689,800 acres (3,272,300 in the Central Provinces and 417,500 in Berar) as compared with 3,443,800 acres (2,019,500 in the Central Provinces and 424,300 in Berar) for last year : this represents an increase of 7 per cent. The season on the whole has been a favourable one; cloudy weather accompanied by rain during February and towards the end of March caused rust in several districts, but the disease was severe only in parts of the northern districts. The total yield is estimated to be 904,700 tons (834,300 in the Central Provinces and 70,400 in Berar) as against 834,400 tons (773,700 in the Central Provinces and 60,700 in Berar) for last year—an increase of 8·4 per cent.

Bombay (7·2% ; ratio of irrigated to total wheat acreage = 11·8 per cent.).—The British districts report 1,211,000 acres compared with 963,000 acres—an increase of 25·8 per cent. The Native States (including Baroda) report 385,200 acres against 381,200 acres last year. Of the total area sown, 278,000 acres, or 12·5 per cent were helped by irrigation. In Gujarat the crop fared well at first, but cloudy weather and rain in February induced rust in places. In the Deccan the crop suffered through want of moisture in the soil and deficient water-supply in the eastern tracts. In some other parts of the Deccan cloudy weather and rain induced rust. Adverse winds and insufficiency of dew have also been reported from places. In the Karnatak the December rain proved injurious to the crop and caused rust in several places. The total yield is estimated to be 328,200 tons (205,800 in British districts and 122,400 in Native States) as compared with 275,100 tons (121,100 in British districts and 154,000 in Native States) for last year—an increase of 19 per cent. No importance should however be attached to this comparison, as the crop of last year failed over extensive tracts. The total yield of the present crop falls short of the average of the previous five years by 15 per cent.

Sind (1·9% , ratio of irrigated to total wheat acreage = 86 per cent.)—The total area is reported to be 623,500 acres (40,800 in Native States) compared with 628,100 acres (43,000 in Native States) last year—a decrease of 0·7 per cent. The crop suffered in places from rain and hailstorm which diminished the outturn to 10 per cent below last year—176,600 tons against 196,300 tons of the previous year.

Hyderabad (3·2%) reports 1,039,500 acres compared with 934,500 acres last year—an increase of 11 per cent. The crop is reported to be in good condition. The total yield is estimated at 58,000 tons as against 41,800 tons of last year—an increase of about 39 per cent., but last year's crop was almost a complete failure in the most important districts. Compared with the average of the preceding five years the yield of the present crop falls short by 1·7 per cent.

Rajputana (3·3%) and Central India (6·3%)—Rajputana reports 810,000 acres and 215,000 tons as compared with 604,000 acres and 145,000 tons last year, or an increase of 34 per cent in area and 48 per cent in yield. Central India reports 2,895,900 acres and 639,800 tons as against 1,852,100 acres and 420,600 tons, that is an increase of 56 per cent. in area and 52 per cent. in yield.

Mysore (0·02%) reports 4,600 acres and 440 tons compared with 2,400 acres and 140 tons last year.

Exports and Prices.—The exports of wheat from India to foreign countries by sea during the last five years have been —

| | Tons. | | | | | | |
|---------|-------|---|---|---|---|---|-----------|
| 1902-03 | . | . | . | . | . | . | 514,607 |
| 1903-04 | . | . | . | . | . | . | 1,205,566 |

(b) Defective.

REPORT OF THE TEXTILE FACTORIES LABOUR COMMITTEE

appointed to enquire into the conditions of Factory Labour in India by the Government of India on the recommendation of the Secretary of State for India under Resolution No. 9974-9993-13, Department of Commerce and Industry, "Factories," dated Calcutta, the 17th December 1906.

The Resolution reads as follows:—

"Acting on a suggestion made by His Majesty's Secretary of State for India, the Government of India have decided to appoint a small Committee to enquire into the conditions of factory labour in textile factories in this country. The investigation will be directed, in the first instance, towards ascertaining the actual conditions prevailing in India, and the observations of the Committee in this respect will supplement the reports recently received from Local Governments on the subject.

"2. The enquiries to be made by the Committee will be directed more particularly towards the settlement of the questions set forth in paragraph 3 below; but they may also put forward recommendations for the amendment of the existing law or practice, if they are of opinion that the present hours of work of operatives are excessive, that the conditions of factory labour are otherwise injurious or oppressive, or that abuses exist in connection with the employment of children or young persons. The Government of India desire that it should be clearly understood that the enquiry now to be held is preliminary only. Should the investigations of the Committee establish the existence of abuses which require to be remedied, a representative Commission will be appointed to consider the whole subject comprehensively before any radical changes in the present factory law are made.

"3. Subject to the provisions of paragraph 2 above, the specific points referred to the Committee are as follows:—

- (1) Whether the working hours of adult males should be limited, and whether the physique of operatives is affected by long hours.
- (2) Whether before children are allowed to work in factories certificates of age and fitness should be required.
- (3) Whether the minimum age of children should be raised beyond nine.
- (4) Whether, as the result of employment as adults of persons between the ages of twelve and fourteen, there has been physical deterioration requiring the creation by law of a special class of workers known as young persons.
- (5) Whether a separate staff of Medical Factory Inspectors should be entertained.

"4. The Committee will consist of:—

| | |
|---|------------|
| Commander Sir H. P. FREER-SMITH, R.N., late Superintending Inspector for Dangerous Trades in England. | President. |
| Lieutenant-Colonel J. F. MACLAREN, M.B., I.M.S., Civil Surgeon, Allahabad. | } Members. |
| Dr. J. A. TURNER, M.B., D.P.H., Health Officer, Bombay Municipality. | |

The Committee will assemble at Bombay on the 21st December, and it is anticipated that their report will be submitted to the Government of India in the beginning of April."

Supplementary to this Resolution it was suggested by the President of the Committee to the Government of India that the enquiry should be extended so

as to include the fencing of dangerous machinery and in answer to that suggestion the following reply was received :—

“With reference to the Resolution issued by this Department, No. 9974-9993-13, dated 17th December 1906, on the subject of the Factory Labour Committee, I am desirous to explain that, although the question of the fencing of dangerous machinery has not been expressly mentioned in the Resolution as one of the points requiring investigation it has been settled, in the telegraphic communication with the Secretary of State for India, that this matter will not be excluded from the scope of the Committee's enquiries.”

General Remarks.

In the agreement entered into between the President and the Secretary of State for India it was stated that “he should proceed to India and report on the hours of work and conditions of labour in Indian Factories and such other matters connected therewith as the Government of India might direct;” his duties were not originally confined to Textile Factories, but it was subsequently decided that the scope of the enquiry should extend to Textile Factories only. The Indian Factories Act does not discriminate between Textile and non-Textile Factories, but a proposal made to the Government that the definition in the English Factory Act should serve as a guide was approved.

In a despatch addressed by Lord Cross to the Government of India, dated 15th May 1890, it was pointed out that in regard to any additional factory legislation in India, due regard must be had to the circumstances of the country which are in many respects different from those of any European nation. The difficulties appreciated then apply with equal force now, the constitution and habits of the Indian worker being entirely different to those of the European. On the other hand during the many years that have elapsed experience has been gained, the Indian workers are becoming more accustomed to mill life, and it is believed that, without imposing any restrictions that will be unduly felt, amendments might be introduced into the Factories Act which would secure uniformity in regard to administration in the various works throughout the country and add materially not only to the health and comfort of the workers, but also to others engaged and interested in textile trades in India.

It has been suggested in estimating the amount of work done by mill workers in India that comparison to be of any value should not be confined to the periods of employment worked by Europeans in their own country, but should extend as far as possible to other Eastern nations.

Unfortunately reliable statistics are difficult to obtain, but quotations from the few who have written on the subject will be referred to hereafter, and individual evidence given by mill managers with experience in China, and elsewhere will be quoted.

It was felt by the Committee that however efficient might be the administration or however well considered the laws relating to Factories, no real or permanent good would follow unless in many instances serious attention is paid to the homes and surroundings of the mill hands. Large numbers of workers from country districts are imported into manufacturing centres rendering the housing question extremely difficult for municipal and other authorities. It was thought that the homes of the workers should be visited and inspected, and this was rendered possible owing to the intimate local knowledge of, and the facilities placed at the disposal of the Committee by, one of the members.

Accompanied by Rao Bahadur Vithalrao Krishnaji Vandekar, President of the Committee, (who submitted to Lord Curzon a memorial from the mill hands of Bombay, see proceedings of the Department of Commerce and Industry, “Factories,” April 1906) and others, visits were made to “challs” occupied by workers in the vicinity of mills in the Parel District, Bombay.

The conditions can only be described as deplorable. After making allowance for the very limited space which will satisfy Indian workers and their families, the houses were distinctly overcrowded, dark, damp and ill ventilated. Admission of fresh air seemed a practical impossibility, for the dwellings were surrounded by narrow gullies for carrying off waste water and sullage. The offensive vapour from these gullies permeating the whole of the surrounding atmosphere.

The method of disposal of the excreta is the basket hand removal system so common to many parts of Bombay.

It is perfectly evident that these baskets are saturated with highly offensive excreta and this in conjunction with insanitary conditions mentioned must tend to lower the individual vitality of the worker. It was no astonishment for the Committee to see the mark fixed by the Health Department on a large proportion of the dwellings, showing that cases of cholera had occurred in them. Although not identical in all respects similar conditions were observed in other large manufacturing centres visited by the Committee. In many country districts where space, and land of less value is available, sanitary conditions are defective, but there is abundance of open area and fresh air to counteract in some measure any insanitary defects.

It must not be inferred that the sad conditions described are universally found. The Committee desire with much satisfaction to point out what has been done and what can be done by individual effort and the measures taken or contemplated by public bodies.

In Bombay we learn that the Bombay Improvement Trust and the mill owners are carrying out schemes for the improvement of congested areas and provision of better dwellings for the working classes throughout the city.

It is realized by the Committee that the health and happiness not only of the vast number of the workers of Bombay but also of their children is so largely dependent upon the early execution of real and practicable schemes that they express a sincere desire that as little delay as possible may occur in giving effect to proposals now in contemplation.

Referring to individual efforts in various parts of India, arrangements not only for housing the workers but for in every way adding to their comfort were explained to and witnessed by the Committee. In many of the places referred to model villages are found in which all that can be conceived to secure health and comfort has been provided by owners of works at their own cost, the workers only paying a nominal rental. Detail in the body of this report would occupy too much space.

Summary of work done by the Committee.

The Committee assembled at Bombay on the 21st of December 1906 when the President reported himself to the Secretary to Government and subsequently with the other members looked over numerous papers bearing on the work to be undertaken.

From the 21st December 1906 to 20th January 1907 with the exception of 6 days spent in Ahmedabad, the members were actively engaged in visiting works in Bombay, in collecting information of a general character and in taking evidence. On 7th January a formal meeting was held when an interview took place with the members of the Chamber of Commerce and the members of the Mill Owners' Association. It was then suggested that evidence of representative witnesses should be taken at a later date and points for consideration were submitted to them by the Committee. In Ahmedabad a large proportion of the mills were visited, evidence taken from the local Magistrate, the Official Inspector, Owners, Managers and groups of mill hands.

On the 20th January the Committee left Bombay for Calcutta arriving on the 22nd. Until 3rd February the time of the members was employed in conferences with mill owners, visiting works and in taking official and representative evidence.

On the 3rd February they proceeded to Madras arriving on the 5th and remaining till the 10th. Here all the mills in the city were visited and as elsewhere, officials, mill owners, managers and operatives were examined.

Returning to Calcutta on the 12th February more mills were inspected, the evidence of Civil Surgeons and Medical Inspectors taken, also that of the representative members of the Bengal Chamber of Commerce and the Jute Mills Association.

Leaving Calcutta on the 16th the Committee arrived at Delhi on the 18th, remaining till the 21st, then to Agra where 3 days were spent, then to Cawnpore arriving on the 24th where they remained for 4 days. At Delhi, Agra and Cawnpore all mills were inspected and as in other places the evidence of operatives, mill owners, managers and workers taken. At Cawnpore the Committee had a special meeting with the Upper India Chamber of Commerce when formal evidence was taken.

The Committee then travelled to Nagpur arriving there on the 1st March. In Nagpur all the Cotton Mills and Ginning Mills were visited, the usual evidence was taken and in addition an exhaustive written statement, very carefully prepared, was handed in by Mr. Beoman Dadabhoi, the experienced Manager of the Empress Mills.

On March the 3rd the Committee left Nagpur arriving in Bombay on the morning of March the 4th. Several days were spent in taking formal and detailed evidence from witnesses suggested by the Bombay Mill Owners' Association. The time of the Committee otherwise was devoted to collecting general information to drawing up report and to conferences, seeing witnesses and special enquiries at works.

It was clearly understood from the beginning that the evidence taken would not be published. Reports, however, of all evidence taken have been printed and forwarded to the Government of India.

A list of witnesses appears in Appendix E.

The works visited by the Committee are mentioned in Appendix D.

Administration

The question of efficient administration is one calling for serious consideration. Laws especially those relating to labour may if inefficiently administered do little good indeed, in many instances may do harm. Employers of labour are apt to consider that where there is State intervention they are relieved of their responsibility and that it is the duty of officials to see the law carried out.

In the first instance the Committee would say with the greatest confidence that no legislation with regard to the questions under consideration will fulfil the end in view if such legislation is of a permissive character.

Certain clauses in the Indian Factories Act on which depends the whole system of child labour in India are stated by the officials administering the Factory Laws to be of a permissive character.

The intention of Government can hardly be questioned; it was intended that children should not be employed in mills under the age of 9 years, that they should not work on full time, or otherwise as adults until the full age of 14 years was reached, and that efficient measures should have been taken by the management to fulfil these requirements.

The different methods and the different forms vary in the different parts of India. To this reference will be made hereafter. The following remarks which will illustrate the points for consideration relate to Bombay.

Rule 19 lays down that the occupier of every Factory should keep in form A a register of children; as a matter of fact this register is generally kept, but is used for a purpose other than was intended.

The certifying Surgeons in Bombay bracket together a large number of children place their initials against these groups, stating against each name simply whether the child is over 9 years or under 14 years.

By the rules and orders No. 21 issued by the Government of Bombay every occupier is required to keep a register in a bound book, each page to be numbered and to contain certain particulars. On this form there are

concise and elaborate details relating to the children, there are columns to be signed by the certifying Surgeons, there are detailed instructions in regard to the certificates and what is to be done with them. Excepting at Ahmedabad and one Factory in Bombay these instructions have not been observed and might for all practical purposes have never been issued.

The Committee have borne in mind that although their reference has been confined to Textile Factories, there are large numbers of other industries employing women and children. The report of the Collector of Bombay shows that in the year 1901 there were in the Bombay Presidency 75 separate industries using steam power and within the scope of the Act. The numbers are likely to increase and in considering any system which may be drawn up with a view to securing uniformity of administration and efficient inspection it has been necessary to look ahead.

In the opinion of the Committee the administration at present in force leaves much room for improvement. Laws that are good for a Cotton Mill, a Flour Mill, an Iron Foundry, Engineering or other works, if good for Bombay or Calcutta, are equally good and equally called for, for similar works all over India, but as a matter of fact the rules made by different Governments differ in important details.

Inspection.

The System of Inspection also differs. For instance in Bombay City - Bombay being the most important manufacturing centre in India—the office of the Chief Inspector of Factories is held by the Assistant Collector. We find in the report of the working of the Indian Factories Act for the year 1905 that the post of Chief Inspector was held by six separate gentlemen. Each of these also held the office of Assistant Collector and was subject to the control of the Collector of Bombay. There is a 1st Inspector of Factories appointed by the Local Government, an Uncovenanted Civil Servant, who has not passed any special, technical or other examination and whose time is largely taken up by other duties (excise, &c.).

There is a Joint Medical Inspector Personal Assistant to the Surgeon General, and there are 3 Presidency Surgeons ex-officio Certifying Factory Surgeons. In the Presidency, Inspections are carried out by the Collector and District Magistrate assisted by the Assistant or Deputy Collector and the Special Presidency Inspector, an Uncovenanted Civil Servant.

In Calcutta the Special Inspector of Factories reports to the Commissioner of Police and appears to be directly subordinate to him. In Madras both the Special and the Medical Inspectors report to the Sanitary Engineer to Government, while outside the Presidency town the work of inspection falls to various officials including Civil Servants, both European and Indian. In the Punjab the inspection is done by the Deputy Commissioner or by some one deputed by him. In the United Provinces inspections are carried on by Civil Surgeons, District Officers and by the Special Inspector of Factories from Calcutta. In the Central Provinces such work is done by Deputy Commissioners, Civil Surgeons and the Special Inspector of Factories of the Bombay Presidency.

Bearing in mind the ever growing importance of Factory legislation in India due to the rapid growth of industrial occupations and the absolute necessity for uniformity in Administration, the Committee would submit that the working of the Factories Act should be primarily under one official under the Department of Commerce and Industry, that for purposes of inspection, carefully considered districts should be placed in charge of competent inspectors recruited perhaps from the ranks of English Factory Inspectors with a thorough knowledge of the many and varied duties to be performed by an official exercising supervision over a large number of separate and distinct industries, or failing this, applicants for Factory Inspectorships, if entertained in India, should be required to pass a strict qualifying examination, and in order to obtain a general knowledge of their duties they should be sent to work for a given period under an experienced Inspector in some large industrial centre in Great Britain.

The point referred to the Committee as to whether a separate staff of Medical Inspectors should be appointed has been very carefully considered. Or the desirability of making such appointments the members of the Committee are quite agreed.

Whether a separate staff of Medical Inspectors should be appointed.

They are of opinion that a number of Medical Officers should be assigned to separate areas, these to depend on the number of works and the facilities for reaching them and that their whole time should be devoted to the work of Factory Inspection.

They are of opinion that, subject to the Department of Commerce and Industry on all medical questions they should be the supreme authority. The Committee would not advise that the Special Factory Inspectors be relieved from duties relating to Sanitary matters but on these points should take their instructions from the Medical Inspectors and refer to them on all doubtful points.

Suggested duties for Medical Inspectors.

Some of the duties to be assigned to the Medical Inspectors may be enumerated as follows, attention to—

- (1) Water-supply.
- (2) Ventilation including the carrying off of dust and noxious fumes. When mechanical appliances are required arrangements should be made in conjunction with the Special Inspectors.
- (3) The purity of air and amount of Humidity
- (4) Temperature.
- (5) Cubic space.
- (6) Cleanliness and Lime-washing.
- (7) The Drainage of Floors
- (8) Sanitary Accommodation.
- (9) Investigation and reports on accidents in conjunction with Special Factory Inspectors.
- (10) Diseases of occupation such as Anthrax, Lead - Arsenic and Phosphorus poisoning—Disease of Respiratory Organs, &c., and also
- (11) To satisfy themselves that women and children are physically fit for the work they are called upon to perform.

In making the above recommendations the Committee have not forgotten that many of the duties now suggested are already performed by Civil Surgeons holding the office of Medical Inspectors. They are however satisfied that owing to the many and important duties that Civil Surgeons are called upon to perform they cannot devote the time required for the efficient Medical Inspection of Factories. In many cases the Civil Surgeon is necessarily the Medical attendant to the Mill and in all probability his wishes would be best consulted were he relieved from making official inspections in places where owners, managers and workers are under his medical care.

The Committee wish to make it clear that in their opinion the work of Medical Inspection should be performed by specially appointed Medical Officers, who should devote their whole time to the work and that this work should be confined solely to them except the duties now performed by Certifying Factory Surgeons.

In submitting the above proposals the Committee remember that Executive officers are responsible for the administration of laws and should control the officials under the different Governments appointed to administer these laws. It might be desirable that the Medical Inspectors should be immediately subordinate to the Local Government, but exercising supreme control over all other Inspectors. The Medical Inspector for Bengal might also act as Technical Adviser to the Department of Commerce and Industry. If, however, the Medical Inspectors are called upon to perform these duties and advise generally on technical matters in Factories, it is suggested that prior to appointment they should be given opportunities for technical study in works in Great Britain and perhaps on the Continent.

The Committee however desire to point out that the Supreme Government (the Department of Commerce and Industry) should at all times be able to command the opinion of an expert, skilled in Factory law and Factory administration and that they should not have to depend on the advice of officials however capable in other matters but who from time to time are removable and have many and other responsible duties to perform.

Certificates of Age and Physical Fitness.

I.—Age.—In the opinion of the Committee the present law relating to certificates of age calls for drastic and immediate reform. The intention of the Factory Act is to protect children from over-work, and further that children should not be classed and worked as adults before they have attained the prescribed age of 14 years laid down by law.

The procuring of these certificates is apparently, as the law stands, purely permissive. In some works they are procured, in others they are not. Some occupiers profess to obtain age certificates but they are asked for at uncertain times. It having frequently come to the notice of the Committee that in mills where hundreds of children are employed, and where nominally certificates of age were procured, that there had been no visit from the Certifying Surgeons for periods varying from several to eighteen months, nor had the children been sent to the Surgeon.

It was the evident intention of Government that these certificates should be procured and special forms were drawn up with detailed and full instructions as to how they should be filled in and what use should be made of them, but as has been before stated, in many parts of India, the forms have not been used and might as well never have been drawn up.

In the opinion of the Committee the law should require that no child under the age of 14 years "*shall*" be employed in a factory until he produces a certificate of age from the Certifying Factory Surgeon; a duplicate copy of the certificate to be retained by the employer and a register kept in the prescribed form which should contain all the particulars of the certificate.

The original certificate to be the property of the child, carried by him when at work and produced when required by the Factory Inspector or other person authorized to require its production.

Should a child employed in a factory resign or be discharged, an endorsement to that effect by the Manager should be made on the original certificate, giving the date, a similar endorsement should be made in the duplicate and register.

On applying for employment in the same or other factory, it will be sufficient proof if the child produces the original certificate, endorsed by the late employer. Failing this, a fresh examination of the child will be necessary and a fresh certificate given.

In support of the recommendations here made, and to meet objections likely to be raised to the effect that a personal certificate will become a marketable commodity and risks of personation increased, the Committee desire to lay particular emphasis on their personal experience in Ahmedabad. Here the form of certificate adopted is that laid down under rule and order 21 made by the Bombay Government on 22nd June 1892. A space, however, has been added for "personal marks." In going through the several factories in Ahmedabad there was absolutely no difficulty in identifying the children. A duplicate of the certificate kept in the office was carried in a small tin receptacle and worn by the child when at work.

Walking through the mills the members of the Committee called large numbers of children who at once produced their certificates, and, by the personal marks stated, identification was easy. In some instances the marks stated on the certificates were not found on the worker. These workers were sent to the office, and subsequent investigation showed that certain children living in the same house had inadvertently taken the case belonging to another child.

It is strongly urged that the insertion of personal marks on the certificate should be a legal requirement and that the age should as far as possible be approximately stated, and it is thought that in addition to this a thumb-mark impression should be taken. The difficulties of identification by thumb-mark are not forgotten, and it is realized that in many instances a skilled expert would be required to identify the thumb-mark, should legal proceedings be contemplated, but such proceedings would be extremely rare, and it is thought that the moral effect of a thumb-mark would be great and a deterrent against trafficking in the certificate.

The cost and trouble of requiring such a mark would be practically nil.

A copy of the proposed form of certificate is given below:—

1

Under section 3, paragraph (2) of the Government of India resolution of December 17th, 1906, a report is called for as to whether, before children are allowed to work in factories, certificates of age and physical fitness should be required. The views of the Committee in regard to age certificates have been stated. An equally important question, namely, whether certificates of physical fitness for employment should be required has engaged their serious attention. It will, of course, be remembered that from the very earliest days of factory legislation affecting the United Kingdom, this certificate has been required, and presumably, if valueless, the united influence and intelligence of the manufacturers of Great Britain would have been sufficiently powerful to secure the repeal of a useless and unnecessary requirement. In England the exact age of candidates for employment can without difficulty be ascertained. In India this is impossible, a fact pointing to the necessity for physical condition being considered and stated in addition to a merely speculative statement in regard to age. The arguments adduced by many manufacturers, whose opinions are worthy of careful consideration, have not been forgotten.

It is urged by them that it would be contrary to their interest to employ weakly children, but personal supervision on the part of the management in regard to matters of detail of this kind is difficult, if not impossible. They must to some extent depend upon subordinates who will be tempted to engage the willing child even if physically unfit. It has also been urged that a child physically fit today may be utterly unfit after a limited period following examination. This argument applies to every walk in life, but a medical examination would at any rate discover constitutional or other defects rendering the child unfit for mill labour. The direct reference appears to be confined to whether a certificate should be required for children *before* employment, but the Committee is empowered to put forward recommendations for the amendment of the existing law or practice. In their opinion serious abuses exist and have for long existed in regard to employment on full time of so called adults professing to be 11 years of age, but in reality one or two or even three years below that age. It is common to find children certified as being over 9 in one year employed within a period of say 12 months on full time. The proof other than the evidence of one's observation is difficult to obtain, conviction in Court almost impossible, for the offence, as stated would have to be for employment of a child below a certain age, evidence would have to be produced on both sides, and as has frequently been the case, there would be a direct conflict of opinion. Could an information be laid for employment without a certificate from the duly appointed Certifying Surgeons, who should be the authority, all this would cease. Difficult as it is to obtain direct evidence in regard to age, the Committee have been able through one of their members, and after much trouble in searching records relating to mill children, to establish that the age as stated for employment in the mill was incorrect in at least ten cases. This was rendered possible by the fact that in Bombay a system of birth registration has been in force for a number of years. But a large proportion of mill children are born out of Bombay.

Within the last few years this system of birth registration has been elaborated and rendered more perfect, so that in a few years it will be possible for every child born or vaccinated in Bombay to produce some documentary evidence of his age to the Certifying Surgeon, and there appears no reason why this documentary evidence should not be procurable in the future in other large centres of industry throughout the country.

Measures to prevent the abuses described appear to be certainly called for. The one most likely to be efficacious is probably a requirement that *before employment on full time* a medical certificate of age and fitness should be required. Difficulties will doubtless be suggested, but these are not insuperable. It will be said, when an occupier has failed to obtain this certificate, that the person employed represented himself or herself to be above 14 years of age. To meet such objections a *wide* limit will have to be allowed, and it is suggested that the names of all persons under 16 should be registered. Further reference in regard to this suggestion will be found under the heading of "Young Persons."

Minimum Age for Employment of Children.

By the Indian Factories Act of 1891 (XI of 1891) it was laid down that no child shall be employed in any factory if he is under the age of nine years and it is submitted for the consideration of the Committee by Government Resolution whether the minimum then fixed should now be raised beyond nine years.

This question has been considered from every point of view and due weight has been given to the evidence of competent witnesses. Were there educational facilities for school attendance throughout the country, the Committee would not have any hesitation in suggesting that the limit of age for employment of children should be raised, but as this is not the case, they have to consider whether any kindness would be done to the children by preventing them from working at the age of nine in well ordered factories. If so prevented, it is feared that many of these children would be employed in places not under the Factories Act where the conditions of labour are much worse, or they might be employed in much more exhausting work in general labour, or if unemployed, they would possibly be idling in the Bazaars instead of honestly earning a small sum towards the family expenses.

It has been noticed with great satisfaction in many mills throughout India that schools on the mill premises have been provided by employers. Witnesses having a wide knowledge of mill life in India, and the habits of the workers, have strongly urged that the law should require the provision of a competent elementary teacher and suitable accommodation for educational purposes on the mill premises. It was pointed out that the expense would be very little—about Rs. 15 to Rs. 20 per mensem—It is submitted that this proposal should receive careful consideration. Should such a system be adopted it would seem desirable at a later stage, that the minimum age for employment should be raised.

It may be well perhaps at this stage to refer to the systems, or in some cases to want of system, under which children are employed in factories. Different methods are in force in different parts of the country. In some mills the children are divided into two sets, one set working forenoon, the other in the afternoon. Sometimes the sets are changed weekly, but this practice is by no means universal. In other mills one set works from 6 A.M. to 9-30 A.M. and again from 1 P.M. to 3-30 P.M. and the 2nd set from 9-30 A.M. to 12-30 P.M. and again from 3-30 P.M. to 6 P.M.; in the interval children are attending the mill school. With slight variations this latter system is found throughout India. In some mills no system of any kind is adopted, the children coming in the morning when the mill starts, and leaving in the evening when the mill stops; they remain on the premises during the day, the overlookers arrange when they shall work and when they shall not work, and profess to exercise supervision which will prevent any child from exceeding the seven hours of work allowed by law.

It is obvious that great irregularities must exist in such mills. In one very large mill in which nearly 100 children were employed, the European Manager assured the Committee that there was no such thing as half-time employment in any mill, nor did he know of a Factory Act restricting child labour in this way. Another European Manager at this mill disagreed and said that the work was carried on in shifts, but he admitted that when there was pressure, work would continue beyond the specified period, that there was a disregard for these shifts, and there was nothing to prevent children in the first shift from also working in the second. The first Manager wrote to the Committee afterwards and said that on further enquiry he found that the children did work in shifts.

It is strongly urged that the law shall require that children shall only be employed on some recognized system, that precautions shall be taken to prevent children working in one shift from being employed in another, and probably this would be secured by adopting the recommendations made by the Bombay Government, General Department, which appeared in the *Government Gazette* dated December 6th, 1906 (Part I), page 1802. (See Appendix H.)

Employment of Women.

So far as the day employment of women is concerned, from personal observation in large numbers of works, and after consulting many authorities, the Committee are satisfied that amendments or alterations in the present law are uncalled for.

Women are chiefly employed as "reelers" and "winders," the rooms in which they work are speaking generally lofty, clean and well ventilated, the work is of suitable character, they are paid by piece-work, and in many instances by their wish do not work the full time allowed by law—In short the lot of the women employed by day in mills is far superior to that of women workers generally engaged in other classes of work in India.

The employment of women by *night* however must be considered from a different point of view. By Section 6 of the Indian Factories Act, where a system of shifts approved by the Local Inspector is in force the employment of women at night is allowed. As a matter of fact however it is quite exceptional to find that in ordinary Textile Factories women are employed at night. The numerous witnesses examined by the Committee, in works and elsewhere, appear to be decidedly opposed to such labour and this view is supported by the Committee.

Where women are employed at night, one of two things will happen, either they will take with them to the works, young infants and children who should be in their homes, or the children will be left at home, generally speaking uncared for. The atmosphere of a mill, especially at night, where artificial lighting must be used is bad both for women and children. In the case of a woman such work will probably in the long run injure her own health and that of her future offspring. Her home will be neglected, and she will frequently be called upon to work on household duties in the day after working a whole night in the mill. It is believed that, although temporary inconvenience might follow the prohibition of night work by women, chiefly in Ginning Mills, this would not be felt were reasonable time allowed for employers to make other arrangements.

There are, as has been stated, over 1,000 Ginning Mills in India; in a very large proportion of which the health of women is being injured by night work. This is a serious question calling for serious attention. It will of course be urged that work continues for only a few months of the year varying from 3 to 5 months, that the supply of cotton comes at irregular times, and that delay in the manipulation, may lead to serious loss, but against this, it must be remembered that a boy aged fourteen can work as an adult, and by gradually making arrangements for the work to be done at night by male adults, the inconvenience could be greatly lessened if not entirely removed.

The Committee understand that the consideration of the question of employment of women at night, has on the suggestion of the Berne Conference been submitted to the Government of India so this seems an opportune time for recording the views here expressed.

Reference has here been made to the fact that women bring young children to the works with them. This practice is by no means confined to Ginning Mills, but is found in nearly all departments in which women are employed in Textile Factories throughout India. To absolutely prohibit this custom, might keep large numbers of women out of the works and thus prevent them from earning a livelihood. On the other hand, it appears that by suitable administrative regulations, infants and young children could be kept away from the running machinery, from rooms in which the inhalation of dust, and impure vapours, is likely to injure their health, and doubtless after consideration, suitable regulations could be drawn up.

Adult Male Labour.

Whether the working hours of adult males should be limited, and whether the physique of operatives is affected by long hours, are questions which perhaps

should be separately considered. On no point relating to Factory Law has the public mind been more exercised than on the question whether restrictions should be placed on the hours of adult males by legislation. Authorities holding high official offices, employers of labour, and representatives of different schools of thought have in emphatic terms expressed their views. Under these circumstances much and careful consideration has been given before arriving at the conclusions now submitted. The Committee would prefer not to draw comparisons between mills in Lancashire, and mills in India, but unhappily such comparisons have been made, and will be made, when this report is under criticism.

Furthermore comparison is to some extent necessary, as in arriving at conclusions in regard to what can be fixed as a reasonable limit of endurance for male adults, one has to consider the conditions under which they work, the amount of physical strain suffered, and the relative production resulting from their labour.

It has been frequently pointed out that the Indian workman is employed in rooms in which excessive temperatures prevail, that his hours of work are greatly in excess of those of men in mills in the United Kingdom, but against this it must be remembered that temperatures which are excessive to the European are borne with comfort by the Indian worker and also that when the tables of temperature and humidity to be found in Appendix A of this report are considered, it will be seen that in many of the best regulated mills, efficient means for cooling the air, are taken and that except for the hottest weeks of the year, the temperature is probably not of a kind that would cause ill health or serious discomfort to the Indian worker.

In English Mills, especially where fine counts are spun, excessive temperatures are certainly not unknown, and the discomfort to the workers must be far greater than that caused to his Indian colleague. The tables in Appendix A of this report will show that the English worker especially in winter is daily subject to great variations of temperature. In the spinning rooms where he spends the better portion of the day, excessive temperatures sometimes approaching 100° Fah. are found, the outside temperature in winter being often at or below freezing point, but at all times, very far below the temperature of the spinning rooms. In India inside and outside temperatures vary only to a very limited extent.

Comparisons must also be made between the numbers of workers employed on each class of machine. From various reliable sources tables relating to India have been procured. These will be found in Appendix B and also similar information relating to Cotton Mills in Lancashire supplied by His Majesty's Inspector Mr. Lewis, and to Jute Mills in Dundee by His Majesty's Inspector Mr. Buchan.

No legislation can alter the nature and ingrained habits of Indian workers. They have been in the habit of leaving their work at odd and uncertain periods throughout the nominal working hours. They go into the mill compounds which generally speaking are large and open for taking food, smoking, bathing, drinking water, and necessary purposes.

In some mills efforts have been made but with only limited success to stop, or at any rate curtail these practices. The men as a matter of fact, within reasonable limits, prefer to have these short periods of relaxation when they want them, instead of longer and fixed periods for meals with the requirement that all the work done by them, must be within a more restricted period.

Unlike the English the Indian mill hand takes frequent unauthorised holidays and in some districts it is the common custom for them to give up their mill work altogether for periods varying from 1 to 3 months when they return to their homes, frequently situated in country districts a long distance from the works.

It need hardly be pointed out, that alleged trade jealousies have been excluded from the minds of the members of the Committee. The conclusions they submit are based upon what they believe to be best alike for employers and employed. By many it has been urged that restrictions on adult male labour are in England unknown, but it must not be forgotten that by many, such restrictions are strongly advocated and the eight hours' movement has many powerful and influential supporters.

In India much of the work, notably in the weaving sheds, is performed by men, whereas in the United Kingdom, the work is done chiefly by women whose hours are restricted. The introduction of the electric light in Indian mills has led to excessive hours of running. The machinery in certain mills is in motion from about 5 A.M. to 9 P.M., in others the hours of running are less, but in busy times they would be increased. Amongst the thinking and moderate class of manufacturers these hours are recognized as a serious evil. Many meetings have been held, many resolutions arrived at, many voluntary efforts attempted to bring about an understanding, which would whilst securing for the operative reasonable hours, also secure for the employer protection from undue competition and its attendant discomforts and worries. These efforts have failed.

To the best of their ability the Committee have ascertained the views of the adult male operatives themselves. They have, as will be seen from the minutes of proceedings, evidence taken and forwarded for reference to Government, endeavoured to ascertain the views of these men not only in their works but also in their homes and in situations away from their works where they had ample opportunities of freely expressing themselves.

Largely signed petitions have been received which may or may not be genuine, but measures were taken to settle this point with the aid of native experts, and the impression formed is that they are genuine. After careful thought the Committee have come to the conclusion that the workers themselves would welcome a legal limitation on the hours of their work. It was fully explained to them that this might mean reduction of wages, but this generally speaking did not shake them in their desire for shorter hours.

The majority of adult operatives object strongly to the electric light alleging, rightly or wrongly, that it affects their eye-sight, and gives them headache.

Many recognized authorities on mill labour in India are strongly opposed to any interference with adult male labour, but in the mills owned by these gentlemen the hours of work will be found to be less than those submitted by the Committee.

The Committee feel satisfied that without legislative interference an understanding will never be arrived at, that excessive hours will be worked and that in exceptionally busy times serious abuses greater than exist at present will creep in. After making due allowance for the numbers of workers employed in Indian mills as compared with those in England after bearing in mind the habits of the people and the irregular periods for rest which they will insist upon the Committee are of opinion that trade will not be restricted by a requirement that the period of employment in Indian mills, except those working on the shift system should be fixed either between the hours of 5-30 A.M. and 6 P.M. or 6 A.M. and 6-30 P.M., that the engine should cease for half an hour between the hours of 12 noon and 2 P.M.; that in mills working by day on the shift system, the period of employment should as at present be between 5 A.M. and 8 P.M. provided that the actual period of employment for adult males shall never in any one day exceed 12 hours and that efficient means be taken to ensure that this restriction is duly observed.

It will doubtless be urged by some that the 72 hours now proposed per week in Indian mills is by far too generous when compared with the 55½ hours allowed in English mills but to those who have carefully studied the question and read this report it will be realized that there are sound reasons for the suggestions made.

Remarks on labour in Textile Factories in Eastern Countries.

Attempts have been made by the Committee to obtain reliable information in regard to the hours worked by Adult Males in Eastern Countries. On November 11th, 1906, the President addressed a letter to the Under Secretary of State for India asking if from the Japanese Embassy any printed public documents relating to State regulations of mills in Japan could be procured.

The following papers from the Board of Trade were sent —(See Appendix C).

(A) "Classification of work-people by age and sex, being a quotation from 'Japan in the beginning of the 20th century published by the Imperial Japanese Commission to the Louisiana Purchase Exhibition in 1904.'"

(B) "*Average daily wages*.—Extracted from the 'Financial and Economical Annual of Japan' issued by the Japanese Department of Finance."

(C) "Working hours in Japanese Factories" and in addition the Trade of Consular District of Kobe for the year 1905.

(A) shows broadly that the greater part of the Operatives in Textile Factories are females between the ages of 16 and 22 years, the number of those from 22 to 30 years coming next.

(B) Average daily wages are given showing that 40 per cent. of the Operatives are on time wages and 60 per cent. on piece wages.

(C) states that in Cotton Mills, 12 hours are the standard for both day and night workers—this being made to take day and night work by turns every 2 days.

In "Filatures" the regulation hours are 13 to 14—Power Loom Factories 12.

Page 29 of the Consular Report for the District of Kobe says under the heading of 'Industries'—"It is not improbable that in Japan sooner or later, like elsewhere, the labour question will have to be dealt with by legislation." It also says: "To the casual enquirer the most urgent reform would appear to be in the direction of shortening the working hours, but this doubtless is a matter which will adjust itself."

Under the heading of the Japanese Cotton Mills which appeared in the *Pioneer* of January 17th, 1907, Mr. W. A. Graham Clark gives much useful and instructive information in regard to the Labour question and the general condition of Japanese Mills. He states that during the last 6 months, 81 out of 85 mills ran both day and night averaging over 22 hours a day, but although probably implied it is not stated that the workers are employed in shifts.

He points out that the operatives have resorted to strikes and other means to secure higher wages and shorten hours of labour. He adds that the present long hours are very oppressive, especially to employees, most of whom are girls. While doubtless there is much to learn from Japan it can hardly be urged that the system of mill labour existing in that country could with advantage be copied in India.

An experienced Mill Manager, who had spent many years in Brazil and China, states that in the latter country Adult Males where he was engaged worked for 24 hours in 2 shifts, including a stoppage of 1 hour in each 12 hours' shift. His opinion was that this system did not pay, that he often found many of the operatives asleep at night, and some of the machines not running. He also stated that at one period of his career, he managed a large mill in Brazil in which there were 10,000 ring spindles and 1,226 looms, where the hours were 12 hours per day with half an hour's rest.

Physique of Operatives.

Passing to the second portion of reference 3 (1), *viz.*, whether the physique of operatives is affected by long hours, the Committee examined Medical Inspectors at nearly every place visited. They almost all expressed the opinion that sufficient evidence was not forthcoming to make definite statements, but two were of opinion, as far as they could judge from casual observation, that no

"deterioration from long hours was seen," while one said that "all workers suffered in health," although he had no evidence to give, to support his statement. The Health Officer of Calcutta could furnish no statistics relating to the health of mill operatives.

Opportunities were taken to examine mill workers themselves as to the effect of mill labour on their health, but their replies were of a contradictory and unreliable character. In Bombay some labour statistics are available but only for the past 6 years, and from them it is gathered that the mean Death Rate from Phthisis per 1,000 of the population of mill hands is much the same as that of the general labourer (see Appendix G).

In 1884 a Medical Commission, appointed by Government to enquire into the health of mill operatives in the City of Bombay, concluded that the operatives in the said mills did not exhibit any material deterioration in health or condition. Their opinions were formed after closely examining and ascertaining the height and weight of 265 male mill operatives. The time at the disposal of the Committee has rendered it quite impossible for an enquiry of this kind. Since 1884 the number of mills has largely increased, many more operatives are employed and some have been employed for many years. Without facts to support their opinion, it is felt by the Committee that although they may draw inferences, they can hardly express definite opinions. It may be thought desirable to make further enquiry on properly laid down lines, and this enquiry should embrace the Textile Industry wherever situated in India.

Particulars of Work and Wages

The attention of the Committee was called in the early part of their inquiry to differences between employers and employed which had led to a strike in one mill. By the operatives—piece-workers—it was asserted that they did not receive the full amount of wages for the work done.

Section 116 of the English Factory Act lays down very precise regulations "for the purpose of enabling each worker who is paid by the piece to compute the total amount of wages payable to him in respect to his work."

In one or two mills visited, the methods laid down by this section were in force, but in all others the wages to be paid were calculated on a different basis, namely, by the weight of cloth produced, bearing in mind particulars relating to width of cloth, reed, number of picks, length, twist, weft, amount of size, or in the case of Drawing, Slubbing, Intermediate and Roving Frame Tenters, per 1,000 lbs. or per hank. Prices varying according to the reed or count, Frame jobbers by the weight.

At the various mills visited and when taking evidence, it appeared that the methods adopted are satisfactory to the workers.

The requirements of section 116 of the English Factory Act are complicated, and it has been found necessary to appoint Special Inspectors known as Inspectors of Particulars to decide upon the very complex questions that arise. Unless hereafter the systems in force in India are questioned or lead to serious dispute, it does not appear to the Committee that special legislation on this point is called for in Indian Mills.

Remarks on proposals for the creation of a new class of workers to be known as Young Persons.

Section 3, paragraph (4), of this reference directs enquiry as to whether as the result of employment as adults of persons between the ages of 12 and 14 years of age, there has been physical deterioration requiring the creation by law of a Special Class of Workers known as "Young Persons".

The reference appears to assume that children at the age of 12 years have been employed as adults. On this point considerable attention has been paid by the Committee. In a large proportion of the Mills visited, groups of boys and girls were examined either in the compound or in the offices of the mill—and also in their own homes. Schools were also visited, the management stating the age of the children as entered on the books of the school register.

By this means it was possible to draw some comparison in the physical condition and development of children alleged to be a certain age on the school books, and those alleged to be of similar age but employed in mills.

The children or young adults were examined in regard to their general physical appearance and it was ascertained whether they had been certified by the Certifying Surgeon for half or for full time. It was constantly noticed that children certified on certain dates as being over 9 years were within a period of about 12 months certified as being above 14 years. It is not suggested that the conclusions arrived at by the Surgeon were inaccurate, but it is suggested that the latitude and elasticity in this method of certifying children is very wide. It is thought that better results would be obtained were the approximate age stated, as is done in many parts of India.

The impression formed on the minds of the Committee was that a large number of children are employed as adults long before they have attained the age of 14 years; many by being put to work without any certificate stating that they are above 14 years, others by misrepresentation or personation have obtained certificates. This is in many instances rendered possible by the fact that the children are sent to certain places away from the Mill for examination. It is said that an official from the mill accompanies them, but this is not always done and sometimes the so called official is the person who has often with difficulty to obtain juvenile labour. It was felt that opinions on this question would be of much greater value could they be supported by direct evidence. In Bombay for 6 years special attention has been given to the birth registration of various class of labourers and thanks to the assistance rendered by the Officers of the Health Department, the names of over two hundred juvenile mill workers were taken and diligent search at considerable trouble was made in the records in ten cases only however could the definite age be established.

In the opinion of the Committee persons who have been illegally employed have worked beyond their strength and their growth and development has consequently been stunted.

Whether a special class of workers to be known as "young persons" should be created, has been considered from many points of view. Many and experienced witnesses have been examined, the practically unanimous opinion being that, recognizing the difficulty of classification in regard to the age of mill workers, the creation of such a class would cause serious, if not insuperable, administrative difficulties. By some however it has been urged that these administrative difficulties would cease were a class of young persons created whose hours of work should be restricted up to the age of 18 years. It has further been suggested that, if the work of persons under the age of 18 years was restricted by law, in practice, that of male adults would be automatically restricted, as when the young persons left the mill it would not pay to run the Machinery, and that thus the alleged overwork of male adults would be stopped.

It is however feared that in busy times, adults might be employed during the night and furthermore that adults who have worked a whole day would frequently work all night in another mill in which wages are paid daily thus securing money for immediate wants, and that those men would absent themselves from work during the succeeding day or days.

After much thought the conclusions arrived at by the Committee are that the creation of a separate class of young persons would create serious administrative difficulties without attaining the object suggested in the reference. They prefer to place restrictions—within reasonable limits—on adult male labour and to allow all adult males to work the full time allowed by law. It should perhaps be here explained that in making a suggestion that there should be a physical examination prior to employment on full time, that the Committee recommends that all persons under the age of 16 years should be registered. By this it is not in any way intended that the hours of work should be restricted or they should be classed as "young persons", the object in view being to secure that

all persons who are of the approximate age of 14 years should be examined and certified as physically fit. Recognizing the difficulty in regard to precisely stating age this limit has been suggested.

Sanitation.

Under this general heading many and important questions arise which will be dealt with in detail. On the general question of Sanitation in Indian Mills, it is satisfactory to report that on some points considerable attention has been given by Mill Owners and with very good results. It is perhaps not too much to say that certain mills seen by the Committee leave little if anything to be desired, some (it would perhaps be invidious to mention them by name) are not only a credit to India but compare very favourably indeed with the best mills to be found in any part of the world.

Unhappily these remarks are not of universal application. In many mills there is room for much improvement and it is believed that there will be no unwillingness on the part of owners and occupiers to carry out improvements if any suggestions of a practical kind are made.

Questions relating to Ventilation, Temperature and Humidity must be closely allied. For manufacturing purposes it is an absolute necessity that temperature and humidity should by artificial means be capable of regulation. If there is too much moisture in the atmosphere as is often the case in the monsoon or wet weather various processes could not be carried out without hot radiating pipes or other appliances for drying the air. At times Humidity is wanting in the atmosphere and it must be artificially supplied.

In the early days of Spinning and Weaving in Bombay, there is evidence to show that when Humidity was wanted all windows were closed, water thrown about on the floor and damp cloths hung up. In a short time owing to carbonic acid and organic impurities given off from the respiratory organs and bodies of the workers and other sources, the air became extremely impure and unhealthy.

Now, in many mills much better methods are found; humidity is supplied by various systems either in the shape of steam introduced by steam jets, cold water in the form of spray, or carried in air currents, by different devices.

In English and Continental Factories the method of humidifying by steam is in common use. It may in certain parts of India where there are cool winters be necessary, but in the opinion of the Committee the cold water system is generally preferable as it reduces the temperature in the rooms and not only moisture but fresh air can be conveyed and equally distributed in the same channels. By this means the temperature in many instances has been found to be much below the outside temperature, the air equally pure.

In the report of the Departmental Committee appointed to enquire into the Ventilation of Factories and Workshops, generally known as the "Haldane Committee", 1902, it is pointed out that the existence of a certain cubic air space per person affords no reliable guarantee of efficient Ventilation, that the most highly vitiated air met with by the Committee was in rooms with an air-space of about 10,000 cubic feet per person or 40 times the legal minimum. The report states, that it has long been recognized that the best objective criterion of the sufficiency of Ventilation in ordinary rooms is the proportion of carbonic dioxide in the air. The Haldane Committee recommended that a standard of Ventilation should be prescribed for all classes of Factories. The advantages of laying down such a standard are numerous. The manufacturer or mill-owner is not restricted to this method or to that, he may choose his own, provided always that the standard is maintained. To maintain a reasonable standard the air in the room must be frequently changed. It is possible to regulate temperature by passing incoming air, if warmth is

References to the "Haldane Committee on Ventilation."

required through radiators, but in India the cases where this is wanted would be extremely rare. The limit originally proposed by Pettenkofer was 10 volumes of carbonic dioxide per 10,000 volumes of air or 6 volumes in excess of the proportion commonly found in the air of towns.

By an English Home Office order dated 2nd February 1898 it is laid down that in a Cotton Cloth Factory in which Humidity is produced by artificial means, the Ventilation shall be such that during working hours in no part shall the proportion of carbonic dioxide in the air be greater than 9 volumes of carbonic dioxide in any 10,000 volumes of air. It is now freely admitted by occupiers of Cotton Mills after various tests made officially and unofficially, that this standard can be easily maintained.

In India where there are not the same variations of temperature as in England and where cold draughts are not likely to be introduced into the mills, it is believed by the Committee that a standard could very easily be maintained and, if established, without in any way interfering with production, the health and comfort of the workers would be materially improved. It is by no means suggested that the standard laid down for English works should apply to Indian mills in which conditions are from climatic and other reasons entirely different. It is however suggested that an exhaustive series of air tests should be taken in all parts of India where factories exist, that when results are tabulated, a Sanitary expert in conjunction with mill experts should decide upon and report to Government as to a suitable standard.

When air analyses had to be conducted by the Pettenkofer or similar systems necessitating expensive instruments of a delicate nature and difficult to carry about the suggestion now made would have been of an impracticable character, but by adopting the systems in force throughout the United Kingdom difficulties are removed.

On the requisition of an Inspector small cases containing 6 or more small stoppered bottles are sent with minute instructions as to how the air to be analysed is to be collected allowing for the breathing of the operatives, or other causes likely to unnaturally vitiate the air at any given points. Samples of air when collected are returned to specially appointed chemists, who for a very small fee analyse the contents of the bottles with the Haldane apparatus. A description of this is given on page 118 of the report of the Ventilating Committee before referred to.

It is not proposed that this apparatus although portable should be taken to the mills. The instrument is a delicate one; vibration in carriages, or more so in railway carriages, rough handling or similar causes would soon put the instrument out of order. The vibration of machinery in the mills, and the alternations of temperature inside and outside causing expansion or contraction of the glass may lead to inaccurate results. By many persons it was asserted, that analyses made in the way now suggested were unreliable.

To set this question at rest, two of His Majesty's Inspectors (expert qualified chemists) Mr. Brothers and Mr. MacNair were directed to make exhaustive comparative investigations both in summer and winter in the mills in Dundee and in Belfast. The samples of air were analysed not only by the Haldane process but also by the Pettenkofer method.

Results of air actually analysed in the mills were also taken and compared with those which were sent to the chemist for analysis in the laboratory. The result of these tests was to establish without doubt, that for all practical purposes the Haldane method of analysing air for carbonic dioxide could be relied upon with the fullest confidence. It is within the knowledge of the President that Mr. Scudder, a very well-known chemist in Manchester, Assistant to Mr. Henry Roscoe, also made experiments corroborating the opinion above expressed regarding the efficiency of the Haldane apparatus.

It should be required that Wet and Dry Bulb thermometers should be affixed in all mills in which artificial Humidity is used, that records showing the difference in the

Legal standard of ventilation in English Humid Cotton Cloth Factories.

Methods of air analysis.

Hygrometers.

readings taken say three times a day should be kept for twelve months, the returns being made monthly to an official deputed to receive them. These should also state the exact nature of work carried on, specifying the counts spun, whether wet or warp, or the class of work in the particular rooms. From these returns it would be very easy to draw up a table which if not enforced by law might nevertheless serve as a useful guide to persons in charge of mills and prevent excessive moisture, sometimes found to the detriment of health and to the discomfort of the worker.

In the opinion of the Committee the Medical Inspectors should be required to pay particular attention to the source from which water used for the purpose of humidifying is drawn. The water should be from a public supply of drinking water, or as far as can be ascertained from other reliable source which would stand the test laid down in the English Home Office regulations

Suggested standard of purity of water to be used for humidifying. dated 26th February 1903 for flax spinning and weaving, viz, that any water which absorbs from acid solution of potassium permanganate in 1 hour at 60° F. more than 0.5 grain of oxygen per gallon of water shall be deemed to be liable to cause injury to the health of the persons employed.

In another part of this report, attention has been called to the Temperature in Indian Mills at all seasons. In many the state of things is satisfactory, in others excessive temperatures prevail, but if a standard of Ventilation is laid down, in order to maintain this standard, air in the rooms will be changed frequently and as outside air will at all times be introduced the difference between the interior and exterior temperature should not be very great. Again if air carrying cold moisture with it, is by Plenum Ventilation introduced into the mills as has been successfully done in works seen by the Committee (see tables relating to Empress Mills, Nagpur, Appendix A) the inside temperature should be considerably lower than that outside. In exceptional cases, it may be necessary to resort to mechanical ventilation or to the simple methods long in use in India, viz., the use of *khush khush latties* or similar devices. It is not thought necessary that any scale of temperature should be laid down, but a general requirement to the effect that a reasonable temperature—bearing in mind what is necessary for manufacturing requirements—should be maintained.

In many works visited, the rooms, walls and surroundings were found to be satisfactory, in others, there was ample room for improvement. A reference to the Resolutions and Orders made under section 18, Indian Factories Act, shows that requirements in different parts of India vary. In the Resolutions and Orders made by the Bombay Government regulations are laid down by rule 9 in regard to general cleanliness and by rule 7 to limewashing once in 14 months. In Madras rule 7 lays down that the Factory shall be kept in a cleanly and wholesome condition but no rule appears to be made requiring periodical limewashing. In the Punjab the rules do not contain any definite regulation regarding either cleanliness or limewashing. In Bengal rule 10 requires that the Factory shall be kept clean and free from effluvia, and rule 12 lays down that the limewashing shall be done once in two years. In the Central Provinces rule 18 requires that limewashing shall be done when ordered by the Inspector, while rule 20 lays down that the Factory is to be kept in a cleanly state. In the United Provinces rule 24 requires limewashing to be done every 14 months, rule 31 relates to the cleanliness and sanitation of the compound, and rule 25 that the floors are to be swept at least once in every week or oftener, to keep them in a cleanly state.

Individual industries are carried on under similar conditions wherever they may be situated, or if they differ in some minute detail, questions relating to Cleanliness and Limewashing will not be affected. It will be noticed that in different parts of India the period within which limewashing must be done varies. In some parts no requirement exists at all. The regulations when any have been made also vary. It would seem that in this respect all requirements should be assimilated and furthermore that there should be means of knowing

without admissions which could not be used in evidence whether the factories had been lime washed within the prescribed time. Under the English Factories Act an entry has to be made in the "general register" giving the date of lime-washing and all particulars. Failing such entry, the onus of proof that the law had been observed, rests with the occupier. It may be worthy of consideration whether in India a "general register" containing all legal particulars relating to Factories should not be used, thus avoiding confusion and loss of time which follows when search has to be made through files of loose certificates, loose registers, etc., but if such register is not kept then the declaration suggested above should be made, signed by the occupier, and produced to the Inspector when called for by him.

In works visited by the Committee which, will be remembered, were textile factories, no very exceptional dusty processes were noticed. In Carding, Preparing and Spinning rooms a certain amount of dust fibre must be expected and at times this probably causes inconvenience. It would however be difficult to say that injury to health is caused. In cotton, unlike hemp, flax and jute, little dust of a silicious nature attaches itself to the fibre. In Woollen mills the greasy nature of the wool and the numerous processes of washing to which the wool is subject, practically do away with the dust. In jute mills in India material of the best kind is used, "ends," tow, and otherwise dirty materials being exported for use in the manufacture of rope and twine or for other purposes. The Carding of this tow is unquestionably a dusty process injurious to health, but it does not appear to be carried on in India. In the early process of jute manufacture the raw material has to be "batched" either by hand or machinery, frequently by both. Oil and water is sprinkled on the fibre to soften it, moisture naturally confining the dust. Heavily compressed bales are not opened in Indian mills as in those in Dundee, the opening of the bales must be more or less a dusty process, but Indian workers are not subject to this. In cotton mills a machine, or machines known as "Willows" are generally found. Waste material of a very dirty character passes through these machines. Much dust is generated and it is suggested that better means should be adopted for carrying this off by a system of local "exhaust". In a report by the President presented to both Houses of Parliament entitled "Illustration of methods of dust extraction in factories and workshops, 1906," will be found 56 plates with descriptions dealing generally with systems of ventilation and dust extraction. In the early manipulation of jute when the fibre is received into the godown, a process of rough "hackling" takes place. The workers doubtless inhale more dust than is desirable, but taking into consideration the methods under which the work has to be carried on "local exhaust" could only be fixed at an enormous cost, which present circumstances do not appear to call for. It is however suggested that much of this work and also of opening of bales might be done in sheds that are practically open, if not in the open air that by a system of screens and by placing the workers in suitable positions when there is any wind, the dust may be made to blow away from them. In some workshops visited, the opening was all done in the open air, the management stating that the workers would not work inside.

Should it hereafter be decided that further enquiry relating generally to the conditions of Labour in Indian Factories be made, it is thought that the dust question will call for much more serious attention in many non textile factories than in the works reported on by the Committee. It was noticed that when occupied in dusty processes the Indian workers almost invariably wore mufflers or in other words a piece of cloth tied in such a way as to cover the mouth and nostrils. In England all efforts have practically failed to induce workers to adopt this precaution.

So far as *factory* life is concerned in India, special injury to health might probably be looked for in the following industries :—

| Industries. | Diseases. |
|--|--|
| (1) Brass Foundries ... | Brass-founders Ague. Dust. Lead-poisoning. |
| (2) Foundries and Engineering Shops .. | Inhalation of metallic dust in dry grinding processes. |
| (3) Distilleries and Breweries . | Risk of inhaling dangerous fumes in refrigerating process. |
| (4) Flour Mills ... | Inhalation of silicious dust in the first handling of the grain prior to washing. |
| (5) Leather Works ... | Dust in certain grinding processes. |
| (6) Aerated and Mineral Water Manufactures. | Risks of being cut by the bursting of bottles in bottling and wiring, sighting and other processes. |
| (7) Cement Works ... | Inhalation of injurious dust. |
| (8) Coach-building ... | Risks of Lead-poisoning when old paint is rubbed off. |
| (9) Cotton Ginning and Cleaning ... | Injurious dust. |
| (10) Dye Works ... | Risks of Lead-poisoning where yellow chromate of Lead is used or arsenical poisoning when Arseniate of Soda is used. |
| (11) Brick Works ... | Risk of Lead-poisoning where Lead is used in the glaze. Dust, Carbonic oxide. |
| (12) Manufacture of Electric Accumulators. | Risk of Lead-poisoning. |
| (13) The Handling of Dry and Dry-sorted Hides. | Risks of Anthrax. |
| (14) Earthenware and Pottery Works ... | Inhalation of dust and risk of Lead-poisoning where lead is used. |
| (15) Lucifer Match Factories ... | Phosphorous poisoning. |
| (16) Paper Mills ... | Dust during the first process in handling the materials used. |

The special danger in Textile Factories to which attention has been paid by the Committee is the risk of contracting Anthrax by workers in Woollen Mills. In England owing to the many deaths amongst the wool combers and sorters, chiefly in Bradford, very rigid regulations have been laid down for the handling of certain wools Scheduled as "Dangerous Wools". These are "Van Mohair," Persian Locks," "Persian" or so-called Persian (including Karadi and Bagdad) Alpaca, Pelitan "East Indian Cashmere," "Russian Camel Hair," Pekin "Camel Hair" and "All Mohair" other than "Van Mohair". A Home Office order proposes to schedule as "Dangerous" East India wools. The Committee visited numerous Wool sorting godowns in Bombay in addition to Woollen manufactories in different parts of India. In the sorting godowns they found women, young persons and quite young children at work—Babies were often found with their mothers. The occupiers of these godowns say that no cases of Anthrax have ever occurred. It is however possible that there may have been cases which have not been recognized owing to medical advice not having been sought. Samples of dust were collected from several of the godowns, one portion being analysed at the Bombay Municipal Laboratory, the other portion forwarded to the Home Office, London, with the suggestion that some light might be thrown on the general question, were the dust analysed by the Special Bacteriologist at present investigating all questions relating to Dangerous Wools in Bradford. The result of the analysis in Bombay did not disclose the presence of the Anthrax Bacillus or the Spore.

The results from Bradford have not yet been received.

In the very extensive wool works known as the Cawnpore Woollen Mills in which 1,700 people are employed, Anthrax up to the present is unknown. It came to the notice of the Committee that there had been an outbreak in the Bareilly Central Jail. The annual report of the Imperial Bacteriologist in India for 1905-06, page 19, states that a severe outbreak of Anthrax occurred amongst the persons working in wool in the Central Jail at Bareilly in December 1905. There were 13 cases and 7 deaths. The report gives very interesting details relating to the serum treatment. It is stated that all the cases treated benefited by the serum injections, and the only regret of the Medical

Superintendent was, that the serum treatment had not been utilized earlier, and suggestions are made that a certain quantity of Anthrax serum of high potency in sealed tubes should be placed in all jails in which foreign or home wool or goat hair is utilized in the manufacture of jail products. Enquiry made by the Committee has since elicited the fact that the wools manufactured at the time were Tibetan, and that during the years 1896 and 1905 inclusive there were nine cases with five deaths in Indian Jails.

In certain works visited, covered sheds were provided in which the workers could take their food, but generally it was noticed that the operatives prefer to select some corner of the compound where families or persons of the same caste or sect could eat together. Many workers take their meals in the work-rooms. Whether to provide separate accommodation or not depends a good deal on considerations of the habits of the people in different parts of the country, and the systems under which work is carried on. In the opinion of the Committee, whether to make special provision or not is best left to the discretion of individual employers.

The rules framed by different Local Governments in regard to the supply of potable water and water for washing purposes vary only in unimportant detail. At certain works visited at Delhi it was stated that exception had been taken to the water supply by the Medical Inspector. By his order a well had been closed. In one mill at Delhi there had been last year a serious outbreak of cholera in which there were 6 deaths in 36 hours and 9 deaths in all. It is of course impossible to say that the water-supply had anything to do with this outbreak.

In works visited in other parts of India little, if any, exception could be taken to the arrangements for supplying water. In many special attention had been given to this question.

Under the regulations framed by different Local Governments it is laid down, except in those framed by the Central Provinces Administration, that there shall be separate and distinct latrine accommodation for Mills and Factories, that seats shall be provided in the proportion of 1 to every 50 workers. In the Central Provinces the rule requires that there shall be seats in the proportion of 1 to every 25 males. In the majority of the mills visited much attention had been paid to sanitary questions with very good results. In many installations on the septic tanks system were found, in others they were in course of construction. The water carriage system had in many works been very successfully adopted or where hand carriage was necessary suitable arrangements were made for removal. In other mills however things were not satisfactory—separate urinal accommodation was either not provided, or inadequate, and in some sufficient attention was not paid to cleanliness and frequency of removal.

In walking through the compounds the Committee noticed large numbers of persons awaiting admission to the latrines—a fact that indicates that the seating accommodation is insufficient. In the interest of the mill-owners, if for no other reason, it is thought that the rules in regard to the numbers of seats should be altered so as to provide more accommodation. By so doing much discomfort to the workers would be avoided and one of many excuses made for loitering removed.

Means of Escape in case of Fire.

In the Textile Mills visited the arrangements made for the escape of workers in case of fire were good. It is however suggested that the owner should see that doors are hung in such a way that they can be immediately opened from inside and be constructed so as to open outwards.

At a very late stage in their proceedings, and when their report was nearly complete, it was for the first time brought to the notice of the Committee that grave dangers from fire exist in Cotton Presses, that very many women and some men have been burnt to death.

These presses are found in all parts of India; time does not allow the Committee to make personal enquiry. It is suggested that reports be called for

from the Chief Factory Inspectors in all Presidencies regarding the frequency of such fires, the number of casualties for a given period, what precautionary measures can be suggested, whether it is the custom to employ women in front of the openers, and if so, should such practice be prohibited by law.

A copy of a report on this subject from Mr. W. L. Hartley, then Presidency Inspector, Bombay, will be found in Appendix F but it is not thought desirable to publish the name of the firm referred to.

Machinery.

By instructions contained in a letter from the Government of India, Department of Commerce and Industry, No. 9991-13, dated the 17th December 1906, it was decided that the Committee should report upon the fencing of dangerous machinery, but as the reference is confined to Textile Factories the much larger consideration of machinery fencing in the manifold works scattered all over India is not included. While visiting Textile Factories, — (Machine shops, Foundries, Wood Cutting Shops, and Crushing Mills, Dye Work, &c.) pertaining to these factories were also seen.

These visits enabled the Committee to form some opinion in regard to the state of similar works outside Textile Mill premises. At the Home Office, London, and in all district offices in the United Kingdom, a book known as a "Guard Book" is kept. This contains a large collection of plans, drawings and descriptions of appliances for saving life or limb, or for health considerations. The book has been kept for years, and in it are found recommendations from recognized authorities. It was suggested that copies of this book should be applied for, and if these are supplied to the officials who administer the Indian Factories Act, they should be of great help. The copies have been applied for as suggested. In Indian Textile Factories, speaking generally, the attention paid to fencing reflects great credit on the management. Many Mill Agents and Managers have opportunities of seeing mills at Home, they visit works where machines are made, and study Trade Journals, the result being that many of the most up to date guards are found in Indian mills and these appear to be generally asked for when new machines are ordered.

A report by Mr. H. S. Richmond, one of His Majesty's Superintending Inspectors of Factories, presented to both Houses of Parliament, 1906, and published by Messrs. Darling & Son 31, Bacon Street, London, East, price 3/9, gives statistics relating to —

1. All machinery accidents in cotton mills,
2. Accidents in connection with mules,
3. Do. do. Looms,
4. Do. do. Carding Engines,
5. Do. do. Speed Frame,
6. Do. do. Scutcher,
7. Do. do. Ring and Thro'le Frames,
8. Do. do. Drawing Frames,
9. Do. do. Winding Frames and reels,
10. Do. do. Combers and Doublers,
11. Do. do. Plaiting machines,
12. Cotton machinery accidents resulting fatally.

Illustrations of the latest and best guards are also given. The Committee would suggest that copies of this report should be supplied to Factory Inspectors who might at occasion offered show them to Agents, occupiers, and Managers of Mills.

In the body of a report such as this space does not allow detail in regard to the general question of machinery fencing, but the Committee would call attention to certain points apparently not yet fully appreciated.

In India as elsewhere there is nothing more difficult to bring home than the danger of unfenced revolving shafting: day by day in all countries press reports appear showing how workers are mangled and killed by being caught by shafting, but day by day officials are assured that there is no danger.

Line shafting at a reasonable height from the floor is from its position considered safe, but frequently platforms are placed just under line and other shafting, the result being that workers are practically invited to approach for

oiling, cleaning, feeling of bearings, putting on belts, etc., a recognized source of danger.

Fencing, owing to the number of drums, is sometimes difficult, but often it would be wise to remove the platform, or if it remains, the shaft itself can often be cased in, at points of danger; sometimes a rail can be fixed which will afford protection without interference with work.

In ginning mills the condition of the line shaft or second motion, calls for careful attention. Many serious and fatal accidents have occurred in such mills; the clothing of men and women has been caught, the victims twisted round by the shaft, mangled and killed. The shaft referred to is in a cellar under the ginning machines. In some the cotton seeds fall in large quantities close to the shaft, in all, some seeds find their way to positions near it. Men and women approach the shaft to remove seeds, to clean, oil or feel bearings, put on belts, etc.

There are in India over a thousand ginning mills, some under the Factories Act, some not. In some visited by the Committee, there was no fencing, in some a rail was fixed, but for protection purposes it was of no more use than the outer wall of the factory. The workers go inside the rail.

In a few the shafting itself was cased in between the drums; this method in the opinion of the Committee, if properly carried out, is the right one. In machine shops it was exceptional to find fenced the bevel wheels of vertical drills, the change wheels of lathes, and on other machines dangerous in taking cogged wheels were often left unfenced.

Circular saws are generally unfenced, contrary to universal custom in the United Kingdom. Sides of saw benches are unfenced rendering workers who remove saw-dust, or stoop to pick up a fallen tool or piece of wood liable to serious injury.

In rope works the "flyers" of the horizontal spinners which revolve at a great speed are unfenced, but makers of these machines are now sending them out properly protected.

The water gauge glasses on boilers are fenced in some works, in some they are not. The glasses occasionally burst, and there is danger of the stokers being cut by fragments of broken glass. A worker in Bombay was recently struck in the eye.

In many rooms, but notably in blow rooms in cotton mills, it was noticed that projecting spindles or ends of shafts driving the beaters of scutchers and similar machines were left unfenced, in some these were covered by a loose cap. This or other form of guard is necessary. Unfenced such spindles are a source of danger.

In weaving sheds shuttle guards were sometimes found, but this practice is not universal. To lay down an absolute law on this subject might sometimes lead to unnecessary trouble and expense. In Jute mills visited, the Committee received assurances, which they accept, that the shuttles do not fly; in some cotton mills where there are fast running looms it was acknowledged that the shuttles do fly, and in some, the workers had improvised guards by hanging up cloths (wing guards) between the looms.

The danger is greater when "under pick looms" are used.

The Inspectors in doubtful cases might require that a certain number of wooden or metal "wing guards" should be fixed in suitable positions; the indentations, if found, would show that the shuttles do fly.

Electricity for Driving Machinery.

Plant for generating electricity is commonly found in Indian mills; the current being utilised for lighting purposes. In one mill only visited by the Committee was it used for driving machinery. There is reason however to believe that electric power will ere long be extensively substituted for steam. In the

public press, schemes are discussed for the construction of gigantic generating plant capable of supplying sufficient force to drive all the mills in Bombay. Inquiry at the one mill referred to above elicited the fact that between May 1905 and November 1906 there had been three deaths from electric shock.

Looking ahead it is felt that measures of protection should be considered if eventually the Indian Factories Act, or the rules made under it, are to be amended. The Committee recommend that the report and suggested Special Rules drawn up in conjunction with the highest electrical experts by the Electrical Adviser to the Factory Department, Home Office, London, should be considered.

Suggested amendments to the Indian Factories Act.

A brief summary of the conclusions arrived at by the Committee may be useful for reference.

Firstly attention is called to the Indian Factories Act and it is suggested for consideration whether the clauses referred to could not with advantage be amended.

(Act No. XV of 1881 as modified up to December 1904.)

Section 1.—"It applies to the whole of British India." This being so, would not uniformity and efficiency be better secured if primarily the administration of Factory Laws were placed under the Department of Commerce and Industry, Calcutta, reserving for Local Governments all necessary powers within their own jurisdiction.

Should not all Rules and Orders relating to similar works carried on under similar conditions be the same in all parts of India. Unless for good cause shown to the central authority there is reason for alteration or modification.

Seeing that Native States compete with works under the Indian Factories Act, and that temptations exist for erecting mills in those States and so evade the Factory Laws, should means be considered whereby these Laws could be made to apply to States under British influence.

Section 2.—The risks to life and limb from unfenced machinery are identical in similar works, whether work continues for less than four months in the year or whether it continues for the whole year. These risks are identical in places employing over or under fifty hands. Should not all places as defined by the section come within the Act. (According to "Kerravalla's Textile Year Book," there are in India, including Native States and the Nizam's Territory, 1,109 ginning factories. These contain dangerous machinery. Excessive hours are often worked by women and children, both by day and night.)

Section 5 B. (Holidays.)—Women have been found at work in a Reeling and Winding room on a Sunday, this day having been declared by the firm to be one of the holidays to be legally observed in compliance with rules and orders of the Bombay Government.

In order to prove an offence, the Inspector would have to show (section 5-B Indian Factories Act—Sub-section (2) (b)) that these women had not, and would not have a whole day on one of the three days immediately preceding or succeeding the Sunday.

Proof as to whether a day had been given on one of the three preceding days could only be had by the evidence of the women, who would be most unwilling witnesses. The persons having been found at work would of course be told by the management to take a holiday on one of the three succeeding days.

No protection appears to be given against employment on legal holidays. It is suggested that the law should state that any person found at work on a legal holiday (except persons specially exempted) should be deemed to be employed contrary to law.

Section 15.—A reference to part IX, English Factory Act, 1901, will show that in every instance the "occupier" is held to be the person primarily responsible for offences under the Act. "Occupier" is an undefined term but by section 146 it is laid down that in laying an information "it shall be sufficient to state the ostensible occupier of the factory or workshop, or the title of the firm by which the occupier employing persons in the factory or workshop is usually known."

Section 129 of the English Factory Act, 1901, requires that a "General Register" shall be kept in which prescribed entries must be made. These include the name of the "occupier."

The "penalty" section of the Indian Factories Act imposes penalties on "any person" practically relieving the management from the duty of seeing that the law is observed in their works.

Section 17.—It is true, lays down that any occupier shall be held primarily responsible, but he may discharge himself by proof that the breach was committed by some other person without his knowledge or consent.

Important cases have been lost by responsibility being transferred from one irresponsible person to another—a fact to which attention has been called by officials and by a Magistrate.

Section 111 of the English Factory Act requires that before an occupier can transfer his responsibility he must satisfy the Court

(a) that he has used due diligence to enforce the execution of the Act,

(b) that the said other person had committed the offence without his knowledge, consent or connivance, or

if at the time an offence is discovered by an Inspector it is made clear

(a) that the occupier had used all due diligence,

(b) by *what* person the offence was committed,

(c) that it was committed without his knowledge, consent or connivance and in contravention of his orders,

then the Inspector shall proceed against the actual offender.

It will be seen that before an occupier can throw off all responsibilities for the conduct of his own works, conditions are laid down.

If the occupier fails to convince the Inspector, then, should proceedings follow, he must convince the Court that he had done his duty and prove by what person the offence was committed.

Section 18.—See remarks under section 1.

Section 20.—See remarks under section 2.

Definite Suggestions made by the Committee.

1. That there may be as little delay as possible in giving effect to proposals in contemplation for improving the homes and home surroundings of Mill hands.

2. That arrangements be made to secure uniformity of administration of the Factory Act throughout India.

3. That the systems of Inspection, the strength and composition of the staff of Inspectors should be considered with a view to securing efficiency.

4. That Medical Inspectors whose whole time should be devoted to their duties under the Factories Act be appointed.

5. That certificates of age and physical fitness for employment be required prior to half-time employment, and prior to employment as an adult.

That these certificates be in the Form suggested in the body of the report and that they be the personal property of the persons to whom they apply.

6. That consideration be given to the suggestion made by many experienced witnesses that elementary teachers to be paid by the millowners should be appointed for instruction of half-time children in suitable places on the mill premises.

7. That clear and definite laws be made, requiring that half-time children shall be employed only in sets—

either on the morning and afternoon set system,

or

the double set system largely adopted in Indian Mills.

That efficient measures be taken to secure that the children work only in their proper sets, and that the prescribed hours of labour are not exceeded.

8. That night work of women be prohibited.

9. That by suitable administrative regulations young children should be prevented from accompanying their parents to rooms in which they incur risk from running machinery or the inhalation of dust or impure vapours.

10. That the period of employment in Indian Factories shall be either between the hours of 5-30 A.M. and 6 P.M., or 6 A.M. and 6-30 P.M.

That the engine shall cease running for half an hour between the hours of noon and 2 P.M.

Provided that in factories working on the day shift system the period may be between 5 A.M. and 5 P.M., but the actual period of employment for male adults shall never exceed twelve hours in any one day. Where from the nature of the work day and night shifts are necessary the period of employment for adult males shall not exceed twelve hours in any twenty-four.

11. That the names of all persons under the age of 16 years be entered in the prescribed register, but that certificates of age and physical fitness be only required up to the age of fourteen years.

12. That samples of air collected under prescribed conditions be taken in works in all parts of India, with a view to hereafter decide upon a suitable standard of ventilation.

13. That wet and dry bulb thermometers be placed in all humid cotton cloth factories, readings taken at fixed times, and returns forwarded monthly; these returns to be eventually considered with a view to deciding the amount of moisture necessary for manufacturing processes, bearing in mind the health of the operatives.

14. That a standard of purity for water to be used for introducing moisture into the mills and factories be fixed.

15. That the dates of lime-washing be entered in a prescribed register.

16. That particular attention be paid to carrying off dust when generated in quantities likely to cause injury to health.

17. That when enquiries now going on are complete, should it be found that workers in woollen mills are liable to contract Anthrax, the special precautions framed under the English Factory Act be considered.

18. That the latrine accommodation be increased to one seat for every twenty-five persons and that separate urinal accommodation be provided in all mills.

19. That doors in the various rooms be hung in such a way that they can be immediately opened from inside and be constructed so as to open outwards.

(This is recommended as a safety measure in case of fire.)

20. That in certain respects—chiefly in ginning mills—more attention be paid to the fencing of dangerous mill gearing and machinery.

In conclusion the Committee desire to express their sincere thanks to those whose help and co-operation has so materially assisted them in their enquiries. From Government Officials, Millowners and Managers, Chambers of Commerce

Trades Associations and others, facilities and courtesies were freely offered. The Special Inspectors of Bombay, Ahmedabad, Calcutta and Madras accompanied the Committee to many of the works visited, and rendered valuable help in their respective districts.

An acknowledgment is due to the Press. Valuable information has been gained by the perusal of articles and notes relating to Factory labour; quotations from the *Pioneer* appear in the body of the report. It is well known that able and exhaustive articles on Mill Labour appeared in the *Times of India*. These much exercised the public mind, and the controversy that followed elicited opinions from many holding divergent views. How far the conclusions of the Committee agree with those of the writer of the *Times of India* articles must be judged by a perusal of this report, but it is thought that a public service was rendered when attention was directed to, and discussion invited on, a question of vital interest to employers and employed.

Instructive articles on ventilation and humidity in mills, which appeared in the *Indian Textile Journal*, were read with interest by the Committee.

(Signed) HAMILTON P. FREER-SMITH,
President.

APPENDIX B

**PARTICULARS SHOWING THE NUMBER OF WORKERS EMPLOYED
ON DIFFERENT MACHINES IN MILLS**

IN

INDIA AND GREAT BRITAIN.

THE MANOCKJEE PETIT MANUFACTURING COMPANY, LIMITED.

MILLS, TANDROO.

Boh day, 7th January 1907.

Average daily number of operatives employed ... $\left\{ \begin{array}{l} 3,495 \text{ male adults.} \\ 610 \text{ female adults.} \\ *118 \text{ male children.} \\ 37 \text{ female children.} \end{array} \right.$

* Half timers working in shift as required by the Factory Act

Milling Room and Blow Room Departments.

Mixing feeder — One male on each machine.

One male on each exhaust opener.

Two males on each lap machine when cotton is fed by hand.

One male on each Scutcher lap machine.

One male on each finisher lap machine.

One male on each Willow machine.

Besides these hands, there are in this Department Lap Weighers, Dust Carriers, Dropping Carriers, Seed Cleaners, Sweeper, Splice Hands, Thread Extractor, Mixing Breakers, Cotton Carriers (in all 51 hands)

Carding Engines.

One pair of Ginders to strip from 11 to 18 Card

One Card Tenter to mind 8 cards

One Lap Carrier to supply Lap on 18 Carding Engine.

Ten persons to carry Fly, Waste, Sweeping, &c.

Three Drawing Tenters on each of the Drawings with 3 Heads each of 5 to 8 deliveries.

One Slubbing Tenter on a Frame of 80 Spindles.

One Intermediate Frame Tenter on a Frame of 124 Spindles.

One Roving Frame Tenter on a Frame of 160 Spindles.

24 Sweepers, Waste Carriers &c., to carry sweepings, &c. of the above frames.

121 Doffer Boys to Doff full bobbins of slubbing Intermediate and Roving Frames

30 Persons as Roller Coverer, Fitters, Carpenter, Moches, &c.

Ring Frames

Two Side Boys to mind a frame of from 281 to 318 Spindle

110 Followers to look after 218 Ring Frames

170 Doffer Boys half timers.

160 Doffer Boys full timers to doff bobbins of 218 Frame.

167 Bobbin Carriers, Waste Carriers, Creeler, Oilers, and extra hands such as Rollers, Coverers, Fitters, Carpenters, Jobbers, Yarn Weighers, Moches, Bindingvils, Cotton Pickers, &c., &c.

Reeling Department.

A pair of Reelers on each Reel, giving on an average 50 lbs. of yarn of 20's standard or 120 lbs. of yarn of 10's standard per day

Yarn Bundling Department.

This Department consists of 30 persons, bundling on an average 1,100 bundles, each of 10 lbs., per day.

Baling Department.

20 men baling on an average 10,500 lbs. of yarn and 10,000 lbs. of cloth per day.

Weaving Department.

A pair of Winders wind up 50 lbs. of yarn of 20's standard.

One Drum and Pin Winder winds up 25 lbs. of coloured yarn of 20's standard

One Warper and one Ciceler on each Weaving Machine.

One Sizer and one Back Sizer on every Sizing Machine.

One Beam Drawer with a Rewher draws in about 5,000 ends per day.

45 Extra Hands to carry Beams, Woff Bobbins, Rubbish Waste, Finished Cloth, &c., to their respective destination.

One man attends two Looms at a time up to 68" in width. Jacquard Looms and Looms over 68" in width have one man on each of them.

This List does not include Headmen, Clerks, Jobbers, and other odd hands engaged in the Mill.

GANGES MANUFACTURING COMPANY, LIMITED.

Seelapore, 24th January 1907.

Particulars giving Number of Workers engaged at the different machines from Batching to Cloth Finishing.

Particulars giving Number of Workers in Jute Mills engaged at the different Machines from Batching to Cloth Finishing, in Dunder.

| Name of Machine. | Workers employed. | Remarks. |
|---|--|----------|
| Jute Softner Feed end ... | 3 women and 1 man but sometimes 4 men. | |
| Do. Delivery end ... | 3 men who take off and other 3 men carry away. | |
| Breaker Card Feed end ... | 2 women. | |
| Do. Delivery end ... | 1 woman or 1 man. | |
| Finisher Card Feed end ... | 1 woman for 2 machines. | |
| Do. Delivery ... | 1 woman for 2 machines. | |
| First Drawing Frame Feed end ... | 1 woman. | |
| Do. do. Delivery end ... | 1 woman. | |
| Second do. Feed end ... | 1 woman. | |
| Do. do. Delivery end ... | 1 woman. | |
| Roving Frame for Sacking Weft. | 1 woman. | |
| Feed end. | | |
| Roving Frame for Sacking Weft | 1 woman, sometimes 1 woman attends to 2 machines. | |
| Delivery end. | | |
| Roving Frame for Warfs and Hessian Wefts Feed end. | 1 woman. | |
| Roving Frame for Warfs and Hessian Wefts delivery. | 1 woman, sometimes 1 woman attends to 2 machines. | |
| Doffing Roving Bobbins Sacking Weft. | 4 women and 4 boys to 7 machines. | |
| Doffing Roving Bobbins Warps ... | 4 women and 4 boys to 7 machines. | |
| Spinning Frame Sacking Weft ... | 1 spinner per frame of 60 spindles. | |
| Spinning Frame Sacking Warp and Hessian Wefts. | 1 spinner per frame of 60 spindles. | |
| Spinning Frame Hessian Warps ... | 1 spinner per frame of 60 spindles. | |
| Doffing Spinning Bobbins Sacking Weft quality. | 20 workers for 15 frames of 60 spindles. | |
| Doffing Spinning Bobbins Warp and Hessian Weft quality. | 20 workers for 24 frames of 60 spindles. | |
| Cop Winding Machine Hessian Wefts. | 6 women, 3 on each side. | |
| Cop Winding Machine Sacking Weft. | 6 women, 3 on each side. | |
| Warp Winding Machine Bobbins ... | 6 women, 3 on each side. | |
| Warp Winding Machine Spools ... | 6 women, 3 on each side. | |
| Dry Beaming Machines ... | 1 man and 1 boy. | |
| Dressing Machines ... | 1 man and 1 boy. | |
| Loom ... | 1 woman attends to two looms except in the cases of sacking and Hessian over 60" wide when she attends to 1 loom only. | |
| Calender Machine ... | 4 men attend to 2 calendering machines. | |

Cotton Spinning—Lancashire.

It is calculated that at a modern Lancashire Mill, $2\frac{1}{2}$ to 3 persons are employed to every 1,000 self-acting Mule Spindles.

At such a Mill of 80,000 Spindles, the weekly output of Yarn, 50s counts American Cotton, would be 35,000 lbs. to 40,000 lbs.

This quantity would about supply a Weaving Shed of 1,000 looms, it being calculated that one loom works up about 35 lbs. Yarn per week for ordinary classes of cloth.

The machines and classes and numbers of workers employed, and the wages paid in such a Mill and Shed would average as follows:—

“D” denotes Day wage and “P” Piece wage.

Cotton and Mixing Room—

2 Bale-breaking machines ... { 2 men at 20 per week D, with the occasional assistance of the Wasteman.

Blowing Room—

2 Exhaust cotton opening Machine and finishing Scutch Machines. { 2 Men at 32 per week ... D.
1 Male y. p. 13 „ ... D.

Card Room—

90 Flat Carding Engines ... { 6 Men, Stopp 1s and grinders at 28 to 32 per week... D.
1 Man Carder 35 to 38 „ ... D.
1 Female y. p. and woman tenters 10/5 „ ... P.
10 Drawing Frames ... 10 Women „ 20 „ ... P.
10 Slubbing „ ... { 5 „ „ 20 „ ... P.
5 Female y. p. back „ 8/6 to 10 „ ... P.
24 Intermediate „ ... { 12 Women „ 21 „ ... P.
6 Female y. p. back „ 8/6 to 10 „ ... P.
46 Roving or “Jack” frames { 22 Women „ 21 „ ... P.
5 Female y. p. back „ 8/6 to 10 „ ...
1 Bobbin and 1 yarn carrier „ 10 „ ... D.
1 Under Carder „ 20 to 25 „ ... D.
1 Frame man

Mule Room—

3 Pairs of S. A. Mule of { 30 Men, Minders at 35 to 45 „ ... P.
1,120 spindles each. { 30 Young men, Big Pickers at 17 to 20 „ ... D.
36 Male y. p. and children little 11 to 14 „ ... D.
1 Overlooker 55 „ ... D.

Warehouse ... { 1 Clerk ...
4 Packers ... } all men at about 20 „ ... D.
1 Wasteman.

Other Departments ... { 1 Engine Driver, 2 Firemen and 1 Mechanic and apprentice, 1 Oiler, 1 Jomer 1 Roller Coverer and girl helper, 2 Clerks, 1 Inside Foreman, 1 Salesman and 1 Cashier and a Manager = 14 at a total of about £ 23 per week.

This makes a total of 218 persons employed.

Cotton Weaving.

| | | Per week. | |
|--|---|---------------------------|--|
| Preparatory Rooms ... | { 60 Female y. p. and woman Winders at 15 to 20 ... | } Piece-work is the rule. | |
| | 11 Women, Beamers „ 15 to 20 ... | | |
| | 4 Men, Slashers and Sizers 20 to 30 ... | | |
| | 2 Women and female y. p., Drawers „ 15 to 20 ... | | |
| | 6 „ „ „ Twisters „ 15 to 20 ... | | |
| Weaving shed, 2, 3 and 1 looms each, Learners, 1 loom. | 500 men, male and female y. ps. and women, weavers with children (“Chittys”) as learners ... | 9 to 21 ... | |
| Generally, one “Tackler” to 50 looms. | 12 to 14 men, Overlookers or “Tacklers”. Their wages are calculated proportionately to the earnings of the weavers under them ... | 42 | |
| Other Departments ... | Outlookers, Assistants, cloth pressers, Engine Driver, Fireman, Mechanic and helper, Inside Foreman and Manager—making a total of upwards of 400 persons employed, the usual scale being 2 to $2\frac{1}{2}$ looms to each person, including preparatory processes. | | |

| Bleaching, Dyeing, Finishing and Making up. | | | | Per week. | Day and piece-rates paid. |
|---|-----|-----|------------------------------------|--------------|---------------------------|
| Croft and Dyehouse | ... | ... | Bleachers, male y. ps. | 10 to 20 ... | |
| | | | Men | 25 to 35 ... | |
| | | | Crofters and Stenterers men. | 32 to 36 ... | |
| | | | Stenterers, Women | 16 to 21 .. | |
| | | | Dyers, men | 32 to 36 ... | |
| Warehouse | ... | ... | Makers y. p. Women | 16 to 25 ... | Day and piece-rates paid. |
| | | | Stitchers, Ribboners, Plaiters and | | |
| | | | Hookers, Females y. ps. and women | 11 to 16 ... | |

* The following tables are from a pamphlet entitled "Cotton Mill Labour in India" by a Mill Manager. The Committee have not been able to verify the statements in detail, but the author is known to them. He is generally considered a reliable authority, and it is thought that his tables should be published.

Table giving a Synoptical view of the Comparative Statements relating to Spinners in England and India.

| | England. | India. |
|--|------------|--------|
| 1. Operatives per 1,000 spindles | 4.2 | 28 |
| 2. Number of times Indian hands employed for a given unit to English | 1 | 6.6 |
| 3. Hands upto a spindle point | 3.7 | 21 |
| 4. Number of times Indian hands to English upto spindle point | 1 | 5.67 |
| 5. Hands per 1,000 spindles in a Mule Mill without reellers | 2.5 | 17 |
| 6. Number of times Indian hands to English for same | 1 | 6.8 |
| 7. Hands per 1,000 spindles in a ring mill | 6 | 32 |
| 8. Number of times Indian hands to English for same | 1 | 5.3 |
| 9. Annual outturn of yarn per operative | lbs. 7.736 | 4,000 |
| 10. Do. per spindle | lbs. 32.3 | 112 |
| 11. Hourly production per spindle | oz. .18 | .43 |
| 12. Indian weight to English per hour per spindle | 1 | 2.2 |
| 13. Production per 1,000 spindles per hour | lbs. 11.25 | 25.62 |
| 14. Average approximate counts | 40s. | 20s. |
| 15. Length of yarn turned out per hour | Yds. 378 | 430 |
| 16. Indian length to English | 1 | 1.2 |
| 17. Working days in the year | 300 | 309 |
| 18. Working weeks in the year | 50 | 51½ |
| 19. Working hours per week | 55½ | 80 |
| 20. Do. per year | 2,775 | 4,120 |
| 21. Number of times Indian working hours to English | 1 | 1.48 |
| 22. Monthly wages per operative | Rs. 70 | 13 |
| 23. Annual wages do. | Rs. 840 | 156 |
| 24. Payment per operative per hour | Pies 58 | 7.2 |
| 25. Do. per 1,000 spindles monthly | Rs. 294 | 364 |
| 26. Payment per 1,000 spindles per hour | Annas 20.3 | 16.8 |
| 27. Number of times English hourly wages to Indians per operative. | 8 | 1 |

Table giving a Comparative Statement of the English and Indian Weavers.

| | England | India |
|---|-------------|--------|
| 1. Hands employed per loom | 43 | 1½ |
| 2. Length turned out per loom annually | Yds. 16,500 | 15,450 |
| 3. Do. do. weekly | Yds. 330 | 300 |
| 4. Do. do. hourly | 5.94 | 3.75 |
| 5. Proportion of English yards turned out to Indian hourly | 1.58 | 1 |
| 6. Weight turned out per loom yearly | lbs. 3,900 | 4,120 |
| 7. Do. do. weekly | 78 | 80 |
| 8. Do. do. hourly | 1.4 | 1 |
| 9. Length turned out per operative per week | Yds. 767 | 240 |
| 10. Proportion of length turned out per operative per week in England and India | 3.11 | 1 |
| 11. Weight per operative per week | lbs. 181 | 64 |
| 12. Proportion of weight per operative per week in England and India | 2.82 | 1 |
| 13. Monthly wages per operative | Rs. 72 | 15 |

APPENDIX C.

JAPANESE TEXTILE FACTORIES.

A.—Classification of Workpeople by Age and Sex.

(The figures in the following Table are extracted from the "Financial and Economic Annual of Japan", 1906, issued by the Japanese Department of Finance).

| | Above 14 years of age. | | Under 14 years of age. | | Total. | | Total. |
|------------------------------|---------------------------|----------|---------------------------|----------|--------|----------|---------|
| | Males. | Females. | Males. | Females. | Males. | Females. | |
| Raw Silk | 7,730 | 117,109 | 160 | 9,753 | 7,890 | 127,162 | 135,052 |
| Spinning | 12,061 | 50,573 | 686 | 5,563 | 12,747 | 56,136 | 68,883 |
| Weaving | 8,827 | 53,399 | 710 | 7,309 | 9,537 | 60,708 | 70,245 |
| Knitting and Braiding | 1,460 | 2,863 | 69 | 318 | 1,529 | 3,181 | 4,710 |
| Total Textile | 30,078 | 221,211 | 1,625 | 22,943 | 31,703 | 247,187 | 278,890 |

No accurate statement as to the age of the majority of operatives employed in any given kind of workshops can easily be elaborated, but broadly stated the greater part of operatives in filature factories are females of 16 to 22 years of age, the number of those from 22 to 30 coming next. Even the youngest are very rarely below 12 or 13. In general, females of from 14 to 20 constitute 50 per cent., those above 20 about 40 per cent., and those below 14 about 10 per cent., of the total number of operatives employed. In spinning mills also, girls below 14 constitute a little over 10 per cent. of the whole number, those from 14 to 20 about 50, and those older about 40 per cent., of whom the majority are of 20 to 25 years old. The female operatives in power-loom factories do not differ from those of spinning mills in regard to the age ratio, and those in hand-weaving workshops are similar to those in filatures.*

B.—Average Daily Wages.

(The following figures are extracted from the "Financial and Economic Annual of Japan", 1906, issued by the Japanese Department of Finance).

| | | | | | 1902. | 1903. | 1904. |
|-----------------------|---|------------------------|-----|-----|-----------|-------|-------|
| | | | | | Sen. | Sen. | Sen. |
| Raw Silk Factories... | { | Males over 14 years | ... | ... | ... | ... | 29 |
| | | Females over 14 years | ... | ... | Not given | | 19 |
| | | Males under 14 years | ... | ... | ... | ... | 11 |
| | | Females under 14 years | ... | ... | ... | ... | 11 |
| Silk Spinners | | Females | ... | ... | 20.3 | 19.5 | 21.0 |
| Cotton Spinning Mill | { | Males | ... | ... | 32.3 | 33.0 | 33.8 |
| Workpeople. | | Females | ... | ... | 20.6 | 20.6 | 21.2 |
| Weavers (material of | { | Males | ... | ... | 32.5 | 33.8 | 35.0 |
| all kinds). | | Females | ... | ... | 19.5 | 19.0 | 17.0 |

(Sen is approximately = 1/100. 100 Sen = 1 Yen = 2s. 0 1/2d.)

In "Japan at the beginning of the 20th Century", it is stated that, in 1900, in Cotton Mills 40 per cent. of the workpeople worked on time wage, and 60 per cent. on piece wage, which was growing in favour.

C.—"Working Hours (1900).

In cotton mills 12 hours are standard, both for day and night workers, they being made to take day and night work by turns every two days. In filatures the regulation hours are 13 to 14, in power-loom factories 12. But in hand-weaving workshops a great diversity prevails, the general rule being 12 to 15, according to the season, though in some rare cases the hours are as long as 16 or 17".

("Japan at the beginning of the 20th Century").

* This is quoted from "Japan in the beginning of the 20th Century", published by the "Imperial Japanese Commission to the Louisiana Purchase Exhibition", in 1904.

APPENDIX D.

Statement showing the Mills inspected by the Factory Labour Commissioner appointed under the Resolution issued by the Government of India, Department of Commerce and Industry, Nos. 9174-9973-13, dated 17th December 1906.

| 1 | 2 | 3 | 4 |
|----------------|--|---------------------|---|
| Serial No. | Name of Work | Date of Inspection | What Work is carried on |
| <i>Bombay.</i> | | | |
| 1 | The Manokji Petit Mills ... | 24th December 1906. | Cotton spinning and weaving. |
| 2 | Messrs. Geo. Giharian and Company's Factory Bellasis Road. | Do. ... | Iron foundry. |
| 3 | The New Great Eastern Spinning and Weaving Company's Mill, Parset Road, Byculla. | 24th December 1906. | Spinning and weaving. |
| 4 | Sassoon and Alliance Silk Mill ... | Do. ... | Silk weaving. |
| 5 | Bombay United Spinning and Weaving Company's Mill, Charni Road, Gungam. | 27th December 1906. | Spinning and weaving. |

APPENDIX F.

No. $\frac{11}{11}$ of 1906.FACTORY EXCISE OFFICE,
CUSTOM HOUSE.

From

THE PRESIDENCY INSPECTOR OF FACTORIES,

Bombay,

To

THE CHIEF INSPECTOR OF FACTORIES,

Bombay.

Bhisawal, 11th September 1906.

Sir,

I have the honour to forward herewith my *Diary* for the month ending 31st August last.

During the course of enquiries made at the factories owned by Messrs. * * * I learnt that a small fire had occurred in their Press Factory on the 3rd April. Cotton belonging to one of their constituents was being pressed and at about 6-30 p.m. loose cotton passing through the Opener machine caught fire (a very frequent occurrence). Out of 16 women employed immediately in front of the Opener, 9 were burnt, four men were also burnt six women and one man died from the injuries received. The outlets from the Press house were ample, had there been no enclosing walls the result would have been the same. The death of these people is due to gross indifference and carelessness on the part of the men who employed them. These ignorant people were permitted to sit immediately in front of the Opener Machine, in the midst of loose cotton with their faces entirely covered by their clothes (to prevent cotton fly and dust entering their eyes, nostrils and mouth), their clothes and bare portions of their bodies would collect a layer of cotton fly so that when the flames broke out from the machine they were at once enveloped as if they were so many bundles of cotton wool and the cloths over their faces not only prevented them from seeing the position of the outlets, but must have at once attracted the fire up to their eyes.

The Press owners contributed Rs. 160 towards the assistance of the sufferers, but the actual employers and owners of the cotton upon which the people were working at the time refused to contribute a single rupee. The cotton burnt was insured and Rs. 1,500 was paid over by the companies concerned.

There is at present no clause under the Act, by which the dangers attending the employment of women in Press houses can be regulated. The presence of women in front of Opener machines is as dangerous as if workers in gunpowder factories were permitted to smoke while at work. The practice was unknown a few years ago. keen competition requires more adulteration and mixing than was formerly the case, the women have been introduced to better mix up into one even grade the several qualities of cotton which the merchant may wish to press up into one lot. At this press the practice of placing women in front of the machine had only been started the day before the fire occurred.

Women should not be permitted to work in positions where at any moment they may be burnt to death or struck dead by a stone hurled from the heaters.

It is only in a small proportion of Press factories in the Presidency that women are allowed near or in front of the Opener. It is quite possible that as many as 50 women to be injured or lose their lives in a single fire on any one working day in several of the factories in the Presidency.

Plans of the building showing the position of the machine and the workers at the time of the fire will be submitted later.

I have the honour to be,

Sir

Your most obedient servant,

(Signed) L. W. HARTLEY,

Presidency Inspector of Factories.

The Gazette of India.

PUBLISHED BY AUTHORITY.

CALCUTTA, SATURDAY, JUNE 8, 1907.

Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART II.

Notifications by High Court, Comptroller General, etc.

GAZETTE OF INDIA.

NOTICE.

The 26th March 1907.

From the 6th April next till further notice, Parts I, IV, V, and VI of the *Gazette of India* and the Weather and Crop Report will be published at Simla. After the 30th March all notifications and other matter intended for publication in the *Gazette* should be addressed to the Officiating Publisher, at Simla.

Attention is invited to the following Circular Memorandum of the Government of India Home Department, of August 1901:—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's *Gazette*, and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No. 777—79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 P.M. on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's *Gazette*. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next *Gazette*."

J. P. HEWETT,

Secretary to the Government of India

Rates of subscription.

| Postage | 6 0 0 |
| Subscription for Parts IV, V, and VI, or any of them | 2 8 0 |
| Postage | 4 0 0 |
| Subscription for Supplement only | 2 8 0 |
| Postage | 5 0 0 |
| Subscription for Supplement and Part VI | 3 0 0 |
| Postage | 6 0 0 |
| For a single copy of the <i>Gazette</i> and Supplement | 3 0 0 |
| For a single copy of Parts I, II, and III, or IV, V, and VI, or Supplement | 0 8 0 |

A special price will be fixed for specially heavy issues of the *Gazette* or any particular Part. Postage on single copies varies according to weight.

Rules and Notifications issued under Legislative Acts, and having the force of law, may be obtained separately at, per page, 2 pice.

By order of Government, all subscriptions must be paid *in advance*.

Applications for the supply of the *Gazette* on the *public service* should be addressed to the Home Department.

Complaints regarding non-receipt of any number of the *Gazette* should be forwarded within a week after the date on which it is due.

J. J. MEJKE,

Publisher, *Gazette of India*.

GOVERNMENT OF INDIA.
DEPARTMENT OF COMMERCE AND INDUSTRY.

INVENTIONS and DESIGNS.

Calcutta, the 6th June 1907.

NOTIFICATIONS.

No. 2105 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act during the week ending 3rd June 1907 :—

- No. 282 of 1907.—Paul Borgnet, manufacturer, residing at 23 Avenue Blondin, in Liege, Belgium. *Electrolytic apparatus.*
- No. 283 of 1907.—Andre Gambin, engineer, of 3 Rue Pelouze, Paris, France. *Improvements in and relating to propellers for vehicles that travel in a fluid.*
- No. 284 of 1907.—Percy Hulburd, engineer, of 150 Leadenhall street, in the city of London, England. *Improvements in apparatus for removing sediment from steam boilers.*
- No. 285 of 1907.—Pintsch's Patent Lighting Company, Limited, manufacturers, of 38 Leadenhall street, in the city of London, England. *Improvements in inverted incandescence gas and like lamps.*
- No. 286 of 1907.—Thomas Claude Durham, gentleman, of the United States of America. *An improvement in razors.*
- No. 287 of 1907.—Lazarus Chater, engineer, and George Edward Grabham, local agent, both of West's Patent Press Company, Limited, of Aligarh, in the United Provinces of British India. *Improvements in gin rollers and the like.*
- No. 288 of 1907.—James Riley, engineer, of Hawarden, Bitterne Park, Southampton in the county of Hants, Frederick Alfred Spiers, auctioneer, of Saint Benet Chambers, 1 Fenchurch street, in the city of London, and Chauncy Robert Dashwood Strettell, clerk, of Mobberley, Surbiton Hill Park, Surbiton, in the county of Surrey, all in England. *Improvements in or connected with automatic couplings for railway carriages and other vehicles.*
- No. 289 of 1907.—Anton Raky, manager, of Erkelenz, Province of the Rhine, German Empire. *Improvements in deep-boring apparatus.*
- No. 290 of 1907.—David Sandmann, manufacturer, of No. 105-106 Alexandrinenstrasse, Berlin, German Empire. *Improvements in process for manufacturing India-rubber, ballata, and the like.*
- No. 291 of 1907.—Lewis William Goold, patent agent, of 5 Corporation street, Birmingham, England. *Process of procuring novel textile fibres from certain species of plants.*

No. 2106 P.—SPECIFICATIONS of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Madras, Bombay, and Burma, and the Director of the Department of Land Records and Agriculture, United Provinces of Agra and Oudh. These and other specifications are open to public inspection, from 11 A.M. to 3 P.M., at the Secretary's office, 2 Bankshall street, Calcutta, on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying :—

- No. 464 of 1906.—Robert Cooke Sayer, engineer, of 11 Clyde road, Redland, Bristol, in the county of Gloucester, England. *Improvements in regulating the running of vehicles.* (Specification filed 24 May 1907.)

- No. 536 of 1906.—Harry Bostock and John Angell Peck, both boot and shoe manufacturers, and both at present residing at Aarons Exchange Hotel, Gresham street, Sydney, in the state of New South Wales, commonwealth of Australia. *An improved lock nut.* (Specification filed 28 May 1907.)
- No. 545 of 1906.—Ernest William Hart, electrical and mechanical engineer, of Windmill road, Luton, in the county of Bedford, and William Peter Durtnall, electrical and mechanical engineer, of 8 Crofton Park road, Brockley, in the county of Kent, England. *Improvements in and connected with the propulsion of railway tramway, road or similar vehicles boats, and the like.* (Specification filed 28 May 1907.)
- No. 546 of 1906.—Henri Saul Samuel, Major, of The Glen, Paisley, Scotland. *Improvements in or relating to wind or weather guards or shields for motor and similar vehicles.* (Specification filed 28 May 1907.)
- No. 547 of 1906.—The Magnoid Company, Limited, engineers, of 12 Camomile street, London, E.C., England. *Improvements in and relating to the joining of parts of cast iron to each other.* (Specification filed 28 May 1907.)
- No. 572 of 1906.—Adolf Gentzsch, mineralogist, of Nr. 1 Stiftgasse, Vienna, in the empire of Austria. *Improvements relating to the utilization of waste rubber.* (Specification filed 22 May 1907.)
- No. 573 of 1906.—Adolf Gentzsch, mineralogist, of Nr. 1 Stiftgasse, Vienna, in the empire of Austria. *Improvements relating to the utilization of waste rubber.* (Specification filed 22 May 1907.)
- No. 64 of 1907.—Peter August Poppe, engineer, of Lockhurst lane, Coventry, Warwickshire, England. *Improvements in spray carburettors.* (Specification filed 25 May 1907.)
- No. 72 of 1907.—Louis Sterne, engineer, of Donnington House, Norfolk street, Strand, London, England. *Process of treating lignite.* (Specification filed 23 May 1907.)
- No. 139 of 1907.—Patrick Bailey O'Callaghan, medical student, of 14 Caledonian road, King's Cross, London, N., Patrick Hearn, contractor, of 61 Doughty street, London, W.C., and Michael Timothy Segrue, journalist, of 38a Granville Square, London, W.C. *Improvements in safety oil lamps.* (Specification filed 23 May 1907.)
- No. 176 of 1907.—Norman Pain Pearse, gentleman, of Burleigh House, Belsize lane, Hampstead, Middlesex, England. *Improvements in cotton gins and like machines for treating fibres.* (Specification filed 24 May 1907.)
- No. 180 of 1907.—Malcolm Bentzon, engineer, of 188 Strand, London, England, and Alfred Henry Emerson, Junior, optician, of 26 Eyre street Hill, Clerkenwell, London, England. *Improvements in bi-focal lenses and their manufacture, and in apparatus to be employed in the said manufacture.* (Specification filed 24 May 1907.)
- No. 189 of 1907.—Karl August Brauning, technician, of 11 Anna Paulownastraat, Zaandam, in the kingdom of the Netherlands. *Improvements in automatic fire-arms.* (Specification filed 23 May 1907.)
- No. 199 of 1907.—Ernest James Andrews, Secretary, of 2 Templar street, Camberwell, London, England. *Improvements in machines for separating the fibrous parts of leaves or stems from the pulpy or woody parts thereof.* (Specification filed 23 May 1907.)

No. 2107 P.—THE fees prescribed in the fourth schedule to the Inventions and Designs Act of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each:—

- No. 113 of 1897.—James Davidson. *Improvements in the manufacture of products from tea.* (From 2 July 1907 to 2 July 1908.)
- No. 301 of 1901.—Alexander Gray. *An improved covering for steam pipes, cylinders and other similar structures.* (From 2 June 1907 to 2 June 1908.)
- No. 76 of 1902.—The Inverted Incandescent Gas Lamp Syndicate, Limited. *Improvements in or connected with gas burners.* (From 16 August 1907 to 16 August 1908.)
- No. 115 of 1903.—The Cooper-Hewitt Electric Company. *Improvements in electric gas or vapour lamps.* (From 5 November 1907 to 5 November 1908.)

No. 246 of 1903.—Max Ruping. *Improvements in or relating to the impregnation of wood and other porous materials.* (From 18 November 1907 to 18 November 1908.)

No. 256 of 1903.—Isaac Shone and Edwin Ault. *Improvements in and connected with pneumatic sewage and other liquid moving or forcing apparatus.* (From 21 October 1907 to 21 October 1908.)

No. 2108 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act of 1888, the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2), of the said Act the exclusive privilege of making, selling, and using the said inventions in British India, and of authorising others so to do, has ceased:—

No. 170 of 1902.—Edwin Musser Herr. *Improvements relating to brake shoes.* (Specification filed 28 February 1903.)

No. 179 of 1902.—Alfred Stewart Judge. *An improved contrivance for hoisting up from a ship's hold, weighing and discharging of salt, coal, metals, grain or any other material over the side of a ship.* (Specification filed 26 February 1903.)

No. 207 of 1902.—Oliver Imray. *Improvements in electromagnetic couplings.* (Specification filed 25 February 1903.)

No. 299 of 1902.—Bernhard Kirsch and Adolf Pessl. *Improvements in braiding machines.* (Specification filed 28 February 1903.)

No. 300 of 1902.—Hubert Joseph Boeken. *Improvements in or relating to a machine for divesting parts of plants of their fleshy substance.* (Specification filed 28 February 1903.)

Fee in respect of the continuance of an exclusive privilege—

4 (a) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of ₹50 for each of the above inventions.

NOTICES.

All communications relating to applications for leave to file specifications and for registration of designs under the Inventions and Designs Act, 1888 (V of 1888), or in continuation of such applications, should be addressed to the Patents Secretary, 2, Bankshall Street, Calcutta.

The Office of the Secretary under the Inventions and Designs Act, 1888, will in future be open for the transaction of business from 11 A.M. to 3 P.M. on all days, except Sundays and gazetted holidays.

The Government of India are advised that, as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash and applicants are warned that they must be responsible for any delay in cashing cheques.

Cheques and money orders will only be accepted if made payable at Calcutta to the Secretary under the Inventions and Designs Act.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's Office are now on sale to the public at one anna and eight annas a copy, respectively. Consolidated indexes for 1905 and for 1906, entitled "Inventions and Designs," are also on sale, price one rupee each. They contain a chronological list, subject-matter and name indexes of exclusive privileges for inventions, which have been obtained or applied for in the year, together with lists of designs applications.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitors' room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified: or, if the 10th day is a holiday, till the evening of the office day next following.

At the time of delivering or sending an application for leave to file a specification, the applicant shall cause a duplicate copy of the application to be delivered or sent therewith to the Secretary.

The Inventions and Designs Act (V of 1888), with the notifications and rules issued under its provisions and the notices of the office of Inventions and Designs, to which is added an explanatory memorandum for the guidance of persons applying for protection of Inventions and Designs. Royal 8vo volumes, paper cover, 13 annas or 1s. 1d. Postage extra. To be had of the Superintendent, Government Printing, 8, Hastings Street, Calcutta, or of the Superintendent, Patents Branch, Department of Commerce and Industry, 2, Bankshall Street, Calcutta.

H. G. GRAVES,
Secretary under the Inventions
and Designs Act, V of 1888.

THOMASON CIVIL ENGINEERING COLLEGE, ROORKEE.

CALCUTTA UNIVERSITY.**NOTICE.**

The following changes in the existing Regulations of the University, which have been adopted by the Senate and approved by the Government of India are published for general information :—

In Section 4 and Section 5 of the F. A. and B. A. Regulations respectively (pp. 43 and 47-48, Calendar 1906) for the words " six calendar months " which occur in the tenth line of the Sections, the words " one academical year " have been substituted ; and for the words " those six months " which occur in the thirteenth line of the Sections, have been substituted the words " that academical year."

The above changes will come into effect from the beginning of the ensuing session.

In accordance with Sections 4 and 5 of the F.A. and B.A. Regulations as now amended, the unsuccessful candidates at the recent F.A. and B.A. examinations are required to join some affiliated Institution within three weeks from its opening after the summer vacation and to attend 66 per cent. of the lectures to be delivered during the full session in all the subjects in order to be eligible for admission to the Examination in 1908.

GOVERNMENT OF EASTERN BENGAL AND ASSAM, REVENUE DEPARTMENT.**NOTIFICATION.****LAND ACQUISITION BRANCH.**

The 30th May 1907.

No. 6602-C.—The following is published for general information with reference to section 42 of the Land Acquisition Act, I of 1894.

AGREEMENT.

An agreement executed on the 26th day of April 1906 by the Imperial Tea Company whose principal place of business is at 10 and 11, Lime Street, London, under section 41, Act I of 1894 (Land Acquisition Act).

Whereas the Imperial Tea Company carry on the business of tea planter in the Rema Tea Garden, Sub-Division Habiganj, District Sylhet, and whereas a part of the road which now connects the Rema Tea Garden with the Habiganj-Assampara Local Board road goes under water in the rainy season, and whereas it is necessary that the land described in the schedule hereto annexed should be acquired under Chapter VII of the Land Acquisition Act, I of 1904, for diverting that portion of the said road which is flooded over in the rains so that the whole road may become useful to the public, and whereas it is necessary that the said Imperial Tea Company should enter into an agreement with the Secretary of State for India in Council as required by section 41 of the said Act, the said Imperial Tea Company do hereby agree and bind themselves and their legal representatives, successors and assigns to the effect that they shall pay to the said Secretary of State for India in Council all the costs that will be incurred for the acquisition of the said piece of land, take a transfer of the said land on the payment of the said costs, construct road on the land within one year from the date of this agreement and maintain the same and use the land for foot and cart traffic. The said Imperial Tea Company do further agree and bind themselves, their legal representatives, successors and assigns that they shall allow the public a right of way over the land and also right to the access to the garden that will be constructed by them.

The schedule above referred to :—

A piece of land measuring 5 acres and situated in Mauza Gabarkhala appertaining to Taluk No. 1081 Ram Prasad, Pargana Tarap Thana and Sub-Registry Habiganj, District Sylhet.

J. ELWIN,

Manager, Kuttal Tea Estate, Cachar.

J. LEES,

GOVERNMENT OF EASTERN BENGAL AND ASSAM—PUBLIC WORKS DEPARTMENT.

NOTIFICATION.

RAILWAYS.

The 3rd June 1907.

No. 77-R.—The following is published for general information with reference to section 42 of the Land Acquisition Act, I of 1894:—

Agreement made this 12th day of December 1905 between the Secretary of State for India in Council of the one part and the Scottpur Tea Company Limited of London where their registered office is hereinafter called the said Company of the other part. Whereas the said Company has applied to the Deputy Commissioner of Cachar for the acquisition of land under Chapter VII of the Land Acquisition Act I of 1894 for the purpose of constructing a tramway for the benefit of the Company as well in the interest of the Public and whereas an enquiry was held under Section 40 of the said Land Acquisition Act in order to ascertain whether the acquisition of the land applied for is needed for the construction of the tramway proposed by the said Company and whether the construction of the proposed tramway is likely to prove of benefit to the public and whereas the Deputy Commissioner of Cachar has under Section 41 of the aforesaid Land Acquisition Act submitted a report per his letter No. 1372 dated the 6th June 1905 to the Secretary to the Chief Commissioner of Assam embodying the result of the enquiry made under Section 40 of the aforesaid Land Acquisition Act to the Honourable the Chief Commissioner of Assam and whereas the Honourable the Chief Commissioner of Assam has been satisfied that the proposed acquisition is needed for the construction of the tramway to be made by the said Company and that the construction of a tramway by the said Company is likely to prove beneficial to the Public the Honourable the Chief Commissioner has by the Secretary's letter No. 1832 P. W. dated the 1st July 1905 to the Deputy Commissioner of Cachar been pleased to call upon the said Company to enter into an agreement with the said Secretary of State for India in Council and the said Company has by their Manager Mr. W. Mason's letter dated the 19th July 1905 expressed their willingness to enter into an agreement in accordance with the provision of Section 41 of the Land Acquisition Act of 1894.

It is hereby agreed between the said Secretary of State for India in Council and the said Company as follows:—

That the said Company shall pay to the said Secretary of State for India in Council the cost of the land to be acquired for the tramway to be made by the said Company and which is fully described in the schedule hereto.

(2) That the said Secretary of State for India in Council shall on the payment by the said Company to the said Secretary of State of the costs incurred by the Government in acquiring the land required for the said Company's tramway transfer the said lands to the said Company.

(3) That the Silchar Local Board shall grant the use of a portion of the Tarapur Road about one mile in length on condition that a 12 feet Road is made up by the said Company alongside and clear of the tram-line and that the Silchar Local Board shall arrange for the repairs and upkeep of the said road by their own Agents and at their own expense the said Company maintaining the tramway at the expense of the said Company.

(4) That the said Secretary of State for India in Council shall acquire a strip of land for a *bund* between the Tarapur Road and the Barak river about half a mile in length for the said Company provided the said Company shall construct and maintain in good order a 6 feet Public Road along the side of this *bund* and clear of the tramway.

(5) That the public shall have a right of way along the said Company's private Road leading from Lakhipur and Banskandi direct to Udharband Road in the Happy Valley.

(6) That the said Company shall provide a properly constructed level-crossing on the Manipur Road to the satisfaction of the Executive Engineer of the Cachar Division.

(7) That the said Company shall maintain the tram-line in such a way that it shall not in any way interfere with or obstruct the drainage of the Tarapur Road.

(8) That the said Company in constructing any sidings shall not encroach upon the 12 feet reserved for the purposes of the Tarapur Road.

(9) That the work shall be completed within 12 months from the date of this agreement.

(10) That in case of the infringement of the conditions stated above the said Secretary of State shall have the right of withdrawing the concession and rescinding this contract and of resuming the land acquired for the tramway.

In witness whereof the said Company has by their duly authorised agent hereto set their hand and seal this day and year first above written.

J. C. R. JOHNSTON,

Administrator to Estate,

A. W. STOGDON DECD.

CALCUTTA;

The 6th June 1907.

SUIT No. 133 OF 1907.

IN THE COURT OF THE MUNSIF AT FATEHABAD, DISTRICT AGRA.

- Lala Chandanlal, son of Kaliandas Matharwais, resident, . *Plaintiff*, of Rawatipara.
Debedas and Shamlal, son of Bhawanadas Mathurwais, . *Defendant*, of Agra, at
present residing in Calcutta Domtale at the shop of Ramchand, confectioner.

Whereas the plaintiff has instituted a suit in this Court against you for Rs300, you are hereby summoned to appear in this Court in person or by a duly authorized pleader of the Court duly instructed and able to answer all material questions relating to the suit, or who shall be accompanied by some other person able to answer all such questions, on the 15th day of June 1907 at 11 o'clock, in the forenoon, to answer the abovenamed plaintiff; and as the day fixed for your appearance is appointed for the final disposal of the suit, you must be prepared to produce all your witnesses on that day; and you are hereby required to take notice that, in default of your appearance on the day before mentioned, the suit will be heard and determined in your absence; and you will bring with you or send by your pleader which the plaintiff desires to inspect, and any documents on which you intend to rely in support of your defence.

Given under my hand and the seal of the Court, this 14th day of May 1907.

AMIR HAIDAR,
Offg. Mansarim.

SUPPLEMENT TO

The Gazette of India.

No. 23.]

CALCUTTA, SATURDAY, JUNE 8, 1907.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

FREDERICK NOËL-PATON

Director-General of Commercial Intelligence

J. S. MESTON

Secretary to the Government of India

Calcutta, June 6, 1907

The Gazette of India.

PUBLISHED BY AUTHORITY.

CALCUTTA, SATURDAY, JUNE 15, 1907.

Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART II.

Notifications by High Court, Comptroller General, etc.

GAZETTE OF INDIA.

NOTICE.

The 26th March 1907.

From the 6th April next till further notice, Parts I, IV, V, and VI of the *Gazette of India* and the Weather and Crop Report will be published at Simla. After the 30th March all notifications and other matter intended for publication in the *Gazette* should be addressed to the Officiating Publisher, at Simla.

Attention is invited to the following Circular Memorandum of the Government of India, Home Department, of August 1901:—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's *Gazette*, and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No. 777—79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 P.M. on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's *Gazette*. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next *Gazette*."

J. P. HEWETT,

Secretary to the Government of India.

Complaints regarding non-receipt of any number of the *Gazette* should be forwarded within a week after the date on which it is due.

J. J. MEIKLE,

Publisher, *Gazette of India*.

GOVERNMENT OF INDIA. DEPARTMENT OF COMMERCE AND INDUSTRY.

INVENTIONS and DESIGNS.

Calcutta, the 13th June 1907.

NOTIFICATIONS.

No. 2175 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act during the week ending 10th June 1907:—

No. 292 of 1907.—John Mervyn Dallas Wrench, assistant locomotive superintendent, 3 grade, Superior Revenue Establishment, State Railways, employed in the locomotive department of the North-Western Railway, Lahore, Punjab. *The coaling of locomotives by the power of vacuum or compressed air which is latent in the locomotive undergoing this operation at the same time, to be known as "Wrench's power coaling crane."*

No. 293 of 1907.—The Imperial Automatic Light, Limited, of Tower Bridge road, in the county of London, England. *Improvements in acetylene gas generators.*

No. 294 of 1907.—Frederick George Richards, foreman carriage finisher, of 139 Clifton street, Swindon, Wiltshire, England. *Improvements in or relating to ventilators for railway and tramway vehicles.*

No. 295 of 1907.—Heinrich Severin, Company Director, of Achern, No. 1, in the Grand Duchy of Baden, Germany. *Machine for the manufacture of hollow glass articles.*

No. 296 of 1907.—Victor Courtecuisse, manufacturer, of 101 rue Nationale, Lille, France. *Electric process of gassing and singeing of thread and textures.*

No. 297 of 1907.—Ram Lal Das, medical practitioner, residing at No. 2-1 Goa Bagan lane, in the town of Calcutta. *Producing musical tones of all pitches and qualities to be called Suralahari.*

No. 298 of 1907.—Thomas Parker, engineer, of 1b Chapel street, Edgware road, London, W., England. *Improvements in and relating to fuel.*

No. 299 of 1907.—Roger John Dennett, workshops foreman, Bengal-Nagpur Railway Workshops, Shalimar. *Improvements in securing railway signals.*

No. 300 of 1907.—Owen Westall Marden, at present of Weston Priory, Bath, in the county of Somerset, England. *An improvement in boots and shoes.*

No. 301 of 1907.—Sir William George Pearce, Baronet, of Chilton Lodge, Hungerford, in the county of Berks, England, and William Robert Reeves, engineer, of 29 Windsor road, Ealing, in the county of Middlesex, England. *Improvements in and relating to recording apparatus suitable for recording railway or other signals and the like.*

No. 2176 P —SPECIFICATIONS of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Madras, Bombay, and Burma, and the Director of the Department of Land Records and Agriculture, United Provinces of Agra and Oudh. These and other specifications are open to public inspection, from 11 A.M. to 3 P.M., at the Secretary's office, 2 Bankshall street, Calcutta on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying.—

No. 557 of 1906.—Max Wagner, manufacturer, 1 Kleine Frankfurter strasse, Wiesbaden, in the kingdom of Prussia, German Empire. *Improvement relating to journal bearing liners and the like.* (Specification filed 4 June 1907.)

No. 559 of 1906.—William Asa Gilson, gentleman, of Chicago, Illinois, United States of America. *Feed water heater, separator and purifier.* (Specification filed 4 June 1907.)

No. 151 of 1907.—William Dunz, manager, of Granville, Shoreham, in the county of Sussex, England. *Improvements in laying jointless stone-wood flooring.* (Specification filed 30 May 1907.)

No. 2177 P.—THE fees prescribed in the fourth schedule to the Inventions and Designs Act of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each:—

No. 53 of 1894.—Amyas Morse. *Securing the safe working of facing points and signals, to be called "Morse's point and signal locking bar."* (From 5 June 1907 to 5 June 1908.)

No. 109 of 1896.—Richard Stephens and William Charles Stephens. *Improvements in apparatus or machinery for drilling rocks and other hard substances.* (From 18 June 1907 to 18 June 1908.)

No. 113 of 1896.—Richard Stephens and William Charles Stephens. *Improvements in apparatus or machinery for drilling rocks and other hard substances.* (From 18 June 1907 to 18 June 1908.)

No. 395 of 1899.—Rudolf Diesel. *Improvements in or relating to internal combustion engines.* (From 4 April 1907 to 4 April 1908.)

No. 99 of 1900.—John William MacGillivray and Herbert Amos Hobson. *The production of a concentrated hopped wort.* (From 15 August 1907 to 15 August 1908.)

No. 22 of 1901.—Ernest Rowland Hill. *Improvements in controlling mechanism especially applicable for use with pumps.* (From 17 August 1907 to 17 August 1908.)

No. 150 of 1902.—Claus August Spreckels and Charles Albert Kern. *Improvements in treatment of sugar, sugar-liquor and sugar-bearing material and cleansing compositions employed in such treatment.* (From 13 June 1907 to 13 June 1908.)

No. 213 of 1902.—Heinrich Severin. *Improvements in the manufacture of hollow glass articles and in apparatus therefor.* (From 8 August 1907 to 8 August 1908.)

No. 79 of 1903.—Jogendra Nath Chatterjee. *Manufacturing cast-iron cooking pans.* (From 6 July 1907 to 6 July 1908.)

No. 101 of 1903.—Raymond Concrete Pile Company. *Improvements in or relating to piles or foundation elements and the method of constructing same.* (From 13 June 1907 to 13 June 1908.)

No. 117 of 1903.—Emil Passburg. *Improvements relating to vacuum drying apparatus.* (From 30 June 1907 to 30 June 1908.)

No. 2178 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act of 1888, the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2), of the said Act the exclusive privilege of making, selling, and using the said inventions in British India, and of authorizing others so to do, has ceased:—

No. 144 of 1902.—Pierre Paulin Faure. *Improved method of and apparatus for decorticating ramie and other textile plants and leaves.* (Specification filed 3 March 1903.)

No. 211 of 1902.—Nicolay Fahrenholtz Jensen. *An improved hub brake for cycles, automobiles and other road vehicles.* (Specification filed 6 March 1903.)

No. 253 of 1902.—Horace Drummond Deane and Charles George Landseer Judge. *Improved method and apparatus for manufacturing green tea.* (Specification filed 3 March 1903.)

No. 281 of 1902.—Joshua Joseph Green. *Improvements in the art of removing fibre from cotton seed.* (Specification filed 4 March 1903.)

No. 313 of 1902.—Anne Ellen Phillimore. *Improvements in bedsteads.* (Specification filed 3 March 1903.)

No. 334 of 1902.—Nathan Woodhull Condict. *Improvements in refrigerating apparatus by the absorption process.* (Specification filed 3 March 1903.)

- No. 353 of 1902.—The Perfection Blind and Lock Stitch Sewing Machine Company. *Blind stitching sewing machines.* (Specification filed 2 March 1903.)
- No. 426 of 1902.—Richard Fitzgerald. *Fluid pressure brakes.* (Specification filed 4 March 1903.)
- No. 500 of 1902.—James Holden Braithwaite. *A variable-gear free-wheel clutch for cycles, motor cars and other chain driven machinery.* (Specification filed 4 March 1903.)
- No. 501 of 1902.—William Yeates Hunter. *Improvements in the construction of tents and their valise accessories.* (Specification filed 4 March 1903.)
- No. 513 of 1902.—Edwin Hancox. *Machinery or apparatus for bending or crimping the sides of dovetail edged plates to be used in the manufacture of certain rivetless pipes and for rivetless pipe making machinery.* (Specification filed 4 March 1903.)

Fee in respect of the continuance of an exclusive privilege—

- 4 (a) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of Rs 50 for each of the above inventions.

- No. 288 of 1900.—Washington Licht-Gesellschaft. *Petroleum incandescence lamps heated from a branched-off part of the mixture of vapour and air.* (Specification filed 6 March 1901.)

- No. 436 of 1900.—William Walter Lean. *A new or improved clasp or fastening.* (Specification filed 6 March 1901.)

Fee in respect of the continuance of an exclusive privilege—

- 4 (c) After the expiration of the fifth year and before the expiration of the sixth year from the date of the filing of the specification—

The sum of Rs 50 for each of the above inventions.

- No. 474 of 1898.—David Carl Bendix. *Improvements in the manufacture of dry alizarine colours.* (Specification filed 2 March 1899.)

Fee in respect of the continuance of an exclusive privilege—

- 4 (e) After the expiration of the seventh year and before the expiration of the eighth year from the date of the filing of the specification—

The sum of Rs 50 for the above invention.

- No. 242 of 1893.—Arthur Octavius Wright. *Improvements in the manufacture of metal laths for use in the formation of ceilings, roofs, partitions and other such purposes.* (Specification filed 7 March 1894.)

- No. 243 of 1893.—Arthur Octavius Wright. *Improvements in laths and sheets for forming ceilings, floors, partitions and other such like purposes and in the machinery for manufacturing the same.* (Specification filed 7 March 1894.)

Fee in respect of the continuance of an exclusive privilege—

- 4 (j) After the expiration of the twelfth year and before the expiration of the thirteenth year from the date of the filing of the specification—

The sum of Rs 100 for each of the above inventions.

NOTICES.

All communications relating to applications for leave to file specifications and for registration of designs under the Inventions and Designs Act, 1888 (V of 1888), or in continuation of such applications, should be addressed to the Patents Secretary, 2, Bankshall Street, Calcutta.

The Office of the Secretary under the Inventions and Designs Act, 1888, will in future be open for the transaction of business from 11 A.M. to 3 P.M. on all days, except Sundays and gazetted holidays.

The Government of India are advised that, as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash and applicants are warned that they must be responsible for any delay in cashing cheques.

Cheques and money orders will only be accepted if made payable *at Calcutta* to the Secretary under the Inventions and Designs Act.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's Office are now on sale to the public at one anna and eight annas a copy, respectively. Consolidated indexes for 1905 and for 1906, entitled "Inventions and Designs," are also on sale, price one rupee each. They contain a chronological list, subject-matter and name indexes of exclusive privileges for inventions, which have been obtained or applied for in the year, together with lists of designs applications.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitors' room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified: or, if the 10th day is a holiday, till the evening of the office day next following.

At the time of delivering or sending an application for leave to file a specification, the applicant shall cause a duplicate copy of the application to be delivered or sent therewith to the Secretary.

The Inventions and Designs Act (V of 1888), with the notifications and rules issued under its provisions and the notices of the office of Inventions and Designs, to which is added an explanatory memorandum for the guidance of persons applying for protection of Inventions and Designs. Royal 8vo volumes, paper cover, 13 annas or 1s. 1d. Postage extra. To be had of the Superintendent, Government Printing, 8, Hastings Street, Calcutta, or of the Superintendent, Patents Branch, Department of Commerce and Industry, 2, Bankshall Street, Calcutta.

H. G. GRAVES,
Secretary under the Inventions and
Designs Act, V of 1888.

SULPHATE OF QUININE AND SULPHATE OF CINCHONIDINE.

Manufactured at the Bengal Government Cinchona Plantation.

These articles are guaranteed to be free from wilful admixture with other Cinchona Alkaloids. Quinine is for sale only to Government officers. Cinchonidine is for sale to Government officers and to dealers. Both Quinine and Cinchonidine are for sale for cash only and may be obtained from the Superintendent, Royal Botanic Garden, Sibpur, near Calcutta.

The rates from 1st April 1907 are as follows:—

| | | | | <i>To Government officers.</i> | | | <i>Post-free.</i> | | |

RAILWAYS.

The 3rd June 1907.

No. 77-R.—The following is published for general information with reference to Section 42 of the Land Acquisition Act, I of 1894 :—

Agreement made this 12th day of December 1905 between the Secretary of State for India in Council of the one part and the Scottpur Tea Company Limited of London where their registered office is hereinafter called the said Company of the other part. Whereas the said Company has applied to the Deputy Commissioner of Cachar for the acquisition of land under Chapter VII of the Land Acquisition Act I of 1894 for the purpose of constructing a tramway for the benefit of the Company as well in the interest of the Public and whereas an enquiry was held under Section 40 of the said Land Acquisition Act in order to ascertain whether the acquisition of the land applied for is needed for the construction of the tramway proposed by the said Company and whether the construction of the proposed tramway is likely to prove of benefit to the public and whereas the Deputy Commissioner of Cachar has under Section 41 of the aforesaid Land Acquisition Act submitted a report per his letter No. 1372 dated the 6th June 1905 to the Secretary to the Chief Commissioner of Assam embodying the result of the enquiry made under Section 40 of the aforesaid Land Acquisition Act to the Honourable the Chief Commissioner of Assam and whereas the Honourable the Chief Commissioner of Assam has been satisfied that the proposed acquisition is needed for the construction of the tramway to be made by the said Company and that the construction of a tramway by the said Company is likely to prove beneficial to the Public the Honourable the Chief Commissioner has by the Secretary's letter No. 1832 P. W. dated the 1st July 1905 to the Deputy Commissioner of Cachar been pleased to call upon the said Company to enter into an agreement with the said Secretary of State for India in Council and the said Company has by their Manager Mr. W. Mason's letter dated the 19th July 1905 expressed their willingness to enter into an agreement in accordance with the provision of Section 41 of the Land Acquisition Act of 1894.

It is hereby agreed between the said Secretary of State for India in Council and the said Company as follows :—

That the said Company shall pay to the said Secretary of State for India in Council the cost of the land to be acquired for the tramway to be made by the said Company and which is fully described in the schedule hereto.

(2) That the said Secretary of State for India in Council shall on the payment by the said Company to the said Secretary of State of the costs incurred by the Government in acquiring the land required for the said Company's tramway transfer the said lands to the said Company.

(3) That the Silchar Local Board shall grant the use of a portion of the Tarapur Road about one mile in length on condition that a 12 feet Road is made up by the said Company alongside and clear of the tram-line and that the Silchar Local Board shall arrange for the repairs and upkeep of the said road by their own Agents and at their own expense the said Company maintaining the tramway at the expense of the said Company.

(4) That the said Secretary of State for India in Council shall acquire a strip of land for a *bund* between the Tarapur Road and the Barak river about half a mile in length for the said Company provided the said Company shall construct and maintain in good order a 6 feet Public Road along the side of this *bund* and clear of the tramway.

(5) That the public shall have a right of way along the said Company's private Road leading from Lakhipur and Banskandi direct to Udharband Road in the Happy Valley.

(6) That the said Company shall provide a properly constructed level-crossing on the Manipur Road to the satisfaction of the Executive Engineer of the Cachar Division.

(7) That the said Company shall maintain the tram-line in such a way that it shall not in any way interfere with or obstruct the drainage of the Tarapur Road.

(8) That the said Company in constructing any sidings shall not encroach upon the 12 feet reserved for the purposes of the Tarapur Road.

(9) That the work shall be completed within 12 months from the date of this agreement.

(10) That in case of the infringement of the conditions stated above the said Secretary of State shall have the right of withdrawing the concession and rescinding this contract and of resuming the land acquired for the tramway.

In witness whereof the said Company has by their duly authorised agent hereto set their hand and seal this day and year first above written.

Scottpur Tea Company, Limited,

By their Attorney,
W. MASON.

The 12th December 1905.

Executed in my presence this day by W. Mason, Esq.

SUPPLEMENT TO

The Gazette of India.

No. 24.}

CALCUTTA, SATURDAY, JUNE 15, 1907

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

FREDERICK NOËL-PATON

Director-General of Commercial Intelligence

B. ROBERTSON

Offg. Secretary to the Government of India

Calcutta, June 14, 1907

The Gazette of India.

PUBLISHED BY AUTHORITY.

CALCUTTA, SATURDAY, JUNE 22, 1907.

Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART II.

Notifications by High Court, Comptroller General, etc.

GAZETTE OF INDIA.

NOTICE.

The 26th March 1907.

From the 6th April next till further notice, Parts I, IV, V, and VI of the *Gazette of India* and the Weather and Crop Report will be published at Simla. After the 30th March all notifications and other matter intended for publication in the *Gazette* should be addressed to the Officiating Publisher, at Simla.

Attention is invited to the following Circular Memorandum of the Government of India, Home Department, of August 1901:—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's *Gazette*, and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No. 777—79, dated 9th February 1877, the Government of India directed that all notifications or other matter intended for publication in the *Gazette of India* should be delivered at the Press not later than 2 P.M. on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's *Gazette*. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next *Gazette*."

J. P. HEWETT,

Secretary to the Government of India.

J. J. MEIKLE,

Publisher, *Gazette of India*.

GOVERNMENT OF INDIA. DEPARTMENT OF COMMERCE AND INDUSTRY.

INVENTIONS and DESIGNS.

Calcutta, the 20th June 1907.

NOTIFICATIONS.

No. 2230 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act during the week ending 17th June 1907:—

- No. 302 of 1907.—Daniel Mulcahy, gentleman, of High street, Fremantle, Western Australia. *Improvements in sash fasteners.*
- No. 303 of 1907.—Phelps and Company, civil and military tailors of Calcutta, Simla and Lahore, 15 Old Court House street, Calcutta. *An unbreakable forage cap.*
- No. 304 of 1907.—Ebrahim, watch-maker, and Shaik Jaffer, cloth merchant, both of Jumma Masjid, Shookawarpet, Sholapur, British India. *Improvements in warping machines.*
- No. 305 of 1907.—Ebrahim, watch-maker, and Shaik Jaffer, cloth merchant, both of Jumma Masjid, Shookawarpet, Sholapur, British India. *Improvements in apparatus for winding cotton onto bobbins and the like.*
- No. 306 of 1907.—Logie Pirie Watson, a partner in the firm of Messrs. Cooper Allen & Co., proprietors of the Government Boot and Army Equipment Factory, of Cawnpore, United Provinces of Agra and Oudh, British India. *Improvements in rifle- or carbine-carrying attachments for mounted troops.*
- No. 307 of 1907.—Keiichiro Okazaki, of Tokyo, in the empire of Japan. *Improvements in nitrogenous food products.*
- No. 308 of 1907.—Karter Singh, medical practitioner, Rawalpindi, India. *A disinfectant to be known as "plunas."*
- No. 309 of 1907.—Arthur W. Dove, publisher, of 27 Gardner's lane, Calcutta. *Locking apparatus known as the interchangeable keyless locking-bolt, for the protection of railway wagons, etc.*
- No. 310 of 1907.—Thomas Whittle, saddler, of Prahran, near Melbourne, in the state of Victoria, commonwealth of Australia. *Improvements in and connected with ships' progress indicators.*
- No. 311 of 1907.—William Henry Lock, a Director of Linotype and Machinery, Limited, of 188 and 189 Fleet street, in the city of London, England, John Glennie Holbourne, linotype operator, and Henry Alexander Longhurst, engineer, both of 188 Fleet street aforesaid. *Improvements in the escapement mechanism of linotype machines.*

No. 2240 P.—SPECIFICATIONS of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Madras, Bombay, and Burma, and the Director of the Department of Land Records and Agriculture, United Provinces of Agra and Oudh. These and other specifications are open to public inspection, from 11 A.M. to 3 P.M., at the Secretary's office, 2 Bankshall street, Calcutta, on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying:—

- No. 601 of 1906.—Edward Lennon Cantwell, consulting engineer, of 14 Lindsay street, Calcutta. *Improved method of covering roofs with sheet iron, galvanized or otherwise or other metal, whether the sheets be plain or corrugated.* (Specification filed 22 May 1907.)

No. 202 of 1907.—George Johnston, engineer, of 16 Balmoral road, Fairfield, Liverpool in the county of Lancaster, in the kingdom of England. *Improvements in railway vehicle couplings.* (Specification filed 5 June 1907.)

No. 226 of 1907.—Samuel Cleland Davidson, merchant, of Sirocco Engineering Works, Belfast, Ireland. *Improvements in stoves and apparatus for heating air.* (Specification filed 10 June 1907.)

No. 2241 P.—THE fees prescribed in the fourth schedule to the Inventions and Designs Act of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each:—

No. 12 of 1895.—Jean Reuse. *Improvements in machines for the manufacture of cigars.* (From 26 June 1907 to 26 June 1908.)

No. 247 of 1895.—George Westinghouse, Junior. *Improvements in buffers and draw bars.* (From 14 November 1907 to 14 November 1908.)

No. 95 of 1896.—John French Golding. *Improvements in machines for manufacturing open or reticulated metal work.* (From 24 August 1907 to 24 August 1908.)

No. 96 of 1896.—John French Golding. *An improved method of manufacturing open or reticulated metal work.* (From 24 August 1907 to 24 August 1908.)

No. 75 of 1900.—Albert Taylor, Willie Brooke, Newton Brooke and Aspinall Brooke. *Improvements in and in connection with hydraulic presses and in the manufacture thereby of artificial stone slabs or the like.* (From 13 June 1907 to 13 June 1908.)

No. 87 of 1902.—Benjamin Garver Lamme. *Improvements in dynamo electric generators.* (From 2 July 1907 to 2 July 1908.)

No. 142 of 1903.—The Dolter Electric Traction Limited. *Improvements in surface contact electric traction systems.* (From 29 July 1907 to 29 July 1908.)

No. 164 of 1903.—Hugh McPhail. *Improvements relating to apparatus for superheating or drying steam.* (From 11 June 1907 to 11 June 1908.)

No. 225 of 1903.—Consolidated Railway Electric Lighting and Equipment Company. *Improvements in apparatus and devices for controlling electric currents.* (From 21 July 1907 to 21 July 1908.)

No. 2242 F.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act of 1888, the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2), of the said Act the exclusive privilege of making, selling, and using the said inventions in British India, and of authorizing others so to do, has ceased:—

No. 464 of 1901.—Robert John Baldrey. *A grip mono-rail system to be worked by steam, electricity or animal power.* (Specification filed 9 March 1903.)

No. 168 of 1902.—Baron Victor Barreto. *Improvements in the process of manufacturing building blocks or bricks and apparatus for use in connection therewith.* (Specification filed 10 March 1903.)

No. 322 of 1902.—The Improved Electric Glow Lamp Company, Limited, and Haydn Thies Harrison. *Improvements in or relating to electric arc lamps.* (Specification filed 11 March 1903.)

Fee in respect of the continuance of an exclusive privilege—

4 (a) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of Rs 50 for each of the above inventions.

No. 440 of 1899.—Josiah Byram Millet. *Improvements in and relating to submarine telegraphy and to apparatus therefor.* (Specification filed 12 March 1900.)

Fee in respect of the continuance of an exclusive privilege—

4 (d) After the expiration of the sixth year and before the expiration of the seventh year from the date of the filing of the specification—

The sum of Rs 50 for the above invention.

No. 1 of 1894.—George Ernest Hudson and George Sanderson. *Improved apparatus for supplying purified and heated feed-water to the boilers of non-condensing steam engines.* (Specification filed 12 March 1894.)

Fee in respect of the continuance of an exclusive privilege—

4 (j) After the expiration of the twelfth year and before the expiration of the thirteenth year from the date of the filing of the specification—

The sum of ₹100 for the above invention.

NOTICES.

All communications relating to applications for leave to file specifications and for registration of designs under the Inventions and Designs Act, 1888 (V of 1888), or in continuation of such applications, should be addressed to the Patents Secretary, 2, Bankshall Street, Calcutta.

The Office of the Secretary under the Inventions and Designs Act, 1888, will in future be open for the transaction of business from 11 A.M. to 3 P.M. on all days, except Sundays and gazetted holidays.

The Government of India are advised that, as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash and applicants are warned that they must be responsible for any delay in cashing cheques.

Cheques and money orders will only be accepted if made payable *at Calcutta* to the Secretary under the Inventions and Designs Act.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's Office are now on sale to the public at one anna and eight annas a copy, respectively. Consolidated indexes for 1905 and for 1906, entitled "Inventions and Designs," are also on sale, price one rupee each. They contain a chronological list, subject-matter and name indexes of exclusive privileges for inventions, which have been obtained or applied for in the year, together with lists of designs applicable.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitors' room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified: or, if the 10th day is a holiday, till the evening of the office day next following.

At the time of delivering or sending an application for leave to file a specification, the applicant shall cause a duplicate copy of the application to be delivered or sent therewith to the Secretary.

The Inventions and Designs Act (V of 1888), with the notifications and rules issued under its provisions and the notices of the office of Inventions and Designs, to which is added an explanatory memorandum for the guidance of persons applying for protection of Inventions and Designs. Royal 8vo volumes, paper cover, 13 annas or 1s. 1d. Postage extra. To be had of the Superintendent, Government Printing, 8, Hastings Street, Calcutta, or of the Superintendent, Patents Branch, Department of Commerce and Industry, 2, Bankshall Street, Calcutta.

H. G. GRAVES,
Secretary under the Inventions and
Designs Act, V of 1888.

Cinchona Febrifuge is sold also by the principal druggists in Calcutta.

**ORDERS BY THE HON'BLE THE CHIEF COMMISSIONER
OF AJMER-MERWARA.****NOTIFICATIONS.**

Mount Abu, the 10th June 1907.

No. 700.—In supersession of the rules published in this office Notification No. 568-C-115-II, dated the 5th February 1892, the Hon'ble the Chief Commissioner is pleased to make the following rules under the Land Improvement Loans Act, 1883, section 10 :—

I. The Hon'ble the Chief Commissioner will inform the Commissioner of Ajmer what amount will be placed at his disposal for loans under the Act for each financial year. The Commissioner will divide the sum between Ajmer and Merwara at his discretion and may transfer for expenditure in either of the districts any part of the amount allotted by him for expenditure in the other. But the total expenditure in the two districts must be kept within the amount assigned by the Hon'ble the Chief Commissioner. If an additional grant is required application should at once be made for it.

II. Subject to the provisions of these rules and within the limits of the funds allotted to them for the purpose any Assistant Commissioner especially empowered by the Hon'ble the Chief Commissioner in this behalf may grant loans not exceeding Rs500 for any one improvement for purposes specified in the Act. Loans exceeding Rs500 for any one work require the sanction of the Commissioner and loans exceeding Rs5,000 the sanction of the Hon'ble the Chief Commissioner. The Commissioner or the Chief Commissioner may call for such detailed plans and estimates or such professional opinion with respect to a project as may seem necessary.

III. An application for a loan may be made to any Revenue Officer of or above the rank of a Girdawar.

IV. The application if made in writing should be as nearly as possible in Form A. If an oral application is made the officer to whom it is made shall cause it to be recorded as nearly as possible in that form.

V. In respect of every application made under Rule III an enquiry shall be made by a Revenue Officer not below the rank of Girdawar if the loan applied for does not exceed Rs500 or of Naib Tahsildar when it exceeds that sum for the purpose of ascertaining the particulars mentioned on the reverse of the Form A. Such enquiry need not be elaborate and should not be carried further than is necessary with due regard to the security of the loan. If, in the opinion of the Assistant Commissioner, Revenue Extra Assistant Commissioner or Tahsildar, it is expedient that public notice of the application should be given under section 5 of the Act he will publish a notice thereof by fixing it up in a conspicuous place in the village or in each village which will be affected by the proposed improvement.

VI. (1) Where the amount of loan applied for does not exceed three-fourths of the value of the land offered in security after the improvement has been carried out no collateral security will be required.

(2) When a loan is applied for by the members of a village community or by a group of land proprietors on their own joint personal security, the Commissioner or the Assistant Commissioner, as the case may be, may, at his discretion, advance on such security an amount not exceeding five times the annual assessment of the land held by the applicants.

(3) Personal security may also be accepted in special cases where the Commissioner or the Assistant Commissioner, for reasons to be recorded by him in writing, thinks it desirable.

VII. Persons from whom arrears of land revenue are due or who have not repaid a takavi loan previously advanced may, at the discretion of the Commissioner or the Assistant Commissioner, be granted further loans if the security offered is sufficient.

VIII. The date for the repayment of the first instalment shall be fixed with reference to the time when the improvement will yield a return.

The period of grace should not, however, exceed 2½ years in any case and interest should be charged during its currency.

IX. The date for the repayment of the last instalment shall not, without the sanction of the Chief Commissioner, exceed 20 years from the date on which the loan or the last instalment of it was advanced. The amount of the instalments shall be fixed with reference to the annual profit likely to accrue from the improvement.

X. When a loan is granted the borrower shall be shown the three tables of equated payments attached to these rules which shall be explained to him and it shall be left to him to choose, subject to the approval of the lending authority, the manner and term in which the loan is to be repaid. No distinction shall be made in the account given to the

borrower between capital and interest. All he need be told is the amount to be paid by him at each instalment and the number of instalments he will have to pay.

XI. The Revenue Officer to whom an application for takavi is sent for enquiry shall see that the amount applied for is sufficient to cover so much of the total outlay required to construct the work as the borrower is unable to provide from his own resources. Applications for the grant of loans which are inadequate to meet the cost of the work to be performed should not be recommended unless there is no doubt of the applicant's ability to provide the balance without extraneous assistance and no loan should be recommended or granted for any improvement the profitable working of which is beyond the applicant's resources.

XII. On completion of the enquiry and verification of the security the officer to whom the application was made may sanction the loan himself if empowered to do so. Otherwise he shall forward the application with his report with the least possible delay through his superior Revenue Officer, if any, to the officer who is empowered to sanction the loan.

XIII. An order granting a loan shall be in Form B hereto annexed and shall be signed by the applicant in token that he understands and agrees to the conditions contained therein. When sureties (if any) whom the applicant is required to furnish give personal security, only the bond to be executed by them shall be in Form C hereto annexed. When immoveable property is required to be given as collateral security the security bond shall be in Form D hereto annexed.

XIV. In the case of a loan of Rs 100 or more, the amount shall be advanced in instalments, the second instalment not being granted until the lending authority is satisfied that work to the value of the first instalment has been executed and so on. For this purpose the work shall be inspected by the Revenue Officer who made the original enquiry and the result reported at least a week before the next instalment falls due. Revenue officers should keep a careful record of the dates on which any instalment of a loan falls due, and should arrange to inspect the work in good time.

XV. A copy of the order shall be given to the applicant, and payment of the loan, or where the loan is advanced in instalments, of each instalment of the loan, shall be made at the treasury on its presentation. The Treasury Officer shall send the Tahsildar immediate notice of all payments made.

XVI. (1) The rate of interest shall be one anna in the rupee or $6\frac{1}{4}$ per cent. per annum.

(2) If an instalment is not paid when it falls due, the Commissioner may, if he thinks fit, charge interest on it at any rate not exceeding $6\frac{1}{4}$ per cent. per annum from the date of its falling due to the date of payment. Such interest should not be levied in cases in which the failure is due to the defaulter's inability to pay or in which the levy of such interest would be productive of hardship.

XVII. The dates for repayment of instalments of a loan should usually be the dates fixed for payment of instalments of land revenue.

XVIII. Instalments may be suspended by order and at the discretion of the officer, who has authority to grant the loan, on proof of failure of crops or other exceptional calamity but when suspensions of revenue are granted on a large scale over a wide area they will carry with them automatically suspensions of the takavi instalments which may fall due during that year.

XIX. A suspended instalment should not be made payable in the ensuing year with the instalment of that year. The effect of suspension will be to postpone for one instalment period the payments of all remaining instalments due on the loan.

XX. (1) Ordinarily no loan made under these rules or any portion of it shall be remitted, but the Chief Commissioner may remit the whole of it or any outstanding instalment or instalments or a part thereof in cases in which he is satisfied that the work for which the loan was granted has failed from causes beyond the borrower's control and when the recovery of the loan or any part of it would occasion serious hardship.

(2) When any loan or a part of it is found to be irrecoverable a special report shall be made to the Chief Commissioner who may pass such orders thereon as he thinks fit.

XXI. Any Revenue Officer not inferior in rank to a Girdawar may at any time enter on and inspect any land for the benefit of which a loan has been granted and any work in progress thereon or direct any Patwari or other subordinate revenue official to inspect such land or work.

XXII. As soon as may be after a loan has been granted the officer or authority granting it shall cause the Patwari of the circle in which the land to be improved is situated to copy into his *Rosnamcha* so much of the order granting the loan as relates to the amount of the loan, the manner in which the loan is to be advanced, the nature of the improvement for the purpose of which it has been granted and the time or times by which the whole or parts of the improvement is or are to be completed.

XXIII. The Chief Commissioner shall regulate the forms of all returns, registers and accounts relating to advances under the Act.

XXIV. For the purposes of these rules, a Revenue Officer includes a Girdawar.

A.

Form of Application.

| Name; residence, etc., of applicant. | Amount of loan required. | Nature of security offered | Nature of proposed im- provement. | Situation of the land. | Applicant's rights in the land. | Proposed dates of repayment. |
|---|--------------------------------|----------------------------------|---|------------------------------|---------------------------------------|---------------------------------|
| | | | | | | |

Applicant's signature.

Note.—(1) The State will advance money to landlords and cultivators for the construction of wells or tanks, the reclamation of waste, or any work by which the value of the land will be permanently increased.

(2) Application for a loan may be made to Tahsildar or Naib Tahsildar or Girdawar in the above form, free of stamp duty.

(3) The rate of interest will be one pie per rupee per month (*i.e.*, $6\frac{1}{2}$ per cent. per annum) and instalments will be distributed over a number of years.

(4) If the value of the applicant's interest in the land to be improved is sufficient to cover the loan, collateral security will not ordinarily be required. Collateral security may consist of other lands belonging to the applicant or of land belonging to other persons who are willing to become his sureties or personal security. The joint personal security of several proprietors may, at the discretion of the Commissioner or Assistant Commissioner, be accepted as sufficient security, provided that the amount of loan does not exceed five times the annual assessment of the land held by such proprietors. The personal security of the members of a village community or of a group of proprietors jointly and severally bound for the repayment of a loan may, at the discretion of the Commissioner or Assistant Commissioner be accepted.

In other cases personal security can be accepted only with the previous sanction of the Commissioner or Assistant Commissioner.

Moveable property should not be accepted as security.

Particulars to be filled in by Inspecting Officers (Reverse of Form A).

I. Mahal and the field number and area of the land to be improved.

II. Status of applicant, that is to say, proprietor or tenant. If a tenant and the landlord's consent is required, whether the landlord consents.

III. Security.

(1) If the land itself, or an interest therein, the value of land, or the nature and value of the interest, as the case may be.

(2) If personal, the names and status of the sureties.

(3) If property other than the land itself or an interest therein, the nature of the property, the pre-existing encumbrances (if any) thereon, and its value.

IV. The improvement.

(1) Its estimated utility and value.

(2) Objections, if any, of third parties.

(3) Date on which it will begin to yield profit.

V. Repayment.

(1) Suitable date for first instalment, with reference to IV (3).

(2) Proposed instalments and period of repayment.

VI. Date or dates on which the loan or instalments of it should be received by the applicant.

Recommendations of Inspecting Officer after verification of the above in the registration and revenue offices of the Tahsil.

Note.—In recording his opinion on heads II and III (1) the Inspecting Officer should note on the following points :—

(a) Whether the interest of the applicant in the land to be improved is transferable by law or usage having the force of law.

(b) Whether there exists in the land any interest other than that of the borrower and of mortgagees or of persons having charges on the borrower's interest, and if there be any such interest, the nature and value of that interest and whether the holder of that interest has any objection to the proposed improvement.

(c) The mortgages of other incumbrances, if any, on the land or the interest in the land to be improved and their amounts with dates.

(d) Whether these have been recorded in the Mutation Register.

(e) Whether the mortgagee is in possession, and, if so, whether he agrees to be liable for the repayment of the loan applied for.

(f) In the last mentioned case the agreement should be in writing and attested by at least two witnesses.

FORM B.

Order granting a loan under the Land Improvement Loans Act, 1883.

1. The sum of R

is hereby

* To be inserted when the person to whom the loan is made has no right to make the improvement without the consent of another person.

granted to A B, son of
* with the consent of C D

, the record whereof is thereto annexed] as a loan under the Land Improvement Loans Act, 1883, for the purpose of (*here describe the work to be carried out*) for the benefit of (*here describe the land to be benefited*) subject to the following conditions.

2. The conditions referred to are as follows :—

(a) That the amount of his loan shall be paid to the aforesaid A B on the production of this order at the treasury of [†] in the instalments and on the dates specified below :—

Dates.

Instalments.

(b) That the amount of this loan, with interest charged thereon and costs (if any) incurred in the making thereof shall be repayable to the person named, and at the place, on the dates, and by the amounts specified below :—

| Name. | Place. | Date. | Principal. | Interest. | Costs (if any). | Total. |
|-------|--------|-------|------------|-----------|-----------------|--------|
|-------|--------|-------|------------|-----------|-----------------|--------|

(c) That this loan shall be applied solely to the purpose specified above, and that if it shall be proved to the satisfaction of the Commissioner that any part of the loan has been misapplied, the whole amount of the loan shall, with such interest as may have become due thereon, as well as costs (if any), be deemed to at once become due.

(d) That unless (*here enter any conditions as to the period or periods appointed for commencing or completing the work*) has been commenced by (date) or completed by (date)—(as the case may be)—the loan shall be held to have been misapplied.

(e) That for the repayment of the loan with interest and costs (if any) due on the same, the immoveable property specified in the margin is in addition to the land for the benefit of which the loan is granted, hypothecated as collateral security to the Government.

Note.—All immoveable property hypothecated as collateral security, whether by the borrower himself or by a surety or sureties, should be specified in the margin of this clause of the order granting the loan, and should, as well as the land to be improved, be described as nearly as may be in the manner prescribed in section 21 of the Indian Registration Act, 1877.

Signature of the officer granting the loan.

I have understood and agreed to the aforesaid terms and conditions.

Signature of the person to whom the loan is granted.

FORM C.

• Security bond to be used when the surety or sureties gives or give personal security only.

Whereas • has on received from the *(here enter name of officer)* an order under the Land Improvement Loans Act, 1883, in virtue of which he is entitled to receive the aggregate sum of rupees as a loan from the Government for the purpose of *(here describe the work to be carried out)* for the benefit of *(here describe the land to be benefited)* we *(or I)* hereby agree that if the said shall fail to repay any instalment of the said loan, or interest chargeable thereon or costs (if any) incurred in the making thereof, on the date on which it may become due, we *(or I)* will be jointly and severally liable to the Government for such sum not exceeding as may be necessary to make good the amount which in consequence of his default he may have become liable to pay.

FORM D.

Security bond to be used when immoveable property is given as collateral security.

Whereas has received from the *[here enter name of officer]* an order under the Land Improvement Loans Act, 1883, in virtue of which he is entitled to receive the aggregate sum of rupees as a loan from the Government for the purpose of *(here describe the work to be carried out)* for the benefit of *(here describe the land to be benefited)*, and whereas collateral security for the punctual repayment of the loan according to the terms of the order is demanded from the said ,

*To be used when the collateral security is the property of the borrower.

†To be used when the collateral security belongs partly to the borrower and partly to other persons.

‡To be used when the collateral security belongs wholly to persons other than the borrower.

* I the said or † we) mortgage to the Government the immoveable property mentioned in the schedule below as a collateral security, and agree that if I fail *(or the said*

fails) to repay any instalment of the said loan or interest chargeable thereon or costs (if any) incurred in the making thereof, on the date on which it may become due, it shall

be lawful for the Collector to recover from the said property such sum as may be necessary to make good the amount which in consequence of my *(or the said*

's) default may be due from me *(or him)*.

No. 701.—In supersession of the rules published in this office Notification No. 1151, dated the 19th October 1885, the Hon'ble the Chief Commissioner is pleased to make the following rules under section 4 of the Agriculturists' Loans Act, 1884.

PART A.

Ordinary Loans.

I. The Chief Commissioner will inform the Commissioner what amount will be placed at his disposal for loans under the Act for each financial year.

The Commissioner will divide this sum between Ajmer and Merwara at his discretion and will have the power of transferring from one district to the other. But the whole expenditure in the two districts will be kept within the total amount assigned. If an additional grant is required it will be at once applied for by telegram, if necessary.

II. An application for a loan may be made to any Revenue Officer of or above the rank of a Girdawar.

III. The application if made in writing should be as nearly as possible in Form A attached. If an oral application is made, the officer to whom it is made shall cause it to be recorded as nearly as possible in that Form.

IV. In respect of every application made under Rule II an enquiry shall be made by a Revenue Officer not below the rank of Girdawar, if the loan applied for does not exceed Rs. 100, or of Naib Tahsildar when it exceeds that sum for the purpose of ascertaining the particulars required in Form A. Such enquiry need not be elaborate and should not be carried further than is necessary with due regard to the security of the loan. If in the opinion of the Collector, Revenue Extra Assistant Commissioner or Tahsildar, it is expedient that public notice of the application should be given, he will publish a notice thereof by fixing it up in a conspicuous place in the village in which the applicant resides.

V. (1) When the amount of loan applied for does not exceed $\frac{2}{3}$ th of the value of the land offered in security, no collateral security will be required.

(2) When a loan is applied for by the members of a village community or by a group of land proprietors on their own joint personal security, the Collector or the Tahsildar, as the case may be, may at his discretion advance on such security an amount not exceeding five times the annual assessment of the land held by the applicants.

(3) Personal security may also be accepted in special cases where the Collector or the Tahsildar, as the case may be, for reasons to be recorded by him in writing, thinks it desirable.

VI. The rate of interest upon the loans will be one anna in the rupee or 6½ per cent. per annum.

VII. The dates fixed for instalments will not extend over more than ten years as a maximum. Loans for seed will ordinarily be repaid from the crop produced from the seed, and those for purchase of plough cattle will ordinarily be repaid within two years.

VIII. The dates for payment of instalments will usually be the dates fixed for payment of the land revenue loans being recoverable as arrears of land revenue.

IX. Compound interest may be charged at the discretion of the Collector upon all overdue instalments of interest or of principal and interest. Such interest should not be levied, however, in cases in which the failure is due to the defaulter's inability to pay or in which the levy of such interest would be productive of hardship.

X. When any loan or a part of it is found to be irrecoverable, a special report shall be made to the Chief Commissioner who may pass such orders thereon as he thinks fit.

XI. Annual statements of loans and collections will be submitted in the forms annexed by the Commissioner to the Chief Commissioner on the 1st of June for the year ending on the preceding 31st March.

XII. Subject to the provisions of these rules the grant of loans will be absolutely within the discretion of the Collector or of the Tahsildar if especially empowered by the Hon'ble the Chief Commissioner in this behalf, but the allotment made for either of the two districts must not be exceeded without the sanction of the Commissioner. The Tahsildar should keep the Collector informed of the loans granted by him.

PART B.

Loans for the relief of distress.

I. Loans for the relief of distress may be made to owners and occupiers of arable land in accordance with the preceding rules to preserve their cattle and to enable them and their dependents to subsist until the ripening of the next crop, subject to the following modifications:—

II. These loans will be recoverable in the same way as ordinary loans but within a maximum period of three years.

III. When the officer authorised to grant loans is satisfied by enquiry made through the Tahsildar or otherwise that a loan is necessary and will be repaid, he will order a loan to be given to the extent considered absolutely necessary and will fix by written order the instalments by which it is to be given and repaid. When the number of such loans is large the necessary enquiries should be made well before hand in order that the money may be disbursed without delay when actually required.

IV. The loans will usually be given by instalments monthly or every two months.

V. Payments of the loan sanctioned may be made in the presence of the officer ordering the loan or of the Tahsildar, and shall be attested by the signature of such officer or Tahsildar.

VI. The loans are meant primarily for small land owners and as they are recoverable as land revenue, it will not generally be necessary to take security for them, provided that they are covered by the value of the recipients' property and if they are not, the loan will not be given unless some sufficiently substantial person becomes security.

VII. The loans may also be made to occupancy tenants provided that some sufficiently substantial person becomes security.

VIII. Monthly returns of the loans will be prepared and submitted to the Commissioner, loans made for subsistence being kept separate from other loans.

Explanation I.—For the purposes of the foregoing rules the "Collector" means a "Collector" as defined in the Ajmer Land and Revenue Regulation, 1877.

Explanation II.—The expression "owners and occupiers of arable land" means any cultivator in the districts of Ajmer and Merwara and includes an Istimrardar, Jagirdar, Muafidar and Bhumia.

Explanation III.—For the purposes of these rules a Revenue Officer includes a Girdawar.

Form A.

Application for Taccavi Loan under Act XII of 1884.

No. 702.—In supersession of the orders contained in Notification No. 858—115-II, dated the 9th August 1886, the Hon'ble the Chief Commissioner of Ajmer-Merwara is pleased to issue the following orders with regard to the procedure to be followed under Rules V and XXIII of the Rules framed under Act XIX of 1883 (Land Improvement Loans Act) published under his Notification No. 700, dated 10th June 1907 :—

(1) When it appears that the land to be improved is subject to a mortgage or other lien or charge or that there exists any superior or subordinate interest in such land a notice under section 5 of the Land Improvement Loans Act should invariably be issued calling for objections to the grant of the loan. Such objections should be in writing.

(2) If any encumbrance has not been recorded in the mutation register as required by the rules contained in the schedule annexed to the Hon'ble the Chief Commissioner's Notification No. 801—562-III, dated the 16th July 1895, the claim of the encumbrancer may ordinarily be disregarded in estimating the value of the security offered, unless it is admitted by the borrower; and if it be not brought forward by the encumbrancer himself, in compliance with the notice issued under section 5 of the Act, it may be disregarded altogether.

(3) The enquiry required by rule V need not be an elaborate investigation of documents registered under the Registration Act, and should not be carried further than is necessary with due regard to the security of the loan.

(4) Under rule XXIII the following printed and bound registers shall be kept in the forms annexed :—

(i) Register of applications for loans.

To be kept by all Revenue Officers of and above the rank of Girdawar.

(ii) Register of accounts of loans and repayments.

To be kept—

(a) for the entire Commissionership by the Sadar Wasil-baki-Navis;

(b) for each Tahsil by the Wasil-baki-Navis, the Tahsildar being responsible for all entries being duly made. At the time of making the Khatauni of each village the Wasil-baki-Navis shall be responsible to the Tahsildar that the demand is entered in its proper column. Each work for which a separate loan is granted shall be entered on a separate page in the register.

(iii) Register of receipts to be given on repayment of loans or instalments.

To be kept by Tahsildars who shall give the receipts at the time of repayment.

The number of the receipt shall be entered in column 20 of register II.

(iv) Register of half-yearly accounts.

RAILWAYS.

The 3rd June 1907.

No. 77-R.—The following is published for general information with reference to Section 42 of the Land Acquisition Act, I of 1894 :—

Agreement made this 12th day of December 1905 between the Secretary of State for India in Council of the one part and the Scottpur Tea Company Limited of London where their registered office is hereinafter called the said Company of the other part. Whereas the said Company has applied to the Deputy Commissioner of Cachar for the acquisition of land under Chapter VII of the Land Acquisition Act I of 1894 for the purpose of constructing a tramway for the benefit of the Company as well in the interest of the Public and whereas an enquiry was held under Section 40 of the said Land Acquisition Act in order to ascertain whether the acquisition of the land applied for is needed for the construction of the tramway proposed by the said Company and whether the construction of the proposed tramway is likely to prove of benefit to the public and whereas the Deputy Commissioner of Cachar has under Section 41 of the aforesaid Land Acquisition Act submitted a report per his letter No. 1372 dated the 6th June 1905 to the Secretary to the Chief Commissioner of Assam embodying the result of the enquiry made under Section 40 of the aforesaid Land Acquisition Act to the Honourable the Chief Commissioner of Assam and whereas the Honourable the Chief Commissioner of Assam has been satisfied that the proposed acquisition

is needed for the construction of the tramway to be made by the said Company and that the construction of a tramway by the said Company is likely to prove beneficial to the Public the Honourable the Chief Commissioner has by the Secretary's letter No. 1832 P. W. dated the 1st July 1905 to the Deputy Commissioner of Cachar been pleased to call upon the said Company to enter into an agreement with the said Secretary of State for India in Council and the said Company has by their Manager Mr. W. Mason's letter dated the 19th July 1905 expressed their willingness to enter into an agreement in accordance with the provision of Section 41 of the Land Acquisition Act of 1894.

It is hereby agreed between the said Secretary of State for India in Council and the said Company as follows:—

That the said Company shall pay to the said Secretary of State for India in Council the cost of the land to be acquired for the tramway to be made by the said Company and which is fully described in the schedule hereto.

(2) That the said Secretary of State for India in Council shall on the payment by the said Company to the said Secretary of State of the costs incurred by the Government in acquiring the land required for the said Company's tramway transfer the said lands to the said Company.

(3) That the Silchar Local Board shall grant the use of a portion of the Tarapur Road about one mile in length on condition that a 12 feet Road is made up by the said Company alongside and clear of the tram-line and that the Silchar Local Board shall arrange for the repairs and upkeep of the said road by their own Agents and at their own expense the said Company maintaining the tramway at the expense of the said Company.

(4) That the said Secretary of State for India in Council shall acquire a strip of land for a *bund* between the Tarapur Road and the Barak river about half a mile in length for the said Company provided the said Company shall construct and maintain in good order a 6 feet Public Road along the side of this *bund* and clear of the tramway.

(5) That the public shall have a right of way along the said Company's private Road leading from Lakhipur and Banskandi direct to Udhband Road in the Happy Valley.

(6) That the said Company shall provide a properly constructed level-crossing on the Manipur Road to the satisfaction of the Executive Engineer of the Cachar Division.

(7) That the said Company shall maintain the tram-line in such a way that it shall not in any way interfere with or obstruct the drainage of the Tarapur Road.

(8) That the said Company in constructing any sidings shall not encroach upon the 12 feet reserved for the purposes of the Tarapur Road.

(9) That the work shall be completed within 12 months from the date of this agreement.

(10) That in case of the infringement of the conditions' stated above the said Secretary of State shall have the right of withdrawing the concession and rescinding this contract and of resuming the land acquired for the tramway.

In witness whereof the said Company has by their duly authorised agent hereto set their hand and seal this day and year first above written.

Scottpur Tea Company, Limited,

By their Attorney,

W. MASON.

The 12th December 1905.

Notifications by High Court, Comptroller General, etc.

GAZETTE OF INDIA.

NOTICE.

The 26th March 1907.

From the 6th April next till further notice, Parts I, IV, V, and VI of the *Gazette of India* and the Weather and Crop Report will be published at Simla. After the 30th March all notifications and other matter intended for publication in the *Gazette* should be addressed to the Officiating Publisher, at Simla.

Attention is invited to the following Circular Memorandum of the Government of India, Home Department, of August 1901:—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's *Gazette*, and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No. 777—79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for publication in the *Gazette of India* should be delivered at the Press not later than 2 P.M. on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's *Gazette*. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next *Gazette*."

J. P. HEWETT,

Secretary to the Government of India.

O. T. BARROW,
Comptroller General.

The 27th June 1957.

GOVERNMENT OF INDIA. DEPARTMENT OF COMMERCE AND INDUSTRY.

INVENTIONS and DESIGNS.

Calcutta, the 27th June 1907.

NOTIFICATIONS.

No. 2305 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act during the week ending 24th June 1907:—

- No. 312 of 1907.—Thomas Oswald Mein, engineer, of 6 Wallwood road, Leytönstone, in the county of Essex, England. *Improvements in mechanism for controlling the action of railway wagon and other fall down doors and flaps.*
- No. 313 of 1907.—William Edward Murray, engineer, of 702 Lankershim Building, in the city of Los Angeles, in the county of Los Angeles, state of California, United States of America. *Improvements in steady floating structures.*
- No. 314 of 1907.—Frank Swales, gentleman, of Palewell Lodge, East Sheen, in the county of Surrey, England. *Improvements in or relating to bits.*
- No. 315 of 1907.—William James Gell, Managing Director of Wright, Bindley and Gell, Limited, manufacturers, of Armstrong Works, Chester street, Aston road, Birmingham, in the county of Warwick, England, and Joseph Frederick Boham, Manager of Works at Wright, Bindley and Gell, Limited, aforesaid. *Improvements in closing umbrellas and parasols.*
- No. 316 of 1907.—Bertram Parrott Gray, solicitor, of 43 Summer row, in the city of Birmingham, England. *A combined horse shoe and pad.*
- No. 317 of 1907.—Georg Loebbecke, Managing Director, of Zehlendorf near Berlin, in the kingdom of Prussia, German Empire. *Paper bag and process for the manufacturing of craped or goffered paper.*
- No. 318 of 1907.—Motilal Chhotalal Mehta, weaving master, and The Gayajee Loom Works, Limited, manufacturers, of Baroda, India. *Improvements in take-up motions for looms.*
- No. 319 of 1907.—Gangadhar Ramchandra Mangrulkar, match manufacturer, of 810 Kasba Peth, Sholapur city. *Improvements in the manufacture of grass matches.*
- No. 320 of 1907.—Hans Carl Albrecht, gentleman, of Chaussee Strasse 24a, Berlin Empire of Germany. *Improvements in the method of producing incandescent mantles.*
- No. 321 of 1907.—Archibald Frank Stevenson, engineer of the St. Helens Cable and Rubber Company, Limited, of Warrington, in the county of Lancaster, England. *Improvements relating to pneumatic hubs for vehicles.*
- No. 322 of 1907.—James Ward, Managing Director of the Northern Quarries Company, Limited, Grange-over-Sands, in the county of Lancaster, England. *Improvements in or connected with the preparation and manufacture of tar paving.*
- No. 323 of 1907.—Adolph Gustave Kaufman, mechanical engineer, of No. 133 Reade street, New York, in the county and state of New York, Benjamin Lazarus Weil and Berthold Weil, capitalists, both of No. 198 Broadway, New York, all in the United States of America. *Improvements in seals or closures for bottles and the like receptacles.*
- No. 324 of 1907.—George Wilkinson, engineer, of Beech Mount, Harrogate, in the county of York, England. *Improvements in and relating to direct contact feed water heaters for steam boilers and the like.*

No. 325 of 1907.—John Thompson Steele, Secretary to a Public Company, of "Hove Dene," 60 Oakfield road, West Croydon, in the county of Surrey, England. *Improvements in locking devices for loose leaf ledgers and other volumes of a similar character.*

No. 326 of 1907.—Angelo Cipriano Baronio, telegraphic code specialist, of 20 Copthall Avenue, in the city of London, England. *Improvements in and relating to electric telegraphy.*

No. 2306 P.—SPECIFICATIONS of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Madras, Bombay, and Burma, and the Director of the Department of Land Records and Agriculture, United Provinces of Agra and Oudh. These and other specifications are open to public inspection, from 11 A.M. to 3 P.M., at the Secretary's office, 2 Bankshall street, Calcutta, on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying:—

No. 486 of 1906.—Priya Nath Roy, overseer, Darjeeling Municipality, Darjeeling. *A semi-automatic spinning wheel, being a rustic machine with common material to be called Sarala Charka.* (Specification filed 1 June 1907.)

No. 564 of 1906.—Cuthbert Harrison Thew, foreman, South Indian Railway, of Negapatam, in British India. *A new or improved guards warning for break aways.* (Specification filed 15 June 1907.)

No. 567 of 1906.—John Miles Moffat, electrical engineer, of 448 Merton road, Wandsworth, London, England, Reuben James Bolt, electrical engineer, of 235 Phillip lane, Tottenham, London, England, John William Manley, electrical engineer, of Segary Villa, Hadley road, New Barnet, England, and the Electric Safety Appliances Company, Limited, manufacturers, of Eldon Street House, Elson street, London, England. *A new or improved method of winding the coils of electric measuring or indicating apparatus and the application thereof to instruments for detecting and obviating leakage from conductors of electricity.* (Specification filed 15 June 1907.)

No. 568 of 1906.—Alexandre Tropenas, engineer, of 10 Grande Rue, Montelimar, in the Department of Drome, in the Republic of France. *Improvements in the manufacture of steel by the pneumatic process.* (Specification filed 15 June 1907.)

No. 149 of 1907.—Henry Ernest Weskin, marine engineer, of No. 3 Ripon street, in the town of Calcutta. *An automatic electric safety fuse replacer.* (Specification filed 28 May 1907.)

No. 223 of 1907.—Andrew Shirra Gibb, assistant engineer, Public Works Department, c/o H. V. Williams & Co., 14 Hare street, Calcutta, India. *A self-regulating apparatus for delivering a constant supply of water for irrigation or like purposes.* (Specification filed 14 June 1907.)

No. 242 of 1907.—Robert Dawes, manufacturer of spinning and twisting machinery, of Trenton and Erie Avenues, in the city of Philadelphia, state of Pennsylvania, United States of America. *Improvements in spinning and twisting machinery.* (Specification filed 13 June 1907.)

No. 2307 P.—THE fees prescribed in the fourth schedule to the Inventions and Designs Act of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each:—

* No. 147 of 1899.—Alexander Mischenetzky. *Process for the manufacture of a new refractory material.* (From 27 June 1907 to 27 June 1908.)

No. 200 of 1903.—John Henry Elspass. *Improvements in pulverising mills.* (From 21 December 1907 to 21 December 1908.)

No. 2308 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act of 1888, the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2), of the said Act the

exclusive privilege of making, selling, and using the said inventions in British India, and of authorizing others so to do, has ceased:—

No. 256 of 1902.—A. H. Martin. *A special interlocking device for securing the safety of conveyances in transit by rail from one station to another.* (Specification filed 16 March 1903.)

No. 346 of 1902.—Henry Lawrence Dingwall Fordyce. *Improvements in the construction of boxes or the like, and the method of securing and fastening the same.* (Specification filed 17 March 1903.)

No. 351 of 1902.—Frederick William Stroudley. *Improvements in stays for fire boxes in locomotive, marine and other boilers.* (Specification filed 17 March 1903.)

Fee in respect of the continuance of an exclusive privilege—

4 (a) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of Rs 50 for each of the above inventions.

No. 405 of 1896.—Samuel Cleland Davidson. *Improvements in machines for packing tea or other substances.* (Specification filed 17 March 1897.)

Fee in respect of the continuance of an exclusive privilege—

4 (g) After the expiration of the ninth year and before the expiration of the tenth year from the date of filing of the specification—

The sum of Rs 100 for the above invention.

NOTICES.

All communications relating to applications for leave to file specifications and for registration of designs under the Inventions and Designs Act, 1888 (V of 1888), or in continuation of such applications, should be addressed to the Patents Secretary, 2, Bankshall Street, Calcutta.

The Office of the Secretary under the Inventions and Designs Act, 1888, will in future be open for the transaction of business from 11 A.M. to 3 P.M. on all days, except Sundays and gazetted holidays.

The Government of India are advised that, as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash and applicants are warned that they must be responsible for any delay in cashing cheques.

Cheques and money orders will only be accepted if made payable at Calcutta to the Secretary under the Inventions and Designs Act.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's Office are now on sale to the public at one anna and eight annas a copy, respectively. Consolidated indexes for 1905 and for 1906, entitled "Inventions and Designs," are also on sale, price one rupee each. They contain a chronological list, subject-matter and name indexes of exclusive privileges for inventions, which have been obtained or applied for in the year, together with lists of designs applications.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitors' room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified: or, if the 10th day is a holiday, till the evening of the office day next following.

At the time of delivering or sending an application for leave to file a specification, the applicant shall cause a duplicate copy of the application to be delivered or sent therewith to the Secretary.

The Inventions and Designs Act (V of 1888), with the notifications and rules issued under its provisions and the notices of the office of Inventions and Designs, to which is added an explanatory memorandum for the guidance of persons applying for protection of Inventions and Designs. Royal 8vo volumes, paper cover, 13 annas *or 1s. 1d. Postage extra. To be had of the Superintendent, Government Printing, 8, Hastings Street, Calcutta, or of the Superintendent, Patents Branch, Department of Commerce and Industry, 2, Bankshall Street, Calcutta.

H. G. GRAVES,

Secretary under the Inventions and
Designs Act, V of 1888.

SULPHATE OF QUININE AND SULPHATE OF CINCHONIDINE.

Manufactured at the Bengal Government Cinchona Plantation.

These articles are guaranteed to be free from wilful admixture with other Cinchona Alkaloids. Quinine is for sale only to Government officers. Cinchonidine is for sale to Government officers and to dealers. Both Quinine and Cinchonidine are for sale for cash only and may be obtained from the Superintendent, Royal Botanic Garden, Sibpur, near Calcutta.

The rates from 1st April 1907 are as follows:—

| | | | | <i>To Government officers.</i> | | | Post-free. | | |

GOVERNMENT OF BENGAL—RAILWAY DEPARTMENT.

NOTIFICATION.

Calcutta, the 20th June 1907.

No. 8-R.—The following agreement executed under the provisions of section 41 of Act I of 1894 between the Secretary of State and the Nilgiri Granite and Stone Company Limited for the acquisition of land required for the Balasore-Nilgiri Tramway is published for general information.

MEMORANDUM OF AGREEMENT made this eleventh day of June 1907 BETWEEN THE NILGIRI GRANITE AND STONE COMPANY LIMITED a Company incorporated under the Indian Companies Act 1882 and having its registered office at No. 1 Lall Bazar Street in the town of Calcutta (hereinafter called the Company) of the one part and THE SECRETARY OF STATE FOR INDIA IN COUNCIL (hereinafter called the Secretary of State) of the other part.

WHEREAS upon the application of the Company the Government of Bengal has consented to take up or acquire on behalf of the Company under the provisions of Act No. 1 of 1894 of the Governor General of India in Council for the purpose of the construction of a tramway from Balasore Railway Station Orissa to Nilgiri in the Nilgiri Estate the piece or parcel of land containing 36 acres 66 dhooors or thereabouts situate in the villages of Sovarampur, Angargaria, Samalpur, Sarawatipur, Bampuda, Sutai, Barghai, Barchikhunta, Jagallaputna, Somnathpur, Khoprapada, Paharpur, Armala, Barhuan and Bimbiria, Parganas Sunhat, Armala and Mukhura Zilla Balasore and more particularly described in the five *plans* hereto annexed it having been shewn to the satisfaction of the said Government of Bengal that the proposed acquisition for the purpose aforesaid is likely to prove useful to the public.

AND WHEREAS the said Government of Bengal has required the Company under the provisions of section 41 of the above mentioned Act to enter into the agreement with the Secretary of State hereinafter contained NOW THESE PRESENT WITNESS that it is hereby agreed and declared as follows :—

1. The Company shall pay to the said Government of Bengal before the hereinbefore described piece or parcel of land is transferred to the Company the cost of the same and also all costs of the acquisition inclusive of all payments and allowances in respect thereof payable under the provisions of the said Act.

2. Upon such payment by the Company the Secretary of State shall execute and do all such acts deeds matters and things as may be necessary or proper for effectually vesting the said piece or parcel of land in the Company.

3. The said piece or parcel of land shall be held by the Company solely for the purposes of such a tramway as is hereinbefore mentioned and for no other purpose whatsoever.

4. The said tramway shall be completed and fully equipped in all respects ready for use within two years from the date when the said piece or parcel of land shall have been transferred to the Company.

5. If at any time after the said tramway shall have been completed as aforesaid the Company shall cease to work the same for a period of two consecutive years then and in such case Government shall be at liberty to take possession of the said piece or parcel

of land and on taking such possession shall be at liberty either to sell or otherwise deal with the same or any part or parts thereof as they may think proper and any sum or sums received by Government on any such sale or dealing as aforesaid shall after deducting all expenses incurred by them in connection with any such sale or other dealing be paid to the Company.

6. The public shall have no right and the Company will not permit them to use the said tramway unless or until the same shall be made subject to the provisions of the Indian Railways Act or any statutory modification or re-enactment thereof for the time being in force and unless or until the Company shall obtain the necessary powers to carry passengers and goods other than their servants and their own property.

IN WITNESS whereof the Nilgiri Granite and Stone Company Limited has hereto caused its common seal to be affixed and the Secretary of State for India in Council hath hereunto set his hand and seal the day and year first written.

The common seal of the abovenamed Nilgiri Granite and Stone Company Limited was hereto affixed in the presence of

N. N. BLOMEFIELD,
Solicitor, Calcutta.

MOLL, SCHUTTE & Co.,
Managing Agents.

Signed sealed and delivered by W. A. Inglis, Esq., Secretary to the Government of Bengal in the Railway Branch for the Honourable the Lieutenant-Governor of Bengal acting in the premises for and on behalf of the Secretary of State for India in Council in the presence of

W. A. INGLIS.

G. E. JOHNSON,
Head Assistant, Railway Branch,
Public Works Department, Bengal.

W. A. INGLIS,
Secretary to the Government of Bengal.

Peshawar, the 18th June 1907.

No. 2982.—Whereas the authorities of the Cantonment of Bannu, with the sanction of the Government of India, have agreed with the Committee of the Municipality of Edwardesabad that the same octroi limits, shall be established for the Cantonments and the Municipality, and that the net octroi receipts, *viz.*, gross octroi receipts (less cost of collection and, refunds), shall be divided between the Cantonment Fund and the Municipal Fund; and whereas the following bye-law has been framed by the Municipal Committee of Edwardesabad under the provisions of section 143, clause (3), of the Punjab Municipal Act, XX of 1861, and has been confirmed by the Chief Commissioner under section 146 (1) of the said Act, the said bye-law is published for general information. The bye-law will come into force from the 1st July 1907.

BYE-LAW.

The octroi limits for the purpose of collecting the octroi tax within the limits of the Edwardesabad Municipality and the Bannu Cantonment shall be the following:—

From Haved gate of city following city wall east to south-east corner of city *Eas* thence still following city wall to north corner of Cattle Mandi on Dera Ismail Khan road; from there following Dera Ismail Khan road to as far as east corner of the Cattle Mandi, thence including Serai Bogha Ram to Police Station on Dera Ismail Khan road, from there to east corner of Wasu Ram Serai and on to north corner of Lal Chand Serai on the Vial Mandan. Cross Vial to point where enclosure wall of Sobha Shah's well joins south wall of Jail, thence along south wall of Jail to Dera Ismail Khan road, thence due north to junction of Dera Ismail Khan and Tochi roads (Stone No. F. Z. 11), thence eastwards to boundary pillar No. 64, thence all round Cantonments following the boundary pillars to No. 33 in north *No* corner of Cantonments, thence still following boundary pillars as far as Cavalry Butts, thence following road running south-east past Cavalry lines as far as south-east corner of Post Office compound, thence following road along south-east side of public garden to boundary pillar No. 8 at west corner of *We* Polo ground, thence south along Katchery gate road up to north-east corner of Serai Shah Jahan, from there west along north enclosure wall of Serai Shah Jahan and Waziri Mandi to north-west corner of Hathi Khel Serai, following Serai along its western enclosure wall to north-west corner of Tochi Serai, thence line will join with the city wall and follow it as far as Mirian gate. From there the line follows the city wall from Mirian gate *Sou* round as far as Des Raj Serai including this Serai, and complete the circle at Haved gate.

E. INGLIS,

Offg. Revenue and Financial Secretary to Chief
Commissioner, N.-W. Frontier Province.

SUPPLEMENT TO

The Gazette of India.

No. 26.]

CALCUTTA, SATURDAY, JUNE 29, 1907.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.
